APPENDIX VII	Summary Radius Map Report – EDR 6/09/17

Section 1.0 Executive Summary

Pari & Gershon, Inc. (PGI) was retained by Piercy Tower Alpha LLC., to perform a Phase I Environmental Site Assessment (ESA) of a 3.6-net-acres property located at 469 Piercy Road, San Jose, California 95138. This property will be referred to as the “subject site.”

The subject site is currently zoned “Industrial Park” (IP) and is composed of two parcels (APN 678-93-08 and APN 678-93-28).

Figure 1-1 presents the regional site location map. Figure 1-2 presents the general site location map. Figure 1-3 is a copy of the assessor’s parcel map outlining the boundaries of the subject site. Figure 1-4 is a site plan of the property and Figure 1-5 is a 2016 aerial photograph depicting the subject site.

Based on the documents reviewed and as confirmed by Mr. Timothy L. Knea (one of the current property owners), prior to 1970s, the subject property was a Walnut Orchard.

A Grant Deed from Valley Title Company states that the property was granted to Mr. William & Mrs. Teresa Caprista on February 28, 1969 by Mr. John Quaglia and his wife, Ms. Theresa Thelma Quaglia. Mr. & Mrs. Caprista build their residence at this property.

On June 8, 1995, the Deed to the subject site was transferred over to Mr. Timothy L. Knea and Mrs. Tena Caprista Knea, husband and wife, as joint tenants (*North American Company Preliminary Report, June 01, 2017*). Mr. & Mrs. Knea demolished the old residence and began construction of a new house in 1996 which was completed in 2001. To date, the subject site has remained a residential property.

The Phase I ESA was performed in general conformance with American Society for Testing and Materials (ASTM) standard designation E1527-13 with the purpose of identifying recognized environmental conditions¹ at the subject site.

The results of the Phase I ESA were based upon information provided to PGI by the property owner, the current tenant, and other individuals knowledgeable of operations at the site, review of pertinent historical documents, and observations specific to environmental conditions at the subject property made by PGI during a site walkthrough conducted on June 20th, 2017.

The subject site was assessed for potential recognized environmental conditions with respect to hazardous substances, petroleum products, solid waste/non-hazardous waste, polychlorinated biphenyls, asbestos-containing materials, storage tanks, herbicides and pesticides, water, wastewater, stormwater, and lead-based paint.

Based on PGI's site walkthrough, interviews, and review of site-specific information, there are no apparent Recognized Environmental Conditions at the subject site.

This Executive Summary is not intended to be read as a standalone document. The reader should review the detailed information regarding each item in Section 3.0, Site Description, Section 4.0, Records Review, and Section 5.0, Results of Site Reconnaissance, Records Review, and Interviews.

¹As used in ASTM E1527-13, "recognized environmental condition" means the following:

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk or harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013)."

Section 2.0 Introduction

This section describes the purpose of the study and presents the scope of work as well as limitations to the study.

2.1 Purpose

Pari & Gershon, Inc. (PGI) was contracted by Piercy Tower Alpha LLC. to perform a Phase I Environmental Site Assessment (Phase I ESA) for the purpose of identifying recognized environmental conditions associated with the subject site composed of assessor parcel numbers 678-93-008 and 678-93-028 (3.6 acres) with reported address of 469 Piercy Road, San Jose, California 95138

2.2 Scope of Work

The study was performed in general conformity with ASTM Standard Designation E1527-13 (ASTM, 2013).

Work performed for the study consisted of the following tasks:

Records Review — PGI conducted a records review of the subject site and of adjoining and surrounding properties. PGI's records review was consistent with ASTM E1527-13 recommendations and included a review of: (i) relevant information provided by the Client, Piercy Tower Alpha LLC.; (ii) information available from regulatory agency databases; and (iii) regulatory agency files for the site or off site areas if further investigation was required based on information contained in regulatory databases. The records review included both environmental information and site use information.

Site Walkthrough — PGI performed visual observations of the subject site and its adjoining properties. PGI assessed the use, storage, and disposal of hazardous materials and hazardous waste at the subject site. In addition, PGI observed the use, storage, and disposal of hazardous materials and hazardous waste at adjoining property to the extent possible from the subject site.

Interviews — PGI conducted interviews with persons familiar with the subject site and the past and present operation of the parcel and individuals knowledgeable of the site (see Section 5.0, Results of Site Walkthrough, Records Review, and Interviews).

