Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT
7201 Bark Lane, San Jose, California 95129
AEI Project No. 371875

Dear Judy Shanley:

AEI Consultants is pleased to provide the Phase I Environmental Site Assessment (Phase I ESA) report of the above referenced address. This assessment was authorized and performed in accordance with the scope of services outlined in the proposal, the scope and limitations of ASTM Standard Practice E1527-13, and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we may assist you in any other matter, please contact me at (408) 559-7600 or TGolino@aeiconsultants.com.

Sincerely,

DRAFT

DRAFT

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with the proposal and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 7201 Bark Lane, San Jose, Santa Clara County, California. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

PROPERTY DESCRIPTION

PROPERTY INFORMATION	
Street Address(es)	7201 Bark Lane
City	San Jose
State	California
Location	North of Bark Lane
Vicinity Characteristics	Mixed commercial and residential
Approximate Site Acreage/Source	0.91/Assessor's Office
Property Type	Multi-family
Subject Property Use(s)	Apartments
Assessor Parcel Number(s)	372-24-011
SITE AND BUILDING INFORMATION	
Number of Buildings	Three
Year(s) of Construction	1961
Number of Floors/Stories	Three
Basement or Subgrade Area(s)	None identified
Number of Units	20
Building Area (SF)/Source	18,000 /Mr. Jason Lee, Property Owner
Building Description(s)	Three three-story apartment buildings
Building Occupant(s)	Residential tenants
Additional Improvements	A swimming pool, laundry rooms, parking garages, asphalt-paved driveway and landscaping
Current On-site Operations	General residential activities
Current Use of Hazardous Substances	Pool maintenance chemicals; refer to Section 7.1.
UTILITY PROVIDER INFORMATION	
Natural Gas Provider	PG&E
Electricity Provider	PG&E
Heating System Fuel Source	Natural gas
Cooling System Power Source	Electricity
Potable Water Provider or Source	San Jose Water Company (SJWC)
Sewage Disposal Provider or Treatment System	City of San Jose
REGULATORY INFORMATION	
Regulatory Database Listings	DOT OPS; Refer to Section 5.1.
Institutional Controls	None identified
Engineering Controls	None identified
Environmental Liens	None identified

Based on a review of historical sources, the subject property was identified to consist of agricultural land from 1939 to 1956. Since 1961, the subject property has been developed with the current apartment buildings

The following addresses are also associated with the subject property: 7221 and 7245 Bark Lane. These addresses were also researched as part of this assessment.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Villa Collina Apartments (7250 Blue Hill Drive) Apartments (1155 Weyburn Lane)	None identified
East	Apartments (7183 Bark Lane)	None identified
South	Bark Lane followed by: Apartments (7180-7240 Bark Lane) Multi-tenant commercial building (7250-7260 Bark Lane)	EDR HIST CLEANER (7260 Bark Lane)
West	Vacant land (7285 Bark Lane)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

Based on groundwater monitoring data for a nearby site at 1192 Saratoga Sunnyvale Road (located approximately 0.037 mile southwest of the subject property) obtained from GeoTracker, the direction of groundwater flow beneath the subject property is inferred to be to the northwest and groundwater is presumed to be present at an estimated depth of 67 to 100 feet bgs.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- Based on a review of historical sources, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI understands that demolition activities of the subject property buildings are planned. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.
- AEI observed interior areas of the subject property buildings in order to identify the presence/absence of visible, suspect mold (fungal) growth. During the on-site reconnaissance, obvious visible signs of suspect mold growth or conditions conducive for mold growth (water damage) were observed in the third-floor bathroom of Unit 18. Based upon the amount of suspect fungal growth observed, AEI recommends that clean-up of visible, suspect mold be conducted by appropriate personnel (typically maintenance personnel for de minimis quantities <10 square feet) within the affected

areas, which should include but not be limited to: (1) cleanup using a mold cleaning solution and utilizing appropriate personal protective equipment (PPE) and engineering controls, and (2) disposal of all suspected mold affected building materials that may not be cleaned, as well as used disposable PPE, in sealed plastic bags. Repairs to correct the source of the water intrusion and damage in the impacted area should also be performed where applicable. In addition, in order to assist on-site staff with proper methods of suspect mold growth evaluation and remediation, as well as proper training for on-site maintenance personnel, it would be prudent for the property owner to implement a Mold/Moisture Plan (MMP).

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 7201 Bark Lane, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Subsurface investigation to determine if the subject property has been significantly impacted in connection with the historical agricultural use.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with the proposal and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 7201 Bark Lane, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this Phase I ESA was limited by the following:

- Due to the size of the property, a representative sample of interior spaces was inspected by AEI. Due to the residential nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment.
- Due to the large volume of stored products within the residential units of the building, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI's site inspection. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- On May 31, 2017, AEI visited the website maintained by the San Jose Permit Center for permits and records issued by the San Jose Fire Prevention Bureau (SJFPB), San Jose Building Division (SJBD), and San Jose Planning Division (SJPD), regarding the subject property to identify any evidence of previous or current hazardous material usage, as well as historical tenants, property use, and the presence of AULs. AEI also visited the Permit Center computers at San Jose City Hall to ensure complete review of records. Due to technical difficulties with the online system and City Hall's system, various permits/documents were unable to be displayed for review. It should be noted that some of these records are not accessible through the Permit Center's website and can only be viewed by submitting a request to review to the City's Imaging Department (ID). It is common that some records may even be inaccessible to City of San Jose as well. In past experience, the ID may be able to recover some files, however such requests generally take at least two months to process and cost at least \$100 to \$200, or more depending on the amount of files retrieved. Based on this notion, outstanding, inaccessible City files are not deemed to be "reasonably ascertainable" as defined by the ASTM standard. Based on the information provided in the records reviewed online, as well as other sources, this limitation is not expected to alter the conclusions of this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- On May 2, 2017, AEI contacted the SCCDEH via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems. AEI requested information for the addresses 7221 and 7245 Bark Lane. However, AEI has not received a response as of this report date. Based on

the quality of information obtained from other regulatory agencies, this limiting condition will not alter the Findings of this assessment.

1.6 DATA GAPS AND DATA FAILURE

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	<p>The earliest historical resource obtained during this assessment was an aerial photograph from 1939 indicating that the subject property was developed, as discussed below. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure.</p> <p>In the 1939 aerial photograph, the subject property was developed agriculturally. Thus it is assumed that prior to 1939 the subject property would have been used for agricultural purposes, if not undeveloped. Therefore, this data failure is not expected to significantly alter the Findings of this assessment.</p>
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous reports, interviews

1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's proposal and Standard Terms and Conditions executed by David J. Powers & Associates on April 26, 2017. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Street Address(es)	7201 Bark Lane
City	San Jose
State	California
Location	North of Bark Lane
Vicinity Characteristics	Mixed commercial and residential
Approximate Site Acreage/Source	0.91/Assessor's Office
Property Type	Multi-family
Subject Property Use(s)	Apartments
Assessor Parcel Number(s)	372-24-011
SITE AND BUILDING INFORMATION	
Number of Buildings	Three
Year(s) of Construction	1961
Number of Floors/Stories	Three
Basement or Subgrade Area(s)	None identified
Number of Units	20
Building Area (SF)/Source	18,000 /Mr. Jason Lee, Property Owner
Building Description(s)	Three three-story apartment buildings
Building Occupant(s)	Residential tenants
Additional Improvements	A swimming pool, laundry rooms, parking garages, asphalt-paved driveway and landscaping
Current On-site Operations	General residential activities
Current Use of Hazardous Substances	Pool maintenance chemicals; refer to Section 7.1.
UTILITY PROVIDER INFORMATION	
Natural Gas Provider	PG&E
Electricity Provider	PG&E
Heating System Fuel Source	Natural gas
Cooling System Power Source	Electricity
Potable Water Provider or Source	San Jose Water Company (SJWC)
Sewage Disposal Provider or Treatment System	City of San Jose
REGULATORY INFORMATION	
Regulatory Database Listings	DOT OPS; Refer to Section 5.1.
Institutional Controls	None identified
Engineering Controls	None identified
Environmental Liens	None identified

Utility provider information listed in the table above is provided by Mr. Jason Lee, Property Owner, unless otherwise noted above.

2.2 SITE AND VICINITY CHARACTERISTICS

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Villa Collina Apartments (7250 Blue Hill Drive) Apartments (1155 Weyburn Lane)	None identified
East	Apartments (7183 Bark Lane)	None identified
South	Bark Lane followed by: Apartments (7180-7240 Bark Lane) Multi-tenant commercial building (7250-7260 Bark Lane)	EDR HIST CLEANER (7260 Bark Lane)
West	Vacant land (7285 Bark Lane)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.3 PHYSICAL SETTING

Geology: Based on a review of the USDA Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as Urban Land. The Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures. Due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property.

USGS Topographic Map:	Cupertino, California Quadrangle
Nearest surface water to subject property:	Calabazas Creek/0.2 mile east
Gradient Direction/Source:	Northwest/GeoTracker
Estimated Depth to Groundwater/Source:	67-100 feet bgs/GeoTracker

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupants of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description/Use	Source(s)
1939-1956	Agricultural land (orchards)	Aerial photographs
1961-present	Developed with the current apartment buildings	Aerial photographs, city directories, agency records, interviews

Based on a review of historical sources, the subject property was identified to consist of agricultural land from 1939 to 1956. Since 1961, the subject property has been developed with the current apartment buildings

The following addresses are also associated with the subject property: 7221 and 7245 Bark Lane. These addresses were also researched as part of this assessment.

Based on a review of historical sources, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

3.2 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1939, 1948, 1956	Agricultural land (orchards)	NORTH: Agricultural land and a residence EAST: Agricultural land SOUTH: Agricultural land and a residence WEST: Agricultural land

Year(s)	Subject Property Description	Adjacent Site Descriptions
1968	Developed with the current apartment buildings	NORTH: Vacant land and one of the current apartment complexes EAST: The current apartments SOUTH: Bark Lane followed by the current apartment complexes and a parking lot WEST: A parking lot, possibly associated with the gas station located further west
1974, 1982	Due to the poor quality of the image, detailed observation of site features was not possible; however, there appears to be no significant changes	NORTH: The current two apartment complexes EAST: No significant changes SOUTH: No significant changes WEST: A building
1991, 1999	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Bark Lane followed by the current apartment complexes and commercial building WEST: A commercial building
2005, 2006, 2009, 2010, 2012	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Vacant land

Environmental concerns associated with the former agricultural uses are further discussed in Section 3.1.

If available, copies of historical aerial photographs are provided in the report appendices.

3.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.4 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1963, 1966, 1970, 1975, 1980, 1985, 1986, 1991, 1996, 2000, 2006	7201, 7221, 7245 Bark Lane: Residential tenants/apartments

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

If available, copies of historical city directories are provided in the report appendices.

3.5 HISTORICAL TOPOGRAPHIC MAPS

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

3.6 CHAIN OF TITLE

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

On May 2, 2017, AEI contacted the Santa Clara County Department of Environmental Health (SCCDEH) via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

AEI spoke with Ms. Somira Pech, who indicated that no records were file for the subject property under 7201 Bark Lane with the Santa Clara County Department of Environmental Health (SCCDEH).

AEI also requested information for the addresses 7221 and 7245 Bark Lane. However, AEI has not received a response as of this report date. Based on the quality of information obtained from other regulatory agencies, this limiting condition will not alter the Findings of this assessment.

Local Oversight Program

On May 31, 2017, AEI accessed the SCCDEH's online LUSTOP database for information on the subject property and nearby sites of concern. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information was on file for the subject property.

4.2 FIRE DEPARTMENT

On May 31, 2017, AEI visited the website maintained by the San Jose Permit Center for permits and records issued by the San Jose Fire Prevention Bureau (SJFPB) regarding the subject property to identify any evidence of previous or current hazardous material usage, as well as historical tenants, property use, and the presence of AULs. AEI also visited the Permit Center computers at San Jose City Hall to ensure complete review of records.

Due to technical difficulties with the online system and City Hall's system, various permits/documents were unable to be displayed for review. It should be noted that some of these records are not accessible through the Permit Center's website and can only be viewed by submitting a request to review to the City's Imaging Department (ID). It is common that some records may even be inaccessible to City of San Jose as well. In past experience, the ID may be able to recover some files, however such requests generally take at least two months to process and cost

at least \$100 to \$200, or more depending on the amount of files retrieved. Based on this notion, outstanding, inaccessible City files are not deemed to be “reasonably ascertainable” as defined by the ASTM standard. Based on the information provided in the records reviewed online, as well as other sources, this limitation is not expected to alter the conclusions of this assessment.

There was no information indicating current or prior use or storage of hazardous substances on file for the subject property with the San Jose Fire Prevention Bureau (SJFPB).

4.3 BUILDING DEPARTMENT

On May 31, 2017, AEI visited the website maintained by the San Jose Permit Center for permits and records issued by the San Jose Building Division (SJBD) regarding the subject property to identify any evidence of previous or current hazardous material usage, as well as historical tenants, property use, and the presence of AULs. AEI also visited the Permit Center computers at San Jose City Hall to ensure complete review of records.

Due to technical difficulties with the online system and City Hall’s system, various permits/ documents were unable to be displayed for review. It should be noted that some of these records are not accessible through the Permit Center’s website and can only be viewed by submitting a request to review to the City’s Imaging Department (ID). It is common that some records may even be inaccessible to City of San Jose as well. In past experience, the ID may be able to recover some files, however such requests generally take at least two months to process and cost at least \$100 to \$200, or more depending on the amount of files retrieved. Based on this notion, outstanding, inaccessible City files are not deemed to be “reasonably ascertainable” as defined by the ASTM standard. Based on the information provided in the records reviewed online, as well as other sources, this limitation is not expected to alter the conclusions of this assessment.

