Young Adults: Building Safety Careers

Home Owners: Earthquake Safety Retrofits

May 10, 2017 6:00-8:00 p.m. | City Hall Rotunda | 200 E. Santa Clara St., San José

Learn about careers in building safety

Get tips on making your home earthquake ready

Photo by Joe Pugliese / Los Angeles Times

Do buildings and construction interest you? Learn about unique and rewarding careers in the building safety industry.

Earthquake retrofits help protect your loved ones and your home.

For more details visit www.sanjoseca.gov/building

Talk to City of San José Building Safety Professionals

- For young adults, high school or college students who are interested in buildings and construction, learn about the different careers in permitting, plan review, and inspection from our experts.
- Learn how you can prepare your home for an earthquake with retrofit designs.

Learn about...

- What a Soft Story is and how Soft Story seismic retrofits are performed
- How to brace and bolt a crawl space to minimize earthquake damage
- What green tags, yellow tags, and red tags mean
- How to determine if your home is in a Geohazard Zone
- Planning an earthquake evacuation plan for you and your loved ones
- How to properly dispose of debris after an earthquake
- Preventing natural gas and electrical hazards during an earthquake

This event is brought to you by the Building Division of the Planning, Building & Code Enforcement Department, with our partners in the Public Works Department, Fire Department, and Environmental Services Department.

VALIDATED PARKING

Use entrance on 6th St. to park under the City Hall Tower. Bring your parking stub to the event for validation. The garage closes at 8:30 p.m.
