Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Introduction

The Norman Y. Mineta San José International Airport's (SJC) 2008-2012 Adopted Capital Improvement Program (CIP) totals \$1.6 billion and consists of over 51 capital projects. On June 13, 2006, the City Council amended the Airport Master Plan. This budget is reflective of those revisions as well as the Airport's vision statement, which sets forth goals to provide the best service to its customers, community, and business partners.

This program is part of the Transportation and Aviation Services City Service Area (CSA) and supports the following outcomes: *Provide Safe and Secure Transportation Systems; Provide Viable Transportation Choices that Promote a Strong Economy; Travelers have a Positive, Reliable, and Efficient Experience; Preserve and Improve Transportation Assets and Facilities; and Provide a Transportation System that Enhances Community Livability.*

The Adopted 2008-2012 CIP represents the capital projects that result from the revised Airport Master Plan that was approved by City Council. Two of these projects include the completion of the North Concourse Building and the implementation of the new Terminal Area Improvement Program (TAIP), Phase I project. The TAIP, Phase I project actually consists of several smaller projects including: Terminal A improvements, Terminal B – phase one, the demolition of Terminal C, and various roadway projects. The design-build contract for the TAIP was awarded in October 2006 to Hensel Phelps, therefore, work on this project is underway. The timing of the second phase of the TAIP, though programmed in this CIP, will actually be determined by passenger demand in the future years. In order to hold

costs to a level determined by available resources, the start of construction of the Public Parking Garage included in the prior CIP has been deferred.

Program Priorities and Objectives

The 2008-2012 Adopted CIP for the Airport is consistent with the priorities and objectives set out for the Transportation and Aviation Services CSA. The Transportation and Aviation Services CSA has identified the following strategic priorities for the Airport for 2007-2008:

- Ensure the Airport is Safe and Secure
- Meet or Exceed Regulatory Compliance
- Neighborhood and Business Outreach
- Implementation of the Airport's CIP
- Improve Customer Service Delivery
- Maintain Reasonable Airline Rates and Charges
- Increase Air Service
- Ensure the Airport is Considered a "Good Neighbor"
- Value Employee Resources

The Adopted CIP includes other projects in addition to those already mentioned, such as the construction of a Consolidated Rental Car Facility, Airfield improvements, Public Art, and numerous terminal and tenant improvements.

Two projects, South Apron Replacement and the Aircraft Rescue and Fire Fighting (ARFF) Facility Upgrade, are budgeted, but their completion is contingent upon receiving grant funding requested from the Federal Aviation Administration (FAA). Modifications to, or replacement of, the Belly-Freight Facility and

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Program Priorities and Objectives (Cont'd.)

the full reconstruction of the West Side Airfield is still under review to determine if the projects are necessary and whether funding needs to be identified; the funding programmed completes the feasibility studies for both projects.

Sources of Funding

In the 2008-2012 Adopted CIP, funding sources for Airport capital projects consist of the following:

- \$624.0 million from fund balance;
- \$120.9 million from Passenger Facility Charges (PFC's);
- \$20.0 million in transfers from Airport Operating Funds;
- \$20.4 million from interest earnings;
- \$30.8 million in Airport Improvement Program (AIP) Grants;
- \$795.6 million from bond proceeds (reflected as a transfer from Airport Fiscal Agent Fund); and,
- \$962,000 from Tenant/Miscellaneous Reimbursements
- \$13.0 million in Commercial Paper Proceeds

While the outlook for passenger growth over the period of this CIP still appears favorable, actual current activity is tracking slightly below prior year levels. As a result, PFC revenue, which is driven by enplanement activity at the Airport, is anticipated to increase at a very modest rate (2.5%) during the next fiscal year.

Transfers from Airport operating funds are budgeted to reflect a decrease from the 2007-2011 Adopted CIP in order to maintain reasonable airline rates and charges.

The federal Airport Improvement Program (AIP) grants administered by the FAA represent both secured funds for which a letter of intent (LOI) or grant agreement are in place, as well as grants that have been requested but not yet secured. As a result, completion of projects programmed to be funded with grant revenue that is not yet secured by the City will be contingent upon the award of the grants. The Airport continues to actively pursue additional grant opportunities as well in order to offset the costs of this CIP.

A significant portion, or approximately 55%, of the Airport's CIP relies on the issuance of long-term debt for funding. Repayment of Airport debt is typically made from PFC's, AIP grants, Customer Facility Charges (CFC's), and airline rates and charges. The long-term debt as programmed in this CIP also reflects the financial model developed by Ricondo & Associates. As progress continues with the construction of the CIP, the Airport will partner with the design-builder, Hensel Phelps, with the understanding that reprogramming of funding due to changing fiscal circumstances in the out-years of the CIP may be necessary.

Program Highlights

Airport Master Plan

The Airport has and will continue to provide a significant benefit to the local construction economy through the development of the

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

Airport Master Plan (Cont'd.)

Airport Master Plan by spurring construction spending. The CIP anticipates significant future construction spending on projects included in the Terminal Area Improvement, Phase 1, the Consolidated Rental Car Garage, and continuation of construction on the North Concourse Building (revised completion date fall 2008). This is in addition to the other major Master Plan projects already completed, including the reconstruction and extension of Runways 30R and 30L, the Cargo Ramp Security and Taxiway Improvement project, the construction of the International Arrivals Facility, the North Concourse Site Preparation and Excavation (North Concourse Building, Package 1), the Terminal C Apron Lighting project, and the Renzel Airfield Improvements project, along with numerous tenant improvements throughout the terminals.

Airfield Facilities

This Adopted CIP allocates \$42.9 million towards projects that will improve airfield infrastructure to accommodate the demands for air carrier and general aviation operations and safety. Airfield improvement projects include the following:

- \$21.0 million is included for the West Side Airfield Reconstruction project, which includes an asphalt overlay of approximately 121,000 square feet on portions of Taxiways V and C; project completion will be based on a project study; and

- \$15.5 million for the first portion of the South Apron Replacement project, which will replace the south apron that supports 11 gate positions adjacent to the new Terminal B and is also contingent upon the receipt of grants.

Other airfield projects are also programmed to provide funding for a new airfield lighting control system, demolition work, and various other compliance projects.

Aviation Support - Environmental

A total of \$19.4 million is programmed in this CIP to continue to fund the acoustical treatment of homes in the 65 decibel Community Noise Equivalent Level (CNEL) noise contour as well as to complete some fuel related projects. The current CIP includes the following projects:

- \$9.1 million is included for treatment of eligible dwellings within the projected 2006 Noise Exposure Map, which was approved by the Federal Aviation Administration in September 2002, as well as the City's updated 2010 65 decibel CNEL contour projection.
- \$7.4 million is proposed for the clean-up of the existing fuel farm as an interim step to the construction of the new fuel farm to be completed by a third party; and

Other funding is programmed to provide for testing of homes to determine eligibility of treatment, fuel storage tank repairs, and environmental audits.

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

Aviation Support Facilities – General

The Adopted CIP provides \$40.5 million to fund various new infrastructure improvements and to renovate, maintain, or upgrade existing facilities. The current CIP includes the following projects:

- \$14.0 million is programmed for the Belly-Freight Facility project which will fund the design and construction of a modified or replacement airline belly freight facility on the east side of the Airport if it is determined to be necessary;
- \$10.4 million for the Aircraft Rescue and Fire Fighting (ARFF) Facility Upgrade project, which funds the design and construction of an upgraded ARFF facility on the east side of the Airport subject to receipt of grant funding; and
- \$4.6 million for Public Art, which provides funding for public art associated with eligible Airport capital construction projects.

Other minor projects are programmed to provide for replacement of equipment, land improvements, and Airport signage design and production.