Please refer to the following table for a listing of permits reviewed:

7201 Bark Lane

Year(s)	Owner/Applicant	Description of Permit and Building Use
1961	Trojan Const. Co	Permit to building a two-story 6-unit apartment building
1981	Ed Lichtman	Repair fire damage to apartments
2000	Not listed	Tenant improvements
2003	Prime Electric	Elect repair to service main for apt complex
2010	Lily Lee and Jason	Install property line cleanout at existing apt bldg

7221 Bark Lane

Year(s)	Owner/Applicant	Description of Permit and Building Use
1961	Trojan Const. Co	Permit to building a two-story 8-unit apartment building
2000, 2008, 2014	Lee	Tenant improvements

7245 Bark Lane

Year(s)	Owner/Applicant	Description of Permit and Building Use
1961	Trojan Const. Co	Permit to building a two-story 6-unit apartment building
1971	E Lacey	Gas permit for apartments

Year(s)	Owner/Applicant	Description of Permit and Building Use
2000, 2014	Lee	Tenant improvements

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the San Jose Building Division (SJBD).

4.4 PLANNING DEPARTMENT

On May 31, 2017, AEI visited the website maintained by the San Jose Permit Center for permits and records issued by the San Jose Planning Division (SJPD) vregarding the subject property to identify any evidence of previous or current hazardous material usage, as well as historical tenants, property use, and the presence of AULs. AEI also visited the Permit Center computers at San Jose City Hall to ensure complete review of records.

Due to technical difficulties with the online system and City Hall's system, various permits/documents were unable to be displayed for review. It should be noted that some of these records are not accessible through the Permit Center's website and can only be viewed by submitting a request to review to the City's Imaging Department (ID). It is common that some records may even be inaccessible to City of San Jose as well. In past experience, the ID may be able to recover some files, however such requests generally take at least two months to process and cost at least \$100 to \$200, or more depending on the amount of files retrieved. Based on this notion, outstanding, inaccessible City files are not deemed to be "reasonably ascertainable" as defined by the ASTM standard. Based on the information provided in the records reviewed online, as well as other sources, this limitation is not expected to alter the conclusions of this assessment.

Evidence indicating the existence of AULs was not on file for the subject property with the San Jose Planning Division (SJPD).

4.5 COUNTY ASSESSOR OFFICE

On May 31, 2017, AEI contacted the Santa Clara County assessor's office via telephone for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Santa Clara County assessor's office, the current building was constructed in 1961.

4.6 OIL AND GAS WELLS/PIPELINES

On May 31, 2017, AEI reviewed the Department of Oil and Gas & Geothermal Resources (DOGGR) maps and the National Pipeline Mapping System (NPMS) Public Map Viewer concerning the subject property and nearby properties. The maps contain information regarding oil and gas development.

According to the Department of Oil and Gas & Geothermal Resources map, oil or gas wells are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

According to the NPMS Public Map Viewer, pipelines are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

4.7 OTHER AGENCIES SEARCHED

On May 2, 2017, AEI contacted the **Bay Area Air Quality Management District (BAAQMD)** via email for information on the property. The BAAQMD maintains records related to permitted air emissions.

According to Ms. Rochelle Reed, no information was on file for the subject property.

On May 31, 2017, AEI accessed the **California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)** online database for information pertaining to hazardous waste disposal associated with the subject property. The HWTS generates reports on hazardous waste shipments for generators, transporters, and treatment, storage or disposal facilities (TSDFs).

No information was on file for the subject property.

On May 31, 2017, AEI accessed the **California Department of Toxic Substances Control (DTSC) EnviroStor** database, which contains information of investigation, cleanup, permitting, and/or corrective actions that are planned, being conducted or have been completed under DTSC oversight.

No information was on file for the subject property.

On May 31, 2017, AEI accessed the **Regional Water Quality Control Board (RWQCB) GeoTracker** database, a data management system for managing sites that impact groundwater, especially those requiring groundwater cleanup [USTs, Department of Defense, Site Cleanup Program] as well as permitted facilities such as operating USTs and land disposal sites.

No information was on file for the subject property.

On May 2, 2017, AEI contacted the **Santa Clara Valley Water District's (SCVWD) Well Division** to determine the presence of onsite wells.

AEI was informed by SCVWD staff that no wells exist on the subject property parcel.

On May 31, 2017, AEI accessed the **SCVWD's online Solvents** database for information on the subject property. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

The subject property was not listed on the SCVWD's online solvents database.

4.8 STATE ENVIRONMENTAL SUPERLIENS AND PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens and/or property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix C of this report.

The subject property was identified in the regulatory database report as follows: DOT OPS. See Section 5.1 for additional discussion.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
NPL	1	No	0	
DELISTED NPL	0.5	No	0	
SEMS (formerly CERCLIS)	0.5	No	0	
SEMS-ARCHIVE (formerly CERCLIS NFRAP)	0.5	No	0	
RCRA CORRACTS	1	No	0	
RCRA-TSDF	0.5	No	0	
RCRA LQG, SQG, CESQGs, VGN, NLR	SP/ADJ	No	0	
US ENG CONTROLS	SP	No	0	
US INST CONTROLS	SP	No	0	
ERNS	SP	No	0	
STATE/TRIBAL HWS	1	No	4	No; one site is further discussed below
STATE/TRIBAL SWLF	0.5	No	0	

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	No	0	
STATE/TRIBAL LUST	0.5	No	7	No; none of the identified sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
STATE/TRIBAL EC and IC	SP	No	0	
STATE/TRIBAL VCP	0.5	No	0	
STATE/TRIBAL BROWNFIELD	0.5	No	0	
ORPHAN	N/A	No	1	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	Yes	2	No; the subject property and one other site are further discussed below

Facility Name: N/A
Database(s): DOT OPS Address: 7201 Bark Lane Distance: Subject property Direction: Subject property
Comments: According to the EDR report, the subject property is listed on the Department of Transportation, Office of Pipeline Safety Incident and Accident data database. In 1984, a release of natural gas was reported due to a corroded pipe. The leak was fixed and no other remediation activities were listed. Based on the nature of release, this listing is not expected to represent a significant environmental concern at this time.

Facility Name: ANN S WASH & DRY
Database(s): EDR HIST CLEANER Address: 7260 Bark Lane Distance: Adjacent (0.02 mile) Direction: South (hydrologically cross-gradient)
Comments: According to the EDR report, this site is listed as being occupied by a potential dry cleaners, Anns Wash & Dry, in 1970. The tenant name would indicate that the site was a self-serve laundrette. Self-serve laundrettes typically do not operate dry cleaning machines, and therefore this listing is not expected to represent a significant environmental concern at this time.

Facility Name: CUPERTINO CREEKSIDE
Database(s): SLIC
Address: 7150 Rainbow Drive, Building 1
Distance: 0.234 mile
Direction: South-southeast (hydrologically cross- to up-gradient)
Comments: According to the EDR report, this site is listed as a closed release case. AEI reviewed information available on GeoTracker. The site is a residential condominium complex. In 2009, an elevator in Building 1 stopped working and was taken out of service. It was determined that the pipe supplying hydraulic fluid to the elevator had leaked and approximately 25 gallons of hydraulic fluid was lost. Impacted soil was removed and soil sampling was conducted. No groundwater was reportedly impacted or sampled. In 2012, the site received case closure from the SCCDEH. Based on the relative distance and the nature of the release, this listing is not expected to represent a significant environmental concern at this time.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 INTERVIEW WITH OWNER

The subject property owner, Mr. Jason Lee, was contacted in person on June 2, 2017. Mr. Jason Lee has been associated with the subject property since 1989. Mr. Jason Lee stated that the current apartments were constructed in 1962. Mr. Jason Lee was asked if he was aware of any of the following:

	Yes	No
Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.		✓
Any knowledge of previous environmental investigations conducted on site.	✓	
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.		✓
Any known plans for site redevelopment or change in site use.		✓
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		✓
Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		✓
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		✓
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		✓
Comments:		
Environmental concerns associated with any previous reports are further discussed in Section 6.3.		

6.1.2 INTERVIEW WITH KEY SITE MANAGER

The property owner, Mr. Jason Lee, is also the key site manager. Refer to Section 6.1.1.

6.1.3 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information of Mr. Jason Lee, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

6.1.4 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by Ms. Fiona Phung of David J. Powers & Associates, Inc. during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (Bark Lane Apartments, San Jose, California), prepared by TRC Lowney (January 5, 2007)

This report describes the subject property generally consistent with current conditions. No environmental issues or RECs were identified in the report.

A copy of the report is included in the appendices.

Note: If the above report(s) were not prepared by AEI, the information obtained was not verified for accuracy and a critique of the report(s) is beyond the scope of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	June 2, 2017
AEI Site Assessor(s)	Megan Nolet
Property Escort(s)/Relationship(s) to Property	Mr. Jason Lee, Property Owner
Units/Areas Observed	Representative portions of the interiors of the three buildings on site including units 3 and 18 (10% of total units) as well as the two laundry rooms, pool pump enclosure and the swimming pool
Area(s) not accessed and reason(s)	<p>Due to the size of the property, a representative sample of interior spaces was inspected by AEI. Due to the residential nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment.</p> <p>Due to the large volume of stored products within the residential units of the building, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI's site inspection. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.</p>
Weather	75° Fahrenheit and sunny

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	✓	Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✓	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✓	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✓	Unidentified Substance Containers
		Electrical or Mechanical Equipment Likely to Contain Fluids
	✓	Interior Stains or Corrosion
	✓	Strong, Pungent, or Noxious Odors
	✓	Pools of Liquid
✓		Drains, Sumps, and Clarifiers
	✓	Pits, Ponds, and Lagoons
	✓	Stained Soil or Pavement
	✓	Stressed Vegetation
	✓	Solid Waste Disposal or Evidence of Fill Materials
	✓	Waste Water Discharges
	✓	Wells
	✓	Septic Systems
	✓	Biomedical Wastes
✓		Other

The subject property is currently occupied by residential tenants. On-site operations consist of general residential activities.

DRAINS, SUMPS, AND CLARIFIERS

One storm drain and associated sump pump was observed in the parking area of the subject property. According to Mr. Lee, the sump pump was installed because the driveway of the subject property is below street level. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drain. Based on the use of the drain solely for storm water runoff, the presence of the drain is not expected to represent a significant environmental concern.

OTHER

The subject property is currently occupied by residential tenants. Small amounts of cleaning supplies, maintenance supplies, and swimming pool chemicals were observed on site. All materials were packaged in consumer quantities and no signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	✓	Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✓	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✓	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✓	Unidentified Substance Containers
✓		Electrical or Mechanical Equipment Likely to Contain Fluids
	✓	Strong, Pungent, or Noxious Odors
	✓	Pools of Liquid
	✓	Drains, Sumps, and Clarifiers
	✓	Pits, Ponds, and Lagoons
	✓	Stained Soil or Pavement
	✓	Stressed Vegetation
	✓	Solid Waste Disposal or Evidence of Fill Materials
	✓	Waste Water Discharges
	✓	Wells
	✓	Septic Systems
	✓	Other

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process,

or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Multiple pole-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

DRAFT

8.0 OTHER ENVIRONMENTAL CONSIDERATIONS

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific, and building products.

At the federal level, asbestos is primarily regulated by the United States EPA primarily through the EPA's NESHAP (Standard 40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard, and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state, or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls, Floors, and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape, and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

AEI understands that demolition activities of the subject property buildings are planned. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

8.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥ 1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LCP is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LCP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 24 tests were conducted for radon levels in the subject property zip code (95129) in 2010. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER

The San Jose Water Company (SJWC) supplies potable water to the subject property. The most recent water quality report states that lead levels in the area's water supply were well within standards established by the US EPA and the State of California.

8.5 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property buildings in order to identify the presence of mold. During the on-site reconnaissance, the following obvious visible signs of mold growth or conditions conducive for suspect mold growth were observed:

Location	Material Affected	Condition	Size of Area Affected
Unit 18 - third-floor bathroom	Ceiling and drywall	New growth	<10 sf

Please refer to the appendices for related photographs.

Although typically not included in the scope of work for a Phase I ESA, the presence of the suspect mold identified may pose a health and safety concern to any subsequent occupants and/or construction workers during future renovation activities. Based upon the amount of suspect fungal growth observed, AEI recommends clean-up of visible, suspect mold be conducted within the affected area, which should include but not be limited to the following:

- Remediation/cleanup using a mold cleaning solution and mild disinfectant by appropriate personnel utilizing appropriate PPE and engineering controls.
- Disposal of all suspected mold affected building materials that may not be cleaned, as well as used disposable PPE gloves and masks, in sealed plastic bags.
- Repairs to prevent or correct the source of the water damage should also be performed.

AEI's remediation recommendations are based upon accepted guidelines determined by the American Conference of Industrial Hygienists (ACGIH), New York City Department of Health (NYCDOH), and Environmental Protection Agency (EPA).

In addition, in order to assist on-site staff with proper methods of mold growth evaluation and remediation, as well as proper training for on-site maintenance personnel, it would be prudent for the property owner to implement a Mold/Moisture Plan (MMP).

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems, and behind enclosed walls and ceilings, may be present on the subject property.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HUNTINGDON DRY CLEAN	1157 S SARATOGA SUNN	WNW 1/8 - 1/4 (0.134 mi.)	16	31

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 2 SLIC sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 6 HIST LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 3 HIST UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 7 CUPA Listings sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: 1990 - In August, a waste oil underground storage tank (UST) was removed. Holes were noted on the top of the UST. One soil sample was collected from 8 feet below the ground surface (ft bgs). The sample was reported to contain 250 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Diesel (TPHd), 25 ppm TPH as Gasoline (TPHg), 3,500 ppm Total Oil and Grease (TOG) and low concentrations of Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX). The sample was also reported to contain 5.1 ppm Naphthalene, 0.75 ppm Phenanthrene, 0.58 ppm Fluoranthene, 0.87 ppm Pyrene, 1.2 ppm Bis (2-Ethylhexyl) Phthalate, and 8.6 ppm 2-Methylnaphthalene (Semi-Volatile Organic Compounds). 1991 - In January, a soil boring (SB1) was drilled to a depth of 16.5 ft bgs near the former waste oil UST. A soil sample collected at 16 ft bgs and was not reported to have concentrations of the Constituents of Concern (COCs), including Semi-Volatile Organic Compounds, present above the laboratory reporting limits. In September, 3 gasoline USTs and associated piping were removed from the site. 6 soil samples were collected from approximately 14.5-15 ft bgs in the UST excavation and were reported to contain maximum concentrations of 220 ppm TPHg, 2.3 ppm Benzene, 14 ppm Toluene, 8.4 ppm Ethylbenzene, and 54 ppm Xylenes. 4 soil samples were collected from beneath the piping at 1.5-3 ft bgs and were reported to have very low to non-detectable concentrations of the COCs. Approximately 100 cubic yards of soil was removed from the tankpit was transported to the Durham Road Landfill in Fremont for disposal. The tankpit was backfilled with clean material. 1993 - In June, 7 soil borings (QSB1

QUALITY TUNE UP (Continued)

S104397024

through QSB6) were drilled to 40-100 ft bgs onsite. One boring (QSB-1) was located in the center of the former gasoline UST pit and was advanced to 100 ft bgs; three borings (QSB-2, QSB-3 and QSB-4) were drilled peripheral to the gasoline UST pit to 40 ft bgs; one boring (QSB-5) was drilled in the center of the former waste oil UST pit to 60 ft bgs; and two borings (QSB-6 and QSB-7) were drilled peripheral to the waste oil UST pit to 15 ft bgs. Maximum concentrations were reported for the soil samples collected from QSB1 at 6,200 ppm TPHg, 73 ppm Benzene, 510 ppm Toluene, 160 ppm Ethylbenzene, and 900 ppm Xylenes and in soil samples collected from QSB5 of 630 ppm TOG and 3,000 ppm TOG. 1996 - In March, 3 groundwater monitoring wells (MW1, MW2 and MW3) were installed to depths of 95-102 ft bgs at the site. MW1 was located within the former gasoline UST pit. In addition, 2 vapor extraction wells (VW1 and VW2) were completed in a single borehole within the gasoline UST pit to 75-95 ft bgs. 16 soil samples were collected and reported to contain maximum concentrations of 6,400 ppm TPHg, 52 ppm Benzene, 350 ppm Toluene, 82 ppm Ethylbenzene, and 430 ppm Xylenes in the sample collected at 60.5 ft bgs in VW1. Depth to groundwater beneath the UST pit was approximately 92 feet. Periodic sampling of the wells was initiated. Initial groundwater samples were reported to contain maximum concentrations of 180,000 parts per billion (ppb) TPHg, 28,000 ppb TOG, 15,000 ppb Benzene, 24,000 ppb Toluene, 4,500 ppb Ethylbenzene, 20,000 ppb Xylenes, 650 ppb Naphthalene, and 140 ppb 2-Methylnaphthalene in well MW1. Free floating gasoline product was observed in MW1 in August and a program of product bailing was begun and continued through October 2007. It is estimated that 113 gallons of free product and groundwater were removed during this time from well MW1. 1999 - In October, monitoring well MW4 was installed onsite to 95 ft bgs, downgradient of the gasoline UST tankpit. 5 soil samples were collected and reported to contain maximum concentrations of 510 ppm TPHg, 6.2 ppm Benzene, 26 ppm Toluene, 13 ppm Ethylbenzene, and 73 ppm Xylenes in the sample collected at 95.5 ft bgs. Methyl tert Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the monitoring program. In December, a soil vapor extraction test was performed on wells VW1 and VW2. The results indicated high vapor concentrations. Flow rates and radius of influence were suitable to encompass the mass of contaminated soil beneath the tankpit. 2001 In May and June, monitoring wells MW5 and MW6 were installed to 100 ft bgs downgradient of the site in Saratoga-Sunnyvale Road. Soil and groundwater samples were non-detect for all analytes. These wells were added to the monitoring program. 2004 In May, soil vapor extraction (SVE) was begun utilizing vapor wells VW1 and VW2 and monitoring well MW1 as extraction wells. The SVE operated through August 2010 and removed approximately 47,418 pounds of TPHg. 2005 In September, monitoring wells MW5 and MW6 were destroyed. 2007 Groundwater elevations fell substantially (approximately 10 feet) between 2007 and 2009 with MW1 and MW4 ultimately going dry. This, however, allowed the SVE system to draw vapors from the entire screened interval of MW1. Water levels began recovering in 2010 to the present day. FP did not reoccur in well MW1 when the groundwater elevation rose. 2011 In October, the final groundwater monitoring event was conducted and reported maximum concentrations of 140 ppb TPHg, 2.3 ppb Benzene, and 1 ppb Xylenes. Detections of these constituents were only reported for the samples from wells MW1 and MW4. In November, one soil boring (CB1) was advanced to 100 ft bgs

within the former tank excavation for the collection of confirmation soil samples. 10 soil samples were collected (1 every 10 feet) and reported to contain maximum concentrations of 1,400 ppm TPHg (90 ft bgs), 0.015 ppm Benzene (100 ft bgs), 10 ppm Toluene (90 ft bgs), and 190 ppm Xylenes (90 ft bgs). The concentrations of TPHg, Toluene, and Xylenes in the 100 foot sample decreased significantly to 1, <0.005, and 0.018 ppm, respectively. Groundwater was encountered during drilling at approximately 97 ft bgs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A

Number of Days to Update: 29	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346
Date Made Active in Reports: 01/06/2017	Last EDR Contact: 04/21/2017

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/10/2016	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Number of Days to Update: 66	Next Scheduled EDR Contact: 06/12/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 5665-4CD1-A23A

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

AEI Consultants (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Licensed Contractors Declaration: I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Date: _____ Contractor Signature: _____

Owner-Builder Declaration: I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.3 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9, (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.3 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

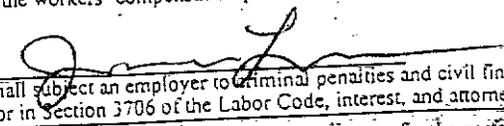

- I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).
- I, as owner of property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the project with a contractor(s) licensed pursuant to the Contractors License Law).
- I am exempt under Sec. _____ B & P.C. for this reason

Date: 12/20/00 Owner Signature: 

Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:
 I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.
 I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

CARRIER: _____ POLICY NO. _____

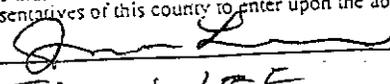

(This section need not be completed if the permit is for one hundred dollars (\$100) or less.)
 I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 12/20/00 Applicant Signature: 
WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney fees.

Construction Lending Agency Declaration: I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name: _____ Lender's Address: _____

I Certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

AGREEMENT FOR PROFESSIONAL SERVICES

This is an Agreement between DAVID J. POWERS & ASSOCIATES, INC. (hereinafter “CONSULTANT”), and AEI CONSULTANTS, (hereinafter “SUBCONSULTANT”), for professional services in connection with the project described below:

I. Project:

Job No. 17-008

Bark Lane Residential Project

II. Scope of Services:

Subconsultant shall prepare a Phase I Environmental Site Assessment as described in the attached scope of work (refer to Exhibit A).

III. Compensation:

1. Basic Compensation:

Compensation will be paid in an amount not to exceed \$2,000, on a times and materials basis, based on work completed.

2. Additional Services:

None

3. Method of Payment:

CONSULTANT will reimburse SUBCONSULTANT upon receipt by CONSULTANT of payment from their client (JASON LEE).

IV. Insurance:

SUBCONSULTANT shall, throughout the duration of this Agreement, maintain insurance to cover SUBCONSULTANT (including its agents, representatives, subconsultants, and employees) in connection with the performance of services under this Agreement.

Concurrently with the execution of this Agreement by SUBCONSULTANT, and prior to the commencement of any services, SUBCONSULTANT shall furnish written proof of insurance (certificates and endorsements) to the CONSULTANT for the marked minimum insurance levels:

- Commercial General Liability coverage in an amount not less than one million dollars (\$1,000,000) per occurrence and two million dollars (\$2,000,000) general aggregate for general liability, bodily injury, personal injury, and property damage.
- Automobile Liability coverage in an amount not less than one million dollars (\$1,000,000) per accident for bodily injury and property damage.
- Workers' Compensation coverage as required by the State of California.
- Professional Liability coverage for damages that may be the result of errors, omissions, or negligent acts of SUBCONSULTANT in an amount not less than one million dollars (\$1,000,000) per claim and annual aggregate.

General Liability and owned Automobile Liability insurance under this contract shall be endorsed to contain the following clause:

“David J. Powers & Associates, Inc., its officials and employees are added as additional insured as respects the operations and activities of, and on behalf of, the named insured's performance under its contract with David J. Powers & Associates, Inc.”

Please note our job number (#17-008) on the insurance certificate(s).

V. General:

1. SUBCONSULTANT is an independent contractor and all persons employed by SUBCONSULTANT in connection herewith shall be its employees and not employees of CONSULTANT in any respect.
2. SUBCONSULTANT shall comply with applicable local, state, and federal laws, rules and regulations and shall obtain all permits required for the work to be performed hereunder.
3. Should litigation occur between the two parties relating to the provisions of this Agreement, all litigation expenses, collection expenses, witness fees, court costs and reasonable attorney's fees shall be paid by the non-prevailing party to the prevailing party.
4. Time is of the essence in this agreement. Work shall commence immediately upon execution of this Agreement.
5. In the event any provision of this Agreement shall be held to be invalid and unenforceable, the remaining provisions shall be valid and binding upon the parties. One or more waivers by either party of any provision, term, condition or covenant shall not be construed by the other party as a waiver or a subsequent breach of the same by the other party.
6. SUBCONSULTANT shall be responsible for the same general terms, conditions and restrictions as are binding by reason of the Agreement between CONSULTANT and

JASON LEE (see Exhibit B of this Agreement), and as limited to that portion of the work covered by this Agreement.

7. SUBCONSULTANT shall indemnify and defend CONSULTANT (including its officers, agents and employees) against all suits, losses, damages, expenses (including reasonable attorney's fees), and liability for injury or harm to persons or property only to the extent caused by the negligent performance of this Agreement, excepting only such injury or harm as may be caused by the fault or negligence of the CONSULTANT.

VI. Additional Provisions:

None.

VII. Scope of Agreement:

This is the entire agreement between the parties and there are no conditions, agreements or representations between the parties except as expressed herein. It is not the intent of the parties to this Agreement to form a partnership or joint venture.

This above is mutually agreed to the 26th day of April, 2017.

Fiona Phung
David J. Powers & Associates Inc.
1871 The Alameda, Suite 200
San Jose, California 95126

RE: Proposal for Phase I ESA
7201 Bark Lane, San Jose, CA

Dear Ms. Phung:

In response to your request for technical reports for the above referenced site, AEI Consultants (AEI) is pleased to present this proposal with our attached Terms and Conditions to complete a Phase I ESA. AEI will follow the scopes of work as stated in the American Society for Testing and Materials (ASTM) to complete these technical requirements.

AEI understands the property consists of the following:

Property Description	
Property Type or Use	Multi-Family
Purpose of Assessment	Redevelop – residential
Date of Construction	1961
Lender Name	TBD
Number of Buildings	3 buildings
Number of Units	20 Units
Gross Building Area / Land Area	18,236 sq. ft. / 0.92 acres
Assessor Parcel Number's (APN)	372-24-011

Proposed Fees:

AEI will complete the below stated scopes of work for the following fees:

	Service	Fee per Service
<input type="checkbox"/>	Phase I ESA - AAI	\$2,000.00

The total cost of the project will be adjusted based on the above selected services. If all services are selected, the total project will be \$2,000.00.

Schedule:

The project will be completed within 15 working days of receiving the signed Authorization to Proceed. Due to the number of days allotted to complete this investigation, responses from some regulatory agencies may not be received prior to the report due date. As such, the report may contain limitations pertaining to the lack of agency responses to the Freedom of Information Act requests and/or records review.

Payment Terms and Deliverables:

An invoice for the full contract amount will be issued at the completion of the assessment. AEI will deliver one electronic DRAFT copy of the report. Upon receipt of comments, AEI will deliver one electronic final copy of the report.

In the event that the client cancels the contract, then the client will be responsible for payment of incurred costs up to the cancellation notice date. If the project is placed on hold for longer than a 90-day period, AEI will cancel the project and the client will be responsible for incurred costs up to the hold date. Hold projects may be re-indicated at any time, and additional fees may apply.

Please review our proposal and if you have any questions, please do not hesitate to contact me. To initiate this contract, please sign the Authorization to Proceed, initial and date each page and return to AEI. Thank you for the opportunity to be of service.

