

**REVISED NOTICE OF AVAILABILITY OF  
A DRAFT ENVIRONMENTAL IMPACT REPORT (EIR)  
AND PUBLIC COMMENT PERIOD**

**\*Comment Period Close Date Extended from October 10, 2019 to November 4, 2019\***

A Draft Environmental Impact Report (DEIR) for the Charcot Avenue Extension is available for review. The City of San José proposes to extend Charcot Avenue from its eastern boundary at Paragon Drive, over Interstate 880 (I-880), to Oakland Road in the North San José area. The proposed two-lane extension is approximately 0.6-mile-long and includes an overcrossing of O’Toole Avenue and I-880 that would be approximately 720 feet in length. Sidewalks and Class IV bikeways are proposed along the extension. In addition, the proposed project includes intersection modifications at Charcot Avenue/Paragon Drive, Charcot Avenue/O’Toole Avenue, Charcot Avenue/Silk Wood Lane, and Charcot Avenue/Oakland Road. The project would require the installation of retaining walls and relocation of existing utilities as necessary, require additional right-of-way from several parcels and easement located along the proposed alignment.

**Location:** The 0.6-mile-long project site is in North San José east of existing Charcot Avenue extending to Oakland Road

**Council District:** 4

**File Nos.:** PP18-044

The proposed project will have potentially significant environmental effects on aesthetics, biological resources, cultural resources, hazardous materials, noise and cumulative noise, and recreation. The California Environmental Quality Act (CEQA) requires this notice to disclose whether any listed toxic sites are present at the project location. The project location is not listed on any State toxic sites databases.

The Draft EIR and documents referenced in the Draft EIR are available for review online at the City of San José’s “Active EIRs” website at [www.sanjoseca.gov/activeeirs](http://www.sanjoseca.gov/activeeirs) and are also available at the following locations:
