Viva CalleSJ (Sunday, September 17):

The City of San Jose's Department of Parks, Recreation, and Neighborhood Services (PRNS) has officially announced that the Viva Calle SJ program, which started in 2015 and brought over 35,000 residents out to walk, bike, skate, and play, is officially back for its third year. Due to the success of the event, we are proud to announce this year's event will visit Japantown, Roosevelt Park, Mexican Heritage Plaza, Alum Rock Village, and Lake Cunningham Park.

The event takes place September 17, 2017 at 10:00 am and ends at 3:00 pm. San Jose Police will be on hand to control traffic and pedestrian movements through predetermined intersections. Attached is a map of the planned route with the controlled intersections for cross traffic. Additional information on the event can be found at: <http://vivacallesj.org/>

St. John Multi-Modal (Project Update):

Since our last report on the project in July, the St. John Multi-Modal project (from N. Almaden Blvd to Terraine St.) has widened the sidewalks, installed new wheel chair ramps, completed landscaping, installed new ornamental street lights and applied a microsurface pavement treatment to the roadway. The last item of work is installing striping and signage along the project limits. The contractor (Redgwick Construction Co.) will be installing striping on the newly treated roadway between September 11-15 during the hours of 8:00 am and 4:00 pm. An important item to note is that St. John St. from N. Almaden Blvd, underneath the overpass, and up to Carlisle St. will be re-striped permanently to allow two-way travel (refer to attached plan sheet).

St. John Bike/Pedestrian Improv. (Project

St. John St. between N. San Pedro St. and Market St. is open! However, there is a restricted right turn onto St. John St. for vehicles driving southbound on Market St. for the time being. The contractor (Graniterock) has installed sidewalks on the north and south sides of St. John St. A new traffic signal at the intersection of St. John St. and Market St. needs to be installed and activated to remove the existing traffic signal and the island it sits on at this intersection. Once the activation date is scheduled, notifications will be sent to businesses and residents in the area. Graniterock has started working on the portion of St. John St. bounded by Market St. & 1st St. To complete the project, the sidewalk on the north side will be closed and one through lane will remain open in both directions of traffic. Once the improvements on the north side are completed, Graniterock will move to the south side and begin construction. Estimated completion is mid-October.

Downtown San José Construction Brief

A monthly update on active construction projects in Downtown San José that affect public streets