Aviation Support Facilities – Parking

In the Adopted CIP, a total of \$148.8 million is allocated for parking upgrades and for construction of parking facilities. Specific projects include the following:

- \$116.6 million for a Consolidated Rental Car Facility, which will complete design and construction on a multi-level, consolidated rental car facility including a quick turn-around facility for washing, fueling, and minor servicing of rental cars; and
- \$11.1 million for Public Parking Improvements, which will provide funds for the design and construction of a public parking lot on the Green Island, once vacated by the rental car facilities.

Due to the continued high escalation of costs in the construction market, the design-builder (Hensel Phelps) has recommended a deferral of the construction of the Public Parking Garage until such time as the true impacts of escalation can be determined. Other parking-related projects are programmed, however, and include the replacement of the joint gasket in the Terminal A Garage, as well as the refurbishment of shuttle bus shelters and cashiering booths.

Aviation Support Facilities – Transportation

In the Adopted CIP, a total of \$1.7 million is allocated for various transportation-related maintenance and upgrade projects. Specific projects include the following:

- \$464,000 for the Pavement Maintenance appropriation, which funds the reconstruction of asphalt and concrete pavement at various locations throughout the Airport to meet airfield and roadway safety requirements; and

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

Aviation Support Facilities – Transportation (Cont'd.)

- \$457,000 is programmed for a bicycle/pedestrian path which will run from the Green Island traffic signal to Terminal A on the west side of Airport Blvd. and Terminal Dr.

A study on how the Automated People Mover System (APM) will interface with the Airport and the Terminal Area Improvement, Phase I has been completed. Further study on how the APM will interface with Bay Area Rapid Transit (BART) will be completed by the Department of Transportation and Valley Transportation Authority as part of the design of the BART system.

Passenger Terminal Facilities

In the Adopted CIP, a total of \$774.8 million is allocated for Passenger Terminal Facilities. Specific projects include the following:

- \$501.6 million for the portion of the Terminal Area Improvement, Phase I appropriation falling within the 5-year CIP, which provides funding for a number of projects that will be completed under the Measure D, design-build process; and
- \$230.1 million is programmed for the initial portion of the Terminal Area Improvement, Phase II appropriation, which includes a number of demand-driven projects to be completed by 2017;

Other terminal-related projects are programmed to provide for annual maintenance and upgrades as well as tenant improvements.

Major Changes from the 2007-2011 Adopted CIP

The 2008-2012 Airport CIP reflects the significant revisions which have been made to the implementation of the Airport Master Plan during the past year. In September 2005, City staff, airline representatives, and industry consultants met to discuss and develop strategies to better align development at the Airport with current economic assumptions. As a result, City Council approved in June 2006 the revised Airport Master Plan, based in part on the work of the Airport's financial consultant, Ricondo & Associates, which recognized that air passenger demand originally projected for 2010 would likely not be achieved until 2017 and in order to maintain reasonable rates and charges, the Master Plan would need to be limited to \$1.2 – \$1.5 billion.

The major changes from the 2007-2011 Adopted CIP include the following:

- A new project titled Airfield Lighting Control and Taxiway V Lighting System (\$1.3 million), which provides for the replacement of the airfield lighting control system, including regulator control boards and dedicated computers and software;
- Restroom Renovations at Terminal A – All Locations has been incorporated into the Terminal Area Improvement, Phase I projects;

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Overview

Major Changes from the 2007-2011 Adopted CIP (Cont'd.)

- The Terminal A Door Replacement project now includes replacement of doors in Terminal C as well as Terminal A and has been incorporated into the Terminal Building Modifications appropriation to better reflect the work being completed; and
- The addition of funding (\$152.7 million) to the Terminal Area Improvement, Phase I appropriation for terminal equity improvements and airline tenant office space as approved by the airlines.