2.3 Limitations and Exceptions of Study

This Phase I ESA has been prepared for Piercy Tower Alpha LLC., according to standard ASTM E1527-13 and is intended to provide an understanding of the recognized environmental conditions at the subject site. The following limitations apply to the study conducted at the subject site:

1. This Phase I ESA is based upon data and information obtained by PGI as a result of the work described in Section 2.2 above. PGI's observations regarding the condition of the subject site are based solely upon the condition of the site on the date or dates of PGI's visit or visits to the site. Information, data, estimates, opinions and other references used to prepare this Phase I ESA were obtained by PGI from sources PGI considered reliable and believed to be true and correct. However, an independent investigation of the sources of information was not performed to determine their accuracy. PGI relied in good faith on information obtained from individuals noted in this Phase I ESA with respect to operations and existing site conditions, and the historic uses of the site to the extent that they have not been contradicted by data obtained from other sources. PGI accepts no responsibility for any deficiency, misstatement, or inaccuracy contained in this Phase I ESA as a result of misstatements, omissions, misrepresentations, or fraudulent acts of any person interviewed.
2. The evaluation and conclusions contained in this Phase I ESA have been prepared in light of the expertise and experience of PGI. PGI believes it has identified all recognized environmental conditions at the subject site. PGI warrants to Piercy Tower Alpha LLC., that this Phase I ESA was performed with the degree of skill that is required by current, good and sound professional procedures and practices and in conformance with generally accepted professional standards prevailing at the time and place the work was performed. PGI makes no other warranty, either expressed or implied, regarding this Phase I ESA. The use of this

Phase I ESA is subject to the terms and conditions set forth in the Contract for Consulting Services between PGI and Piercy Tower Alpha LLC., executed June 8, 2017.

3. Review of Title and Judicial Records for Environmental Liens and Activity and Use Limitations (AULs) were excluded from this Phase I ESA.

Section 3.0 Site Description

This section presents descriptions of the site location and boundaries, physical characteristics of the site and structures on the site, a description of operations, characteristics of the vicinity around the site, and the environmental setting of the subject property.

3.1 Location and Site Characteristics

As stated previously, this Phase I ESA was focused on the subject site located at 469 Piercy Road, San Jose, CA 95138.

Report Figures are presented in Appendix I. Figure 1-1 presents the regional site location map. Figure 1-2 presents the general site location map. Figure 1-3 presents the assessor's parcel map denoting the subject site. Figure 1-4 presents a property site plan prepared by Leal's Drafting of Hollister, California. Figure 1-5 is a 2016 aerial photograph depicting the subject site and its surrounding properties which include:

- on the north by vacant lands;
- on the east by Piercy Road and commercial properties;
- on the south by Hellyer Avenue and commercial properties; and
- on the west by a strip of vacant land, Commonwealth Central Credit Union, and Silver Creek Valley Road.

The preliminary report identifies several easements for roadway, utility, and incidental purposes.

The subject site is a 3.6-acres currently zoned "Industrial Park" (IP) and is composed of two parcels (APN 678-93-08 and APN 678-93-28). The property is in the Edenvale Enterprise Zone, a business park with neighboring companies. It is close to highways 101 and 85, as well as close to Caltrain. The subject site is also within approximately 18 minutes of the San Jose International Airport.

On June 20th, 2017, PGI conducted a site reconnaissance of the subject site. During the site visit, visual observations of the subject property were performed, and photographs were taken (*Refer to Appendix II for Photographs*). Presented below is a summary of observations made during the site reconnaissance.

Building 469 Piercy Road, San Jose, California

The subject site is surrounded by partially wooden and barbed-wired fence. There are two buildings on this property, the main residence building and a “garage and storage” building also referred to in this report as the “second building” (*see Figure 1-4*).

The main residence has an unpainted exterior with painted interior. The second building was last painted in 1996 (*See Photographs 3-1 and 3-2*). According to the property owner, lead-based paint and asbestos-containing-materials have not been used in either of the buildings.

The followings were observed inside of the main residence building (*See Photographs 3-3 to 3-8*):

- An entrance hall with one flight of stairs to the second floor.
- Underneath the stairs is one small bathroom with a toilet and sink.
- A kitchen with two sinks, a gas stove top, an oven, and other household items.
- A living room with a fire place.
- A room used as an office by the current tenant.
- Upstairs are the bedrooms, each with their own on-suite bathroom.

Garage and Storage (Second Building) – Next to the home there is a one-story detached three (3) car garages, an office, and two storage rooms (*See Photographs 3-2 and 3-9 through 3-12*). In Figure 1-4, the “garage and storage” building is referred to as “garage and shop.” However, according to the property owner, it has always been used as the residence’s garage, storage facility and sometimes office.