Sincerely,

Tory Golino

SCOPE OF WORK

Phase I Environmental Site Assessment (ESA) ASTM E1527-13: The Phase I ESA will be performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). The Phase I ESA will be conducted under the charge of an Environmental Professional and will include the following:

- Site visit and walk-through of the property and structures, readily accessible interior common areas, and a representative sample of occupant spaces. Items such as current and past uses of the property and adjoining properties; property boundaries; observable topographic geologic, hydrogeologic conditions; structures or other improvements; roads; source and location of potable water; wells; surface water; potential hazardous substances and/or petroleum products; storage tanks; abnormal odors; pools of liquid; drums and containers; suspected fill materials; stain soil or pavement; stressed vegetation; solid waste; waste water discharges; floor drains, sumps or clarifiers; septic systems shall be noted as reasonably and visibly observed.
- Search of local, state, tribal and federal databases in accordance with current ASTM and AAI standard search distances.
- Contact local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.
- Site history and land use review, including reasonably ascertainable agency records, aerial photographs, historical city directories, fire insurance maps, and other applicable sources.
- Interviews with knowledgeable persons (i.e. past and present owners, property managers, tenants, neighbors), as available and open to interview, regarding the history, operations, waste management, and other environmental considerations for the property.
- Additional observations, though generally outside the scope of a PH I ESA, but provided as a service to our clients unless otherwise instructed, include EPA-determined radon zone, visual inspection of asbestos-containing building materials, lead-based paint, and mold.
- AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.
- Report includes findings, opinions and conclusions, photographs, site map, historical sources, and qualifications in a manner consistent with standard practices.

This proposal does not include searches for recorded environmental clean-up liens. AEI charges a fee of \$300.00 per parcel and/or parcel split. If you would like AEI to search for recorded environmental clean-up liens, please check the box under the fees section of this proposal.

TERMS AND CONDITIONS

- 1. Billings, Payment and Credit.** The Client shall pay All Environmental Inc. d/b/a AEI Consultants (AEI) for the services (the "Services") performed in accordance with the prices set forth in the proposal to which these terms and conditions are attached (the "Proposal", and together with these terms and conditions the "Agreement"). Invoices shall be submitted in accordance with the Proposal. Payment of the AEI invoices shall be the primary, absolute and non-contingent obligation of the Client, and shall not be conditioned upon the closing of a loan transaction or any other event. PAYMENT IS DUE UPON RECEIPT. If AEI does not receive payment in full within thirty (30) calendar days of the date of the invoice, the account shall be deemed delinquent. Unpaid delinquent balances shall bear interest from the invoice date at one and one-half percent (1.5%) per month, or at the maximum lawful interest rate (whichever rate is less).

The Client shall be liable to AEI for all costs and expenses of collection of delinquent balances, including reasonable attorney and other fees, and court costs. Time is of the essence with respect to this provision. AEI's non-exercise of any rights or remedies, whether specified herein or as otherwise provided by law, shall not be deemed a waiver of any rights or remedies, nor preclude AEI from the future exercise of such rights or remedies. If a third party is accepting a Proposal as agent for the Client, such third party represents and warrants to AEI that it is legally authorized to bind the Client to the terms of the Agreement and guarantees payment for services.
- 2. Right of Entry Force Majeure.** The Client shall arrange for the right of entry to the subject property ("Site") by AEI, its agents, employees, consultants, contractors and subcontractors, for the purpose of performing all acts as may be reasonably necessary to complete the Services within the agreed scope of work. AEI may require that an authorized, knowledgeable representative of the Site owner be present at the Site as a condition of the performance of the Services and may require that Site personnel operate major building systems and equipment at the time the Services are performed. AEI's ability to comply with the schedule for performance described in the Proposal is contingent upon timely and complete Site access. AEI shall not be responsible for damages or delays in performance caused by force majeure, acts of God, events beyond the control of AEI, or events that could not have been reasonably foreseen and prevented.
- 3. Documents/Samples.** All field notes, calculations, estimates and other documents, data or information prepared by or on behalf of AEI in connection with the performance of its Services (collectively, "Documents"), shall remain the sole property of AEI. All Documents prepared by AEI for the Client with respect to any Site shall be used solely for the intended purposes described in the Proposal, and solely with respect to the Site. Unless otherwise agreed, AEI shall retain all Documents for three (3) years following submission of AEI's report to the Client. In its sole discretion and without prior notice to the Client, AEI may dispose of all field samples within thirty (30) calendar days after submission of AEI's report to the Client.
- 4. Matters Known to Client.** The Client, itself or through the Site owner, shall provide AEI with any and all information known to the Client, or suspected by the Client, which pertains to: (a) the existence or possible existence at, on, under or in the vicinity of the Site, any hazardous materials, pollutants, lead-based paint, radon or asbestos; (b) any conditions at, on, under or in the vicinity of the Site, which might represent a potential safety hazard or danger to human health or the environment; (c) any permit, manifest, title record, or other record of compliance or non-compliance with any federal, state or local laws, or court or administrative order or decrees; (d) any known or suspected deficiencies or adverse conditions associated with structures or other physical improvements on Site; or (e) any modifications or changes from the original plans and specifications of Site improvements which could affect the recommendations or conclusions reached by AEI in the performance of its Services.
- 5. Preliminary Findings.** Preliminary findings (often referred to as "verbals") can be provided to the Client in order to quickly apprise them of preliminary data obtained as a result of AEI's visual observations at the project Site. They are not intended to be exhaustive or conclusive or to substitute for the final written report, as they do not include information obtained from a number of other important and necessary components of the overall assessment. AEI recommends against making any decisions based upon such limited, preliminary, verbal information.
- 6. PERFORMANCE STANDARDS.** IN PERFORMING THE SERVICES, AEI SHALL EXERCISE THE DEGREE OF SKILL AND CARE NORMALLY EXERCISED BY CONSULTANTS IN THE SAME COMMUNITY PROVIDING THE SAME OR SIMILAR SERVICES FOR PROJECTS OF COMPARABLE SIZE, COMPLEXITY, BUDGET, SCHEDULE AND OTHER CHARACTERISTICS OF THE PROJECT (THE "STANDARD OF CARE"). EXCEPT AS SET FORTH IN THE IMMEDIATELY PRECEDING SENTENCE, AEI MAKES NO WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES OR ANY OF ITS ORAL OR WRITTEN REPORTS. CLIENT ACKNOWLEDGES AND AGREES THAT (I) THE SERVICES MAY REQUIRE JUDGMENTS TO BE MADE BY AEI THAT ARE BASED UPON LIMITED DATA RATHER THAN UPON SCIENTIFIC CERTAINTIES; (II) AEI'S APPROACH, RECOMMENDATIONS, AND ASSOCIATED COST ESTIMATES, IF ANY, ARE BASED ON INDUSTRY PRACTICES AND AVERAGES; (III) PROFESSIONAL OPINIONS ARE RENDERED WITH RESPECT TO OBSERVATIONS MADE AND DATA OBTAINED AT THE TIME OF ASSESSMENT; AND (IV) ULTIMATE OUTCOMES COULD BE INCONSISTENT WITH THE CONCLUSIONS, RESULTS AND PROJECTIONS OF AEI. ALL INFORMATION REGARDING OPERATIONS, PLANS, SPECIFICATIONS, CONDITIONS OR OTHER DATA WHICH IS PROVIDED TO AEI BY CLIENT, OWNERS OR THIRD PARTIES (INCLUDING WITHOUT LIMITATION, ANY POINT OF CONTACT AT THE SITE), IS DEEMED BY AEI TO BE CORRECT AND COMPLETE WITHOUT INDEPENDENT VERIFICATION. AEI ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION AND SHALL NOT BE LIABLE IF RELIANCE ON SUCH INFORMATION RESULTS IN INCORRECT CONCLUSIONS OR RESULTS.
- 7. INDEMNIFICATION AND LIMITATION OF LIABILITY.** AEI AGREES TO INDEMNIFY AND HOLD HARMLESS (BUT NOT DEFEND) CLIENT, ITS DIRECTORS, OFFICERS AND EMPLOYEES AGAINST ANY LOSSES, LIABILITY, DAMAGES, COSTS AND EXPENSES TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS, ERRORS, OR OMISSIONS OF AEI, ITS EMPLOYEES, SUBCONTRACTORS OR ANYONE FOR WHOM AEI IS LEGALLY LIABLE, IN THE PERFORMANCE OF SERVICES HERUNDER. IN NO EVENT SHALL AEI BE LIABLE FOR LATENT OR HIDDEN CONDITIONS, CONDITIONS NOT ACTUALLY OBSERVED BY AEI WITHIN THE LIMITED SCOPE OF WORK, THE POTENTIAL CONSEQUENCES OF OBSERVABLE CONDITIONS, CONDITIONS OF WHICH CLIENT HAD KNOWLEDGE OF AT THE TIME OF THE ASSESSMENT, OR ANY UNAUTHORIZED ASSIGNMENT OF OR RELIANCE UPON THE REPORTS. THE LIABILITY OF AEI, AND THAT OF ITS OFFICERS, DIRECTORS, EMPLOYEES, AGENTS AND SUBCONTRACTORS, TO CLIENT OR TO ANY THIRD PARTY CLAIMING BY OR THROUGH CLIENT, INCLUDING ANY COMPANY AFFILIATED WITH CLIENT, OR ANY OFFICER, DIRECTOR, EMPLOYEE, AGENT, SUBCONTRACTOR, SUCCESSOR, OR ASSIGN OF SUCH PARTIES, FOR ANY LOSSES, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY), RELATED TO THE SERVICES, THE AGREEMENT OR OTHERWISE, SHALL NOT EXCEED THE AGGREGATE SUM OF TWENTY-FIVE THOUSAND DOLLARS (\$25,000.00). IN NO EVENT SHALL AEI BE LIABLE TO CLIENT FOR ANY EXEMPLARY, PUNITIVE, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) ARISING FROM OR IN ANY WAY CONNECTED WITH ITS PERFORMANCE OR FAILURE TO PERFORM UNDER THE AGREEMENT, EVEN IF THE AFFECTED PARTY HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.
- 8. Dispute Resolution.** This Agreement shall be governed by, subject to, and construed in accordance with the laws of the State of California. Any controversy, claim or action arising out of, or related to, this Agreement, the breach thereof, or the coverage of this arbitration provision may be settled by arbitration and will be based on the rules in effect on the date of delivery of demand for arbitration. The arbitrator(s) shall apply California substantive law to the proceedings, except to the extent Federal substantive law would apply to the claim. The arbitrator(s) shall prepare in writing and provide to the parties an award including actual findings and the reasons on which their decision is based. The arbitrator shall not have the power to commit errors of law or legal reasoning, and the award may be vacated or corrected on appeal to a court of competent jurisdiction for any such error. The arbitration of such issues, including the determination of the amount of any damages suffered by either party hereto by reason of the acts or omissions of the other, shall be to the exclusion of any court of law except for enforcement of an arbitrated award. The decision of the arbitrators, or a majority of them, shall be final and binding on both parties and their respective successors and assigns. If the arbitrators determine that a party has initiated a recovery action on a basis inconsistent with the provisions of this Agreement, the initiating party shall, without exception, be assessed all costs incurred by the responding party. Except as identified above, each party shall pay the fees of its own attorneys, and the expenses of its witnesses and all other expenses connected with the presentation of its case. The costs of the arbitration, including the cost of the record or transcripts thereof, if any, administrative fees, fees of the arbitrators, and all other fees and cost shall be borne as determined by the arbitrators.
- 9. RELIANCE AND ASSIGNMENT.** AEI'S WRITTEN REPORT SHALL CONTAIN AEI'S STANDARD RELIANCE LANGUAGE UNLESS ALTERNATE LANGUAGE HAS BEEN PRE-APPROVED BY AEI. IF NO PRE-APPROVED ALTERNATE LANGUAGE EXISTS, THE SERVICES, THE REPORTS AND OTHER RELATED WORK PRODUCT PROVIDED BY AEI MAY BE RELIED UPON BY THE CLIENT, ITS SUCCESSORS AND ASSIGNS WITH RESPECT TO A LOAN SECURED BY THE SITE, AND ANY RATING AGENCY RATING, OR ANY ISSUER OR PURCHASER OF, ANY SECURITY COLLATERALIZED OR OTHERWISE BACKED BY SUCH LOAN. NO OTHER PERSON OR ENTITY MAY RELY ON THE REPORT WITHOUT THE ADVANCE WRITTEN CONSENT OF AEI, AND NO OTHER THIRD PARTY BENEFICIARIES ARE INTENDED. EXCEPT AS DESCRIBED ABOVE, THE CLIENT SHALL NOT ASSIGN THE AGREEMENT, ANY REPORT OR ANY RELATED WORK PRODUCT, WITHOUT THE PRIOR WRITTEN CONSENT OF AEI. ANY UNAUTHORIZED REUSE OR REDISTRIBUTION OF AEI'S WORK PRODUCT OR REPORTS SHALL BE AT THE CLIENT'S AND RECIPIENT'S SOLE RISK, WITHOUT LIABILITY TO AEI. CLIENT WILL HOLD AEI HARMLESS FROM ANY AND ALL LIABILITY, OBLIGATION, COST AND EXPENSE ARISING FROM OR RELATED TO ANY UNAUTHORIZED DISTRIBUTION OR USE BY CLIENT OF AEI'S WORK PRODUCT OR REPORTS. AEI SHALL NOT ASSIGN ITS OBLIGATIONS UNDER THE PROPOSAL. HOWEVER, AEI MAY EMPLOY, BY SUBCONTRACT, SUITABLY TRAINED PERSONS OR ENTITIES ACCEPTABLE TO AEI TO PERFORM THE SERVICES.
- 10. Confidentiality.** AEI shall not disclose information regarding the Proposal, the Services or any Documents, except to the Client, employees, consultants, subcontractors, or other persons engaged by AEI to perform the Services, third parties designated by the Client (subject to the reliance limitations described herein), or as required by law. Notwithstanding the terms of this Section, AEI shall comply with all judicial orders, government directives, and laws, regulations and ordinances, regarding the reporting to appropriate public agencies of potential dangers to public health, safety or the environment.
- 11. Miscellaneous.** AEI is an independent contractor of Client, and not Client's agent, employee or partner. The Agreement shall be governed by the laws of the State of California and the parties irrevocably consent to the jurisdiction of the courts of the State of California and of the United States District Court for the District of Northern California if a basis for federal jurisdiction exists. In the event a dispute relating to an AEI report results in litigation, and the claimant does not prevail at trial, then the claimant shall pay all costs incurred by AEI in the defense of the claim, including reasonable attorney's fees. Each provision of the Agreement shall be considered separable, and if, for any reason, any provision or provisions herein are determined to be invalid and contrary to any existing or future law, such invalidity shall not affect those portions of this Agreement that are valid. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, between the parties with respect to the Services to be provided pursuant to this Agreement. The provisions of the Agreement may only be modified by a written instrument signed by an authorized representative of each party.
- 12. Hazardous Waste and Reporting.** The Client understands and agrees that human health and safety is a priority in implementing any investigation or assessment. AEI and Client agree that the discovery of hazardous materials, suspect hazardous materials or petroleum products, or unexpected conditions may constitute a change in the condition of the job Site mandating a renegotiation of the scope of work or termination of the project and may make it necessary for AEI to take immediate measures to protect human health and safety. AEI agrees to notify Client as soon as practicable if such materials are encountered. Client encourages AEI to take any and all measures, that in AEI's professional opinion, are justified to protect AEI's personnel and the public. Client agrees to waive any claim against AEI and to indemnify, defend and hold harmless AEI from any and all claims arising out of AEI's encountering unanticipated hazardous materials or suspected hazardous materials. Client agrees to compensate AEI for all costs associated with such an event based upon AEI's prevailing fee schedule.
- 13. Utilities.** If AEI is expressly engaged to perform soil boring or other invasive testing, AEI shall not be responsible for damages to underground or aboveground utilities, for unmarked or mismarked utilities or other features, or for damage that occurs to such utilities or features. The Client is responsible for providing information to AEI regarding the location of intra-Site utilities. Client recognizes that the use of exploration equipment may unavoidably affect, alter or damage existing structures, vegetation and terrain at the Site. AEI, including subcontractors, will take reasonable precautions to limit damage. However, Client recognizes that such damage is inherent in the normal course of the contracted scope of work and the cost of the repair for any damages is not part of the contracted services. In the event of damage to the property as a result of such work and specifically stated above, Client will hold harmless, AEI, including subcontractors, for damage caused during the course of the agreed upon scope of work.
- 14. Conflict of Interest.** To the best of AEI's knowledge, AEI has no actual, potential or apparent conflict of interest pertaining to this Agreement, except as has been previously disclosed to Client in writing, and AEI covenants and agrees that it shall promptly advise Client of any other actual, potential or apparent conflicts of interest, whether existing as of the execution date of this Agreement or arising in the future, upon discovering the same.

Services Offered by AEI include:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Phase II Subsurface Investigations
- Asbestos/Lead Based Paint Surveys
- Vapor Intrusion Studies
- Remediation Services
- Property Condition Assessments
- Seismic Risk Assessments (PML)
- Energy Audits
- Mold Surveys
- Operation & Maintenance and Moisture Management Plans
- Zoning Reports
- ALTA Surveys
- Construction Monitoring
- Radon Surveys
- Construction Consulting Services

San Jose, CA 95129

RE: BARK LANE RESIDENTIAL PROJECT BUDGET AMENDMENT REQUEST

Dear Mr. Lee:

As previously discussed via e-mail with Lawrence DeSantis, we are requesting an amendment to our contract for the Bark Lane Residential project to include a Phase I Environmental Site Assessment for the CEQA analysis. The cost to complete this additional work will be \$2,300. No additional in-house staff time is required for this technical analysis. The inclusion of the Phase I report will increase our project budget to \$84,314.

We have been informed that the site plan will be modified. Due to the need for DJP&A to complete the Phase I Assessment and because project plans are being revised, the schedule for the analysis has changed. The new project schedule is attached.

A dated countersigned copy of this letter agreement, returned to me, will serve as our binding legal agreement for the services herein described. We appreciate your consideration of this request. Please call Shannon George at (408) 454-3402 or me with any questions or to discuss this matter further.

Sincerely,

Judy Shanley
President

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
BARK LANE APARTMENTS
SAN JOSE, CALIFORNIA**

1.0 INTRODUCTION

1.1 Purpose

This Phase I environmental site assessment was performed for David J. Powers and Associates, who we understand is preparing an environmental review for a client considering the purchase and redevelopment of the site shown on Figures 1 and 2. The planned development reportedly consists of the demolition of the existing structures and construction of up to 45 single family attached residential units that would be located within one structure up to 49 feet tall.

The purpose of this study was to strive to document recognized environmental conditions at the site related to current and historic use of hazardous substances and petroleum products. The term "recognized environmental conditions" means the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate a significant release or significant threat of a release into the ground, ground water, or surface water.

1.2 Scope of Work

As requested, the scope of work for this study was performed in general accordance with the American Society for Testing and Materials (ASTM) Designation E 1527-05 as outlined in our agreement dated October 20, 2006. The scope of work included the following tasks.

- Reconnaissance of the site and limited drive-by survey of adjacent properties for readily observable indications of current or historic activities that have or could significantly impact the site.
- Review of readily available topographic maps and reports to evaluate local hydrogeologic conditions including anticipated ground water depth and flow direction.
- Review of readily available documents, maps, and aerial photographs, and interviews with knowledgeable persons to evaluate past land uses.
- Acquisition and review of a regulatory agency database report to evaluate potential impacts to the site from reported contamination incidents at nearby facilities.
- Review of available regulatory agency files to obtain information about the use and storage of hazardous materials at the site.

Our scope of services did not include sampling or analysis of on-site building materials, air, soil, or ground water. The limitations of this Phase I environmental site assessment are presented in Section 6.0; the terms and conditions of our agreement are presented in Appendix A.

- 1.3** This work was performed under the oversight of Ron L. Helm, C.E.G., R.E.A. II, who meets the ASTM E 1527-05 qualifications.

2.0 SITE RECONNAISSANCE

2.1 Site Location and Ownership

The site is located at 7201, 7221, and 7245 Bark Lane in a residential area of San Jose, California. It is bounded by apartment buildings to the north, Bark Lane, apartment buildings, and a commercial strip center to the south, a vacant lot to the west, and apartment buildings to the east. The site is owned by Mr. and Mrs. Jason and Lily Lee, who reportedly purchased the property from the previous owner, Mr. Ed Lichtman, in 1989. The site's existing General Plan land use designation is High Density Residential (25-50 DU/AC). Site location and ownership information is shown in Table 1.

Table 1. Site Information

Site Address	APN	Approximate Acreage	Site Owner	Approximate Square Footage of Buildings
7201, 7221, and 7245 Bark Lane, San Jose	372-24-011	0.90	Jason and Lily Lee	27,000 (three buildings)

2.2 Topographic Features and Hydrogeology

Based on U.S. Geological Survey (USGS) topographic maps, the site's elevation is approximately 275 feet above mean sea level. Topography in the vicinity of the site slopes gently to the northeast toward the San Francisco Bay. Although we have not reviewed site-specific ground water data, based on information for nearby sites available on the Geotracker web site, the shallow water-bearing zone likely is encountered at depths of 70 to 80 feet; ground water beneath the site likely flows to the northwest.

2.3 Site Visit

To observe current site conditions, our representative, environmental engineer Belinda Blackie, visited the site on January 2, 2007 and was unaccompanied. At the time of our site visit, the subject property was developed with a three-building apartment complex with associated landscaped areas, asphalt driveways and parking areas, and a fenced swimming pool. The three buildings were generally similar in configuration, with private garages on the ground floor and two levels of living space above.

Reconnaissance only of the exterior areas of the apartment complex was performed; observation of the interior of the private living units was not conducted.

The apartment garages were accessed by the driveway extending around the exterior of the three buildings, which were generally configured in a "U" around the swimming pool and landscaped area (Figure 2). The ground surface in the interior of the "U" was even with the first floor of living space, elevated approximately one story above the ground surface around the exterior of the "U".

The swimming pool was enclosed by a fence. One aged box of diatomaceous earth was observed within the pool enclosure; no other pool chemicals were observed within the enclosure or in the vicinity of the pool.

Three automotive batteries were observed on the asphalt adjacent to a trash dumpster at the northeastern corner of the site. Staining or corrosion of the asphalt around the batteries was not observed.

Additional observed site features are listed in Table 2.

Table 2. Additional Readily Observable Site Features

Site Features		Comments
Heating/Ventilation/Air Conditioning System	<input checked="" type="checkbox"/> Natural Gas and/or Electrical <input type="checkbox"/> Fuel Oil	
Potable Water Supply	<input checked="" type="checkbox"/> Municipal <input type="checkbox"/> On-Site Well	
Sewage Disposal Syst.	<input checked="" type="checkbox"/> POTW <input type="checkbox"/> On-Site Septic	
Transformers	<input type="checkbox"/> Present <input checked="" type="checkbox"/> Not Observed <input type="checkbox"/> PG&E <input type="checkbox"/> Privately Owned	
Other Features	<input type="checkbox"/> Aboveground Storage Tanks <input type="checkbox"/> Agricultural Wells <input type="checkbox"/> Air Emission Control Systems <input type="checkbox"/> Auto Servicing Areas <input type="checkbox"/> Boilers <input type="checkbox"/> Burning Areas <input type="checkbox"/> Chemical Mixing Areas <input type="checkbox"/> Chemical Storage Areas <input type="checkbox"/> Clean Rooms <input type="checkbox"/> Drainage Ditches <input type="checkbox"/> Dry Wells <input type="checkbox"/> Elevators <input type="checkbox"/> Emergency Generators <input type="checkbox"/> Equipment Maintenance Areas <input checked="" type="checkbox"/> Garbage Disposal Areas <input type="checkbox"/> HazMat Storage Areas <input type="checkbox"/> High Power Transmission Lines <input type="checkbox"/> Hoods and Ducting <input type="checkbox"/> Hydraulic Lifts <input type="checkbox"/> Petroleum Pipelines <input type="checkbox"/> Petroleum Wells <input type="checkbox"/> Ponds or Streams	Municipal waste dumpsters and recycling bins observed at northwestern and northeastern corners of the property

<input type="checkbox"/> Railroad Lines <input type="checkbox"/> Row Crops or Orchards <input type="checkbox"/> Stockpiles of Soil or Debris <input type="checkbox"/> Sumps or Clarifiers <input type="checkbox"/> Underground Storage Tanks <input type="checkbox"/> Vehicle Maintenance Areas <input type="checkbox"/> Vehicle Wash Areas <input type="checkbox"/> Waste Water Neutralization Systems <input type="checkbox"/> Other Wells	
--	--

Note: An unchecked box does not warrant that these features are not present on-site; it only states that these features were not readily observed during our site visit.

2.4 Site Vicinity Drive-By Survey

To evaluate adjacent land use, we performed a limited drive-by survey. Our observations are presented in Table 3.

Table 3. Adjacent Properties

Business Name and Address	Direction from Site	Observations
Apartment buildings	North and East	
Monsters of Rock #2/ Pure Water/ Bona Mini Market/ Office 7250 Bark Lane	South	Small strip center with retail/office tenants
Apartment buildings		
Vacant lot	West	Fenced, weed-covered lot with a small pit containing a protruding steel pipe adjacent to Bark Lane

2.5 Interviews with Current Site Owner/Occupant

During our study, we contacted Mr. Jason Lee, one of the current property owners and the on-site complex manager, for general information regarding past and current site usage. Mr. Lee was asked to complete a questionnaire and was interviewed via the internet; a copy of the completed questionnaire is presented in Appendix B.

Mr. Lee and his wife, Lily Lee, reportedly purchased the 20-unit apartment complex in 1989 from Mr. Ed Lichtman. The complex reportedly was constructed in 1962; Mr. Lichtman owned the site from 1982 until 1989. The complex currently is rented on a month-to-month basis to 19 tenants, with the Lees occupying the 20th unit. Mr. Lee stated that no hazardous materials are used or stored on-site. Up to ten 1-gallon bottles of liquid pool chlorine (5 cases) at a time reportedly are stored in Mr. Lee's garage on the concrete slab floor. Mr. Lee stated that the bottles are spill-proof and

that no releases have occurred. Other pool chemicals are not stored on-site and are purchased on an as-needed basis.

Mr. Lee was unaware of any environmental clean-ups or related activities at the site or of any limitations filed or recorded under Federal, tribal, State, or local law. Mr. Lee also had no specialized knowledge or experience related to the site or nearby properties related to potential hazardous materials issued on-site.

2.6 Interviews with Previous Site Owner

Contact information from 1989 was available for Mr. Ed Lichtman, the previous site owner. We attempted to contact Mr. Lichtman, but the information no longer was correct and he was unable to be reached.

3.0 USER PROVIDED INFORMATION

3.1 Specialized Knowledge

The ASTM standard defines the User as the party seeking to use a Phase I environmental site assessment to evaluate the environmental condition of the site. If the User is aware of any specialized knowledge or experience that is material to recognized environmental conditions in connection with the site, it is the User's responsibility to communicate any information based on such specialized knowledge to TRC Lowney. For the purpose of this Phase I environmental site assessment, the User is David J. Powers and Associates. Based on our discussions with David J. Powers and Associates and Mr. Jason Lee, the current site owner, we understand that they do not have any such specialized site knowledge.

3.2 Commonly Known or Reasonably Ascertainable Information

The ASTM standard requires that if the User (David J. Powers and Associates) is aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property, it is the User's responsibility to communicate such information to the environmental professional.

David J. Powers and Associates provided one page of an undated title report for the site, prepared by Old Republic Title Company, to TRC Lowney for their review. Based on review of the document, Thinman, Inc. deeded the site to Jason C. Lee and Lily Fu Lee on January 4, 1989. The property subsequently was deeded by Jason C. Lee to Lily Fu Lee as her sole and separate property on June 9, 2000. Most recently, the property was deeded by Lily Fu Lee to Lily Fu Lee and Jason C. Lee as community property on November 30, 2006.

4.0 HISTORICAL REVIEW

The ASTM standard requires that all obvious uses of the subject property be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. Review of historical sources at less than approximately 5 year intervals is not required by this standard.

4.1 Photograph and Map Review

To evaluate the site history, we reviewed the following.

- Stereo-paired aerial photographs (dated 1939, 1948, 1956, 1965, 1982, 1993, and 1998) from Environmental Data Resources, Inc. (EDR) in Southport, Connecticut.
- USGS 15-minute and 7.5-minute topographic maps (1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, and 1991).
- Historic Sanborn fire insurance maps were requested from EDR in Southport, Connecticut. However, no Sanborn maps were available.

The above maps and photographs commonly provide historical information regarding a site including land uses and changes in development over time. Copies of these maps and photographs are presented in Appendix C. The following is a summary of our observations for the site and site vicinity.

4.1.1 Site

1899 through 1902: The exact location of the site was difficult to determine on the early topographic maps, but a single building and/or a portion of a small road may have been present on-site.

1939 through 1956: The aerial photographs from this time period and the 1948 topographic map showed the site cultivated with an orchard. What appeared to be a single-family residence, with an associated out-building, was visible on or adjacent to the western property boundary on the aerial photographs and 1943 through 1948 topographic maps.

1961: The site was depicted as being a portion of a large orchard.

1965 through present: The current apartment complex was present by 1965.

4.1.2 Site Vicinity

1899 through 1902: The site vicinity was depicted as being sparsely developed with what appeared primarily to be residences and small roads. A small street was present in the current location of De Anza Boulevard.

1939 through 1956: The site vicinity primarily was cultivated with orchards on the 1956 photograph, with what appeared to be single-family residences scattered through the area. By 1956, one residential tract of homes was visible southwest of De Anza Boulevard, in the current location of the Rainbow Drive/Highway 85 intersection. The small street remained present in the current location of De Anza Boulevard; other current surface streets and Highway 85 were not present.

1961 through present: By 1965, the site vicinity to the west, east, and south appeared generally similar to the current development. The vicinity south and east of the site primarily was residentially developed with multi-family housing; the vicinity

along De Anza Boulevard, west of the site, appeared largely commercially developed. A single building, appearing commercial, was present immediately west of the site on the 1965 through 1993 photographs and 1961 through 1980 topographic maps, in the current location of the adjacent vacant lot. The current gas station appeared present on the corner of Bark Lane and De Anza Boulevard by 1965. The northern site vicinity, including the property immediately north of the site, was largely undeveloped in 1965, but appeared developed with apartment buildings by 1985. All current surface streets were present by 1965; portions the right-of-way for Highway 85 were visible southwest of the site as early as 1985.

3.2 City Directories

Our review of available city directories obtained from EDR, Inc. suggested that past site occupants were primarily residential. The EDR report is presented in Appendix D. Assorted residential tenant names, as well as a listing as "apartment" and Bark Lane Apartments, were present in directories available from 1963 through 2000. In the 2000 directory, commercial listings for Bona Mini Market, Company Image, Dynmo, Inc., Parkin Security Consultant, and Work Safe Technology at 7245 Bark Lane were listed in addition to the residential listings for that address; these listings appear to be in error as no other indication of commercial development on-site was encountered during this study and Bona Mini Market was observed at 7250 Bark Lane at the time of the site reconnaissance. No listings were available for the site addresses in directories from 1922 through 1962.

4.0 REGULATORY RECORDS

4.1 City and County Agencies File Review

To obtain information on hazardous materials usage and storage, we reviewed readily available information at the San Jose Building Department (SJBD), San Jose Fire Department (SJFD), and Santa Clara County Environmental Health Department (SCCEHD) pertaining to site addresses 7201, 7221, and 7245 Bark Lane in San Jose. According to a representative of the SCCEHD, no hazardous materials file information was available for the site addresses; no hazardous materials file information for the site addresses was available on the public access computers for the SJFD. The information available on the public access computers for the SJBD is summarized in Table 4 .

Table 4. Available File Review Information

Agency	Date	Entity	Remarks
<i>7201 Bark Lane</i>			
SJBD	1/23/61	Trojan Construction Co.	Permit to build six-unit apartment building. One portion of permit finalized was completion of a retaining wall. Permit indicated as closed.
SJBD	11/4/68	---	Survey of fire damage; structural damage noted.
SJBD	9/25/81	Ed Lichtman	Permit to repair fire damage to apartment building.
SJBD	2/13/01	Lee	Permit for new water heater.
<i>7221 Bark Lane</i>			
SJBD	1/23/61	Trojan Construction Co.	Permit to build eight-unit apartment building. Permit indicated as closed.
SJBD	11/4/68	---	Survey of fire damage; structural damage noted.
SJBD	12/20/00	---	Permit for water heater.
<i>7245 Bark Lane</i>			
SJBD	1/23/61	Trojan Construction Co.	Permit to build six-unit apartment building. Permit indicated as closed.
SJBD	8/2/71	H. Lacey	Gas permit for apartment building.
SJBD	12/20/00	---	Permit for water heater.

4.2 Regulatory Agency Database Report

During this study, a regulatory agency database report was obtained and reviewed to help establish whether contamination incidents have been reported in the site vicinity. A list of the database sources reviewed, a detailed description of the sources, and a radius map indicating the location of the reported facilities relative to the project site are presented in Appendix E.

Nearby reported hazardous materials spills and releases considered to have a moderate or high potential to impact the site are presented in Table 5. The potential for site impact was evaluated based on information in the database records regarding the type of release, current case status, and distance and direction from the site.

Table 5. Nearby Reported Hazardous Materials Spills and Releases

Facility	Map ID No.	Address	Distance and Direction From Site	Remarks
Ann S. Wash & Dry	1	7260 Bark Lane	<1/8-mile southwest (up-gradient)	Historical cleaning/dyeing facility listed as present in 1970. No further information available.
Exxon #7-0108	B7	1188 Saratoga-Sunnyvale Road (De Anza Boulevard)	<1/8-mile west (cross-gradient)	Leaking underground storage tank (LUST) facility. Release of gasoline reportedly impacted drinking water in 1990; case closed in 1999. Methyl tertiary butyl ether (MTBE) documented at 2.5 parts per billion (ppb).
Quality Tune Up #3	B8	1192 Saratoga-Sunnyvale Road (De Anza Boulevard)	<1/8-mile southwest (up-gradient)	LUST facility. Release of gasoline reportedly impacted drinking water in 1989. Characterization of impact initiated in 1993. MTBE evaluated in 2002, documented at 20 ppb in ground water and 0.1 ppb in soil. Case remains open.

4.3 Radon

Studies conducted by the California Department of Health Services (DHS) at 2,858 sites in California revealed that 3.8 percent had radon levels above 4 picocuries per liter (pCi/l) with the highest known reading at 29 pCi/l. The United States Environmental Protection Agency (EPA) has set a recommended action level at 4 pCi/l.

Based on information provided in the regulatory agency database report obtained from EDR and presented in Appendix E, two Federal and seven State radon screening tests have been performed in the site zip code (95129). All radon concentrations detected in both the State and Federal tests were less than 4 pCi/l; the average radon activity in the Federal tests was reported to be 1.85 pCi/l.

5.0 CONCLUSIONS

5.1 Historical Summary

A structure and possibly part of a small road appeared present on or in the immediate site vicinity as early as 1899. The site was cultivated with orchards, part of a larger vicinity orchard, as early as 1939 continuing through the late 1950s/early 1960s. Possible orchard cultivation earlier than 1939 also may have existed, but early

topographic maps generally did not depict that type of development. An apparent single-family residence with an associated out-building (appearing to be a different structure than the earlier structure and road) was present on or adjacent to the site during the same time period as the orchard.

The current on-site apartment buildings reportedly were constructed in 1962 and appeared to have remained similar from that time to the present. Current and previous owners of the site as it currently is developed appear to have been private individuals and couples.

Site information prior to 1899 was unavailable from sources researched, but based on our experience, site use prior to 1899 likely was either agricultural or undeveloped land.

5.2 Agricultural Use

The site was used for agricultural purposes (orchards) for several decades. During the course of agricultural use, pesticides such as DDT and lead arsenate may have been applied to trees and soil in the normal course of farming operations. Because the site has been developed, residual pesticide concentrations, if any, likely were reduced by mixing of the topsoil during construction. However, because redevelopment of the site for residential use is planned, soil sampling and analyses should be considered to evaluate the residual pesticide concentrations, if any, and potential health risks to future residents and construction workers and the potential liabilities and costs of the off-haul and disposal of pesticide-impacted soil. However, as we understand that the site likely will be almost entirely capped by the proposed development, risk to human health of the future residents is likely not significant.

5.3 Chemical Storage and Use

No information was found indicating that significant quantities of hazardous materials historically have been used or stored at the site, with the possible exception of agricultural chemicals as described in Section 5.2 above. Significant quantities of hazardous materials were not observed on-site at the time of our reconnaissance. Up to ten 1-gallon bottles of "spill-proof" liquid pool chlorine are present on-site at any time, stored on the concrete slab floor in Mr. Lee's garage. Other pool chemicals are not stored on-site. All hazardous materials should be removed from the site prior to property acquisition.

5.4 Historically Developed Areas

In addition to the structures currently present on-site, additional structures were visible on historical aerial photographs and topographic maps as summarized in Section 5.1 above. Undocumented buried structures, such as, septic tanks, wells, underground storage tanks (USTs), and other buried objects from these historic developments may have been present on-site. Although they likely would have been encountered during previous site development activities, if encountered during this project, these materials may require special handling and disposal.

5.5 Radon

Based on the data reviewed, in our opinion the risk of radon gas accumulation is not a significant environmental concern at the site.

5.6 Asbestos

Due to the age of the on-site buildings, asbestos-containing materials (ACMs) may be present. Since demolition of the buildings is under consideration, an asbestos survey must be conducted under National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. In addition, NESHAP guidelines require that all potentially friable ACM be removed prior to building demolition or renovation that may disturb the ACM.

5.7 Lead-Based Paint

In 1978, the Consumer Product Safety Commission banned the use of lead as an additive in paint. Based on the age of the building, lead-based paint may be present. If lead-based paint is still bonded to the building materials, its removal is not required prior to demolition. It will be necessary, however, to follow the requirements outlined by Cal/OSHA Lead in Construction Standard, Title 8, California Code of Regulations (CCR) 1532.1 during demolition activities; these requirements include employee training, employee air monitoring, and dust control. If lead based paint is peeling, flaking or blistered, it should be removed prior to demolition. It is assumed that such paint will become separated from the building components during demolition activities; thus, it must be managed and disposed as a separate waste stream. Any debris or soil containing lead paint or coating must be disposed at landfills that are permitted to accept the waste being disposed.

5.8 Fill

The portion of the site located within the "U" of the three buildings has been elevated above the existing ground surface, apparently through the placement of fill within a retaining wall. The source and quality of the fill are unknown.

5.9 Potential Environmental Concerns Within the Site Vicinity

Several nearby facilities are listed in the Leaking Underground Storage Tank (LUST) database. Two facilities are located less than 1/8 mile from the site, but appear to be located in a cross-gradient direction (in terms of ground water flow) and appear unlikely to significantly impact the site.

A former facility located across the street from the site, Ann S. Wash and Dry at 7260 Bark Lane, was reported to be a cleaners in 1970. Cleaners typically used chlorinated solvents such as perchloroethylene (PCE) in the dry cleaning process. No information was available regarding whether historic on-site operations may have resulted in dry cleaning solvent releases to soil and/or ground water which, in turn, may have impacted ground water beneath the site. However, the facility appears to have been located in a cross-gradient direction (in terms of ground water flow) with respect to the site and if a release had occurred would have been unlikely to impact the site.

What appeared to be a small pit containing a pipe was observed on the vacant property adjacent west of the site. Historical photos showed one building with a parking lot present in the general location of the pit. The address of this property was unavailable in the information available for this study; city directories listed two construction companies and assorted commercial businesses as possible previous occupants of the property. No indication of contamination at the adjacent property was found in the data reviewed for this study.

5.10 Data Failures and Gaps

Data failure occurs when the readily available standard historical sources that are likely to be useful have been reviewed and yet the objectives have not been met. For example, data failure is not uncommon in trying to identify the use of a property at 5 year intervals back to first use or 1940 (whichever is earlier). The following data failures were identified:

- Contact information for the former property owner was outdated and current contact information was not available.
- The historical information reviewed did not include information between 1902 and 1939 or from 1998 to the present. Since the historical sources reviewed showed the property as rural and/or agricultural during the earlier time period and since the current development was present from 1998 to the present, these data gaps do not appear significant.

A data gap is the lack of or inability to obtain information regarding the site that adversely impacts the ability of an environmental professional to identify recognized environmental conditions.

Based on the information presented in this assessment, no significant data gaps were identified.

6.0 LIMITATIONS

As with all site assessments, the extent of information obtained is a function of client demands, time limitations, and budgetary constraints. Our conclusions and recommendations regarding the site are based on readily observable site conditions, review of readily available documents, maps, aerial photographs, and data collected and/or reported by others. Due to poor or inadequate address information, the regulatory agency database report listed several sites that may be inaccurately mapped or could not be mapped; leaks or spills from these or other facilities, if nearby, could impact the site.