Operating Budget Impact

A total of three projects in the 2008-2012 Adopted CIP are estimated to have an impact on the operating budget, which is fully supported by the Airport Maintenance and Operations Fund and consistent with the Airport's financial model completed by Ricondo & Associates. The following table shows the net impact of these projects. All projects anticipated to be operational in 2007-2008 are addressed in the 2007-2008 Adopted Operating Budget. Additional detail on the individual projects with operating budget impacts is provided in Chart A at the conclusion of this overview and in the Project Detail Pages.

Net Operating Budget Impact Summary (000's)

	2008-2009	2009-2010	2010-2011	2011-2012
Airport Capital Projects	<u>\$3,737,000</u>	<u>\$12,418,000</u>	<u>\$13,039,000</u>	<u>\$13,693,000</u>
Total	\$3,737,000	\$12,418,000	\$13,039,000	\$13,693,000

Note: The estimated operating costs have been provided by the Airport Department and have not yet been fully analyzed by the Budget Office. That analysis may well result in different costs when the actual budget for the year in question is formulated.

Council-Approved Revisions to the Proposed Capital Improvement Program

During the June budget hearings, the City Council approved several changes to the Proposed Capital Improvement Program. The rebudgeting of \$192.7 million of unexpended funds for 50 projects was approved along with a rebudget of commercial paper proceeds in the amount of \$13.0 million associated with the FMC Site Reuse Preparation. In addition, the City Council approved the augmentation of

funding in the FIS 3rd Floor Lounge Build-Out project (\$56,000) to cover the cost of this project's construction contingency.

Funding was also added (\$450,000) to establish the International Garbage Sterilization project, which funds the design and construction of an international flight garbage sterilization system that was formerly managed by an outside vendor. City Council also approved the shift of funding from the Land Improvements project to the Fuel Storage Tank Repairs project (\$39,000) to better align staff work efforts.

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Detail of Capital Projects

1. ACM Demolition

CSA: Transportation & Aviation Services **Initial Start Date:** 1st Qtr. 2008
CSA Outcome: Provide a Transportation System that Enhances **Revised Start Date:**
 Community Livability **Initial Completion Date:** 4th Qtr. 2009
Department: Airport **Revised Completion Date:**
Council District: 3
Location: Norman Y. Mineta San José International Airport

Description: This project funds the design, demolition, and site restoration of the ACM Aviation leasehold for future Airport development. Clearance of the site is part of the approved Airport Master Plan. If the ACM Aviation site is needed for reuse, an amendment to the Master Plan will be brought forward for Council approval at the time of the construction award.

Justification: The ACM Aviation leasehold currently conflicts with future roadway alignments. In order to allow for construction of the roadway, the ACM property must be reconfigured.

3. Airfield Lighting Control and Taxiway V Lighting System

CSA:	Transportation & Aviation Services	Initial Start Date:	3rd Qtr. 2007
CSA Outcome:	Provide Safe and Secure Transportation Systems	Revised Start Date:	
Department:	Airport	Initial Completion Date:	2nd Qtr. 2009
Council District:	3	Revised Completion Date:	
Location:	Norman Y. Mineta San José International Airport		

Description: This project funds the replacement of the airfield lighting control system, which includes regulator control boards, dedicated computers and software, and an industrial grade programmable logic controller. It also includes the reconstruction of taxiway shoulders, replacement of failed conduit, conductors, and lighting fixtures for Taxiway Victor.

Justification: The equipment is obsolete, not compatible with current technology, and replacement parts are becoming unattainable.

4. Runway Guard Light Replacement

CSA: Transportation & Aviation Services **Initial Start Date:** 4th Qtr. 2006
CSA Outcome: Provide Safe and Secure Transportation Systems **Revised Start Date:**
Department: Airport **Initial Completion Date:** 4th Qtr. 2008
Council District: 3 **Revised Completion Date:**
Location: Norman Y. Mineta San José International Airport

Description: This project funds the design and replacement of the in-pavement runway guard lights.