The garages contain cars, motorcycles, supplies for their upkeep, including small quantities (less than one- to 5-gallons) of miscellaneous chemicals, and construction tools and materials.

On the back of the building there is a small vegetable garden and various tools. Along the front of the garage, there are multiple cars parked, also different piles of construction materials such as wood and bricks (*See Photographs 3-12 and 3-13*).

Yard – According to the property owner and the blueprints for the property, there is a septic tank and two leach fields on the northern side of the residence building (*See Photograph 3-14*). Photograph 3-15 shows the location of an abandoned leachfield associated with the previous residence which was demolished when the new residence was constructed.

The residence has 8 Vertical pipes (*See Photograph 3-16*) which lead to rock lined pits to carry away any water from the Foundation. The under house access door has a drain that leads to one of the pits (*see Photograph 3-17*). This drain captures water when the Hot Water Heater is drained during Maintenance. The drains around the Garage Building are diverted to a French Drain for storm Water dispersion (*See Photograph 3-18*).

A 200-foot deep groundwater well with its associated pumping system (electric motor) and two water storage tanks were observed at the southeast corner of the subject site, by the intersection of Piercy Road and Hellyer Avenue (*See Photograph 3-19*). According to the property owner only one of the water tanks is currently being used, the other is damaged and inactive.

The rest of the land is vacant and contains a few trees.

3.2 Description of Operations

Prior to 1970s the land was occupied by Walnut Orchards. The Walnut trees were later removed by the current property owner, Mr. Timothy Knea, once the residence was established on the subject site.

From 1970 until 2001, the subject site contained a house, the existing garage and storage building, the water well and a leach-field. The previous house and its leach-field were demolished when the new house was built in 2001. However, the garage and the storage building was not demolished and remains at its current location.

The Pacific Gas & Electric Company provides natural gas and electric power. The property owners provide their own water and sewer service. All standard urban utilities are reportedly available to the property.

Water to the subject site is supplied from a 200-foot deep groundwater well. The water is used untreated according to the property owner.

Swewer system at the subject site includes a 2000-gallon underground septic tank that collects the sewage and drains it into two 900 linear-foot leach fields located at the northern part of the subject site.

3.3 Vicinity Characteristics

The subject site is located within a mix use neighborhood, even though it is General Planned and Zoned "Industrial Park" (IP).

A small strip of vacant land followed by Commonwealth Central Credit Union and Silver Valley Road abut the subject site to the west. On the west of Silver Creek Valley Road, Broadcom Corporation, Innotrans Communications, MeiVac Incorporated, and NDS Surgical Imaging are located.

Piercy Road borders the subject site to the east, followed by the Academy of Cosmetic Tattoos, the Rohi Christian Church, the Family Community Church, Shiela-Marie Ventura Realtors, and San Jose Bike Club.

Hellyer Avenue adjoins the site to the south followed by Cognilytics Incorporated, Julio's Fresh Mex, Balance Yoga Center, Kotar Data Recovery, and ASAP Systems.

Vacant lands border the subject site to the north.

Site Coordinates (Refer to Appendix III)

Version Update: 2012
South Map: 5640420 SANTA TERESA HILLS, CA
Version Update: 2012

3.4 Environmental Setting

The subject site lies within the San Jose 7.5-minute Quadrangle, Santa Clara County, California. It sits mostly atop geologically recent (Quaternary) clay loams with deep to moderately deep wells and well drained soils. The Silver Creek Hills contain Franciscan Complex basement rocks and Coast Range Ophiolite (Mesozoic terrane), which have been thrust over Cenozoic strata along the Silver Creek Fault (Wentworth and others, 1999). Cenozoic deposits include marine and non-marine units. The northwest-trending Silver Creek thrust fault bisects the Silver Creek Hills in the southeastern part of the quadrangle. Several smaller transpressive faults also are mapped within the quadrangle, primarily along the base of the San Jose Foothills. They include the Evergreen, Quimby, Piercy, and Clayton faults. Coyote Creek is the largest drainage in the area. Numerous Holocene fluvial terraces and well-defined Holocene levees flank Coyote Creek. The Holocene levee deposits result from Coyote Creek depositing overbank sediment adjacent to the channel during large floods. (CGS, 2000).

To the Northeast of the subject site is the Piercy Fault Line, which has been declared inactive by the California Division of Mines and Geology. The Piercy Fault is quaternary, which are common in San Jose. The risk of surface fault rupture is considered low for the Piercy Fault Line (CGS, March 16, 1981).

The Silver Creek Fault located north of the subject site is still considered potentially active. According to wikipedia.org, "*the **Silver Creek Fault** is a potentially seismically active northwest-southeast trending geological fault structure in Santa Clara County, California. The Silver Creek Fault runs through and adjacent to the 25 miles (40 km) long and 5 miles (8 km) wide Evergreen Basin,^[1] and generally lies parallel and between the Guadalupe River and Coyote Creek in the city of San Jose. No historic activity of the Silver Creek Fault has been recorded.^[2] The Silver Creek Fault is parallel to the Hayward Fault, which is located 5 miles (8 km) to the east. New research in 2003 suggests an extension of the Silver Creek Fault may run the entire*

length of the East Bay.⁽²⁾

Groundwater – According to Environmental Data Resources, Inc.’s (EDR) report dated June 09, 2017, groundwater flow direction is possibly towards southwest. Depth to shallow groundwater is reported to be possibly between 20- to 30-feet (*California Department of Toxic Substances Control, 2009*).

Storm Water and Surface Water Runoff – As stated previously in this report, the residence has 8 Vertical pipes which lead to rock lined pits to carry away any water from the Foundation. The under house access door has a drain that leads to one of the pits. This drain captures water when the Hot Water Heater is drained during Maintenance. The drains around the Garage Building are diverted to a French Drain for storm Water dispersion.

Flood Zone - According to EDR *Radius Map Report with GeoCheck*, the subject site is not located on neither a 500-year flood-zone nor a 100-year flood-zone.

Water Supply – According to the property owner, the subject site’s main source of water comes from a 200-foot deep groundwater well located on the southern corner of the site. Photograph 3-19 depicts the groundwater well, pump and storage system including two above ground, 5000-gallon water storage tanks. One of the tanks (to the right of the photo) is inactive due to its physical damage. Reportedly, the property has street access to water from City of San Jose.

Water Treatment – According to the property owner, the well water that they pump themselves isn’t treated. He stated that the well water has been tested on multiple occasions and has been reported “safe to drink.”

Wastewater – The property has sewer septic system. The septic system is composed of two 900 linear-feet leach-fields (*See Photograph 3-14*) and a concrete underground septic tank with wooden lid. The septic tank digests organic matter and separates floatable matter (e.g., oils and grease) and solids from the wastewater. Soil-based systems discharge the liquid (known as effluent) from the septic tank into a series of perforated pipes buried in the leach fields designed to slowly release the effluent into the soil. The soil accepts, treats, and disperses wastewater as it percolates through the soil, ultimately discharging to groundwater. Finally, the wastewater percolates into the soil, naturally removing harmful coliform bacteria, viruses and nutrients.

Photograph 3-15, depicts the location of a previous leach field associated with the former residence which was demolished prior to 2001.

Section 4.0 Records Review

This section presents information obtained from review of available records including records relating to site history, environmental databases, regulatory agency files, additional record sources, aerial photographs, and topographic maps. Appendix I contains the report figures. Appendix II are photographs taken from the subject site during the site reconnaissance. Appendix III confirms lack of historical Sanborn Insurance map for the site. Appendix IV presents the City Directory. Appendix V contains historical aerial photographs. Appendix VI presents historical topographic maps. Appendix IV presents the Summary Radius Map Report prepared by EDR.

4.1 Site History

Based on the documents reviewed and as confirmed by Mr. Timothy L. Knea, prior to 1970s (one of the current property owners), the subject property was a Walnut Orchard.

A Grant Deed from Valley Title Company states that the property was granted to Mr. William & Mrs. Teresa Caprista on February 28, 1969 by Mr. John Quaglia and his wife, Ms. Theresa Thelma Quaglia. Mr. & Mrs. Caprista build their residence at this property.

On June 8, 1995, the Deed to the subject site was transferred over to Mr. Timothy L. Knea and Mrs. Tena Caprista Knea, husband and wife, as joint tenants (*North American Company Preliminary Report, June 01, 2017*). Mr. & Mrs. Knea demolished the old residence and began construction of a new house in 1996 which was completed in 2001. To date, the subject site has remained a residential property.

4.2 Standard Environmental Record Sources

A search of environmental regulatory databases was conducted for the subject site and its vicinity. Environmental Data Resources, Inc. (EDR) performed the database search on June 09, 2017 to identify existing documentation related to environmental incidents at the site and/or at surrounding properties. The databases searched and related search distances from the subject site, are those suggested by ASTM and are listed in the EDR report (*Refer to Appendix VII*).

The environmental listings identified in the EDR database search (if any) were evaluated with respect to their potential to adversely impact the subject site. If an environmental listing met any one of the following four criteria, the listing was not investigated further and is not specifically discussed in this Phase I ESA: (i) mislocated or unmappable listings beyond the ASTM search criteria, (ii) listed as only soil media impacted and at a distance from the site that would preclude migration to the site; (iii) hydraulically downgradient of the site with respect to groundwater flow; and (iv) site remediation has been completed and site closure approved by the regulatory agencies.

Per EDR, groundwater flow direction at the subject site and within a quarter mile radius is towards South west direction (*EDR, June 09, 2017, Physical Setting Map – 4962931.2S*). Data provided by EDR did not identify any site within a one mile radius which could have had adverse environmental impact on the subject site.

4.3 Additional Record Sources

Piercy Tower Alpha LLC, Santa Clara County Recorder's Office, Santa Clara Valley Water District, and First American Title Insurance Company were contacted for site related information. A list of documents used in this Phase I ESA is presented in Section 7.0 – Reference of this document. Except for the agencies identified above, other outside agencies were not contacted as part of the Phase I ESA with regard to offsite properties because the EDR report did not identify any offsite properties (specific to the ASTM search criteria) in the environmental databases searched that met any of the four criteria listed in Section 4.2 above.

4.4 City Directory, Aerial Photographs, and Sanborn Insurance and Topographic Maps

Historical aerial photographs and topographic maps encompassing the site were reviewed. Table 4-1 summarizes the years that this information covers. Sanborn Fire Insurance Maps were not available for this property (*See Appendix III*).

Table 4-1	
City Directory, Aerial Photographs, Sanborn Insurance and Topographic Maps Reviewed	
<i>Source</i>	<i>Year</i>
Sanborn Insurance Maps (<i>Appendix III</i>)	Not Available

A discussion of the City Directory, Aerial Photographs and Topographic Maps is presented in the following sections.

4.4.1 City Directory

City Directory Report was obtained from EDR and includes a search of available city directory data (*Refer to Appendix IV*). Table below presents a summary of information provided by the directory on the subject site from 1975 and 2000.

Year	469 Piercy Road, San Jose, California 95138
2000	“CAPRISTAW 88anm”
1975	“HARRISON KEN”

4.4.2 2006 through 2012 Aerial Photographs

The 2006, 2009, 2010, and 2012 aerial photographs have a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). These aerial photographs depict a residential home facing Piercy Road and the existing garage and storage building at the subject property as well as the groundwater well.

South of Hellyer Avenue are Cognilytics Inc., Julio's Fresh Mex, ASAP Systems, Balance Yoga Center, and Kotar Data Recovery.

Piercy Road borders the subject site to the east and located east of Piercy Road are the Rohi Christian Church, Shiela-Marie Ventura Realty, Family Community Church, and San Jose Bike Club.

A small strip of vacant land abuts the property to the west followed by Commonwealth Central Credit Union, Silver Creek Valley Road, Broadcom Corporation, Innotrans Communications, MeiVac Inc., and NDS Surgical Imaging. Broadcom Corporation is a semiconductor company; Innotrans Communications supplies technologic equipment; MeiVac Inc. produces and sells film manufacturing processing equipment; and NDS Surgical Imaging is a medical supply store.

Vacant lands border the subject site to the north.

4.4.3 2005 Aerial Photograph

The 2005 aerial photograph has a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). The following structures appear on the subject site: current residence, the current garage and storage building, a possible horse corral, and the existing groundwater well.

Hellyer Avenue was constructed at this time and appears in this aerial photograph along with Piercy and Silver Creek Valley Roads at their current locations. The surrounding properties appear similar to the 2006 aerial photograph.

4.4.4 1998 Aerial Photograph

The 1998 aerial photograph has a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). Two to three building structures appear at the subject site. The land abutting the subject site to the north still appears as vacant. Piercy and Silver Creek Valley Roads appear at their current locations. Hellyer Avenue was still not constructed.

Generally, the area surrounding the subject site appears less developed than seen in 2005 aerial photograph. Gognilytics, Inc., is visible south of the subject site across the current Hellyer Avenue.

4.4.5 1982 Aerial Photograph

The 1982 aerial photograph has a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). Building structures appear on the subject site surrounded by vacant lands. Piercy and Silver Creek Valley Roads appear at their current locations. Vacant lands border the subject site to the north.

4.4.6 1973 Aerial Photograph

The 1973 aerial photograph has a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). This aerial photograph has poor resolution. It is difficult to identify building structures at the subject site, but it appears clear of orchards. Silver Creek Valley and Piercy Roads appear at their current locations.

4.4.7 1939 through 1968 Aerial Photographs

The 1939, 1940, 1948, 1950, 1956, 1963, and 1968 aerial photographs have a scale of 1-inch equals to 500-feet (*Refer to Appendix V Historical Aerial Photographs*). Piercy and Silver Creek Valley Roads appear at their current

locations. Hellyer Road was not constructed at that time. The subject site appears as an orchard. The surrounding properties also appear as orchards or vacant lands with sporadic building structures.

4.4.8 2012 Topographic Map

2012 United States Geological Survey, San Jose East 7.5 Minute Series Topographic Maps, even though many structures were present at the subject site and its surrounding properties at the time, do not denote any building structures. Piercy Road, Hellyer Avenue, and Silver Creek Valley Road are depicted at their present locations. US-101 and US-82 are south of the subject site. Coyote Creek is south of Piercy Road.

4.4.9 1980 Topographic Map

1980 United States Geological Survey, San Jose East 7.5 Minute Series Topographic Map shows a small structure at the subject site and Piercy Road at its present location. Hellyer Avenue and Silver Creek Valley Road are not depicted. Fontanoso Avenue appears at the current location of Silver Creek Valley Road. “New North Almaden Mine” exists on the land located north/northeast of the subject site, across the Ever Green Canal. Coyote Creek flows south of Piercy Road. US-101 is still south of the subject site, but US-82 doesn’t exist (*see Appendix VI*).

4.4.10 1973, 1968, and 1961 Topographic Maps

1973, 1968, and 1961 United States Geological Survey, San Jose East 7.5 Minute Series Topographic Maps are the same as the 1980 topographic map except there isn’t a structure on the subject site. Furthermore, as the years decrease there are less structures, more orchards and vacant lands (*see Appendix VI*).

4.4.11 1953 Topographic Map

1953 United States Geological Survey, San Jose East 7.5 Minute Series Topographic map shows the subject site as a vacant land. The streets surrounding the subject site aren't named but are visible. Evergreen Canal doesn't exist. There are no structures anywhere near the subject site (*see Appendix VI*).

4.4.12 1899, 1897, and 1889 Topographic Maps

1899, 1897, and 1889 United States Geological Survey, San Jose 7.5 Minute Series Topographic Maps do not show any structures on the subject site as well as its surrounding properties. No visible streets appear near the subject sit. Coyote Creek is depicted to the south of the subject property (*see Appendix VI*).

Section 5.0

Results of the Site Reconnaissance, Records Review, and Interviews

On June 20, 2017, PGI met with Mr. Timothy Knea, one of the property owners, and Mr. Nathan Shirley, builder of the residential home and tenant, to perform a site reconnaissance, review existing blueprints of the property, and to interview both individuals for information about the subject site's history and existing conditions.

Additionally, on June 28, 2017, Mr. Paul Monaco, Sales Manager at First American Title Insurance Company was contacted via telephone and email to confirm subject site's property boundaries and ownership.

According to Mr. Knea, he has been living on the property with his wife since 1984 and has been associated with the land for 33 years. Mr. Knea's wife was not available for an interview. However, according to Mr. Knea, his wife and her parents build their residence at the subject site in 1970.

Mr. Nathan Shirley has been a tenant on the land for about 12 years. Moreover, he stated that he built the existing house that resides on the property. Hence, he has been associated with the land for approximately 21 years.

The following subsections present site assessment findings with respect to hazardous substances, petroleum products, solid waste/non-hazardous waste, polychlorinated biphenyls (PCBs), asbestos-containing materials, storage tanks, herbicides and pesticides, water, wastewater, stormwater, and lead-based paint.

5.1 Hazardous Substances

According to the individuals interviewed and documents reviewed, hazardous substance have not been reportedly used at the property. Small quantity (less than one- to 5-gallons) of chemicals were observed in the storage area of the second building.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Hazardous Substances are not recognized environmental conditions at the subject site.

5.2 Solid Waste/Non-Hazardous Waste

Solid waste/non-hazardous waste generated at the subject site are collected in trash containers/bins and picked up for transportation by City of San Jose Garden City Sanitation and disposed of at the Newby Island Landfill (<http://www.sanjoseca.gov>).

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Solid Waste/Non-Hazardous Waste are not recognized environmental conditions at the subject site.

5.3 Polychlorinated Biphenyls (PCBs)

According to the individuals interviewed, PCBs have never been present at the subject site. Reportedly, there are no known PCBs inside the buildings.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, PCBs are not recognized environmental conditions at the subject site.

5.4 Asbestos-Containing Material

Construction of the main residence began in 1996 and was completed in 2001. The second building housing garages and storage rooms was constructed in 1970. An asbestos inspection was not performed as part of this

assessment; however, per the individuals interviewed and lack of any readily available documentation stating otherwise, the buildings do not contain Asbestos-containing materials (ACM).

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, ACM are not recognized environmental conditions at the subject site.

5.5 Storage Tanks

During the site walkthrough, with the exception of aboveground water storage tanks, and underground septic tanks, indication of other underground and aboveground storage tanks at the subject property were not observed. Records reviewed and interviews of individuals familiar with the subject site confirmed PGI's visual observations.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Storage Tanks are not recognized environmental conditions at the subject site.

5.6 Herbicides and Pesticides

According to the individuals interviewed, herbicides and pesticides have not been used at the property. Herbicides and Pesticides are determined to be *de minimis conditions* and are not considered as recognized environmental conditions nor controlled recognized environmental conditions at the subject property.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Herbicides and Pesticides are not recognized environmental conditions at the subject site.

5.7 Potable Water

The subject site's main source of water comes from a 200-foot deep groundwater well located on the southeastern corner of the property abutting Piercy Road and Hellyer Avenue. The water from the well is used at the subject site untreated. According to the property owner, the groundwater has been tested and meets the drinking level standards.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Potable Water is not a recognized environmental condition at the subject site.

5.8 Wastewater and Stormwater

The property has sewer septic system. The septic system is composed of two 900 linear-foot leach-fields and a concrete underground septic tank with wooden lid. Septic systems are underground wastewater treatment structures, commonly used in rural areas without centralized sewer systems. They use a combination of nature and proven technology to treat wastewater from household plumbing produced by bathrooms, kitchen drains, and laundry. The septic tank digests organic matter and separates floatable matter (e.g., oils and grease) and solids from the wastewater. Soil-based systems discharge the liquid (known as effluent) from the septic tank into a series of perforated pipes buried in the leach fields, leaching chambers, or other special units designed to slowly release the effluent into the soil. The soil accepts, treats, and disperses wastewater as it percolates through the soil, ultimately discharging to groundwater. Finally, the wastewater percolates into the soil, naturally removing harmful coliform bacteria, viruses and nutrients.

Stormwater and surface water runoff are discharged into gravel lined pits reportedly constructed of 12-feet of drain rocks which discharge water into the ground below.

Based on visual observations, document reviews, and interviews of individuals knowledgeable about the property, Wastewater and Stormwater are not recognized environmental conditions at the subject site.

5.9 Lead-Based Paint

The main residence was constructed between 1996 and 2001 with unpainted exterior and painted interior. The second building containing the garages and storage room was reportedly constructed in 1970. According to the property owner, the second building last was painted in 1996 with water-based paint. Lead based paint has not been used at the property, at least not after 1996.

Due to the age of the main residence (1996-2001) and the fact that the second building was last painted in 1996 using water-based paints, Lead-based paint is not considered a recognized environmental condition.

Section 6.0 Conclusions

Pari & Gershon, Inc. (PGI) has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the subject site located at 469 Piercy Road, San Jose, California 95138. Any exceptions to, or deletions from this practice are described in “Section 2.0 – Introduction” of this report.

Based on PGI’s site walkthrough, interviews, and review of site-specific information, there are no apparent Recognized Environmental Conditions at this property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
XERNUS CORP	372 PIERCY RD	S 1/8 - 1/4 (0.177 mi.)	C9	16

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 2 HIST UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DAVE ESCOVER Facility Id: 00000041871	422 PIERCY ROAD	S 0 - 1/8 (0.097 mi.)	6	13
BARRERAS RANCH Facility Id: 00000048434	390 PIERCY RD	SSW 1/8 - 1/4 (0.152 mi.)	7	14

Other Ascertainable Records

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 5 CUPA Listings sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 03/09/2017 has revealed that there is

EXECUTIVE SUMMARY

1 DRYCLEANERS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

S118466278

Completed Date: 04/04/2016
Comments: A Community Profile was prepared to help determine potential community interest in the investigation and cleanup activities at the site and describes the demographics of the community. This project uses the Community Profile from the adjacent Great Oaks Mixed Use Project site, which has the same owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 08/03/2016
Comments: The fact sheet describes the site and the proposed response action and announces the public comment period for the Draft Response Plan. Contact information for the DTSC project manager and public participation specialist are included in the fact sheet should the public have questions or comments.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 09/21/2016
Comments: DTSC prepared a Statement of Findings documenting its finding that the proposed response action identified in the Response Plan will not result in significant and unavoidable effects to the environment. DTSC based its finding on the City of San Jose's Environmental Impact Report for the Great Oaks Mixed Use Project. DTSC filed a Notice of Determination with the State Clearinghouse after the project was approved on July 14, 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: California Land Reuse and Revitalization Agreement
Completed Date: 07/13/2016
Comments: Costco Wholesale Corporation and DTSC entered into a California Land Reuse and Revitalization Act Agreement

Completed Area Name: PROJECT WIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 04/21/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2015	Source: California Environmental Protection Agency

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

UTM X (Meters):	608058.1
UTM Y (Meters):	4124163.5
Elevation:	207 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640414 SAN JOSE EAST, CA
Version Date:	2012
South Map:	5640420 SANTA TERESA HILLS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

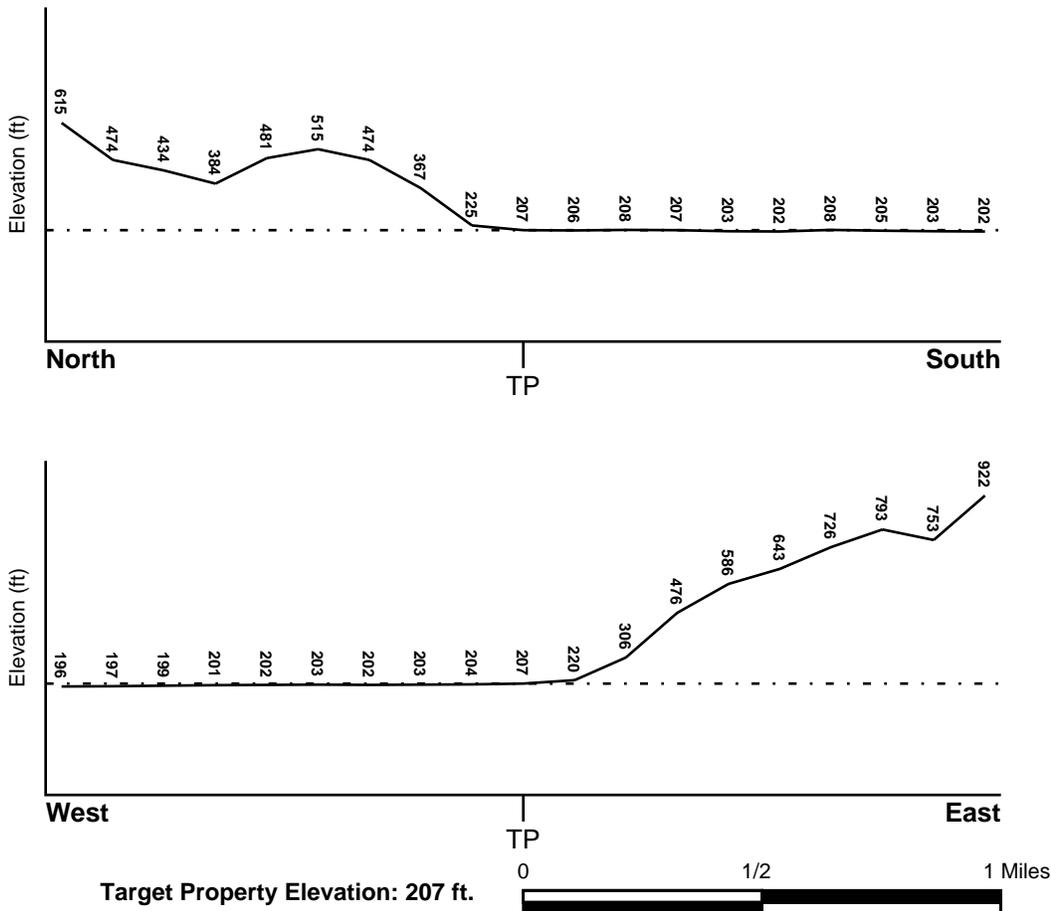

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

06085C0407H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN JOSE EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Permian
Series: Ultramafic rocks
Code: uM (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Plutonic and Intrusive Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