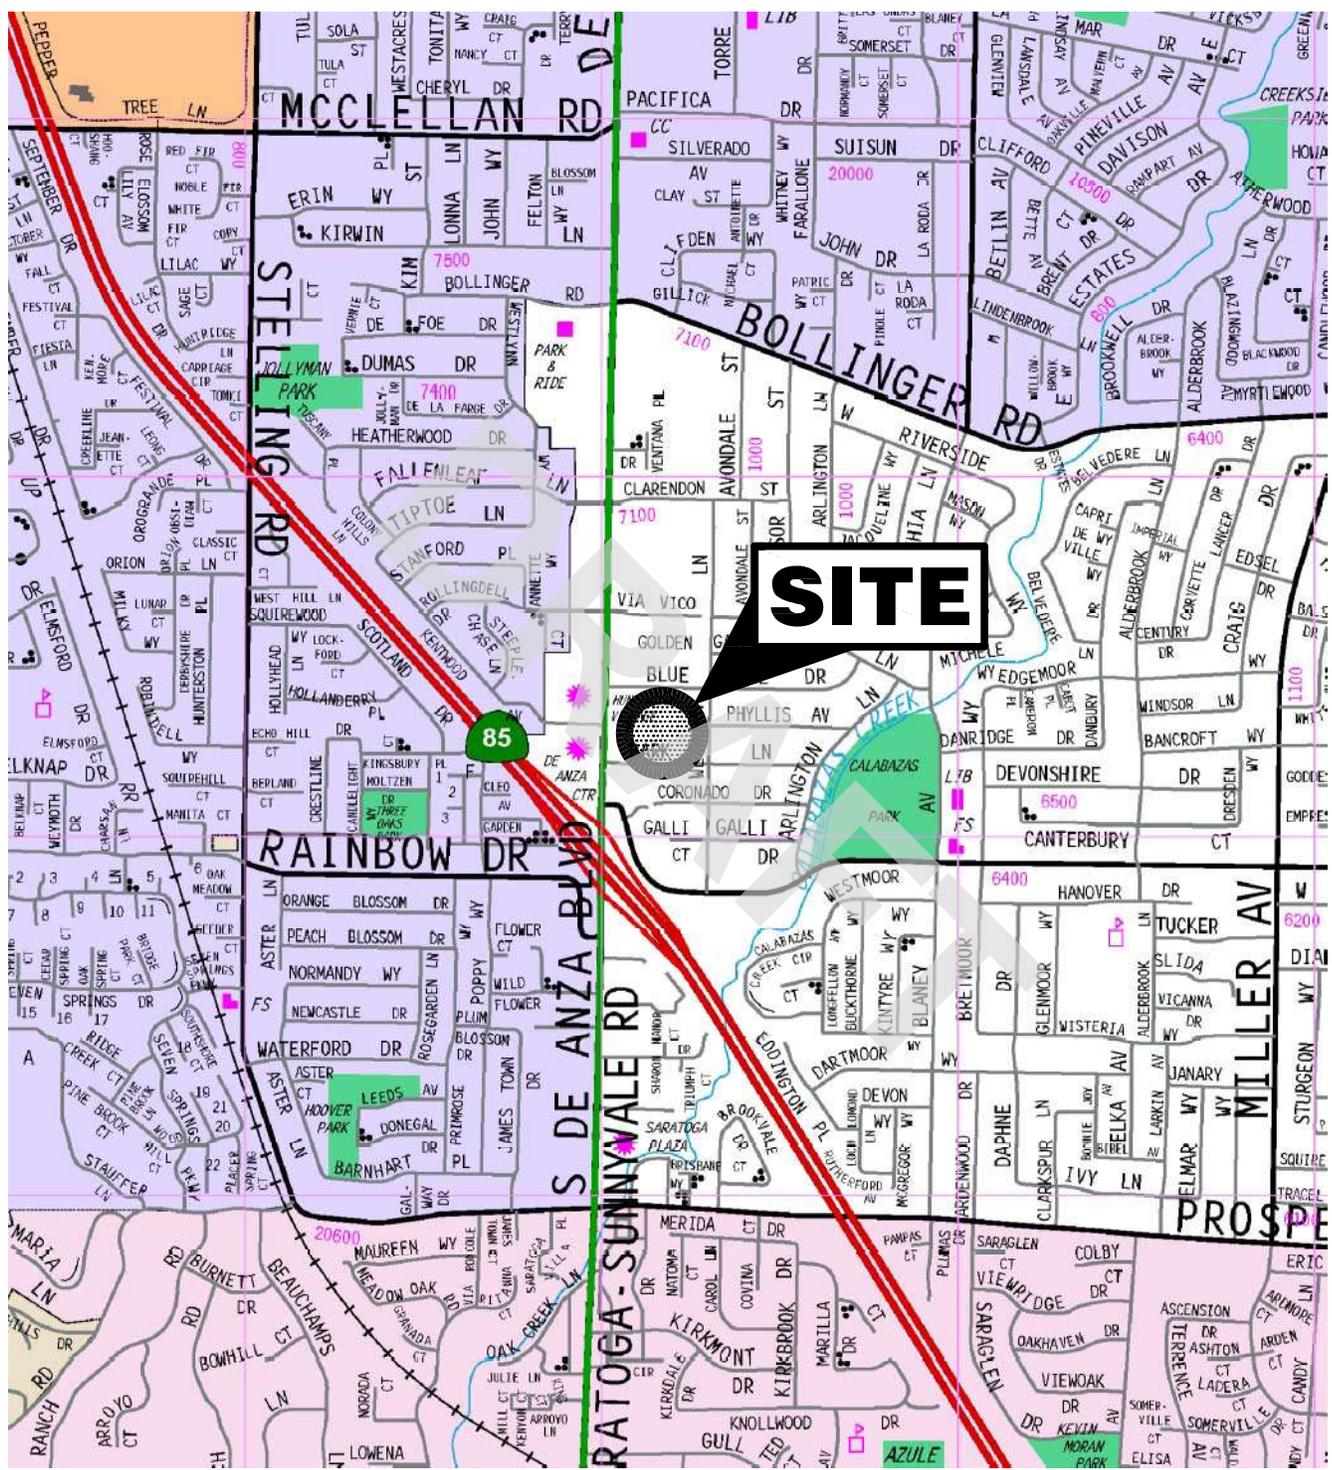

Because publicly available information often cannot affirm the presence of recognized environmental conditions, there is the possibility that such conditions exist. Our conclusions and recommendations in this site assessment are qualified in that no soil, ground water, air, or building material analyses were performed. Sampling and analysis lead to a more reliable assessment of environmental conditions, conditions that often cannot be noted from typical Phase I activities. Should you desire a greater

degree of confidence, these samples should be obtained and analyzed to further evaluate environmental conditions.

This report was prepared for the sole use of David J. Powers and associates. It is valid for 180 days. We make no warranty, expressed or implied, except that our services have been performed in accordance with environmental principles generally accepted at this time and location.

Annual Water Quality Report 2016

Building an Intelligent Water System

In response to recent calls for conservation, customers have gone above and beyond to exceed the requested targets. While this outstanding response ensures continued adequate water supplies, conservation also presents challenges for maintaining SJWC's high standard for water quality.

Water conservation can result in increased water age, where water resides in a system for longer than usual. To understand, maintain, and improve water quality throughout the service area, SJWC has increased water quality monitoring. A year-long study identified strategic locations where installation of mixing and disinfectant residual boosting systems will enhance water quality. In addition, SJWC will be installing mixing and residual monitoring devices at all of our tanks and reservoirs.

Deployment of these mixing and boosting systems at over 100 sites is one of the first steps to transforming SJWC's water system to a state-of-the-art, intelligent operation. This new technology will require an investment of over \$5 million per year over the next four years. Customers will benefit through better public health protection, more efficient monitoring, and a proactive water quality management program. Additional initiatives underway to enhance water quality and ensure outstanding value for our customers include:

- Deployment of pressure monitors at representative high and low pressure locations throughout the water system
- Improvements in water flushing technology
- Remote leak detection systems
- A sustainable water main replacement program
- Improved operating procedures

The vision for this intelligent water system stems from SJWC's participation in the Partnership for Safe Water, a collaboration between the American Water Works Association, the US Environmental Protection Agency, the Association of State Drinking Water Administrators, the Association of Metropolitan Water Agencies, the National Association of Water Companies, and the Water Research Foundation.

Newly installed tank mixing systems (top) and remote pressure monitors will provide continuous monitoring of SJWC's system and water quality

A new Dechlorinating Overflow Security Assembly (DOSA) installed at one of SJWC's water tanks

SJWC's Water Quality team is also responsible for environmental stewardship and ensuring compliance with environmental regulations. Any large quantity of drinking water containing chlorine or chloramines could negatively impact natural waterways and aquatic life. To prevent accidental chlorinated discharges from tanks and reservoirs to streams and river, SJWC engineers worked with a leading manufacturer to develop the Dechlorinating Overflow Security Assembly (DOSA). The DOSA systems are installed in-line with water tank overflows to remove chlorine from water before it can reach a stream or river.

SJWC remains focused on water quality, environmental stewardship, and operational efficiencies that ensure continued delivery of safe, high quality, and reliable water service to our customers.

2016 SJWC Annual Water Quality Report

SJWC regularly tests our water supplies for over 200 potential contaminants. Only those contaminants detected in any of our water sources appear in this table. Primary standards relate to public health, whereas secondary standards relate to aesthetic qualities such as taste, odor, and color. The state Division of Drinking Water allows us to monitor for some contaminants every few years instead of annually because these concentrations do not change frequently. Therefore, some of our data are more than a year old, though they are representative of the water served in 2016. Where possible, averages are weighted based on use of each source during the year.

Primary Standards - Mandatory Health-Related Standards

Unregulated Contaminant Monitoring Rule 3 (UCMR3)

PARAMETER	UNITS	GROUNDWATER		IMPORTED SURFACE WATER		MOUNTAIN SURFACE WATER	
		AVERAGE	RANGE	AVERAGE	RANGE	AVERAGE	RANGE
1,4-Dioxane	ppb	ND	ND - 0.22	ND	ND	ND	ND
Chlorodifluoromethane	ppb	ND	ND - 0.12	ND	ND	0.08**	0.08**
Chromium VI	ppb	1.1	0.37 - 1.7	ND	ND	0.46	0.38 - 0.54
Molybdenum	ppb	ND	ND - 2.5	1.3	ND - 2.2	ND	ND
Strontium	ppb	420	240 - 710	210	130 - 420	190	150 - 240
Vanadium	ppb	3.1	1.8 - 4.4	2.7	1.5 - 3.7	1.4	1.2 - 1.6

UCMR sampling is completed every few years as requested by the USEPA, and was not conducted in 2016. Unregulated contaminants do not have a drinking water standard at the time of testing. Data collected by utilities help USEPA decide whether the contaminants should have a standard. ** data from one sample

* Typical Sources of Constituents

1. Erosion of natural deposits. 2. Runoff and leaching from fertilizer use 3. Runoff and leaching of natural deposits. 4. Residue from some surface water treatment processes 5. Industrial waste 6. Seawater influence 7. Discharge from refineries and mines 8. Discharge from metal degreasing sites and other factories 9. By-product of drinking water disinfection 10. Naturally present in the environment 11. Soil erosion and stream sediments 12. Naturally occurring organic materials 13. Substances that form ions when in water 14. Internal corrosion of household plumbing systems

Important Definitions

Primary Drinking Water Standards (PDWS):

MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

Detection Limit for the Purposes of Reporting (DLR):

The lowest level of a constituent that the Division of Drinking Water requires to be reported.

Maximum Contaminant Level(MCL):

The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG):

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.

Not Detected (ND):

If a constituent is not measured at or above a DLR, it is reported as ND.

Not Analyzed (NA):

Source is designated as not vulnerable to contamination or testing not required.

Public Health Goal (PHG):

The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Maximum Residual Disinfectant Level (MRDL):

The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG):

The level of a drinking water disinfectant below which there is no known risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Treatment Technique (TT):

A required process intended to reduce the level of a contaminant in drinking water.

Regulatory Action Level (AL):

The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Units of Measure

Nephelometric Turbidity Units (NTU):

A measure of the cloudiness of water.

TON:

Threshold Odor Number, a measure of odor.

pCi/L:

picocuries per liter, a measure of radioactivity.

umho/cm:

micromho per centimeter, a measure of electrical conductivity.

One part per million (ppm):

the same as one milligram per liter (mg/L). One ppm corresponds to a single penny in \$10,000 or one minute in two years.

One part per billion (ppb):

the same as one microgram per liter (ug/L). One ppb corresponds to a single penny in \$10,000,000 or one minute in two thousand years.

Fluoride in our Community's Drinking Water

The Santa Clara Valley Water District (SCVWD) Board of Directors decided in November 2011 to provide optimal fluoride concentrations at its three water treatment plants, which provide a significant portion of the water served by SJWC. In December 2016, SCVWD began delivering

fluoridated water from their Santa Theresa Water Treatment Plant. Customers receiving this water were notified by mail in advance. As other treatment plants begin delivering fluoridated water, SJWC will provide advance notification to our customers. More information about SCVWD's program can be found at www.valleywater.org/services/fluoridation.aspx.

SJWC maintains a neutral position on water fluoridation. Many organizations including the Centers for Disease Control (CDC) and the State Water Resources Control Board's Division of Drinking Water are supportive of adding fluoride to drinking water to help prevent tooth decay. Please contact your health care provider or the CA State Department of Public Health's dedicated line for fluoride inquiries, at 1-844-435-8420.

Ongoing Lead Sampling in the System

The next round of Lead and Copper Rule (LCR) sampling will take place in summer 2017 (data from 2014 sampling can be found in the table opposite). With input from the state Division of Drinking Water and guided by an outside consultant, SJWC has just completed a voluntary comprehensive survey of our distribution system to identify areas of highest risk for lead exposure from drinking water. This survey will be used to conduct the 2017 LCR compliance round. Samples collected at customers' taps over the past several years have not indicated that our customers face significant risk due to lead exposure from drinking water. If you have reason for concern about lead-containing fixtures in your home, please feel free to contact us at (408) 279-7900 to request sampling.

Lead Sampling in Schools

In early 2017, the state Division of Drinking Water set up a program for schools serving grades K-12 to request lead sampling from their water utilities. Requests are made by the school superintendent (or principal, for private schools) to the utility. San Jose Water Company has already sampled at several schools in our area. For more information about sampling in your child's school, contact your school officials or see the California DDW website at http://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/leadsamplinginschools.shtml

Source Assessment

An assessment of the drinking water sources for SJWC's water system was completed in December 2002. Though not associated with any contaminants detected in the water supply, SJWC's wells are considered most vulnerable to dry cleaners, automobile gas stations and repair shops, and underground storage tanks. Some of SJWC's wells are also considered vulnerable to metal plating and finishing, photo processing/printing, electrical/electronics manufacturing, chemical/petroleum processing and storage, plastics/synthetics producers, and known contaminant plumes. SJWC's surface supplies are most vulnerable to low density septic systems, and vulnerable to potential contamination from commercial stables and historic mining practices. Imported surface water purchased from Santa Clara Valley Water District (SCVWD) is considered most vulnerable to a variety of land use practices, such as agricultural and urban runoff, recreational activities, livestock grazing, and residential and urban development. Although these activities exist or have existed near one or more of SJWC's or SCVWD's sources, physical barriers, treatment systems, and monitoring programs are in place to ensure that water supplied to our customers is not adversely affected. Customers seeking additional information may view a copy of the assessment during normal business hours at our 110 W. Taylor St. office.

Special Populations

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as those with cancer undergoing chemotherapy, those who have had organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk. These people should seek advice about drinking water from their healthcare providers. USEPA/Centers for Disease Control(CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium, Giardia, and other microbial contaminants are available from the Safe Drinking Water Hotline.

Cryptosporidium is a microbial pathogen commonly found in surface water, and was detected in our source water before treatment in 2016. However, the most common filtration methods cannot guarantee 100% removal. Ingesting Cryptosporidium can cause abdominal illness, with more severe implications for immuno-compromised persons.

Drinking Water Regulations

In order to ensure that tap water is safe to drink, the US Environmental Protection Agency (USEPA) and the State Water Resources Control Board Division of Drinking Water (DDW) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. DDW regulations also establish limits for bottled water that provide the same protections for public health.

Drinking water, including bottled water, may reasonably be expected to contain small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791). Sources of drinking water include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material. It can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, viruses, and bacteria which may come from sewage treatment plants, septic systems, livestock, and wildlife
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming
- Pesticides and herbicides from a variety of sources such as agriculture, urban stormwater runoff, and residential uses
- Organic chemical contaminants including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production or may come from gas stations, urban stormwater runoff, agricultural application, and septic systems
- Radioactive contaminants, which can be naturally-occurring or the result of oil and gas production or mining activities

Fluoride

For more information about fluoride in your water, please refer to our website at <http://www.sjwater.com>.

Selenium

Selenium is a naturally-occurring metal and also an essential nutrient. However, long-term exposure to concentrations above the MCL may cause a variety of circulatory problems.

Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water primarily comes from materials and components associated with service lines and home plumbing. SJWC is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing and service line components on the customer's side of the water meter. When your water has been sitting for several hours, you can minimize potential lead exposure by flushing your tap for 30 sec to 2 min before using water for drinking or cooking. You may wish to collect the flushed water and reuse it for a beneficial purpose such as watering plants. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/lead>.

Nitrate

Nitrate-N in drinking water at a level above 10 ppm is a health risk for infants under six months of age. Such Nitrate-N levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of skin. Nitrate-N levels above 10 ppm may also affect the ability of blood to carry oxygen in other individuals, including pregnant women and those with certain enzyme deficiencies. If you are caring for an infant or are pregnant, you should seek advice from your health care provider.

Turbidity

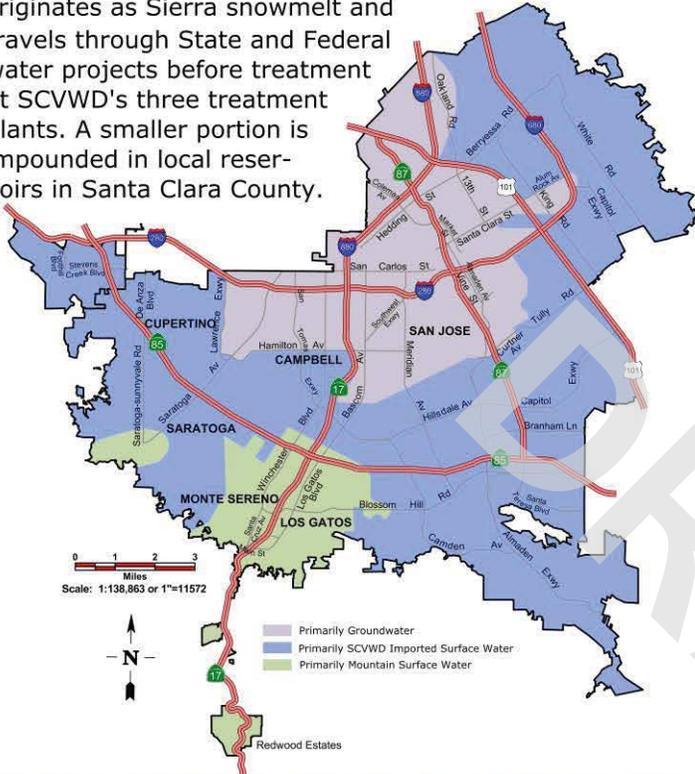

Turbidity is a measure of cloudiness of the water. It is a good indicator of the effectiveness of our filtration systems.

Reminder for Dialysis Patients and Aquarium Owners

Chloramine and chlorine may be present in water provided by SJWC. These chemicals are used to protect public health by destroying disease-causing organisms. Except for a slight chlorinous taste or odor, these disinfectants will not cause any problems for the general public. However, home dialysis patients and aquarium owners must take special precautions before the water can be used in kidney dialysis or aquariums. Please consult your doctor or dialysis technician to be sure your home equipment is adequate and that proper tests are performed every time it is used. Before filling an aquarium or fish pond, the disinfectant must be removed. Your local fish store can help determine the best water for your fish.

SJWC Service Area and Water Supply Sources

SJWC provides water from three major sources. The first source is groundwater, which is pumped from over 100 wells that draw water from the Santa Clara Groundwater Sub-Basin. The second source is local mountain surface water, which is collected in our watershed and treated at our two treatment plants. The third source, imported surface water, is provided by the Santa Clara Valley Water District, our while supplier. A majority of imported water originates as Sierra snowmelt and travels through State and Federal water projects before treatment at SCVWD's three treatment plants. A smaller portion is impounded in local reservoirs in Santa Clara County.

To Learn More about the Quality of Your Water

Your drinking water is continually tested to ensure compliance with state and federal standards for quality and safety. This annual report summarizes results of more than 18,000 water quality tests conducted throughout the year. If you have any questions about your water quality, service, or the information contained in this report, please call us at (408) 279-7900, Monday to Friday between 8:30AM and 5:30PM. Or, you may contact the USEPA Safe Drinking Water Hotline at 1-800-426-4791 for additional public information about the Safe Drinking Water Act or USEPA's drinking water regulatory programs.

Detailed information about specific drinking water topics is available on the internet. Visit our website or any of the sites listed below to find out about water treatment, quality, and current regulations.

- San Jose Water Company: www.sjwater.com
- Santa Clara Valley Water District: www.valleywater.org
- American Water Works Association: www.awwa.org
- SWRCB Division of Drinking Water: www.waterboards.ca.gov/drinking_water/programs/index.shtml
- United States Environmental Protection Agency: water.epa.gov/drink

This brochure provides a snapshot of last year's water quality data for SJWC. Included are details about where your water comes from and how your water quality compares to State standards. As you can see, in 2016, as in years past, your drinking water met all USEPA and State primary drinking water health standards.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for San Jose Water Company

Our water system failed to monitor for a drinking water standard during the past year and therefore was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

After being informed of a positive coliform result, we are required to monitor groundwater wells that may have contributed to the sample tested as positive. We collect and test approximately 400 samples a month for coliform and our tests results are in full compliance with State and Federal Regulations. On April 20, 2017, we failed to collect three groundwater samples within 24 hours of being notified by our laboratory of a positive coliform result. We collected these samples on April 25, 2017 and all results met drinking water standards.

SJWC has provided additional training to staff to ensure that follow up samples are taken within the timeframe required by regulations.

APPENDIX I

QUALIFICATIONS

DRAFT

Megan Nolet – Project Manager, Due Diligence

BA- Environmental Studies, Brown University, Providence, RI

Ms. Nolet provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Assessments, Environmental Transaction Screens, Regulatory Database Review, and Historical Records Review.

Project experience for Ms. Nolet includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Environmental Transaction Screens (ETS)
- Regulatory Database Review
- Historical Records Review

In addition, prior to joining the environmental consulting industry, Ms. Nolet spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

David Hodge , B.Sc. – Director, European Operations

- Bachelor of Science (Organic Chemistry), University of Queensland, 1987;
- Chartered Member, Royal Australian Chemical Institute 1986-1994;
- Member, International Association of Water Pollution Research and Control
- Panel member of the National Waste Management Competency Standards Committee (Brisbane), 1997 – policy development;
- Approved Contaminated Site Assessment and Remediation Consultant, Old Environment Protection Agency, 1998;
- Appointed by the Queensland Environmental Protection Agency to the Sustainable Industries Task force, 1999.

Mr. Hodge is AEI's European Operations Director, and is a technical director / transaction and due diligence specialist with financial expertise and over 20 years international experience. Mr. Hodge has conducted:

- Real estate transaction risk and liability assessment, asset management and risk and cost modeling. €22 BN in assets to date.
- Logistics, planning, resourcing, management, execution, QA/QC and delivery of Underwriting Grade complex large-scale (> 5000 assets), Pan European / multi country, high-speed environmental and structural due diligence, liability assessment and costing projects.
- Management, execution and client media representation for high media visibility and contentious developments/projects, including public consultation and expert witness testimony.
- Mr. Hodge has over 15 Years business process, production process and sustainability auditing/evaluation, process re-design, management, execution and delivery in: real estate, manufacturing, consulting, chemical, food and beverage, water and waste water, heavy engineering, oil and gas, mining, leisure and waste management sectors.

Project experience for Mr. Hodge includes:

- Felix Portfolio – 78,400 apartments / 10700 properties, 9 weeks – Purchase of commercial property assets of GAGFAH in Germany. Advisor to a Fortune 50 and consortium investment fund. Deal value €8.7 billion. European project director, principal reviewer and author. European deal team liaison, Management Co-Ordination and logistics for the delivery of Phase I pre purchase EDD/liability economics for transaction process. Provision of screening portfolio review and economics for deal team and client risk management review team.
- Etoile Portfolio – 70 properties, 4 months – Purchase of commercial property assets of Autodistribution in France. Advisor to a Real Estate Opportunities Group. Deal value €2.5 billion. European project director, principal reviewer and author. European deal team liaison, management co-ordination and logistics for the delivery of Phase I and Phase 2 pre purchase EDD/liability economics for transaction process. Provision of screening portfolio review for deal team.
- Ramazotti Portfolio – 92 properties, 3 weeks – Purchase of assets and network of

Telecom Italia in Italy. Advisor to acquisition underwriting team. Deal value €1.0 billion. Project manager, principal reviewer. Management co-ordination and delivery of Phase I pre purchase EDD/liability economics for auction process. European deal team liaison, USA - Dallas Senior Review Team liaison. Provision of Phase II costs and remediation costs approved by AG. Implementation, budgeting and logistics for international EDD team for Phase II.

- Bears Portfolio – 3816 apartments 627 buildings, 9 days – Purchase of commercial/residential property assets of HPE in Germany. Advisor to a Fortune 50 real estate investment fund. Deal value €189.5 million. European project director, principal reviewer and principal author. European deal team liaison, management co-ordination and delivery of Phase 1 and Phase 2 pre purchase EDD/liability economics. Liability economics and approach approved by underwriting team.
- Arcelor Portfolio – 870 properties in 70 cities, 2 months - Purchase of commercial property assets of Arcelor. Advisor to a Real Estate Opportunities Group. Deal value €55 million. Project director, principal reviewer and author. Deal team liaison, management co-ordination and logistics for the delivery of Phase I EDD/liability economics and Phase 2 subsidence risk study for transaction process. Provision of screening portfolio/liability economics review for deal team.
- Galleria Portfolio – 373 properties, 5 weeks – Purchase of commercial property assets of AIB AG in Germany, Turkey, Greece, Hungary, France, Luxembourg. Advisor to a Fortune 50 investment fund. Deal value €2.7 billion. European project director, principal reviewer and co- author. European deal team liaison, Stanford (Senior Review Team) liaison. Management Co-Ordination and delivery of Phase I pre purchase EDD /liability economics for auction process. Provision of Phase II costing and remediation costs approved by underwriting team.

Mr. Hodge has worked for and with Fortune 50 clients and the top Environmental and Engineering consultants in Europe and globally. As a key client manager for Fortune 50 clients, Mr. Hodge has high level interpersonal and written communication skills and has drafted and negotiated Master Services Agreements, performed as an expert witness in transaction disputes, acted as an environmental expert in transaction teams and represented clients in tribunals and with regulatory bodies for development applications.

Mr. Hodge has deep industry knowledge and a current focus on market meeting business / services development for the real estate investment community.