Justification: This project improves operational safety and efficiency. The existing runway guard lights are difficult to maintain, spare parts are difficult to obtain, and this project will replace the lamp-out monitoring feature, which does not work.

5. Taxiway Y Reconstruction

CSA: Transportation & Aviation Services **Initial Start Date:** 3rd Qtr. 2002
CSA Outcome: Provide Safe and Secure Transportation Systems **Revised Start Date:**
Department: Airport **Initial Completion Date:** 2nd Qtr. 2007
Council District: 3 **Revised Completion Date:** 4th Qtr. 2007
Location: Norman Y. Mineta San José International Airport

Description: This project funds the reconstruction of Taxiway Y, between Taxiways B and L, to design group IV standards (Airport Master Plan Project A-29). It includes the reconstruction of the existing taxiway and the strengthening of intersections at cross taxiways, including the widening of Taxiway L. This project is envisioned to be a multi-phase project to accommodate the operational needs of the Airport.

Justification: Taxiway Y is the primary north-south taxiway used by all air carriers to go from the terminal to the runways. It was designed and built approximately 40 years ago and is at the end of its useful life. The new taxiway will be built to current FAA standards and will provide very durable pavement sufficient to support aircraft operations referenced in the Airport Master Plan.

6. Taxiway Z Alignment

CSA: Transportation & Aviation Services **Initial Start Date:** 3rd Qtr. 2004
CSA Outcome: Provide a Transportation System that Enhances Community Livability **Revised Start Date:** 4th Qtr. 2004
Department: Airport **Initial Completion Date:** 2nd Qtr. 2006
Council District: 3 **Revised Completion Date:** 4th Qtr. 2007
Location: Norman Y Mineta San José International Airport

Description: This project funds the design and construction of the realignment of a portion of Taxiway Z, ten feet to the west from Taxiway G to L. This project was completed in concert with the Taxiway Y Reconstruction project (these two projects combined to make the Renzel Airfield Improvements project).

Justification: Taxiway Z needs to be widened to allow larger aircraft parked at Terminal A to use this taxiway, thereby improving operational flexibility.

7. West Side Airfield Reconstruction

CSA: Transportation & Aviation Services **Initial Start Date:** 4th Qtr. 2005
CSA Outcome: Provide Safe and Secure Transportation Systems **Revised Start Date:**
Department: Airport **Initial Completion Date:** 2nd Qtr. 2008
Council District: 3 **Revised Completion Date:** 2nd Qtr. 2010
Location: Norman Y. Mineta San José International Airport

Description: This project funds the design and construction of an asphalt overlay of approximately 121,000 square feet on portions of Taxiways V and C. Funding in 2009-2010 represents reconstruction of the west side airfield to construct portions of the future Taxiway W extension. Timing of this work is dependent on the implementation of cargo facilities on the west side of the Airport.

Justification: In order to support safe and efficient aircraft operations for fix based operators, reconstructive work is required on several west side taxiways.

ANNUAL OPERATING BUDGET IMPACT (000'S)

None

Major Changes in Project Cost:

2002-2006 CIP, 2003-2007 CIP, 2004-2008 CIP and 2005-2009 CIP - Decreases of \$968,000 and \$365,000, increase of \$3.3 million and decrease of \$1.4 million respectively. All changes represent project scope changes driven by the airline consortium that have caused total project budgets to fluctuate since project inception.

2006-2010 CIP - Decrease of \$987,000 since the project's budget no longer includes funding provided by the consortium of airlines.

Notes:

This project was previously titled "Fuel Farm Review", and then "New Fuel Farm Review" (retitled in the 2005-2009 CIP). The initial start date corresponds to the original plan to have a consortium of airlines implement the project. The revised start date reflects Airport's negotiations to coordinate the construction of this project by a third party.

Airport Capital Program

2008-2012 Adopted Capital Improvement Program

Detail of Capital Projects

13. Noise Attenuation Testing - Category III

CSA:	Transportation & Aviation Services	Initial Start Date:	Ongoing
CSA Outcome:	Provide a Transportation System that Enhances Community Livability	Revised Start Date:	
Department:	Airport	Initial Completion Date:	Ongoing
Council District:	City-wide	Revised Completion Date:	
Location:	Various		

Description: This allocation provides funding to perform requested acoustical tests of dwellings in the projected 60 to 63.5 decibel Community Noise Equivalent Level (CNEL) noise contour area. If the interior noise level of a residence within this area exceeds the 45 CNEL level identified by the California Noise Standard, the Airport is required to provide acoustical treatment. Residences that are eligible for treatment have been identified as the "Category III Treatment Area."

Justification: The City Municipal Code requires the Airport to offer acoustical testing for residences outside the Category I and II treatment areas, but within the projected 60 to 63.5 decibel CNEL noise contour.

Detail of Capital Projects

14. Noise Attenuation Treatment - Category IB

CSA:	Transportation & Aviation Services	Initial Start Date:	Ongoing
CSA Outcome:	Provide a Transportation System that Enhances Community Livability	Revised Start Date:	
Department:	Airport	Initial Completion Date:	Ongoing
Council District:	City-wide	Revised Completion Date:	
Location:	Various		

Description: This allocation constructs noise attenuation improvements at various residential dwellings located within the updated 65 decibel Community Noise Equivalent Level (CNEL) projected noise contour as presented to Council on June 19, 2001. The 65 decibel CNEL is the accepted level of aircraft noise for persons living within the vicinity of airports, identified by the California Noise Standard. Residences that fall within this 65 CNEL boundary have been identified as the "Category IB Expanded Treatment Area."

Justification: The Noise Attenuation Treatment Program is a mitigation measure required by the Airport Master Plan Environmental Impact Report (EIR) and City Municipal Code.

15. Noise Attenuation Treatment - Category II/III

CSA:	Transportation & Aviation Services	Initial Start Date:	Ongoing
CSA Outcome:	Provide a Transportation System that Enhances Community Livability	Revised Start Date:	
Department:	Airport	Initial Completion Date:	Ongoing
Council District:	City-wide	Revised Completion Date:	
Location:	Various		

Description: This allocation provides for the construction of noise attenuation improvements at various residential dwellings and schools within the projected 60 to 65 decibel Community Noise Equivalent Level (CNEL) area. Pursuant to the Airport Master Plan Supplemental Environmental Impact Report (EIR), residences within the projected 63.5 to 65 CNEL are generally eligible for acoustical treatment (Cat. II), and residences within the projected 60 to 63.5 CNEL can request testing (Cat. III). The California State Noise Standard requires that the Airport reduce non-compatible land use if the interior noise level exceeds the 45 CNEL.

Justification: The Noise Attenuation Category II program is a required Airport Master Plan EIR mitigation measure. The Category III program is required by the City Municipal Code.

16. Noise Monitoring Units

CSA: Transportation & Aviation Services **Initial Start Date:** 3rd Qtr. 2004
CSA Outcome: Provide a Transportation System that Enhances **Revised Start Date:**
 Community Livability **Initial Completion Date:** 2nd Qtr. 2007
Department: Airport **Revised Completion Date:** 4th Qtr. 2007
Council District: City-wide
Location: Various

Description: Remote monitoring site upgrades are required for the 15 sites with remote noise monitoring devices as well as the four spare devices currently in use.

Justification: The replacement of remote monitoring units with new Environmental Monitoring Units (EMU) takes advantage of upgraded transmission technology, advanced noise metrics, and seamlessly interfaces with the new PC-version noise monitoring system.

20. Belly-Freight Facility

CSA: Transportation & Aviation Services **Initial Start Date:** 1st Qtr. 2008
CSA Outcome: Provide a Transportation System that Enhances **Revised Start Date:**
Community Livability **Initial Completion Date:** 2nd Qtr. 2010
Department: Airport **Revised Completion Date:**
Council District: 3
Location: Norman Y. Mineta San José International Airport

Description: This project funds the design and construction of a new airline belly freight facility on the east side of the Airport. The exact location will be determined as part of the feasibility effort. An amendment to the Airport Master Plan, if needed for the selected location, will be brought forward for Council approval at the time of construction award.

Justification: The existing belly freight facility impacts both the construction of Terminal B and the ultimate roadway configuration. A replacement facility is required to be located away from the Terminal area.

Department: Airport **Revised Completion Date:**
Council District: 3
Location: Norman Y. Mineta San José International Airport

Description: This allocation funds minor land improvements, including utility extension, curbs, gutters, driveways, and site improvement projects.

Justification: Ongoing land improvements of this kind are necessary to maintain both the integrity and operational capability of Airport property.

Major Changes in Project Cost:

2004-2008 CIP and 2005-2009 CIP - Increase of \$14.2 million and decrease of \$10.9 million respectively. Both changes represent only an estimate of those potential projects implementing public art at Airport facilities based on the size of the eligible construction budget. Costs have now been more closely aligned with the forthcoming projects.
 2007-2011 CIP - Increase of \$2.2 million to reflect the addition of the Terminal Area Improvement, Phase I project.

None

Major Changes in Project Cost:

2007-2011 CIP - Decrease of \$23.9 million since this project was rescope to coincide with the rephased Airport Master Plan approved by Council in November 2005. As a result, the total project costs were decreased to \$131.9 million.

Notes:

This project's design efforts were formerly programmed as a project titled Rental Car Garage and this project's construction was a combination of several projects titled Public Parking Garage and Central Garage Phases 1 through 3. Since this project's scope has changed and now combines several projects into one due to the rephased Airport Master Plan, the total cost of the project is also quite different. All identified funding for this project has been front-loaded. Unused funding will get rebudgeted until the project's completion. The Airport will use best practices, given the use and program constraints of the structure, when applying Green Building principles during the construction of this facility.

32. FMC Site Reuse Preparation

CSA: Transportation & Aviation Services **Initial Start Date:** 1st Qtr. 2005
CSA Outcome: Provide a Transportation System that Enhances **Revised Start Date:**
Community Livability **Initial Completion Date:** 4th Qtr. 2007
Department: Airport **Revised Completion Date:**
Council District: 3
Location: Norman Y. Mineta San José International Airport

Description: This project provides funding to demolish the existing structures on the 52-acre Airport leasehold and design and construct grading, paving, and utility service improvements for interim relocation of rental car and employee parking facilities and Airport construction staging.

Justification: This project is necessary to facilitate the relocation of planned uses to this site, including the rental car lot and the employee parking lot. Interim reuse of the site will provide expanded Airport facilities, support the City's purchase of the property, and facilitate construction of various Master Plan projects.

ANNUAL OPERATING BUDGET IMPACT (000'S)

Maintenance				825	866	910					
TOTAL				825	866	910					

Major Changes in Project Cost:

2008-2012 CIP - Decrease of \$74.1 million. Due to the continued high escalation cost in the construction market, the design-builder has recommended that the construction of the Public Parking Garage be deferred until such time that the true impacts of escalation can be determined. Therefore the out-year funding for this project has been reduced. It has been agreed upon by the rental car agencies that the first floor of the Rental Car Garage be built for use of public parking.

Notes:

The Airport will use best practices, given the use and program constraints of the structure, when applying green building principles during the construction of this facility.

35. Refurbish/Replacement of Shuttle Bus Shelters

CSA: Transportation & Aviation Services **Initial Start Date:** 3rd Qtr. 2006
CSA Outcome: Travelers Have a Positive, Reliable and Efficient **Revised Start Date:**
Experience **Initial Completion Date:** 2nd Qtr. 2009
Department: Airport **Revised Completion Date:**
Council District: 3
Location: Norman Y. Mineta San José International Airport

Description: This project provides funding for the refurbishment, where possible, of existing shuttle bus shelters located in the Airport's parking facilities and provides for shelter replacements where refurbishment is determined not to be feasible.

Justification: The current bus shelters are in need of repair. Roofs leak, the plexiglass has become aged and hazy, and the shelters do not portray an appealing image. Once shelters have been repaired, Airport customers will be better protected from the weather elements.

37. AVI System Replacement

CSA:	Transportation & Aviation Services	Initial Start Date:	3rd Qtr. 2006
CSA Outcome:	Preserve and Improve Transportation Assets and Facilities	Revised Start Date:	
Department:	Airport	Initial Completion Date:	2nd Qtr. 2007
Council District:	3	Revised Completion Date:	2nd Qtr. 2008
Location:	Norman Y. Mineta San José International Airport		

Description: This project funds the purchase or lease of new hardware and software that will be used for the purpose of tracking, auditing, and invoicing revenue generated from ground transportation activities at the Airport including taxi cab, door-to-door shuttle, off-airport rental car shuttle, and Airport shuttle buses.

Justification: The current Automated Vehicle Identification (AVI) system purchased in 1994 is difficult and arduous to maintain and reporting systems are no longer reliable. The AVI program provides data on parking, ground transportation, road use and access, and, as a result, is a critical revenue collection system.

ANNUAL OPERATING BUDGET IMPACT (000'S)

None

Major Changes in Project Cost:

2005-2009 CIP - Decrease of \$38.5 million since a portion of this project not related to the construction of the North Concourse Building has been eliminated from this project.

Notes:

FY Initiated:	2003-2004	Redevelopment Area:	N/A
Initial Project Budget:	\$49,512,000	SNI Area:	N/A
Appn. #:	4712	USGBC LEED:	N/A

Airport Capital Program
2008-2012 Adopted Capital Improvement Program
Detail of Capital Projects

50. Advanced Planning

CSA: Transportation & Aviation Services **Initial Start Date:** Ongoing
CSA Outcome: Preserve and Improve Transportation Assets and **Revised Start Date:**
 Facilities
Department: Airport **Initial Completion Date:** Ongoing
Council District: 3 **Revised Completion Date:**
Location: Norman Y. Mineta San José International Airport

Description: This allocation funds preliminary planning, programming, and special studies associated with the implementation of the Airport Master Plan program, as well as other studies/surveys as needed.

Justification: Ongoing general planning and environmental impact analysis requires this annual expenditure.

51. Computerized Maintenance Management System

CSA: Transportation & Aviation Services **Initial Start Date:** 3rd Qtr. 2004
CSA Outcome: Preserve and Improve Transportation Assets and **Revised Start Date:** 2nd Qtr. 2007
 Facilities **Initial Completion Date:** 2nd Qtr. 2005
Department: Airport **Revised Completion Date:** 2nd Qtr. 2008
Council District: 3
Location: Norman Y Mineta San José International Airport

Description: This project provides funding for the purchase of a new Computerized Maintenance Management System.

Justification: The new system will replace a current system that is outdated and presents risks of failure and error. The current system requires significant IT support and has size limitations that will only worsen as the Airport grows. The new system will also enable the maintenance division to leverage technologies and improve efficiency.

ANNUAL OPERATING BUDGET IMPACT (000'S)

None

Major Changes in Project Cost:

2006-2010 CIP - Increase of \$220,000 due to the reallocation of resources from the Shared Use Ticket Counter and Gate Use Pilot Program appropriation as the result of project savings. These two projects are being combined to more accurately reflect staff work efforts.

2008-2012 CIP - Increase of \$250,000 to fund the purchase of desktop services, which is an additional component of the Computerized Maintenance Management System.

Notes:
