APPENDIX A – DATABASE SEARCH REPORT
APPENDIX B – HISTORICAL AERIAL PHOTOGRAPHS AND MAPS
APPENDIX C – LOCAL STREET DIRECTORY SEARCH RESULTS
SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 6321 and 6325 San Ignacio Avenue in San Jose, California (Site) as shown on Figures 1, 2 and 3. The planned electrical transmission line alignment shown on Figure 2 also was evaluated as part of this study. This work was performed for David J. Powers & Associates in accordance with our proposal dated April 11, 2019 (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that David J. Powers & Associates is performing a CEQA analysis associated with the proposed use of the Site as an energy storage facility. We performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

1.2 PROJECT DESCRIPTION

The proposed project involves construction of a 75 mega-watt (MW)/300 mega-watt hour (MWh) battery-based energy storage system. The project was awarded a long-term agreement with PG&E to address an electrical capacity deficiency in the South Bay-Moss Landing sub-capacity area (which includes the south portion of the City of San Jose) caused by the potential retirement of the Metcalf Natural Gas Generating Station. Energy storage is an essential part of enabling the state’s transition to a carbon-free electricity system. Intermittent resources, such as
wind and solar, require the ability to store excess generated energy that would otherwise be wasted (curtailed). The renewable energy is stored and redistributed for later use when demand is high. The energy storage capacity created as part of the project would assist the City and State of California in meeting their carbon-free electricity goals.

The project has two main components: 1) the approximately 103,894 square-foot battery-based energy storage building and substation at 6321 San Ignacio Avenue\(^1\) (part of APN 706-09-094), and 2) an approximately 2.5-mile-long transmission line that would run from the substation at 6321 San Ignacio Avenue to the Pacific Gas & Electric (PG&E) Metcalf Natural Gas Generating Station substation to the south at 150 Metcalf Road. The transmission line would run underground along the east side of Monterey Road until it reaches the existing PG&E transmission line corridor that traverses Coyote Creek and connects to the Metcalf Power Plant substation.

### 1.2.1 Battery Storage Facility and Substation

The proposed project would utilize an existing 103,894 square-foot, vacant industrial building at 6321 San Ignacio Avenue to house lithium-ion batteries that would store excess energy generated by the electrical grid during the day. The batteries would be assembled within racks and cabinets that are seismically anchored to the building foundation and constructed of non-flammable aluminum and steel. In addition to the batteries, inverters and medium-voltage transformers would be installed inside the existing building. Once fully operational, the energy storage facility would be able to store up to 75MW/300 (MWh) of electricity generated within the South Bay-Moss Landing area.

Metal-clad switchgear, a power transformer, and additional electrical equipment would be installed within an approximately 15,000-square-foot fenced substation located in the parking area to the northeast of the energy storage facility. This substation is needed to transform the electricity voltage for storage and use consistent with PG&E requirements. Substation electrical equipment would be housed in fire-rated enclosures and screened from view using slatted fencing. Substation electrical cabling would be installed underground.

### 1.2.2 Transmission Line

The energy storage facility and associated substation would connect to the Metcalf Substation via a 2.5-mile-long, underground transmission line located mainly within the Monterey Road public right-of-way. The underground transmission line would exit the energy storage building and travel through the northeast portion of the Site, and then under the existing Union Pacific railroad tracks. It would then run under the east side of Monterey Road reaching the existing PG&E transmission line corridor that traverses Coyote Creek. The transmission line would daylight and span Coyote Creek, where it would travel overhead along an existing PG&E transmission line corridor and connect to the Metcalf Substation.

---

\(^1\) A historical address of 6325 San Ignacio Avenue also was associated with the building.
1.3 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site and publicly accessible portions of the planned electrical transmission line alignment to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.

- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site or planned electrical transmission line alignment.

- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site or planned electrical transmission line alignment from reported contamination incidents at nearby facilities.

- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.

- Review of readily available maps and aerial photographs to help evaluate past and current uses at the Site and along the planned electrical transmission line alignment.

- Interviews with persons reportedly knowledgeable of existing and prior Site uses.

- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10.

1.4 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site and planned electrical transmission line alignment, based on information provided by David J. Powers & Associates, are as shown on Figures 2 and 3. We have not independently verified the accuracy or completeness of any data received.

1.5 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1, 2, and 3. Tables 1 through 3 summarize general characteristics of the Site.
and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the property, based on information provided by David J. Powers & Associates.

Table 1. Location and Ownership

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is David J. Powers & Associates. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (i.e., the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3)
knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property’s use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (i.e., engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E 1527-13 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA.

3.2 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with David J. Powers & Associates, we understand that David J. Powers & Associates does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site or planned electrical transmission line alignment, or other information that is material to Recognized Environmental Conditions.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site and planned electrical transmission line alignment. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

To obtain additional information regarding reported spill incidents along the planned electrical transmission line alignment, Cornerstone also conducted a cursory review of readily available documents obtained from the state Geotracker (http://geotracker.waterboards.ca.gov) and Envirostor (http://www.envirostor.dtsc.ca.gov) databases. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and contains information on investigation,
cleanup, permitting, and/or corrective actions that are planned, being conducted or have been completed under DTSC’s oversight. The Envirostor database includes the following site types: Federal Superfund sites; State Response sites; Voluntary Cleanup sites; and School sites.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

4.1.1 Database Listings and Reported Spill Incidents

4.1.1.1 PG&E Metcalf Substation, 150 Metcalf Road

The PG&E Metcalf Substation is listed as a closed Cleanup Program Site (CPS). On April 16, 2013, the substation was vandalized and approximately 52,000 gallons of mineral oil were released to the ground surface from 16 transformers in Banks 2, 3, 4, 11, 12, and 13. The substation is equipped with Spill Prevention, Control, and Countermeasure (SPCC) ponds, culverts, and other best management practices as part of a site-wide SPCC plan to provide protection for a reasonably sized oil spill. The capacity of each SPCC pond equals the capacity of the largest transformer in the substation or 10 percent of the volume of the total transformer oil in use. However, the volume of transformer oil released during this event overwhelmed the capacity of the SPCC Oil Retention Pond No. 1 and some of the transformer oil migrated off of the PG&E property towards Coyote Creek. No transformer oil from the release reached the SPCC Oil Retention Pond No. 2 located at the southern end of the substation, but transformer oil did flow through the drainage swale that leads to this pond. Of the 52,000 gallons of transformer oil released, approximately 38,000 gallons were recovered from the SPCC Pond No. 1 and temporary pools of oil that formed on the ground surface. Released oil was transferred into tanks with a vacuum truck and transported for disposal as Non-Resource Conservation and Recovery Act (Non-RCRA) California hazardous waste at the Environmental Management Systems, Inc. facility in Phoenix, Arizona. Approximately 7,000 tons of soil were subsequently excavated to remove oil-related impacts due to the release. Additionally, approximately 108,183 gallons of captured oily water and approximately 36,254 gallons of water pumped from an excavation near Coyote Creek were transported and disposed.

Remedial activities were conducted under Santa Clara County Department of Environmental Health (DEH) oversight. The DEH coordinated with other agencies including the United States Environmental Protection Agency (USEPA), DTSC, San Francisco Bay Regional Water Quality Control Board (Water Board), California Department of Fish and Wildlife (CDFW) and Santa Clara Valley Water District (SCVWD).

PG&E previously prepared a Substation Soil Management Plan (SSMP) that reportedly was approved by the Water Board and DTSC, and provides a standardized framework to manage impacted soil while protecting the health of workers and the environment following a release of mineral oil in energized substations. Emergency cleanup and excavation activities were performed in accordance with the SSMP and a Remediation Work Plan (ARCADIS, 2013).

---

On May 14, 2015, the Bank 4 transformer failed as a result of a malfunction in the internal mechanism. As a result, approximately 10,000 gallons of transformer oil (mineral oil) were released to the ground surface from the Bank 4 transformer. The released transformer oil flowed west from the Bank 4 transformer into the concrete swale (v-ditch; which was re-built during the 2013 release event) and eventually to the SPCC Pond No. 2. As part of the spill response activities, approximately 8,500 gallons of the transformer oil were recovered from the SPCC Pond No. 2 and the v-ditch. Approximately 341 tons of soil were excavated and disposed off-site to remove transformer oil-related impacts due to the release. Following excavation, confirmatory soil samples were collected. These activities were conducted under DEH oversight in accordance with the previously prepared SSMP and Remediation Work Plan.

The DEH issued a case closure letter dated December 6, 2018 confirming the completion of investigation and remedial activities at the substation. The letter notes that residual contamination remains at the property at concentrations below established environmental screening levels that are acceptable for the intended land use (i.e., an electrical substation). The letter requires that the DEH be notified if there are proposed changes in land use and if any unexpected contamination or hazardous material is encountered in the subsurface.

4.1.1.2 On-Site Database Listings

Stion Corporation was identified on-Site at 6321 San Ignacio Avenue on the HAZNET database, which contains data extracted from the copies of hazardous waste manifests received each year by the DTSC. Listed wastes disposed between 2008 and 2017 were categorized as off-specification, aged or surplus inorganics; unspecified aqueous solutions; organic and inorganic solids; laboratory waste chemicals; aqueous solutions with total organic residues; unspecified oil-containing waste; alkaline solutions (pH >= 12.5) with metals; waste oil and mixed oil; liquids with pH <= 2 with metals; organic solids with halogens; and liquids with cyanides.

Stion Corporation also was identified on City and County databases of facilities with permits for storage of hazardous materials and for generation of hazardous wastes, and on the Emissions Inventory (EMI) database that includes toxics and criteria pollutant emissions data collected by the California Air Resources Board (ARB) and local air pollution agencies. Stion was listed as a RCRA large quantity generator of hazardous waste.

Penstock also was listed on-Site at 6321 San Ignacio Avenue on the EMI database between 1998 and 2005.

Avnet RF & Microwave also was identified on-Site at 6321 San Ignacio Avenue on the HAZNET database and on a County database of facilities with permits for generation of hazardous waste. Listed wastes disposed between 1999 and 2003 were categorized as oxygenated solvents; organic solids; unspecified organic liquid mixtures; organic liquids with metals; alkaline solutions (pH >= 12.5) with metals; and off-specification, aged or surplus inorganics.

G&I VIII Westcore Silicon Valley TRS LLC also was listed in 2018 at 6321 San Ignacio Avenue on the RCRA NonGen/NLR database. This database lists facilities that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. NLR means that the business is no longer registered. No violations were reported.
4.1.2 Nearby Spill Incidents

Three closed leaking underground storage tank (LUST) cases were identified along Monterey Road adjacent to the planned electrical transmission line alignment. These include USA Petroleum (currently a Shell station) at 6050 Monterey Road and two former gasoline stations referred to as Kaufman & Broad Site #1 and Site #2 at 6240 Monterey Road and 6300 Monterey Road, respectively. Based on available files obtained from the Geotracker database, releases from these LUST case properties do not appear to have significantly impacted soil or groundwater beneath the planned transmission line alignment.

4.2 ADDITIONAL ENVIRONMENTAL RECORDS SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 6321 and 6325 San Ignacio Avenue at the following public agencies: the San Jose Building Department (BD), San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH).

Building department files contained numerous permits and plans dated between 1980 and 2019 pertaining to the initial construction of the on-Site building in 1980 and 1981, and subsequent tenant improvements and alterations. Based on the information reviewed, the building was occupied by IBM for office, research and development (R&D), laboratory and manufacturing purposes from 1981 to 1993. Avnet (a.k.a., Penstock3) occupied the building for office and manufacturing uses from 1997 to 2006. From 2008 to 2018, the building was occupied by Stion Corporation for R&D associated with solar panels and operation of a pilot manufacturing line.

Information contained in Fire Department and DEH files is summarized in Table 4, and further discussed in the following paragraphs.

---

3 Based on a cursory internet search, Penstock, Inc. (a.k.a., Peninsula Stocking Distributor) was a distributor of radio frequency (RF) and microwave components. Avnet (a.k.a., Avnet Electronics Marketing and Avnet RF & Microwave) acquired Penstock in 1994 along with Penstock Engineering (a.k.a., PSElect), which became Avnet MTS “Microwave Technical Solutions” and was sold to Teledyne Cougar (an affiliate of Teledyne Technologies Inc.) in 2005.

<td>FD</td>
<td>2012 and 2016</td>
<td>Stion Corp.</td>
<td>Reports by Otis Institute evaluating a cadmium waste treatment system. Stion reportedly operated a cadmium waste water and pH adjustment treatment system that collected waste liquids from a cadmium plating process (chemical bath deposition [CBD]) and from a laboratory sink. The system provided pH adjustment (acid waste neutralization [AWN]) and removed cadmium prior to discharge to the sanitary sewer. The wastewater treatment area reportedly was a reinforced concrete area approximately 81 feet by 18 feet, and 16 inches in depth. The concrete floor and berm were coated with a fiber reinforced chemical-resistant epoxy material to prevent waste migration through the containment structure. The system reportedly was installed in 2009 and treated approximately 60,000 gallons of wastewater per month.</td>

<td>Facility closure applications and inspection reports. Wipe samples for pH and metals were noted to have been collected from 32 locations at the plating system, treatment system andAWN. The pH results were noted to be between 5 and 8. Metal results were not indicated; the inspection report stated that the results and a closure report were pending. The closure report was not contained in the records reviewed by Cornerstone.</td>
</tr>
</tbody>
</table>

Based on the noted 2006 closure documents for Avnet, the facility reportedly was used for the assembly and testing of microwave hybrid circuits and coaxial cables. The Hybrid circuit operation involved the attachment of thin film gold circuits substrates onto (or into) gold plated Kovar packages (Kovar is an iron-nickel-cobalt alloy). The attachment of the substrates was done using a gold-silicon eutectic alloy preform. Subsequently, active and passive silicon based components were attached to the circuits using either gold-germanium or gold-tin alloy preforms. Alternatively, depending on circuit requirements, attachment of the components was accomplished through the use of conductive epoxy. Packages of completed assemblies were sealed through direct welding of a lid, seam sealing of the lid or through soldering using lids with gold-tin solder rings along their edges.

Isopropyl alcohol (IPA) (approximately 40 gallons annually) reportedly was used as a pre-wash for packages and lids. Waste IPA reportedly was captured for off-Site disposal by All Chemical Disposal of San Jose.
Hermeticity testing involved inserting the finished products in a chlorofluorocarbon liquid. The liquid reportedly was replaced quarterly, with spent material disposed by All Chemical Disposal of San Jose. Avnet reportedly used approximately 4 gallons on an annual basis.

Avnet sometimes was requested by customers to solder-dip the leads of the packages to make them compatible with standard electrical operations. Avnet maintained solder pots for this operation. When the solder in these pots became contaminated with gold, the pot was emptied into a simple mold and kept for off-Site disposal.

Avent also had a small off-set printing machine for making packages within the facility. This operation reportedly used approximately one quart of an epoxy based ink annually. Ink residuals reportedly were disposed off-Site.

Cable assembly operations used rosin based flux and standard tin-lead solder to install connectors on to cables. IPA was used to clean the finished products of any flux residue and to clean the connectors prior to assembly. Cleaning was accomplished through immersion and through the use of cotton swaps when required. As with the materials mentioned above, these spent materials reportedly were sent to All Chemical Industries for disposal. The cable assembly group reportedly used approximately 80 gallons of IPA annually.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 1980 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site’s elevation at the San Ignacio Avenue building is approximately 205 feet above mean sea level. Elevations increase to approximately 255 feet at the Metcalf Substation. Topography in the general vicinity of the Site slopes downward gently to the northwest towards the San Francisco Bay; locally, steeper slopes are present adjacent to Coyote Creek.

5.2 GEOLOGY AND HYDROGEOLOGY

Based on information presented in the California Geotracker database pertaining to nearby properties and the Metcalf Substation, groundwater depths beneath the Site likely are variable with reported depths of approximately 10 to 25 feet at the Metcalf Substation and approximately 25 to 45 feet near the San Ignacio Avenue building. Groundwater depths of 5 feet or less may be encountered in close proximity to Coyote Creek. Groundwater likely generally flows to the west or northwest, with variable flow directions possible in close proximity to Coyote Creek.

Cornerstone’s certified professional geologist reviewed readily available geologic maps to help evaluate the geology of the Site and surrounding area. Published maps covering the region indicate serpentine bedrock is located southwest of the PG&E Metcalf Substation and Monterey Road. Asbestos occurs naturally in ultramafic rock (such as serpentine).
SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property’s first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 5.

- **Historical Aerial Photographs**: We reviewed aerial photographs dated between 1939 and 2016 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B. Additional aerial photographs of the planned transmission line alignment were reviewed online at https://www.historicaerials.com.

- **Historical Topographic Maps**: We reviewed USGS 15-minute and 7.5-minute historical topographic maps dated between 1916 and 2012; copies of historical topographic maps obtained from EDR are presented in Appendix B. Additional topographic maps of the planned transmission line alignment were reviewed online at https://www.historicaerials.com.

- **Historical Fire Insurance Maps**: EDR reported that the Site was not within the coverage area of fire insurance maps.

- **Local Street Directories**: We reviewed city directories obtained from EDR for 6321 and 6325 San Ignacio Avenue that were researched at approximately 5 year intervals between 1922 and 2014 to obtain information pertaining to past Site occupants. The city directory summary is presented in Appendix C.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 6. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on July 9, 2019. The Site reconnaissance was conducted by walking representative areas of the Site, including the interior of the on-Site structure, the periphery of the structure and the Site periphery. Additionally, the planned transmission line alignment was viewed by driving the alignment along Monterey Road. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing building and associated asphalt paved parking areas and vehicle drives (typical of developed properties).

7.2 OBSERVATIONS

At the time of our visit, the Site was developed with a single story commercial building that was unoccupied. Interior partition walls, flooring and other finishes were observed to have been removed. Fenced equipment pads were observed on the exterior southeast and northeast sides of the building; these formerly contained wastewater treatment systems, dionized water systems, emergency generators, chemical storage areas, scrubbers, toxic gas cabinets, and other equipment that supported operations by past tenants. The equipment was observed to have been removed. Bermed concrete pads, some of which were epoxy coated and formerly used for secondary containment purposes, were observed to remain. The bermed areas on the northeast side of the building appeared to drain to three small concrete lined sumps. The former sump pumps were observed to have been removed; remnant aboveground piping extended from the sumps.

Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The building presumably is connected to the publically owned sanitary sewer system; no on-Site septic systems were obvious. On-Site storm water catch basins appeared to discharge via below ground piping to the City’s storm water drainage system. Two electrical transformers owned by PG&E were observed on concrete pads. No evidence of transformer oil leaks was observed.
The proposed new substation location was observed to consist of an asphalt paved parking area. The planned transmission line alignment was observed to extend northeast from the new substation area, traversing under Great Oaks Boulevard and the existing Union Pacific railroad tracks, and then extending southeast beneath Monterey Road before turning northeast and spanning Coyote Creek prior to connecting with PG&E’s Metcalf Substation.

No hazardous materials were observed on the San Ignacio Avenue property or along the planned transmission line alignment.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to for completion by the Site owner. The completed questionnaire was not returned to us as of the date of this report.

8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance with ASTM E1527-13 to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the San Ignacio Avenue parcel historically was used for agricultural purposes (orchards and row crops). Several small structures that appear to have been residences or associated outbuildings (e.g., barns or sheds) were located on the southeast portion of the parcel. These structures were removed and the existing on-Site building was constructed during the early 1980s. The existing building was occupied by IBM for office, R&D, laboratory and manufacturing purposes from 1981 to 1993. Avnet (a.k.a., Penstock) occupied the building for office and manufacturing uses from 1997 to 2006. From 2008 to 2018, the building was occupied by Stion Corporation for R&D associated with solar panels and operation of a pilot manufacturing line. Stion Corporation vacated the building in 2018 and it has since remained unoccupied.

Properties adjacent to the planned transmission line alignment (i.e., along Monterey Road) were historically used mainly for agricultural purposes. Most of bordering former agricultural land was developed with the current residential and commercial structures during the 1980s and 1990s.

The Metcalf Substation property also historically was used for agricultural purposes (an orchard). A portion of the substation was constructed during the mid-1950s and it was expanded to its current configuration during subsequent decades.

9.2 CHEMICAL STORAGE AND USE

No information pertaining to prior chemical use or storage by IBM was identified during this study.

Avnet used the on-Site building for the assembly and testing of microwave hybrid circuits and coaxial cables. Operations by Stion Corporation included manufacturing of solar panels. As
summarized in Section 4.2.1, historical activities by Avnet and Stion Corporation involved the use and storage of a variety of hazardous materials. Although hazardous materials were used and stored on-Site, no significant on-Site spills at the San Ignacio Avenue building were identified within the records reviewed during this study. Facility closure activities for Avnet and Stion Corporation were conducted under Fire Department oversight in 2006 and 2018, respectively. The facility closure report and documentation of Fire Department approval of the report were not provided for our review.

Spills of transformer oil occurred at the Metcalf Substation in 2013 and 2015, as summarized in Section 4.1.1.1. Remedial activities subsequently were completed under DEH oversight. The DEH issued a case closure letter dated December 6, 2018 confirming the completion of investigation and remedial activities at the substation. The closure letter notes that residual contamination remains at the property at concentrations below established environmental screening levels that are acceptable for the intended land use (i.e., an electrical substation). The letter requires that the DEH be notified if there are proposed changes in land use and if any unexpected contamination or hazardous material is encountered in the subsurface.

9.3 AGRICULTURAL USE

The San Ignacio Avenue parcel and the Metcalf Substation parcel historically were used for agricultural purposes. Additionally, the planned transmission line alignment along Monterey Road historically was bordered by agricultural properties.

Pesticides may have been applied to crops in the normal course of farming operations. Residual concentrations of agricultural chemicals may remain in on-Site soil, such as organochlorine pesticides and pesticide-related metals (i.e., arsenic, lead and mercury).

9.4 AERIALLY DEPOSITED LEAD

Lead in excess of California’s hazardous waste criteria is sometimes found next to older and/or heavily traveled roadways in California primarily due to the historical use of leaded gasoline. There is a potential that elevated lead concentrations could be present in shallow soil along the planned transmission line alignment (i.e., along Monterey Road).

9.5 RAILROAD RIGHT-OF-WAY

The planned transmission line alignment crosses beneath the Union Pacific railroad tracks that run parallel to Monterey Road. Assorted chemicals historically were commonly used for dust suppression and weed control along rail lines. Common contaminants along railroad lines include metals, petroleum hydrocarbons, pesticides and polycyclic aromatic hydrocarbons (PAHs). There is a potential for contaminants to be present in shallow soil within the railroad right-of-way.

9.6 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no off-Site hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact soil or groundwater quality at the Site. However, as is typical to many developed areas, several facilities in the vicinity were reported as hazardous materials users. Additionally, several leaking underground storage tank cases were reported near the planned transmission line alignment that were listed as closed cases; thus, suggesting that the potential for significant adverse
impacts is low. As with any earthwork project, there is a potential that unexpected or previously unreported contamination could be encountered during construction activities.

9.7 NATURALLY-OCCURRING ASBESTOS

Serpentine bedrock is located southeast of the PG&E Metcalf Substation and Monterey Road. Asbestos occurs naturally in ultramafic rock (such as serpentine). When this material is disturbed in connection with construction, grading, quarrying or surface mining operations, asbestos-containing dust can be generated. Exposure to asbestos can result in health ailments.

The Asbestos Airborne Toxic Control Measure (ATCM) for Construction, Grading, Quarrying and Surface Mining Operations (California Code of Regulations, Title 17, Section 93105) was signed into State law on July 22, 2002, and became effective in the Bay Area Air Quality Management District (District) on November 19, 2002. The purpose of this regulation is to reduce public exposure to naturally occurring asbestos (NOA) from construction and mining activities that emit dust which may contain NOA. Since a portion of the planned electrical transmission line alignment is located in an area that may contain NOA, compliance with the ATCM provisions may be required as part of the planned development. Soil sampling should be performed to help evaluate the potential presence of NOA.

9.8 LEAD-BASED PAINT AND TERMITE CONTROL PESTICIDES

Soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. Lead and/or pesticides often are identified in soil near old residences and associated outbuildings, such as those historically located on the southeast portion of the San Ignacio Avenue parcel.

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the existing building, lead-based paint is not likely to be present.

9.9 SITE MANAGEMENT PLAN AND SOIL SAMPLING

We recommend preparing a Site Management Plan (SMP) and Health and Safety Plan (HSP) for the proposed construction activities. The purpose of these documents would be to establish appropriate management practices for handling impacted soil and/or groundwater that may be encountered during construction activities.

To aid in preparing the SMP and HSP, we recommend soil sampling be performed to help address the potential environmental concerns identified in this Phase I ESA. The sampling should focus in areas where subsurface excavation will occur. This work will assist in evaluating potential disposal options if excess soil is generated that will require off-haul, and assist in segregating impacted and non-impacted soil during excavation activities; thus, reducing disposal costs. For subsurface work performed near the PG&E Metcalf Substation, if NOA is identified during soil sampling or if it is determined that NOA is likely to be encountered during earthwork activities, the SMP and HSP should include asbestos dust mitigation measures and protocols to perform personnel and perimeter air and dust monitoring to evaluate the effectiveness of dust control measures.

If groundwater dewatering is to be conducted, the extracted groundwater should be pumped into a storage container, sampled and analyzed to establish appropriate disposal options.
9.10 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structure, building materials may contain asbestos. If demolition, renovation, or re-roofing of the building is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

9.11 DATA GAPS

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. Additionally, the environmental questionnaire provided for completion by the Site owner was not returned to us as of the date of this report. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider these data gaps to be significant.

9.12 DATA FAILURES

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data failures were identified:

- Detailed information concerning past Site operations by some occupants (i.e., IBM) was not readily available from the information sources reviewed during this study. The lack of this data can diminish our ability to identify Recognized Environmental Conditions.
9.13 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13. This assessment identified the following Recognized Environmental Conditions:

- There is a potential that residual contaminants could be present in soil at the San Ignacio Avenue parcel as a result of past agricultural uses. Lead and/or pesticides (termiteicides) also are often identified in soil near old residences and associated outbuildings, such as those historically located on the southeast portion of the San Ignacio Avenue parcel.

- There is a potential that residual contaminants could be present in soil along the planned transmission line alignment resulting from 1) historical agricultural activities at bordering properties, 2) aerially deposited lead related to the historical use of leaded gasoline, and 3) the possible use of chemicals for dust suppression and weed control within the Union Pacific railroad right-of-way.

- There is a potential that residual contaminants could be present in soil at the Metcalf Substation property as a result of past agricultural uses, and/or resulting from past transformer oil spills (mineral oil and polychlorinated biphenyls [PCBs]).

Although NOA does not appear to meet the definition of a REC, the presence of NOA in soil is a potential environmental concern.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions associated with the Site. David J. Powers & Associates understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. David J. Powers & Associates understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

---

4 The presence or likely presence of hazardous substances or petroleum products on the Site: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.
Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

David J. Powers & Associates may have provided Cornerstone environmental documents prepared by others. David J. Powers & Associates understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

SURROUNDING SITES: SEARCH RESULTS
Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

**Federal NPL site list**
NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Cerclis ID: 901685
EPA Id: CAD097012298

**Federal CERCLIS list**
SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 SEMS
EXECUTIVE SUMMARY

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is
1 RCRA-CESQG site within approximately 0.25 miles of the target property.

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 01/31/2019 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

**State- and tribal - equivalent CERCLIS**

CA ENVIROSTOR: The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 9 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

A review of the CA VCP list, as provided by EDR, and dated 04/29/2019 has revealed that there are 2 CA VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the CA HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 CA HIST Cal-Sites site within approximately 1 mile of the target property.

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 04/09/2019 has revealed that there are 22 CA CERS HAZ WASTE sites within approximately 0.25 miles of the target property.
LOCAL LISTS OF REGISTERED STORAGE TANKS

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 CA SWEEPS UST site within approximately 0.25 miles of the target property.

CA HIST UST: Historical UST Registered Database.

A review of the CA HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 3 CA HIST UST sites within approximately 0.25 miles of the target property.
CA CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CA CERS TANKS list, as provided by EDR, and dated 04/09/2019 has revealed that there are 5 CA CERS TANKS sites within approximately 0.25 miles of the target property.

**Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA).
The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 6 CA HAZNET sites within approximately 0.001 miles of the target property.
CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST],
the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This
listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that
there are 2 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

CA HWP: Detailed information on permitted hazardous waste facilities and corrective action
("cleanups") tracked in EnviroStor.

A review of the CA HWP list, as provided by EDR, and dated 05/20/2019 has revealed that there are 3
CA HWP sites within approximately 1 mile of the target property.
CA HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the CA HWT list, as provided by EDR, and dated 04/08/2019 has revealed that there is 1 CA HWT site within approximately 0.25 miles of the target property.

CA CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CA CIWQS list, as provided by EDR, and dated 03/05/2019 has revealed that there is 1 CA CIWQS site within approximately 0.001 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials.

A review of the CA CERS list, as provided by EDR, and dated 04/09/2019 has revealed that there are 7 CA CERS sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Pathway: GROUND WATER PATHWAY
Scoring: 2

NPL Status: Currently on the Final NPL
Substance ID: U239
Substance: XYLENE
CAS #: 1330-20-7
Pathway: GROUND WATER PATHWAY
Scoring: 2

Summary Details:
SHELL SERVICE STATION  (Continued)

Conditions at proposal October 15, 1984): Fairchild Semiconductor Corp. manufactures semiconductors on approximately 20 acres in South San Jose, Santa Clara County, California. Land use in the vicinity of the site is agricultural, residential, and commercial. This site was proposed under the name Fairchild Camera Instrument Corp. South San Jose Plant). The company took the new name in 1986. Soils and part of a major aquifer providing drinking water to an estimated 65,000 people are contaminated with trichloroethane and other solvents, according to analyses conducted by the Great Oaks Water Co. and Fairchild. One municipal well within 3 miles of the site has been taken out of service. In response to a request from the California Regional Water Quality Control Board, Fairchild is voluntarily taking action to contain and reduce the plume of contamination. Fairchild has started an investigation to determine the extent of the problem at the site and is currently undertaking interim cleanup measures consisting of excavation of contaminated soils, the pumping and treatment of contaminated ground water, and construction of a slurry wall to reduce the spread of contamination from the site. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act RCRA) when the company filed Part A of a permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status January 1986): Fairchild has removed contaminated soil from the facility, has installed a system to pump and treat contaminated ground water, and is constructing the slurry wall. Status June 24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. In 1982, the facility converted to a hazardous waste generator. Hence, it satisfies a component of EPA's NPL/RCRA policy. The slurry wall has been completed. In a pilot test, vapor extraction proved to effectively clean up contaminated soil within the wall. A full-scale system is scheduled to be implemented shortly. Contaminated ground water continues to be pumped and treated. Status October 4, 1989): EPA has placed this site on the NPL. A Record of Decision was signed in March 1989, finalizing the remedy and concurring with State orders for final cleanup. The company is in compliance with these orders. The remedy includes pumping and treatment of ground water and vapor extraction to remove contaminants from soils. In addition, the feasibility of reinjecting treated ground water is being studied.

Site History: Background: The Site is located at 101 Bernal Road near the intersection of Bernal Road and San Ignacio Avenue in south San Jose (see Site location map). Land use in this area is a mixture of commercial and residential. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency overseeing soil and groundwater cleanup activities and EPA also provides oversight. In 1977, Fairchild Semiconductor Corporation (Fairchild) constructed a facility for manufacturing electronic devices at the Site. Fairchilds operations at this facility included the use, handling, repackaging, and storage of industrial solvents or volatile organic compounds (VOCs), including 1,1,1-trichloroethane (TCA), and 1,1-dichloroethylene (1,1-DCE). In 1981, an underground waste solvent storage tank was found to have failed, causing a release of its contents. All manufacturing operations at the Site stopped in 1983. The current Site owner developed the Site into a retail shopping center between 1998 and 2000 and it remains a shopping center with a paved parking lot. Site Investigation: An investigation in 1981 detected VOCs in subsurface soil and groundwater at the Site, with TCA being detected most frequently and at the highest concentrations. In the initial investigation in 1981-82, VOCs were detected in the A and B and C aquifers (underground water-bearing zones designated by increasing depth below ground surface). Since 2013, the only VOC detected above the cleanup level inside the slurry wall in the “B” aquifer is 1,1-DCE with a maximum concentration of 1,600 micrograms per liter (a%g/L). Outside the slurry wall, the maximum 1,1-DCE is 7.9 a%g/L at well RW-25(B). The drinking water standards (cleanup level) for 1,1-DCE is 6.0 a%g/L. No samples from wells outside the slurry wall exceed the clean level, except, RW-25(B). The contaminated groundwater plume once extended approximately 500 feet off-Site within the B aquifer. The TCA plume in the B aquifer once extended approximately 4,500 feet west/northwest of the Site. The shallow groundwater beneath the Site is not used for drinking or other purposes. Great Oaks Water Company supplies drinking water to
the Site and its vicinity. In 1995, Fairchild completed a health risk assessment evaluating potential VOC vapor intrusion into structures built on-Site. The assessment concluded that no significant health risk exists for building occupants. Cleanup Activities: Fairchild completed a series of extensive remedial programs at this Site. The underground storage tank and associated piping were taken out of service and 3,400 cubic yards of impacted soil were removed in 1982. Additional cleanup activities conducted between 1982 and 1998 included groundwater extraction and treatment, soil flushing, sealing of potential conduit wells, installation of a clay slurry wall around the perimeter of the site, and soil vapor extraction (SVE) and treatment. The clay slurry wall was constructed around the site perimeter between 1986 and 1987, 3 feet thick, depth varies 55 to 148 ft keyed into the B-C aquitard. Groundwater pumping from the C aquifer was terminated in 1989 due to non-detection of VOCs. The SVE was terminated in 1990 due to low VOC vapor recovery rates. All off-Site groundwater pumping was terminated in 1991 due to VOC detections at or below drinking water standards. Subsequently, on-Site groundwater pumping and treatment system operations were terminated in 1998 due to the effectiveness of the slurry wall containment. Site cleanup requirements were documented in the EPA’s Record of Decision (ROD) and RWQCB Order No. 89-16 in March 1989. The final remedies were SVE at TSU#4, groundwater extraction, air stripping treatment, and reinjection and storm drain discharge, and deed restriction. In 2007, the Order’s self-monitoring program was revised to annual reporting and revised monitoring and sampling schedule for wells. Based on the five year reviews, to be protective in the long term, the feasibility of alternative remedies or improvements to the existing system need to be evaluated to insure the long term remedial objectives are achieved. The ROD will need to be amended to reflect the change in remedy and the new contaminant of concern, 1,4 dioxane. Next Steps: Due to implementation of these cleanup measures, VOC concentrations in soil and groundwater have decreased significantly over the past 30 years. Groundwater monitoring and reporting will continue. The draft Focused Feasibility Study and associated comments, which evaluates other remedial options, is under review. On August 3, 2017, the Regional Water Board approved the destruction of 13 monitoring and remediation wells, cessation of sampling inactive supply well GO-04(M), and reduce monitoring from annual to once every five years preceding a five year review, all of which were requested in the 2016 Annual Report. In 2017, the Regional Water Board required onsite vapor intrusion workplans for indoor air sampling and soil gas sampling. In early 2018, indoor air sampling was completed and concentrations did not exceed ESLs. Soil gas probes and second round of indoor air sampling will be completed in Summer 2018.

The violation notes indicate that the facility’s UST Permit to Operate expired on October 31, 2016. Full compliance is required to receive a UST Permit to Operate. In order to obtain full compliance, all open violations must be corrected and written responses with the corrective actions taken for each open violation must be submitted. The Certification of Compliance must be signed, and the completed Official Notice of Inspection Report must be returned to HMCD for review. Upon verification that full compliance has been achieved, a UST Permit to Operate will be issued from the office.
SHELL SERVICE STATION (Continued)

Violation Description: Failure to record any unauthorized release from the primary containment.

Violation Notes: Returned to compliance on 04/25/2017. A fuel alarm in the Dispenser 7/8?7 UDC pan, 91 PLLD shutdown, and 91 gross line fail occurred on 10/10/2016. Service Station Systems was on-site the same day to address the alarms. The maintenance record states that a customer drove off on the Dispenser 7 side, which caused the 91 meter to "blow up" and caused the retractor hose end to break. The service technician pumped out 7 gallons of gasoline from the UDC and poured it into the hazardous waste container on-site. Based on the documentation provided and observations made during inspection, the unauthorized release was able to be cleaned up within 8 hours after the release was detected, did not escape secondary containment, and did not cause any deterioration of the secondary containment. The facility maintains a ?Spill Log? to record all unauthorized releases. While smaller spills were noted to have occurred in the past year, no record for the 7 gallons of gasoline was included in the ?Spill Log? or available.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 98294
Site Name: BERNAL SHELL #131
Violation Date: 01-30-2017
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)

Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 04/25/2017. Names and phone numbers of all emergency coordinators and the fire department are posted in the cash register area, but no other required information is posted.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 98294
Site Name: BERNAL SHELL #131
Violation Date: 01-30-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 04/25/2017. Trash Dumpster Area: One, 15 gallon, degraded black drum located in the western corner is marked with an illegible hazardous waste label. Soda crates and a white, 5 gallon bucket were observed to be accumulating on top of the drum at the time of inspection. The bunghole in the top of the drum was observed to be open and approximately 8 gallons of liquid was observed within the drum. Per facility staff, the contents of the drum are unknown as the drum was believed to be empty. Provide documentation of the hazardous waste determination made through generator knowledge or laboratory analysis, as instructed below, to HMCD for review. If
SHELL SERVICE STATION (Continued)
determined to be hazardous waste, immediately begin managing in
accordance with all applicable hazardous waste requirements.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS
Site ID: 98294

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).  
Violation Notes: Returned to compliance on 07/17/2017. All dispensers are approximately three inches wider than the under dispenser containment (UDC) pans and portions of regulated, primary product piping are located outside the UDC pan footprint. Currently, leaks from the primary piping components outside the UDC pan footprint will not be channeled into the existing UDC pans. Under dispenser containment must provide containment for any potential leaks within the dispenser. Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks within dispensers. Apply for a permit from HMCD, if necessary.

Eval Notes: Onsite to witness portions of three year SB989 secondary containment testing for UST system. Last testing began 8/22/2012 with repairs and re-test of failed/untestable components on 11/1/2012. -- Repairs to penetration fittings in UDC and boots in sumps was conducted under permit SR0839706. -- REtest of failed parts occurred on 12/21/12, with diesel piping and UDC 9/10 passing testing. Documentation of 989 test attached to SR packet in HMCD files. Testing conducted by ABLE Maintenance, Technician James Moore. Mr. Moore has current ICC (5254517-UT, exp7/27/17 ) Witnessed testing of three fill sumps, using the Inconn 15 minute accelerated test measuring device. 87 and 91 sumps passed first test. Diesel sump failed first two tests. the following tests remained to be conducted: product piping, STP sumps
and UDCs. Upon return to site in afternoon, all testing had concluded.

SHELL SERVICE STATION (Continued)

Site Name: BERNAL SHELL #131
Violation Date: 01-30-2017
Citation: HSC 6.7 25294 - California Health and Safety Code, Chapter 6.7, Section(s) 25294
Violation Description: Failure to record any unauthorized release from the primary containment.
Violation Notes: Returned to compliance on 04/25/2017. A fuel alarm in the Dispenser 7/8?s UDC pan, 91 PLLD shutdown, and 91 gross line fail occurred on 10/10/2016. Service Station Systems was on-site the same day to address the alarms. The maintenance record states that a customer drove off on the Dispenser 7 side, which caused the 91 meter to ?blow up? and caused the retractor hose end to break. The service technician pumped out 7 gallons of gasoline from the UDC and poured it into the hazardous waste container on-site. Based on the documentation provided and observations made during inspection, the unauthorized release was able to be cleaned up within 8 hours after the release was detected, did not escape secondary containment, and did not cause any deterioration of the secondary containment. The facility maintains a ?Spill Log? to record all unauthorized releases. While smaller spills were noted to have occurred in the past year, no record for the 7 gallons of gasoline was included in the ?Spill Log? or available

Violation Date: 01-30-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 04/25/2017. Trash Dumpster Area: One, 15 gallon, degraded black drum located in the western corner is marked with an illegible hazardous waste label. Soda crates and a white, 5 gallon bucket were observed to be accumulating on top of the drum at the time of inspection. The bunghole in the top of the drum was observed to be open and approximately 8 gallons of liquid was observed within the drum. Per facility staff, the contents of the drum are
unknown as the drum was believed to be empty. Provide documentation of the hazardous waste determination made through generator knowledge or laboratory analysis, as instructed below, to HMCD for review. If determined to be hazardous waste, immediately begin managing in accordance with all applicable hazardous waste requirements.

Violation Description: Returned to compliance on 07/17/2017. All dispensers are approximately three inches wider than the under dispenser containment (UDC) pans and portions of regulated, primary product piping are located outside the UDC pan footprint. Currently, leaks from the primary piping components outside the UDC pan footprint will not be channeled into the existing UDC pans. Under dispenser containment must provide containment for any potential leaks within the dispenser. Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks within dispensers. Apply for a permit from HMCD, if necessary.
Violation Notes: Returned to compliance on 07/17/2017. All dispensers are approximately three inches wider than the under dispenser containment (UDC) pans and portions of regulated, primary product piping are located outside the UDC pan footprint. Currently, leaks from the primary piping components outside the UDC pan footprint will not be channeled into the existing UDC pans. Under dispenser containment must provide containment for any potential leaks within the dispenser. Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks within dispensers. Apply for a permit from HMCD, if necessary.

Eval General Type: Other/Unknown
Eval Date: 08-10-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Onsite to witness portions of three year SB989 secondary containment testing for UST system. Last testing began 8/22/2012 with repairs and re-test of failed/untestable components on 11/1/2012. --Repairs to penetration fittings in UDC and boots in sumps was conducted under permit SR0839706. -- RETest of failed parts occurred on 12/21/12, with diesel piping and UDC 9/10 passing testing. Documentation of 989 test attached to SR packet in HMCD files. Testing conducted by ABLE Maintenance, Technician James Moore. Mr. Moore has current ICC (5254517-UT, exp7/27/17 ) Witnessed testing of three fill sumps, using
the Inconn 15 minute accelerated test measuring device. 87 and 91 sumps passed first test. Diesel sump failed first two tests. The following tests remained to be conducted: product piping, STP sumps and UDCs. Upon return to site in afternoon, all testing had concluded.

Violation Program: UST
Violation Source: CERS
Site ID: 98294
Site Name: BERNAL SHELL #131
Violation Date: 01-30-2017
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284

Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: Returned to compliance on 04/25/2017. The UST Monitoring Plan for all three UST systems incorrectly marks YES to the submittal element, “UDC Monitoring Stops Flow of Product at Dispenser”. The Veeder-Root 794380-208 sensors located in each dispenser only trigger audible/visual alarms and provide automatic pump shutdown when a leak is detected and provide automatic pump shutdown during failure/disconnection of the UDC Monitoring System. The sensor does not stop the flow of product at the dispenser. Amend the UST Monitoring Plans by marking “NO” for the submittal element indicating that “UDC Monitoring Stops Flow of Product at Dispenser” for all UST systems.

#### Violation Notes:
Returned to compliance on 04/25/2017. A fuel alarm in the Dispenser 7/8?S UDC pan, 91 PLLD shutdown, and 91 gross line fail occurred on 10/10/2016. Service Station Systems was on-site the same day to address the alarms. The maintenance record states that a customer drove off on the Dispenser 7 side, which caused the 91 meter to ?blow up? and caused the retractor hose end to break. The service technician pumped out 7 gallons of gasoline from the UDC and poured it into the hazardous waste container on-site. Based on the documentation provided and observations made during inspection, the unauthorized release was able to be cleaned up within 8 hours after the release was detected, did not escape secondary containment, and did not cause any deterioration of the secondary containment. The facility maintains a ?Spill Log? to record all unauthorized releases. While smaller spills were noted to have occurred in the past year, no record for the 7 gallons of gasoline was included in the ?Spill Log? or available [Truncated]

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 07/17/2017. All dispensers are approximately three inches wider than the under dispenser containment (UDC) pans and portions of regulated, primary product piping are located outside the UDC pan footprint. Currently, leaks from the primary piping components outside the UDC pan footprint will not be channeled into the existing UDC pans. Under dispenser containment must provide containment for any potential leaks within the dispenser. Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks within dispensers. Apply for a permit from HMCD, if necessary.

Testing activity. Resham Lal, Manager, Bernal Shell is on site to allow facility access and records review. This Notice of Inspection
shall be emailed to Sunny Goyal, at; sunny@vintnersdist.com by the end of the business day today. Eric Salenger, UST Service Tech, Able
Maintenance, is on site to conduct the Secondary Containment Testing.
ICC # 8729425 Serv Tech Expires 4/24/2019, Incon Level 4 #1018893709
FFS/Incon exp 5/2/2019 The 3 - UST annular spaces are liquid filled.
No Secondary Containment Testing required. 3 STP Sumps, 91 Octane sump
has a torn boot and is unable to be tested. 3 Fill Sumps, 87 Fill sump
was no able to pass when tested. The test boot seemed to be the
problem. 3 product piping (Flexible) - 91 Octane sump has a torn test
boot and is unable to be tested. 8 UDCs, to be done today, but not
witnessed by this office. NOTE: Submit today’s test results

Solarzano, Site Manager is on site to allow facility access and
records review. This Notice of Inspection shall be emailed to Sunny
Goyal, at; sunny@vintnersdist.com by the end of the business day
today. Jesse Rodriguez, California UST Service Technician, Service
Station Systems, was on site to conduct the UST Monitoring System
Annual Test and Certification. His ICC, # 8024952, is set to expire on
9/17/2019. His Veeder-Root Certification, #B97359, for Certified UST
Monitoring Technician, expires on 1/5/2019. His Vaporless Manufacturing, Inc. Record #2660, Certification to operate the Vaporless LTD-890 Leak Detector, is set to expire on 4/3/2018. The 3 Spill Buckets were under water test at the time of my arrival. These were measured with a standard tape and recorded in writing. After 60 minutes these spill buckets were re-tested and showed no drop in the water level. All 3 spill buckets passed these [Truncated]

BAE SYSTEMS PLATFORMS & SERVICES (Continued)  S120629443

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Your hazardous materials inventory needs to be updated to include the following: Metallography Lab- Waste acid- Max qty., 30 gal., (size of the container) Conex Warehouse- Chem 03 locker; - ATF- max qty., 110 gal. (2 x 55gal.) - Lubricating oils (Synthetic,10W-40, 80W-90, etc.) max qty., 330gal. Please update your hazardous materials inventory via CERS to include all of the above and any other hazardous materials/or hazardous waste that needs to be reported at HMBP quantities.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 387426
Site Name: BAE Systems Platforms & Services
Violation Date: 09-14-2017
Citation: 40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance ) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes: Metallography Lab- Spill control equipment was not available at this lab where the hazardous waste is being stored. Ensure that locations of hazardous wastes are equipped with spill control equipment.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: The site map currently found on CERS needs to be updated to include all of the required elements such as: ? A general site plan that can include, but not be limited to, the location of buildings, exterior storage facilities, permanent access ways, evacuation routes, parking lots, internal roads, chemical loading areas, equipment cleaning areas, storm and sanitary sewer accesses, emergency equipment and adjacent property uses. ? A building floor plan that includes hazardous materials storage areas within the building, rooms, doorways, corridors, means of egress and evacuation routes. Additionally, the areas currently identify on the map do not correspond to the areas inspected. The map lists locations as supposed to actual areas (i.e. Conex area, Generator area, Metallography area, etc.) You can provide multiple maps with this information. Additionally the maps need to have the correct locations of where hazardous materials and hazardous waste being stored. Currently

Violation Date: 09-14-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Metallography Lab- A hazardous waste determination to all the used q-tips that come in contact with the waste acid. Currently, these used q-tips are being rinsed and the wastewater is collected and disposed of as hazardous waste. After they are rinsed they are disposed of in the trash can. Have these q-tips tested by a registered environmental lab and test them for corrosivity that at the point of disposal these waste q-tips are no longer a hazardous waste. Provide to our office in writing how this violation was corrected.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-14-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through took place on 09/12 and 09/13, paperwork review took place on 09/13 and inspection report was issued today to Mr. Vitug.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-14-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through took place on 09/12 and 09/13, paperwork review took place on 09/13 and inspection report was issued today to Mr. Vitug. Present during this inspection were: Hector Velez. Notes: 1) VCG020- Marking of Hazardous wastes (CORRECTED)- Observed a couple of containers through out the facility that store hazardous waste that were mislabeled (i.e., generator name was incorrect and some were missing the accumulation date). All of these containers were properly marked during this inspection. 2) This facility is a small quantity generator of hazardous waste and your accumulation time is 180 days. 3) Make sure that all Universal Waste is labeled as required.

Violation Date: 09-14-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Metallography Lab- A hazardous waste determination to all the used q-tips that come in contact with the waste acid. Currently, these used q-tips are being rinsed and the wastewater is collected and disposed of as hazardous waste. After they are rinsed they are disposed of in the trash can. Have these q-tips tested by a registered environmental lab and test them for corrosivity that at the point of disposal these waste q-tips are no longer a hazardous waste. Provide to our office in writing how this violation was corrected.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (CIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Description:
6.95, Section(s) 25508(a)(1)
HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Notes:
Your hazardous materials inventory needs to be updated to include the following: Hydraulic canopy area; - 2 x 260 gal., Liquid Nitrogen, max qty., 520 gallons - Shop area; - 1 x 55 gal., of waste aerosol cans
Please update your hazardous materials inventory via CERS to include all of the above and any other hazardous materials/or hazardous waste that needs to be reported at HMBP quantities.

Violation Notes: Shop 2 - Storage Area; - Observed a parts washer stored inside this unit. It is unsure if this parts washer has any wastewater inside the equipment or if it’s empty. Additionally, observed an oily spill on the floor coming from a jack, it appears that the jack is leaking. Clean up spill immediately. Additionally, ensure that all equipment no longer in use is completely drained out of the fluids. Lastly, ensure that any old parts that could potentially leak oil have a secondary containment to capture all of the drained oil.

Violation Source: CERS

Site ID: 377938
Site Name: BAE Systems Platforms & Services
Violation Date: 09-14-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Shop 2- Storage Area; - Observed a parts washer stored inside this unit. It is unsure if this parts washer has any wastewater inside the equipment or if it’s empty. Additionally, observed an oily spill on the floor coming from a jack, it appears that the jack is leaking. Clean up spill immediately. Additionally, ensure that all equipment no longer in use is completely drained out of the fluids. Lastly, ensure that any old parts that could potentially leak oil have a secondary containment to capture all of the drained oil.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: Yes
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Violation Status: No violations found

CERS Description: Hazardous Waste Generator

Eval Type: Other, not routine, done by local agency
Eval Notes:
On-site to conduct a permit investigation. Facility contacted Santa Clara County Department of Environmental Health on August 9th via phone call to inform me that the facility has moved locations from 970 Lonus St to 6341 San Ignacio Av. Facility is a manufacturer of electronic components, and has incidental machining operations. Facility used to primarily perform machining operations but has slowly changed operations over the years. Electronic components manufacturing activities include assembly, light soldering, and cleaning of components with alcohol solvents. As per Mr. Viet Pham, solder dross is collected and disposed of through Stericycle, no pick up of solder dross has occurred since facility has moved to this location. Q-tips are dabbed with isopropyl alcohol and used to clean components. As per Mr. Viet Pham, the alcohol evaporates and the q-tips are thrown in the municipal garbage. Other waste streams include waste coolant from 2 CNC machines. CNC machines are [Truncated]

Eval Notes: On-site to conduct a permit investigation. Facility contacted Santa Clara County Department of Environmental Health on August 9th via phone call to inform me that the facility has moved locations from 970 Lonus St to 6341 San Ignacio Av. Facility is a manufacturer of electronic components, and has incidental machining operations. Facility used to primarily perform machining operations but has slowly changed operations over the years. Facility also allows customers to perform testing of equipment using liquefied inert argon, which is periodically stored on-site for up to a couple of months at a time. Facility used to utilize vats of isopropyl alcohol and acetone for batch cleaning in their clean room operations, but no longer performs these operations in the clean room and has outsourced their batch cleaning operations. The following reportable chemicals were observed on-site: 4x55 gal drums Waste Coolant 3x55 gal drums Machine Coolant 2x60 L dewars liquefied [Truncated]

Violations:
- Site ID: 373356
- Site Name: Jabil
- Violation Date: 09-15-2017
- Citation: 22 CCR 12 66262.211 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
- Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
- Violation Notes: A hazardous waste determination must be made on the following: 1) Currently, wastewater contaminated with metals such as aluminum, stainless steel and copper as well as plastics grindings are being plumbed directly into a holding tank that’s about 200 gallons (DI Tank) at the evaporator room. This wastewater is being generated from the cleaning/polishing line as well as from the Radius (3D Printing Lab). After the holding tank this water is being discharged into a evaporator unit in which the wastewater is evaporated and the metal sludge generated is managed as hazardous waste. At this time it is uncertain if the wastewater currently being evaporated is a hazardous waste. A sample must be taken at the point of discharged (pre-filtered wastewater) from both discharged points. This wastewater must be analyzed for metal toxicity (CAM-17) at a registered environmental
The following containers were storing hazardous waste and were missing characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: The sample must be inclusive of the liquid and sludge. Notify our office when this sample will take as [Truncated]

Site Name: Jabil

Violation Date: 09-15-2017

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: During paperwork review I was unable to determined at this time if employees are being trained annually in emergency response and safety procedures. An annual refresher must be conducted annually and documents must be kept of this training. Ensure that you begin documenting this training and that records are being made available for review during an inspection.

**Evaluation:**

Eval General Type: Other/Unknown

Eval Date: 10-11-2017

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: On-site to observe the collection of samples on this date. Justin Dutmers- EHS Project Manager with Millennium Environmental was present during this inspection. The following was observed: 1) Sample- ETS Rinse Sink- This sample was taken at the reservoir at the sink pre-filtered at the Destructive Analysis area. The sample was collected by Mr. Norman Sanchez with Clean Harbors at 9:50am and about 200 cc (200ml) were collected. 2) Sample Radius Rinse Sink- This sample was taken at the reservoir at the sink pre-filtered at the Radius (3D Printing Lab) The sample was collected by Mr. Norman Sanchez with Clean Harbors at 10:00am and about 200cc (200ml) were collected. 3) Sample Evap, holding tank- This sample was taken at the holding tank from the evaporator room. The sample was collected by Mr. Norman Sanchez with Clean Harbors at 10:10am and about 200cc (200ml) were collected. Notes: 1) All of the samples above were evidence taped and were noted to be stored in an ice [Truncated]

Eval Program: HW

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection

Eval Date: 09-15-2017

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Present during the facility walk-through were; Ana Tirado, EHS Manager with Jabil, Anh Do, EHS Engineer with Jabil and Jaymar Ellen, Environmental Health Specialist with County of Santa Clara. Facility walk-through took place on Wednesday, September 6th and documents reviewed on Tuesday, September 12th. A copy of this report will be e-mailed to Mr. Do at: anh_do@jabil.com on this day. Notes: 1) It is recommended that you revisit the waste profile of all of the hazardous wastes that are currently being placed inside the 5-gallon "lab waste"
containers. Especially take into the consideration the physical
composition of the waste (liquid and solid) as well as the hazardous
properties. If all wastes currently going into your lab waste
containers do not exhibit the same hazardous properties then they
cannot be commingled for disposal. 2) This facility is a small
quantity generator of hazardous waste. You have 180 days to dispose of
your waste. 3) Provide a copy of the [Truncated]

Eval General Type: Other/Unknown
Eval Date: 11-08-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a follow-up inspection on this date. Present during
this inspection were; Carlos Barillas- Facilities Supervisor, Paul
Strange, President with Millennium Environmental and Ray Maiden,
Hazardous Materials Specialist II with the County of Santa Clara,
Department of Environmental Health. During this inspection the
following items were discussed and these items need to be addressed
within 30 days: 1) Based on the analytical results received from Jabil
back in 11/01/17 it is still undetermined if hazardous waste is being
treated at this site via the evaporator. After further discussion from
today and further explanation of the process from the wastewater
generated from the polishing line it was determined that a sample
needs to be collected at the primary collection point (white
collection sump). Jabil personnel must demonstrate the worst case
scenario of polishing components containing copper, to ensure a
comprehensive waste determination sample is [Truncated]

- **Violation Description:** Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.  
- **Violation Notes:** The most recent CERS submittal for this site was conducted on 06/23/2016. The following information needs to be updated; 1) The primary, secondary emergency contacts and the environmental contact need to be updated to reflect the current person in these positions. All of the people listed on that submittal are no longer employed with Jabil. The current environmental contact for this site is; Ana Tirado, EHS Manager. Within 30 days update this information via CERS.

- **Eval Date:** 10-11-2017  
- **Violations Found:** No  
- **Eval Type:** Other, not routine, done by local agency  
- **Eval Notes:** On-site to observe the collection of samples on this date. Justin Dutmers- EHS Project Manager with Millennium Environmental was present.
during this inspection. The following was observed: 1) Sample- ETS Rinse Sink- This sample was taken at the reservoir at the sink pre-filtered at the Destructive Analysis area. The sample was collected by Mr. Norman Sanchez with Clean Harbors at 9:50am and about 200 cc (200ml) were collected. 2) Sample Radius Rinse Sink- This sample was taken at the reservoir at the sink pre-filtered at the Radius (3D Printing Lab) The sample was collected by Mr. Norman Sanchez with Clean Harbors at 10:00am and about 200cc (200ml) were collected. 3) Sample Evap, holding tank- This sample was taken at the holding tank from the evaporator room. The sample was collected by Mr. Norman Sanchez with Clean Harbors at 10:10am and about 200cc (200ml) were collected. Notes: 1) All of the samples above were evidence taped and were noted to be stored in an ice [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-15-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Present during the facility walk-through were; Ana Tirado, EHS Manager with Jabil, Anh Do, EHS Engineer with Jabil and Jaymar Ellen, Environmental Health Specialist with County of Santa Clara. Facility walk-through took place on Wednesday, September 6th and documents reviewed on Tuesday, September 12th. A copy of this report will be e-mailed to Mr. Do at; anh_do@jabil.com on this day. Notes: 1) It is recommended that you revisit the waste profile of all of the hazardous wastes that are currently being placed inside the 5-gallon "lab waste" containers. Especially take into the consideration the physical composition of the waste (liquid and solid) as well as the hazardous properties. If all wastes currently going into your lab waste containers do not exhibit the same hazardous properties then they cannot be commingled for disposal. 2) This facility is a small quantity generator of hazardous waste. You have 180 days to dispose of your waste. 3) Provide a copy of the [Truncated]

Eval Notes: On-site to conduct a follow-up inspection on this date. Present during this inspection were; Carlos Barillas- Facilities Supervisor, Paul Strange, President with Millennium Environmental and Ray Maiden, Hazardous Materials Specialist II with the County of Santa Clara, Department of Environmental Health. During this inspection the following items were discussed and these items need to be addressed within 30 days: 1) Based on the analytical results received from Jabil back in 11/01/17 it is still undetermined if hazardous waste is being treated at this site via the evaporator. After further discussion from today and further explanation of the process from the wastewater generated from the polishing line it was determined that a sample needs to be collected at the primary collection point (white collection sump). Jabil personnel must demonstrate the worst case

- Registry ID: 110002713305

**Environmental Interest/Information System**
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-20-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Notes: 1) Hazardous waste training is being documented on Lotus Notes (IBM)- EH&S Forms. Dominic was able to show me this electronically. Hazardous waste training is performed annually. 2) This facility is a CESQG (Conditionally Exempt Small Quantity Generator). Hazardous waste such as; waste IPA, waste oil, and waste Silane is being accumulated in 5-gal containers and it’s being disposed off through the CESQG Business Program Drop-off with the County of Santa Clara. Hazardous waste disposal records were reviewed at the time of this inspection. 3) A copy of their Emergency Response Plan was available at the facility. 4) In a year there are about 4 hazardous waste drop-offs and about 30-50gal. of hazardous waste are taken each time. At this time your facility is permitted at the right category for hazardous waste generation. However, if in the future you decrease your hazardous waste generation than your hazardous waste permit could be re-evaluated and reduce to a [Truncated]

**Hazardous Waste Generator CERS Description:**

- **Site ID:** 424117
- **Site Name:** Leiter’s
- **Violation Date:** 06-21-2017
- **Citation:** 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
- **Violation Description:** Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
- **Violation Notes:** DETERMINE IF THE FOLLOWING ARE HAZARDOUS WASTE WHEN DISPOSED OF; - 1X5 GAL., RED GASOLINE CONTAINER - 1X 2 GAL., BUG STOP CONTAINER - 1X X1 GALS., RESIN CLEANER *ALL CONTAINERS ABOVE ARE CURRENTLY NOT BEING USED AND ACCORDING TO FACILITY CONTACT THEY WERE LEFT BEHIND FROM THE PREVIOUS OWNER. IF THESE MATERIALS ARE NO LONGER USED, THEY MUST BE MANAGED AS HAZARDOUS WASTE. ADDITIONALLY, THE FACILITY USES DISINFECTING/CLEANING CHEMICALS (MSDS SHOW THAT UNUSED PRODUCT IS A CORROSIVE WASTE (D0020/ OTHER DISINFECTANT SHOWS A PH OF 1.5-2.50 RANGE) THAT IN CONCENTRATED FORM MEET HAZARDOUS WASTE CRITERIA. MAKE A HAZARDOUS DETERMINATION OF WASTES GENERATED FROM THE USE OF THESE DISINFECTANTS THAT WHEN DISPOSED OF THEY ARE NOT HAZARDOUS WASTE. PROVIDE TO OUR OFFICE IN WRITING AN EXPLANATION OF THE DISPOSAL OF THESE WASTES.

**Violation Division:** Santa Clara County Environmental Health
**Violation Program:** HW
**Violation Source:** CERS

---

**Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.**
Violation Notes: BASED ON RECORDS REVIEW AND FROM SPEAKING WITH FACILITY MANAGER, IT IS UNSURE IF THE "GENERATOR COPY" OF THE HAZARDOUS WASTE MANIFESTS ARE BEING SENT TO DTSC AS REQUIRED. MAIL COPIES OF ALL OF THE HAZARDOUS WASTE MANIFESTS TO DTSC AS REQUIRED.

Violation Notes: THE EMPTY CONTAINERS OF MITOMYCIN RESIDUALS ARE CURRENTLY BEING MANAGED AS MEDICAL WASTE (CHEMO SOFT WASTE) BUT THEY ARE A FEDERAL (RCRA) WASTE THAT SHOULD CARRY THE CODE "U010" AND BE MANAGED AS HAZARDOUS WASTE. FROM NOW ON ANY EMPTY CONTAINERS OR UNUSED EXCESS SOLUTIONS CONTAINING MITOMYCIN MUST BE DISPOSED OF HAZARDOUS WASTE AND NOT MEDICAL WASTE.

EPA Region: 09
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste
LEITER'S COMPOUNDING (Continued)

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): Yes
- Recycler of hazardous waste: No
- Transporter of hazardous waste: Yes
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Violation Status: No violations found

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/17/2015. Inventory last submitted in 2013 does not account for all chemical noted during the inspection that exceed reporting thresholds/levels. The following items were noted as being stored at above reportable levels, but are not included in the last HMBP inventory submittal: Oxygen (281+110+110+220), acetylene (121+110+120), 75/25 Ar/CO2 gas, propane (500 gal), Hotsy soap (2x55), used antifreeze (220 gal), 50/50 coolant (3x55), 797 degreaser (55 gal). Mr. Rosas noted that the HMBP was under review and revision at the time of the inspection.

Site Name: CALTRANS - S. San Jose Maintenance
Violation Date: 01-13-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 02/17/2015. A container marked "non-RCRA HW liquids (spill clean up, contains free liquids)" was noted as having a strong gasoline odor in it. It was determined that parts contaminated with gasoline were allowed to sit and drain on top of the spent absorbent pads previously used for spill clean up. The waste is indicated as a non-RCRA waste, but is now contaminated with benzene (a RCRA regulated constituent) and is being used to drained liquids and not for the accumulation of contaminated solids. CEASE DRAINING GASOLINE CONTAMINATED PARTS AND EQUIPMENT IN THIS MANNER.

Site ID:
CERS
Violation Source:
HW
Violation Program:

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes:
Returned to compliance on 02/17/2015. Noted 55 gallon container of used absorbent in roads locker missing physical state, properties and start date. Bag also noted holding various containers of paint removed from roadsides, with bag unlabeled. Rolling containers for oil collection in Bldg B had faded/illegible label. Not all information was legible on one of the wheeled oil tanks or the coolant tank.

Violation Program:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violation Notes:
Returned to compliance on 02/17/2015. Labels and receipts indicate accumulation of antifreeze coolant for longer than 180 days. Interval marked on waste container spanned 11/21/13 to 12/9/14 and only receipt noted for 2014 was dated 12/9/14.

MAP FINDINGS

CALTRANS - S. SAN JOSE MAINTENANCE (Continued)

Site ID: 389081
Site Name: CALTRANS - S. San Jose Maintenance
Violation Date: 09-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Based on my inspection and paperwork review, facility failed to provide copies of hazardous waste shipments for the past 3 years for the hazardous waste generated at this facility (oily-debris hazardous waste drum) at Bldg. A. Make sure that all hazardous waste disposal receipts are made available during inspection for review. Within 30 days of each shipment of hazardous waste.

Violation Notes: According to facility contact at the shop, Bldg. B. A copy of the "Generator Copy" of the hazardous waste manifest is not being sent to DTSC as required. Begin sending copies of these manifest to the State as required.

Site ID: 389081
Site Name: CALTRANS - S. San Jose Maintenance
Violation Date: 09-13-2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Observed a 55 gal drum of drained used oil filters. The drained used oil filters are being drained by means of gravity flow only. Ensure that drained used oil filters are completely drained out from any free-flowing used oil and fuel. Puncturing is an allowable method of draining the used filters as long as the residue is being captured and managed properly.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-13-2015
Violations Found: Yes
Eval Notes: Facility has tow functional groups generating different wastes: maintenance (Bldg B) and roads (Bldg A, yard). Roads group generates wastes collected from roadsides and accedents as well as some incidental onsite maintenance operations. Maintenance group generates vehicle maintenance wastes. Roads wastes stored in cabinet in yard, maintenance waste in work area. Roads controls operation of wash rack which is to be used only for exterior vehicle washing. Maintenance did note that mop water from floors are added to this system. Mop water noted during inspection was dirty with only slight sheen. Maintenance using wheeled 220 gallon tanks for collection and consolidation of antifreeze and used oil. Site has Particulate filter cleaning unit that generates an ash waste. Waste is still connected to the unit, and has not yet been disposed of. Will need to conduct waste determination prior to first disposal. Emergency equipment in good condition. All extinguishers inspected [Truncated]

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through was conducted on 08/29/18 and inspection report was issued on this date. Present during this inspection were: Manuel Hernandez, Jose Magallanes, Brad Mustard and Randy Lewis with Caltrans. Notes: 1) Used oily absorbent when it becomes saturated must be disposed as hazardous waste. Additionally, absorbent cannot be added to used oil for purposes of disposal. This could potentially be considered hazardous waste treatment. 2) Used mop degreaser waste water is being disposed of down the oil water separator at least once a week after they mop the shop floors in Bldg. B. According to facility contact, absorbent is used to clean-up spills on the shop and the degreaser is only used for surface mopping of the floors. There was waste water with degreaser inside the 5-gallons mop bucket. A pH test strip was used to verify corrosivity. The pH was a 10. This wastewater is not a hazardous waste for corrosivity. 3) Ensure that all hazardous waste drums and [Truncated]

Site ID: 389081
Site Name: CALTRANS - S. San Jose Maintenance
Violation Date: 01-13-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/17/2015. Inventory last submitted in 2013 does not account for all chemical noted during the inspection that exceed reporting thresholds/levels. The following items were noted as being stored at above reportable levels, but are not included in the last HMBP inventory submittal: Oxygen (281+110+110+220), acetylene (121+110+120), 75/25 Ar/CO2 gas, propane (500 gal). Hotsy soap (2x55), used antifreeze (220 gal), 50/50 coolant (3x55), 797 degreaser (55 gal). Mr. Rosas noted that the HMBP was under review and revision at the time of the inspection.

<td>At the time of this inspection facility contact provided me with a copy of the Tier II Qualified Facility. However, this facility is subject to full SPCC plan reporting as it stores more than 10,000 gallons of petroleum liquids on-site. Within 30 days provide a copy of the SPCC Plan or an explanation as to when a SPCC plan will be provided to our Department. THIS IS A REPEAT VIOLATION AS OF 01/13/2015.</td>

---

**Violation Description:**

Failure to meet the conditions of a Tier I or Tier II Qualified Facility: A Tier II qualified facility is one that has had no single discharge exceeding 1,000 U.S. gallons or no two discharges each exceeding 42 U.S. gallons within any twelve month period in the three years prior to the SPCC Plan self-certification date, or since becoming subject to this part if the facility has been in operation for less than three years (other than discharges that are the result of natural disasters, acts of war, or terrorism), and has an aggregate aboveground oil storage capacity of 10,000 U.S. gallons or less. A Tier I qualified facility meets the qualification criteria of a Tier II qualified facility and has no individual aboveground oil storage container with a capacity greater than 5,000 U.S. gallons.

**Violation Notes:**

Returned to compliance on 02/17/2015. Facility completed a SPCC using the "California Tier II" template. Facility confirmed as having more than 10,000 gallons of petroleum stored onsite, which precludes them from being a Qualified Facility.

---

**Violation Description:**

Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

**Violation Notes:**

The current copy of the emergency response plan found on CERS as of 3/15/18 list an emergency contact as of; Jose Rosas who is no longer employed at this location. Update the Contingency Plan to include the correct emergency response at this location.

Violations Found: Yes
Eval Date: 09-13-2018
Eval Type: Facility walk-through was conducted on 08/29/18 and inspection report was issued on this date. Present during this inspection were; Manuel Hernandez, Jose Magallanes, Brad Mustard and Randy Lewis with Caltrans.
Eval Notes: Facility has tow functional groups generating different wastes: maintenance (Bldg B) and roads (Bldg A, yard). Roads group generates wastes collected from roadsides and accidents as well as some incidental onsite maintenance operations. Maintenance group generates vehicle maintenance wastes. Roads wastes stored in cabinet in yard, maintenance waste in work area. Roads controls operation of wash rack which is to be used only for exterior vehicle washing. Maintenance did note that mop water from floors are added to this system. Mop water noted during inspection was dirty with only slight sheen. Maintenance using wheeled 220 gallon tanks for collection and consolidation of antifreeze and used oil. Site has Particulate filter cleaning unit that generates an ash waste. Waste is still connected to the unit, and has not yet been disposed of. Will need to conduct waste determination prior to first disposal. Emergency equipment in good condition. All extinguishers inspected [Truncated].

Violation Date: 01-13-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/17/2015. Inventory last submitted in 2013 does not account for all chemical noted during the inspection that exceed reporting thresholds/levels. The following items were noted as being stored at above reportable levels, but are not included in the last HMBP inventory submittal: Oxygen (281+110+110+220), acetylene (121+110+120), 75/25 Ar/CO2 gas, propane (500 gal), Hotsy soap (2x55), used antifreeze (220 gal), 50/50 coolant (3x55), 797 degreaser (55 gal). Mr. Rosas noted that the HMBP was under review and revision at the time of the inspection.

Violation Date: 01-13-2015
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to meet the conditions of a Tier I or Tier II Qualified Facility: A Tier II qualified facility is one that has had no single discharge exceeding 1,000 U.S. gallons or no two discharges each exceeding 42 U.S. gallons within any twelve month period in the three years prior to the SPCC Plan self-certification date, or since becoming subject to this part if the facility has been in operation for less than three years (other than discharges that are the result of natural disasters, acts of war, or terrorism), and has an aggregate aboveground oil storage capacity of 10,000 U.S. gallons or less. A Tier I qualified facility meets the qualification criteria of a Tier II qualified facility and has no individual aboveground oil storage container with a capacity greater than 5,000 U.S. gallons.
Violation Notes: Returned to compliance on 02/17/2015. Facility completed a SPCC using the "California Tier II" template. Facility confirmed as having more than 10,000 gallons of petroleum stored onsite, which precludes them from being a Qualified Facility.

Facility has two functional groups generating different wastes: maintenance (Bldg B) and roads (Bldg A, yard). Roads group generates wastes collected from roadsides and accidents as well as some incidental onsite maintenance operations. Maintenance group generates vehicle maintenance wastes. Roads wastes stored in cabinet in yard, maintenance waste in work area. Roads controls operation of wash rack which is to be used only for exterior vehicle washing. Maintenance did note that mop water from floors are added to this system. Mop water noted during inspection was dirty with only slight sheen. Maintenance using wheeled 220 gallon tanks for collection and consolidation of antifreeze and used oil. Site has Particulate filter cleaning unit that generates an ash waste. Waste is still connected to the unit, and has not yet been disposed of. Will need to conduct waste determination prior to first disposal. Emergency equipment in good condition. All extinguishers inspected [Truncated]

| Eval Notes:       | Facility walk-through was conducted on 08/29/18 and inspection report was issued on this date. Present during this inspection were: Manuel Hernandez, Jose Magallanes, Brad Mustard and Randy Lewis with Caltrans. **Notes:** 1) Used oily absorbent when it becomes saturated must be disposed as hazardous waste. Additionally, absorbent cannot be added to used oil for purposes of disposal. This could potentially be considered hazardous waste treatment. 2) Used mop degreaser waste water is being disposed of down the oil water separator at least once a week after they mop the shop floors in Bldg. B. According to facility contact, absorbent is used to clean-up spills on the shop and the degreaser is only used for surface mopping of the floors. There was waste water with degreaser inside the 5-gallons mop bucket. A pH test strip was used to verify corrositivity. The pH was 10. This wastewater is not a hazardous waste for corrosivity. 3) Ensure that all hazardous waste drums and [Truncated.]

NORTHROP GRUMMAN SYSTEMS
6379 SAN IGNACIO AV
SAN JOSE, CA 95119
Facility is a defense contractor developing sensors. Observed the following hazardous materials stored above reportable quantities:
- Lead acid battery electrolyte (184 gallons)
- Diesel (1160 gallons)
- Propane (~90 gallons)
- Notes: HMBP was submitted via CERS on 09/07/2018 ACCEPTED. Property owner notification provided to Sobrato Development Company. Update quantities of propane and diesel during next annual certification. Changes in quantities observed were <100% increase. Hazardous Materials training is job specific and all staff receives general evacuation/safety training. No violations observed at time of inspection.

Eval Date: 10-18-2018
Eval Type: Routine done by local agency

CERS Description: Chemical Storage Facilities
Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility is a defense contractor developing sensors. Observed the following hazardous materials stored above reportable quantities: - Lead acid battery electrolyte (184 gallons) - Diesel (1160 gallons) - Propane (~90 gallons) Notes: - HMBP was submitted via CERS on 09/07/2018 ACCEPTED - Property owner notification provided to Sobrato Development Company. - Update quantities of propane and diesel during next annual certification. Changes in quantities observed were <100% increase. - Hazardous Materials training is job specific and all staff receives general evacuation/safety training. No violations observed at time of inspection.
Eval Division: Santa Clara County Environmental Health

</table>
Failure to ensure that all employees are thoroughly familiar with hazardous waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Based on my observations of the Contingency Plan, Table G, the emergency equipment listed on this table needs to be updated to list all of the equipment that is currently found at this facility at the correct locations.

Based on my observations and the type of violations issued employees are not thoroughly familiar with hazardous waste handling and emergency response procedures. Within 30 days obtain required training.

Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Violation Notes:
The self contain eye-wash (Fendal 2000) has an expiration date of 11/2016. Ensure that eye-wash has been maintained as required.

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes:
Your hazardous materials inventory currently found on CERS needs to be updated to include the following: - 1 x 55 gal., used oil - 1 x 30 gal., of poly drums of cadmium solid waste(*) *- These hazardous waste needs to be reported for purposes of hazardous waste permitting with our Department.

Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

<td>Violation Notes:</td>
<td>Based on my observations and records review hazardous waste is being stored on-site for longer than 180 days. In the past 3 years there was only one hazardous waste shipment for the cadmium lab waste on 08/22/18. There were no records found for the used-oily coolant waste. Additionally, in the hazardous waste storage room observed 1 x 5gal. plastic container with what appeared to be used oil with an accumulation date of 10/13/10. Within 30 days dispose of all hazardous waste and provide copies of hazardous waste disposal receipts to my office. In the future, ensure that all hazardous waste is disposed off every 180 days. Do not exceed the time limit.</td>

Violation Date: 09-04-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
The following hazardous waste determination needs to be made on the following waste streams at these facility. A determination can be made by the generator by using generator knowledge and manage the waste as hazardous waste or by having the waste tested by a California Registered Environmental Lab and have the waste analyze for metal toxicity (CAM-17); 1) SPG Lab- Contaminated rags with a primer solution and others with IPA are currently being disposed of in the trash. 2) Cleaning area- Currently polishing and scrubbing of copper based products are being polished, scrubbed and sandblast for cleaning prior to going into the quality control area. A sponge type of scrubber is used to clean or polish these products. At this time, the sponge, dust and blast media contaminated with copper is being disposed of in the trash. 3) C-Scan Table- The water table used to clean the copper component pieces has a filtration system to collect small particles and sediments. The DI-water [Truncated]

**FINDS:**

Registry ID: 110002830125

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- **Class:** CERS HAZ WASTE
- **CERS Description:** Hazardous Waste Generator
- **Violations:**
  - **Site ID:** 114769
  - **CERS ID:** 10128337
  - **CERS Description:** Hazardous Waste Generator

### Violation Notes:

- Returned to compliance on 11/09/2018. Plan does not include the forms or format by which inspections are to be conducted.
EQUINIX - SV1 (Continued)

Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 114769
Site Name: Equinix - SV1
Violation Date: 10-11-2018
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Returned to compliance on 11/09/2018. Site does not have receipts demonstrating the proper disposal of coolant, which is being taken offsite by contractor during routine maintenance. Contractor needs to be a licensed hauler and issue receipts if coolant is to be removed by them.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 114769
Site Name: Equinix - SV1
Violation Date: 10-11-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 11/09/2018. Map submitted is incomplete in that it does not show adjacent streets, drains and locations of emergency shutoffs.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 114769
Site Name: Equinix - SV1
Violation Date: 10-11-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: “Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs.”
Violation Notes: Returned to compliance on 11/09/2018. Cross reference to plan is incorrect- references wrong sections. examples include facility drainage (5.2 in list, 5.3 in plan), Inpections (same as drainage), bulk storage (5.2 in list, table in plan)

Evaluation:
   Eval General Type: Compliance Evaluation Inspection
   Eval Date: 10-11-2018
   Violations Found: Yes
   Eval Type: Routine done by local agency
   Eval Notes: SV1 (11 GO) ID number CAL000314967, active as of date of inspection. No manifested shipments from site since 2011, no record of shipment in TQR in past 3 years. Site contracts generator maintenance, with Caterpillar noted as taking oil, filters and coolant. No waste containers onsite. Evacuation information posted. Site operates 4 bloom energy server units. Emergency info posted at server, but no binder onsite. 2 units not operations, 2 units came on line in past 2 months. No service or change of catalyst units to date.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Evaluation:
   Eval General Type: Compliance Evaluation Inspection
   Eval Date: 01-12-2015
   Violations Found: No
   Eval Type: Routine done by local agency
   Eval Notes: The HMBP has been reviewed and Accepted in CERS. The HMBP threshold chemicals onsite include: 1. Diesel Fuel - 25,000 gallons (AST's). 2. Batteries - 6,000 gallons (gel form) 3. Inhibitor - 100 gallons (HVAC system/chillers) Note: New Oil and Coolants are stored over 55 gallons inside each of 7 back-up generators. No violations were noted today, thank you.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Evaluation:
   Eval General Type: Compliance Evaluation Inspection
   Eval Date: 01-12-2015
   Violations Found: No
   Eval Type: Routine done by local agency
   Eval Notes: The SPCC plan is available onsite electronically, hard copy is located at 9 Great Oaks. Facility stores approximately 25,000 gallons of diesel fuel in 4 double walled above ground Modern Welding storage tanks. Daily inspections of 4 Diesel AST's, day tanks and the associated piping are completed as part of a preventative maintenance schedule. Monthly inspections are documented and placed in the SPCC binder by onsite personnel. Training for oil handling personnel has been completed. No significant spills or releases have occurred in the last 12 months. Balch Petroleum conducts annual certification of AST monitoring equipment (annular space and overfill sensors), records are maintained onsite.

Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Evaluation:
   Eval General Type: Compliance Evaluation Inspection
   Eval Date: 10-11-2018
   Violations Found: Yes
   Eval Type: Routine done by local agency
   Eval Notes: SV1 (11 GO) Site stores more than 10,000 gallons of petroleum in tanks larger than 5000 gallons in size. Plan is dated June 2017, revised from 2015 plan. Inventory submitted in SPCC plan confirmed during

USA GASOLINE CORPORATION FACILITY NO 832 (Continued)

Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Historical Generators:
- Date form received by agency: 03/13/2003
- Site name: USA GASOLINE CORPORATION FACILITY NO 832
- Classification: Small Quantity Generator

Hazardous Waste Summary:
- Waste code: D018
- Waste name: BENZENE
- Violation Status: No violations found

FINDS:
- Registry ID: 110014461180

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

09-06-2018

Citation: 
22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: 
Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: 
Based on my observations and the lack of paperwork review it is undetermined at this time if any hazardous waste has been disposed of in the past year. This facility can managed their hazardous waste under point of generation accumulation time which is the waste cannot be held on-site for longer than one year or after the 55 gallon drum becomes full whichever comes first. Immediately dispose of all of your hazardous waste and provide to our office copies of the disposal receipts.

Violation Date: 09-06-2018
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Based on my observations and the lack of paperwork review it is undetermined at this time if any hazardous waste has been disposed of in the past year. This facility can managed their hazardous waste under point of generation accumulation time which is the waste cannot be held on-site for longer than one year or after the 55 gallon drum becomes full whichever comes first. Immediately dispose of all of your hazardous waste and provide to our office copies of the disposal receipts.

Notice of Violation (Unified Program) was submitted on 07/11/2018 to facility contact. The last Hazardous Materials Business Plan (HMBP) was issued on this date. Inspection report was issued on this date.

On-site on 08/22/2018 to conduct a site inspection. Present during this inspection were: Ashley Ryder, Hazardous Materials Specialist with County of Santa Clara. A brochure was provided during this inspection. Collection center. A brochure was provided during this inspection. A battery collection center. A brochure was provided during this inspection.

4) Used fluorescent lamps and used commercial type batteries can be taken to a battery collection center. A brochure was provided during this inspection.

CA CERS HAZ WASTE: 
Site ID: 160464
CERS ID: 10095934
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-05-2015
Citation: HSC 6.7 25286(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25286(a)
Violation Description: Failure to submit a complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.
Violation Notes: Returned to compliance on 07/02/2015. THE SECONDARY TANK CONSTRUCTION IS NOTED IN CERS AS BEING STEEL. BASED ON PREVIOUS TANK PAGES SUBMITTED THE INFORMATION NOTED THE TANKS TO BE STEEL JACKETED. UPDATE CERS TO THAT THE SECONDARY TANK CONSTRUCTION IS STEEL (JACKET) WHICH DOES NOT REQUIRE CATHODIC PROTECTION.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-05-2015
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 07/02/2015. TANK 87-1 IS EQUIPPED WITH A RED JACKET MLLD MODEL 7X2V AND NOT A VAPORLESS LD-2000.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS
TESORO/SHELL #68207 (Continued)

Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 07/02/2015. TANK 1 REGULAR SPILL CONTAINMENT FAILED THE 60 MINUTE HYDROSTATIC TEST. THE CONTAINMENT WAS OBSERVED TO BE LEAKING.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-15-2017
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Description: "Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC)."
Violation Notes: Returned to compliance on 07/15/2017. During testing of "sensor out" on all tanks, a "stuck" relay was observed that prevented positive shutdown of 91 tank. The relay was replaced like for like during time of inspection and testing demonstrated functionality. Violation is observed as corrected and no further action is required.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-05-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/02/2015. OBSERVED A 55 GALLON CONTAINER OF FLAMMABLE LIQUID MISSING THE ACCUMULATION START DATE, THE CONTAINER IS LOCATED ADJACENT TO THE CAR WASH AREA.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 160464
Site Name: TESORO/SHELL #68207
Violation Date: 06-02-2016

### TESORO/SHELL #68207 (Continued)  
**Violation Description:** Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

**Violation Notes:** Returned to compliance on 08/05/2016. THE 87-2, 91 AND DIESEL SPILL BUCKETS FAILED THE HYDROSTATIC TEST. LEAKS WERE OBSERVED NEAR THE TOPS OF ALL THREE OF THE SPILL BUCKETS. APPLY FOR A PERMIT FROM HMCD TO REPLACE THE THREE SPILL BUCKETS.

**Violation Division:** Santa Clara County Environmental Health

**Violation Program:** UST

**Violation Source:** CERS

#### Evaluation:
- **Eval General Type:** Compliance Evaluation Inspection
- **Eval Date:** 06-05-2015
- **Violations Found:** No
- **Eval Type:** Routine done by local agency
- **Eval Notes:** Not reported
- **Eval Division:** Santa Clara County Environmental Health
- **Eval Program:** HMRRP

#### Evaluation:
- **Eval General Type:** Other/Unknown
- **Eval Date:** 08-05-2016
- **Violations Found:** No
- **Eval Type:** Other, not routine, done by local agency
- **Eval Notes:** Final permit inspection conducted to observe testing of UST fill spill buckets for Tanks 2, 3, & 4. Spill buckets for Tanks 2, 3, & 4 (87-2, 91, and Diesel product tanks) failed annual spill bucket testing on 6/2/2016. Spill buckets for Tanks 2 & 3 were subsequently replaced with new CNI CON2 spill buckets (like for like). The spill bucket for Tank 4 (Diesel) was observed to have loose bellow bolts. Once these bolts were tightened, the spill bucket passed testing according to Jesse Rodriguez with Service Station Systems, Inc. A retest of this bucket was performed today. Spill bucket testing was performed today by Service Station Systems, Inc. Technician Jesse Rodríguez (ICC# 8024952-UT Exp. 10/23/17, CNI Manufacturing EVR System Installation Trained Installer #3508, training provided 2/22/2016). A one hour

ON SITE TO WITNESS UST MONITORING EQUIPMENT TESTING PERFORMED BY UST SERVICE TECHNICIAN JESSE RODRIGUEZ OF SERVICE STATION SYSTEMS. MR. RODRIGUEZ HAS CURRENT ICC UST SERVICE TECHNICIAN CERTIFICATION (EXP. 10/23/2017), VEEDER-ROOT LEVEL 4 CERTIFICATION (EXP. 1/13/2017) AND VMI INSTALLATION AND TESTER (EXP. 04/03/2018). THE FOLLOWING UST MONITORING EQUIPMENT WAS TESTED AND FUNCTIONED PROPERLY: 3 TANK ANNULAR SPACE SENSORS (87-1, 87-2 AND 91/DIESEL COMPARTMENT) 4 STP SUMP SENSORS (87-1, 87-2, 91 AND DIESEL) 4 FILL SUMP SENSORS (87-1, 87-2, 91 AND DIESEL) 4 MECHANICAL LINE LEAK DETECTORS (87-1, 87-2, 91 AND DIESEL) SENSOR OUT AND POWER OUT ALARMS 8 UDC SENSORS 4 ATG’S WERE SET AT 81 INCHES AND THE OUTSIDE AUDIBLE/VISIBLE OVERFILL ALARM FUNCTIONED AS REQUIRED. THE MODERN WELDING TANK CHART WAS CHECKED TO VERIFY 81 INCHES IS THE CORRECT SETTING FOR THE 90% LEVEL. THE 87-1 SPILL BUCKET WAS HYDROSTATICALLY TESTED FOR ONE HOUR AND PASSED. (SEE VIOLATION CITED FOR THE [Truncated])

Eval Notes: Routine done by local agency
Eval Type: On-site to conduct a UST compliance inspection. Annual monitoring system testing was performed by UST service technician Alex Leyva from Service Station Systems. Mr. Leyva had all of the required certifications. During testing of monitoring equipment the following was observed: -Secondary containment test boots were observed as pulled-back prior to testing. -Mechanical overfill devices (flapper valves) were verified on all tanks. -The 87, 87-2, 91, and Diesel spill buckets were hydrostatically tested with 5 gallons of water for 60 minutes and passed. -The 87, 87-2, 91, and Diesel STP sump sensors (Veeder Root 208) were tested in water and produced an audible and visual alarm at the monitoring panel as well as positive shutdown of the turbines. -The 87, 87-2, 91, and Diesel annular sensors (Veeder Root 420) were tested with water and produced an audible and visual alarm at the monitoring panel. -Mechanical line leak detectors (Red jacket FX2V on 87 tank & VMI [Truncated])

Evil Notes: Onsite to observe Secondary Containment Testing (SB989) retest following troubleshooting of UDC failure at dispensers 9/10 and 11/12. One penetration boot was replaced for vent piping entering into the UDC for dispenser 11/12 (pictures taken). Testing was performed by Able Maintenance Technicians (James Moore ICC UST Service Technician #5254517 Exp. 7/26/15, Franklin Fueling INCON Level 4 Sump Test System Operation #6063063703 Exp. 5/23/15). The UDC for dispenser 9/10 was retested on 8/8/2013 prior to making any repairs as part of troubleshooting the initial failure. This UDC passed the retest, so no repairs were made. The UDC for dispenser 11/12 passed the retest following replacement of the penetration fitting. Both UDCs were retested again today, 8/9/2013, in the presence of HMCD inspector, Lindsay Morgado. Both UDCs passed the INCON 15-minute accelerated hydrostatic test. All UST system components at this facility subject to secondary containment (SB989) [Truncated]

<td>Final permit inspection conducted to observe testing of UST fill spill buckets for Tanks 2, 3, &amp; 4. Spill buckets for Tanks 2, 3, &amp; 4 (87-2, 91, and Diesel product tanks) failed annual spill bucket testing on 6/2/2016. Spill buckets for Tanks 2 &amp; 3 were subsequently replaced with new CNI CON2 spill buckets (like for like). The spill bucket for Tank 4 (Diesel) was observed to have loose bellow bolts. Once these bolts were tightened, the spill bucket passed testing according to Jesse Rodriguez with Service Station Systems, Inc. A retest of this bucket was performed today. Spill bucket testing was performed today by Service Station Systems, Inc. Technician Jesse Rodriguez (ICC# 8024952-UT Exp. 10/23/17, CNI Manufacturing EVR System Installation Trained Installer #3508, training provided 2/22/2016). A one hour hydrostatic test was performed on all three spill buckets. All three spill buckets passed testing today. Final permit inspection completed. Permit [Truncated]</td>

Eval Notes: Onsite to observe Secondary Containment Testing (SB989) retest
following troubleshooting of UDC failure at dispensers 9/10 and 11/12. One penetration boot was replaced for vent piping entering into the UDC for dispenser 11/12 (pictures taken). Testing was performed by Able Maintenance Technicians (James Moore ICC UST Service Technician #S254517 Exp. 7/26/15, Franklin Fueling INCON Level 4 Sump Test System Operation #6063063703 Exp. 5/23/15). The UDC for dispenser 9/10 was retested on 8/8/2013 prior to making any repairs as part of troubleshooting the initial failure. This UDC passed the retest, so no repairs were made. The UDC for dispenser 11/12 passed the retest following replacement of the penetration fitting. Both UDCs were retested again today, 8/9/2013, in the presence of HMCD inspector, Lindsay Morgado. Both UDCs passed the INCON 15-minute accelerated hydrostatic test. All UST system components at this facility subject to secondary containment (SB989) [Truncated]

CERS ID: 10095934
Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Returned to compliance on 07/02/2015. THE SECONDARY TANK CONSTRUCTION IS NOTED IN CERS AS BEING STEEL. BASED ON PREVIOUS TANK PAGES SUBMITTED THE INFORMATION NOTED THE TANKS TO BE STEEL JACKETED. UPDATE CERS TO THAT THE SECONDARY TANK CONSTRUCTION IS STEEL (JACKET) WHICH DOES NOT REQUIRE CATHODIC PROTECTION.

Returned to compliance on 07/02/2015. TANK 1 REGULAR SPILL CONTAINMENT IS NOTED IN CERS AS BEING STEEL JACKETED. UPDATE CERS TO THAT THE SECONDARY TANK CONSTRUCTION IS STEEL (JACKET) WHICH DOES NOT REQUIRE CATHODIC PROTECTION.

Returned to compliance on 07/02/2015. TANK 87-1 IS EQUIPPED WITH A RED JACKET MLLD MODEL 7X2V AND NOT A VAPORLESS LD-2000.

Returned to compliance on 07/02/2015. THE SECONDARY TANK CONSTRUCTION IS NOTED IN CERS AS BEING STEEL. BASED ON PREVIOUS TANK PAGES SUBMITTED THE INFORMATION NOTED THE TANKS TO BE STEEL JACKETED. UPDATE CERS TO THAT THE SECONDARY TANK CONSTRUCTION IS STEEL (JACKET) WHICH DOES NOT REQUIRE CATHODIC PROTECTION.

Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Returned to compliance on 07/02/2015. TANK 1 REGULAR SPILL CONTAINMENT FAILED THE 60 MINUTE HYDROSTATIC TEST. THE CONTAINMENT WAS OBSERVED TO BE LEAKING.

Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Returned to compliance on 07/02/2015. TANK 1 REGULAR SPILL CONTAINMENT FAILED THE 60 MINUTE HYDROSTATIC TEST. THE CONTAINMENT WAS OBSERVED TO BE LEAKING.

Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Returned to compliance on 07/02/2015. TANK 1 REGULAR SPILL CONTAINMENT FAILED THE 60 MINUTE HYDROSTATIC TEST. THE CONTAINMENT WAS OBSERVED TO BE LEAKING.
TESORO/SHELL #68207 (Continued)

Violation Notes: Returned to compliance on 07/15/2017. During testing of "sensor out" on all tanks, a "stuck" relay was observed that prevented positive shutdown of 91 tank. The relay was replaced like for like during time of inspection and testing demonstrated functionality. Violation is observed as corrected and no further action is required.

<td>Final permit inspection conducted to observe testing of UST fill spill buckets for Tanks 2, 3, &amp; 4. Spill buckets for Tanks 2, 3, &amp; 4 (87-2, 91, and Diesel product tanks) failed annual spill bucket testing on 6/2/2016. Spill buckets for Tanks 2 &amp; 3 were subsequently replaced with new CNI CON2 spill buckets (like for like). The spill bucket for Tank 4 (Diesel) was observed to have loose bellow bolts. Once these bolts were tightened, the spill bucket passed testing according to Jesse Rodriguez with Service Station Systems, Inc. A retest of this bucket was performed today. Spill bucket testing was performed today by Service Station Systems, Inc. Technician Jesse Rodriguez (ICC# 8024952-UT Exp. 10/23/17, CNI Manufacturing EVR System Installation Trained Installer #3508, training provided 2/22/2016). A one hour hydrostatic test was performed on all three spill buckets. All three spill buckets passed testing today. Final permit inspection completed. Permit [Truncated]</td>

Eval Notes: On site to observe Secondary Containment Testing (SB989) performed today by Walton Engineering Technician Mauricio Miranda (ICC UST Service Technician #8407460 Exp. 12/29/17). UST System is comprised of four (4) double walled steel tanks (87-1, 87-2, 91 & Diesel product tanks) and double walled flexible piping with eight (8) dispensers. *This SB989 testing is a retest in response to failures encountered during initial testing on 4/5/2016. The following components failed SB989 testing on 4/5/2016: -The active 87-1 product line (one line is capped off; the active line runs to dispensers 7/8, 9/10, & 11/12) -The active 87-2 product line (one line is capped off; the active line runs to dispensers 1/2, 3/4, & 5/6) -Both 91 product lines -The fill and vapor spill containment buckets for the 87-1 tank. Note: The vapor spill containment bucket was replaced, but the fill spill containment bucket was not. Observed testing of the following components while on site [Truncated]

Eval Notes: Onsite to observe Secondary Containment Testing (SB989) retest following troubleshooting of UDC failure at dispensers 9/10 and 11/12. One penetration boot was replaced for vent piping entering into the UDC for dispenser 11/12 (pictures taken). Testing was performed by Able Maintenance Technicians (James Moore ICC UST Service Technician #5254517 Exp. 7/26/15, Franklin Fueling INCON Level 4 Sump Test System Operation #6063063703 Exp. 5/23/15). The UDC for dispenser 9/10 was retested on 8/8/2013 prior to making any repairs as part of troubleshooting the initial failure. This UDC passed the retest, so no repairs were made. The UDC for dispenser 11/12 passed the retest following replacement of the penetration fitting. Both UDCs were retested again today, 8/9/2013, in the presence of HMCD inspector, Lindsay Morgado. Both UDCs passed the INCON 15-minute accelerated hydrostatic test. All UST system components at this facility subject to secondary containment (SB989)

PALISADES GAS & WASH C/0 KLEI (Continued)

Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 08S2E17G01f
Potential Media Affect: Aquifer used for drinking water supply, Soil, Well used for drinking water supply
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History:

Background The site has been used to operate a gasoline and diesel service station since 1994. The station contains three 12,000 gallon underground storage tanks (USTs) for regular unleaded gasoline, mid-grade unleaded, and premium unleaded/diesel fuel (in a divided tank) in the southeastern portion of the property. A water supply well belonging to the Great Oaks Water Company (well number GO-16) is located approximately 300 feet to the southwest of the site, and is reportedly screened at various intervals from 100 to 265 feet below ground surface (bgs). It has been reported that GO-16 has operated intermittently at up to 1,600 gallons per minute (gpm). 2003 On June 9, 2003 five borings (SB-1 through SB-5) were excavated to approximately 45 feet bgs. In soil samples, the highest detected level of TPH-g and MTBE was 77 ppm and 130 ppm, respectively. The highest level of TPG-g and MTBE in groundwater samples was 85,000 ppb and 140,000 ppb, respectively. Between July 10 and 11, 2003 six soil borings were excavated and used to construct groundwater monitoring wells MW-1 through MW-6. In soil, the highest detected concentrations for TPH-g and MTBE were 54 ppm and 120 ppm, respectively. The highest groundwater concentrations were reported for the sample collected from MW-3 which had detections of 8,400 ppb TPH-g and 30,000 ppb MTBE. From August 4 through 8, 2003 four cone penetrometer test borings (CPT-1 through CPT-4) and adjacent soil borings, and one soil boring (TPC-1) located near the USTs using a high pressure vacuum truck were excavated. The CPT borings were extended to approximately 100 feet bgs. It was determined that MTBE impact in soil extends to at least 88 feet bgs in boring CP-1 (0.290 ppm). The deepest MTBE detection in groundwater was from the sample collected at 96 feet bgs from boring CP-2 (16 ppb). On September 22 and 26, 2003 two CPT borings were installed. Soil and groundwater samples were collected from various depths to characterize the vertical extent on contamination. o CPT-5 was located approximately 120 feet downgradient of the USTs. Up to 0.38 ppm MTBE was detected in soil samples. TPH-g and BTEX sample results were ND. The maximum MTBE detected in groundwater was 1.6 ppb. TPH-g and BTEX results were ND. o CPT-7 was located near the USTs. Up to 130 ppm MTBE and 1.1 ppm TPH-g was detected in soil samples. BTEX sample results were ND. The maximum MTBE detected in groundwater was 96 ppb. TPH-g and BTEX results were ND. On October 15 and 20, 2003 three additional groundwater monitoring wells; one shallow well (MW-7) and two deep (MW-31 and MW-51) were installed. The groundwater sample collected from MW-7 detected 35,000 ppb MTBE. The groundwater sample collected from the deeper wells (MW-31 and MW-51) detected up to 12 ppb MTBE. 2004 On January 4, 2004 one additional shallow well (MW-8) was installed. A groundwater sample collected from this well was ND for oxygenates and petroleum hydrocarbons. Between April 19 and May 10, 2004 six soil vapor extraction (SVE) wells (VW-1 through VW-6) and eighteen ozone sparging points (OW-1 through OW-6, OW-7A, OW-7B, OW-8A, OW-8B, OW-9A, OW-9B, OW-10A, OW-10B, OW-11A, OW-11B, OW-12A, and OW-12B) were constructed. The SVE and ozone sparge system began operating in November 2004. 2008 Between April 14 and 24, 2008 five groundwater monitoring wells were constructed. The purpose of the
additional site assessment was to evaluate off-site groundwater conditions and evaluate the potential impact to water supply well GO-16. Three of the wells were shallow (MW-9, MW-10 and MW-11) and screened in first encountered groundwater which was approximately 36 feet bgs. One well (MW-91) was screened in the second encountered water bearing zone and screened from 57 to 77 feet bgs. The fifth well (MW-101) was set with screen from 92 to 102 feet bgs in the third encountered water bearing zone. The primary COCs (TPH-g, MTBE and TBA) were not detected in groundwater samples. TCE was detected in MW-91 at a concentration below the MCL. In soil samples, VOCs, TPH-g, TPH-d, and TPH-mo were not detected. Based on the results of the off-site analysis, Kleinfelder concluded that the Great Oaks well GO-16 is not impacted by COCs associated with releases from the site. Remediation 2004 - 2009 A soil vapor extraction system was operated from November 2004 until June 26, 2009. During the period of operation it was reported that 1,242 pounds of MTBE and 13,926 pounds of non-methane hydrocarbons were removed. The ozone sparge system operated intermittently.

Violations:

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: The emergency response and contingency plan currently found on CERS needs to be updated to include the following: - Section C- Emergency response phone numbers. The CUPA phone number has been incorrectly added. - Section G- Emergency Equipment- The locations for where emergency response is found must be clearly identify on the site map. - Section H- Earthquake vulnerability- Need to include all areas and tanks that are subject to this. Within 30 days update the contingency plan on CERS.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: During records review; manifest #009522725 FLE shipment date; 03/21/16 was missing the signed TSDF copy. Obtain a signed TSDF copy and keep it for your records.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS
MONOLITHIC POWER SYSTEMS (Continued)

Violation Notes: The following containers were storing hazardous waste and were not marked as required; Failure analysis lab: - 1 x 60 gal. lab waste water - 2 beakers with lab waste such as paper towels, q-tips, etc., contaminated with fumic nitric and sulfuric acids. - 8 X 5 gal., containers with lab waste. Vacuum pump room; - 1 x 55 gal. used oil drum Label drums and containers as required. Labels were provided during this inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Violation Notes: Based on my observations it couldn’t be determined if emergency response equipment and fire protection is being checked on a regular basis to ensure it’s operation. Ensure that all fire extinguishers and eye-wash equipment are being maintained at a minimum yearly by a third party company and inspected monthly or as required by manufacturer. It is recommended that logs are kept.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper hazardous waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Violation Notes: Based on my observations and the type of violations that were issued in this inspection report, employees are not thoroughly familiar with proper hazardous waste handling and emergency procedures. Provide the required training to all employees specially those employees who are responsible for the; Failure analysis lab, machine shop, test floor, and engineering lab.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: The most recent hazardous materials inventory available on CERS is
incomplete. Your inventory needs to be updated to include the following; Failure Analysis Lab; Lab wastewater - max. qty. = 60 gal., dry lab residue waste - max. qty. = 30 gal. (in 5 gal size) Room next to machine shop; Oxygen- 281 ft³ Vacuum pump room; 1 x 55 gal., used oil drum Within 30 days, update your hazardous materials/waste inventory to include all of the above and any other hazardous materials/waste currently not listed.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Based on my observations some of the hazardous waste had the following accumulation times; 12/16/14, 5/9/16, 4/48/16, 7/29/16, 7/20/16, 7/8/16, 10/13/16, 5/10/17, and 1/17/16. After records review there has only been one disposal pick up, on 03/21/16. There were no records to show that used oil from the vacuum pump room has ever been picked up as well as the lab waste water. Within 30 days dispose of all hazardous waste generated at this site. This includes hazardous waste generated from; failure analysis lab, engineering lab, test floor, machine shop, etc. Provide copies of disposal receipts to my office for all of the hazardous waste. In the future you cannot exceed the accumulation time limit of 1 year.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
MONOLITHIC POWER SYSTEMS  (Continued)

Violation Notes: An annual training list of all employees trained in emergency response and safety procedures was not available at the time of this inspection. Ensure that all employees are trained annually and a list of employees trained is available on-site for review during this inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Simplified emergency procedure form was not posted at this facility next to a map with the location of emergency response equipment. A sample form was provided during this inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Observed two open beakers containing hazardous waste as well as an used oil drum with a hazardous waste missing it's bung. All containers storing hazardous waste must completely closed when adding or removing waste. Keep containers closed at all times.

MONOLITHIC POWER SYSTEMS (Continued)

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: The following containers were storing hazardous waste and were not marked as required; Failure analysis lab; - 1 x 60 gal. lab waste water - 2 beakers with lab waste such as paper towels, q-tips, etc., contaminated with fumic nitric and sulfuric acids. - 8 X 5 gal., containers with lab waste. Vacuum pump room; - 1 x 55 gal. used oil drum Label drums and containers as required. Labels were provided during this inspection.
Violation Division: Santa Clara County Environmental Health

Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes: Based on my observations it couldn’t be determined if emergency response equipment and fire protection is being checked on a regular basis to ensure it’s operation. Ensure that all fire extinguishers and eye- wash equipment are being maintained at a minimum yearly by a third party company and inspected monthly or as required by manufacturer. It is recommended that logs are kept.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Based on my observations and the type of violations that were issued in this inspection report, employees are not thoroughly familiar with proper hazardous waste handling and emergency procedures. Provide the required training to all employees specially those employees who are responsible for the; Failure analysis lab, machine shop, test floor, and engineering lab.
Violation Division: Santa Clara County Environmental Health

MAP FINDINGS

MONOLITHIC POWER SYSTEMS (Continued)

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: The most recent hazardous materials inventory available on CERS is incomplete. Your inventory needs to be updated to include the following; Failure Analysis Lab; Lab wastewater- max qty. = 60 gal. - dry lab residue waste - max. qty. = 30 gal. (in 5 gal size) Room next to machine shop; Oxygen- 281 ft³ Vacuum pump room; - 1 x 55 gal. used oil drum Within 30 days, update your hazardous materials/waste inventory to include all of the above and any other hazardous materials/waste currently not listed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Based on my observations some of the hazardous waste had the following accumulation times; 12/16/14, 5/9/16, 4/48/16, 7/29/16, 7/20/16, 7/8/16, 10/13/16, 5/10/17, and 1/17/16. After records review there has only been one disposal pick up, on 03/21/16. There were no records to show that used oil from the vacuum pump room has ever been picked up as well as the lab waste water. Within 30 days dispose of all hazardous waste generated at this site. This includes hazardous waste generated from; failure analysis lab, engineering lab, test floor, machine shop, etc. Provide copies of disposal receipts to my office for all of the hazardous waste. In the future you cannot exceed the accumulation time limit of 1 year.

MONOLITHIC POWER SYSTEMS (Continued)

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: An annual training list of all employees trained in emergency response and safety procedures was not available at the time of this inspection. Ensure that all employees are trained annually and a list of employees trained is available on-site for review during this inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes: Simplified emergency procedure form was not posted at this facility next to a map with the location of emergency response equipment. A sample form was provided during this inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Observed two open beakers containing hazardous waste as well as an used oil drum with a hazardous waste missing it’s bung. All containers storing hazardous waste must completely closed when adding or removing waste. Keep containers closed at all times.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS
MONOLITHIC POWER SYSTEMS (Continued)

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: The site map currently available on CERS needs to be updated to show all the current location of the hazardous waste and hazardous materials storage. Additionally, the map key note must include the name of all the things identified on the map.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 49885
Site Name: MONOLITHIC POWER SYSTEMS INC
Violation Date: 10-18-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Machine shop- Observed contaminated absorbent pads with oil generated from this area. However, I did not observe a container where this is stored. Saturated oily rags could be considered hazardous waste if disposed of in the trash. Engineering Lab- Contaminated wipes with IPA to clean table tops and surfaces and table soldering waste is generated in this area. However, I did not observed a collection container. These wastes could potentially be hazardous waste if disposed of in the trash. Make a hazardous waste determination of this waste by either having the waste tested by a registered environmental lab or by using generator knowledge. Within 30 days provide an explanation how this waste will be managed in the future.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through was conducted on 10/17/18 and inspection report was issued today. Facility walk-through took place with Jim Hernandez and Chiakung Chang. Notes: 1) The last Universal waste pick-up was done on 10/2/18 via Evergreen E-Waste Recycling 2) Failure Analysis
MONOLITHIC POWER SYSTEMS (Continued)  S112206398

Lab - Currently, to clean small acid spills (fumic nitric & sulfuric acid) baking soda is added to the spill, the spill is then wiped with a paper towel and then the contaminated paper towel is added to a beaker with water. After some time has passed the wet paper towels are removed, they are dried out and then added into the dry hazardous waste lab container. This process could potentially be considered treatment. Provide a written explanation as to why the paper towels are placed inside the wet beaker first? Is this process necessary? If so, why?

FINDS:

Registry ID: 110000770880

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
JABIL CIRCUITS INC (Continued)

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Program: HW
Evaluation:
- Eval General Type: Compliance Evaluation Inspection
- Eval Date: 07-01-2015
- Violations Found: Yes
- Eval Type: Routine done by local agency
- Eval Notes:
  THE FOLLOWING DOCUMENTS WERE REVIEWED DURING THIS INSPECTION: - HAZARDOUS WASTE MANIFESTS FOR THE PAST 3 YEARS. - HAZARDOUS WASTE WEEKLY INSPECTION RECORDS. - BILL OF LADING DOCUMENTS FOR UNIVERSAL WASTES. NOTES: 1) THIS FACILITY IS NO LONGER TREATING THE WASTE WATER FROM THE STENCIL WASHER. DI WATER IS USED INSTEAD FOR THIS PROCESS. THE ONLY HAZARDOUS WASTE GENERATED ARE THE FILTERS CONTAMINATED WITH TRACE AMOUNTS OF LEAD FROM THE DI WATER TREATMENT SYSTEM. 2) YOU ARE A SMALL QUANTITY GENERATOR OF HAZARDOUS WASTE. YOU HAVE 180 DAYS TO DISPOSE OF ALL HAZARDOUS WASTE. 3) YOUR HAZARDOUS WASTE PERMIT WITH OUR DEPARTMENT WILL DECREASE TO SHOW THE DECREASE IN WASTE BEING GENERATED AT THIS TIME.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: THE FOLLOWING DOCUMENTS WERE REVIEWED DURING THIS INSPECTION; - HAZARDOUS WASTE MANIFESTS FOR THE PAST 3 YEARS. - HAZARDOUS WASTE WEEKLY INSPECTION RECORDS. - BILL OF LADING DOCUMENTS FOR UNIVERSAL WASTES. NOTES: 1) THIS FACILITY IS NO LONGER TREATING THE WASTE WATER FROM THE STENCIL WASHER. DI WATER IS USED INSTEAD FOR THIS PROCESS. THE ONLY HAZARDOUS WASTE GENERATED ARE THE FILTERS CONTAMINATED WITH TRACE AMOUNTS OF LEAD FROM THE DI WATER TREATMENT SYSTEM. 2) YOU ARE A SMALL QUANTITY GENERATOR OF HAZARDOUS WASTE. YOU HAVE 180 DAYS TO DISPOSE OF ALL HAZARDOUS WASTE. 3) YOUR HAZARDOUS WASTE PERMIT WITH OUR DEPARTMENT WILL DECREASE TO SHOW THE DECREASE IN WASTE BEING GENERATED AT THIS TIME.

Eval Division: Santa Clara County Environmental Health

### Violation Notes:
- **Failure to properly label hazardous waste accumulation containers with the following requirements:** "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
- Returned to compliance on 10/18/2013. 1 x 55 gal. drum of used coolant adjacent to back-up generator E was not labeled properly. As co-generator of this hazardous waste, the storage requirements for your hazardous waste containers still applies. Make sure contract activities are managed in a way to include proper handling and storage of hazardous waste.

### Violation Description:
- Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

### Violation Notes:
- Returned to compliance on 11/17/2016. Plan submitted via CERS website contains several errors and omissions. Refer to marked up copy of submittal provided via eMail today to Sujanitha Sambasivan. Correct all errors and omissions and resubmit within 30 days. Ensure that the plan addresses daily visual inspections of monitoring system leak detection consoles required to maintain Emergency Generator Tank System (EGTS) line leak detector exemption.

### Violation Description:
- Failure to maintain on site an approved monitoring plan.

### Violation Notes:
- Returned to compliance on 12/13/2014 contains several errors and omissions. Refer to marked up copy of submittal provided via eMail today to Sujanitha Sambasivan. Correct all errors and omissions and resubmit within 30 days. Ensure that the plan addresses daily visual inspections of monitoring system leak detection consoles required to maintain Emergency Generator Tank System (EGTS) line leak detector exemption.

### Violation Description:
- Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.

### Violation Notes:
- Returned to compliance on 09/08/2016. Spill containment (Simplex Fuel Port model 24055215) at new remote fill station does not provide the minimum required 5 gallon capacity and will not catch releases when
the fill hose is disconnected because the hose connection fitting is located directly above the front edge of the cabinet. Remote fill shall not be used until approval is granted by HMCD.

Violation Source: CERS

Site ID: 28551
Site Name: Equinix - SV5
Violation Date: 09-13-2016
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284
Violation Description: Failure to obtain a valid permit to operate from the CUPA.
Violation Notes: Returned to compliance on 09/19/2017. UST Permit to operate issued by San Jose Fire Department expired on 6/20/2016. A renewal permit cannot be issued until facility is in full compliance with UST regulations, so please expedite corrective actions required in response to all violations noted in this Official Notice of Inspection. A permit will be issued upon return to compliance.

Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 07/25/2017. The UST Certification of Financial Responsibility (CFR) form contains errors: 1) In Section A, the box for $1,000,000 annual aggregate coverage (not $2,000,000) should be checked since Equinix has fewer than 101 USTs nationwide; 2) Section B certifier information must identify the name of the UST owner/operator (Equinix, LLC), not Warren Weitz. Submit a corrected CFR within 30 days.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 28551
Site Name: Equinix - SV5
Violation Date: 09-13-2016
Citation: 23 CCR 16 2638(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(d)
Violation Description: Failure to submit the Annual Monitoring System Certification Form to the CUPA within 30 days of completion of the test.
Violation Notes: Returned to compliance on 10/08/2016. Repeat violation. Monitoring System certification form documenting annual testing done on 9/14/2015 did not include the required System Setup report and Alarm History Report. An addendum page is also required to document testing of vacuum monitored systems. An addendum was submitted last year, but it documented testing of 4 vacuum sensors (the system contains only 2) and noted incorrect sensor IDs. Notify your testing contractor of these deficiencies and ensure that this year’s testing and all future testing is properly documented. Per Franklin Fueling Systems.
(manufacturer of your Incon consoles), your testing contractor should be connecting a computer to the Incon TS-5000 console’s Ethernet port and downloading these reports to generate a PDF report.

Site Name: Equinix - SV5
Violation Date: 09-16-2015
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284
Violation Description: Failure to maintain secondarily contained piping to allow liquid to flow into the sump in the event of a leak (i.e., failure to remove test boot).
Violation Notes: Returned to compliance on 08/22/2017. The flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 was obstructed by what appears to be a precipitate of some sort. There was no interstitial communication between the sump interstitial space and the leak sensor on 6/21/2017. The sump’s interstitial monitoring fluid had a milky appearance. Have the sump interstitial space and sensor reservoir thoroughly flushed out and replace the interstitial monitoring fluid with fluid specified by the sump manufacturer to restore proper function to the leak detection system. This work must be done by or under the direct supervision of a qualified UST Service Technician.

EQUINIX - SV5 (Continued)

Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 08/22/2017. Violation remains uncorrected. UST systems are not yet equipped with methods for confirming interstitial communication within vacuum zones and hydrostatically monitored sumps. Within 30 days, have Lescure Company install the proposed interstitial monitoring drain valves at the bottoms of all 9 hydrostatically monitored sumps and install the proposed vacuum end of line vacuum release valves inside Transition Sumps TS-1, TS-2, and TS-3. The printer for Incon TS-5000 LCCE Console 3 was not working properly on 9/8/2016 (possibly due to incorrect paper being used). Have Lescure Company or Balch Petroleum restore proper functionality to the printer within 30 days.

Site ID: 28551
Site Name: Equinix - SV5
Violation Date: 06-29-2017
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 06/29/2017. Hydrostatic sensor reservoirs for sumps TS-2 and TS-3 were mounted too low. Hydrostatic sensor reservoirs must be mounted so the monitoring fluid level in the reservoir is several inches above the point where the reservoir’s flexible tubing connects to the sump wall in order to maintain hydraulic head pressure. The reservoirs were remounted at a higher level on 6/21/2017. No further corrective action is required.

Site Name: Equinix - SV5
Violation Date: 09-13-2016
Citation: HSC 6.7 25281.5(b)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25281.5(b)(3)
Violation Description: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated. Conduct daily visual inspections at least monthly. Maintain a log of inspection results for review by the CUPA.
Violation Notes: Since installation of transparent inspection plates was completed in June of this year, most of the piping downstream of Transition Sump TS-1 can now be visually inspected. However, an additional transparent plate must be installed in place of the steel plate located nearest the point where the piping surfaces from the trench system and enters the sheet metal enclosure shielding the aboveground piping adjacent to the wall by the Fuel Filtration System cabinets. Have this plate replaced within 30 days. Have Lescure Company supplement the information associated with the current UST retrofit plan check by submitting drawings or other information clearly documenting that the

Violation Date: 06-28-2017
Citation: 23 CCR 16 2715(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(i)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 09/19/2017. The vacuum sensors were not functionally tested in 2016. Equinix was directed to have those
sensors tested and certified within 30 days of issuance of the 9/13/2016 Official Notice of Inspection, but they were not tested until 6/21/2017. Ensure that all UST leak detection equipment is tested every 12 months as required. [Note: Your new testing anniversary month is June. Ensure that the next annual testing is scheduled to occur in June 2018 and every 12 months thereafter.]

| Citation: | HSC 6.7 25281.5(b)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25281.5(b)(3) |
| Violation Description: | Failure to conduct daily visual inspections each time the tank is operated, but not less than monthly, and maintain a log of inspection results for review of the CUPA. |
| Violation Notes: | The unburied piping associated with these EGTS UST systems does not meet California requirements for construction and monitoring of UST systems. The piping downstream of Transition Sump #2 can be exempted if Equinix performs and documents visual inspections of all portions of the unburied fuel piping every time the system is operated (i.e., whenever the submersible turbine pumps run) and not less than monthly. This will necessitate either frequently removing many of the solid steel cover plates that are currently sealed to the top of the trench system to keep water out, or retrofitting the trench covering to facilitate the required visual inspections. The other alternative is to replace the current piping in the trench system with double wall lines that are monitored using an approved vacuum, pressure, or hydrostatic continuous monitoring method. Include your proposal for dealing with this issue in the scope of work for the plan check review covering installation of the [Truncated] |

- Violations Found: Yes
- Eval Type: Routine done by local agency
- Eval Notes: Facility is template eligible SPCC facility with storage capacity of approximately 4500 gallons, no single AST larger than 5000 gallons and no history of releases. Site has chosen not to utilize the template, and has a full SPCC plan that utilizes a cross reference table in place of following regulatory numbering. Plan provided is dated June, 2015. eligible storage devices include 7 emergency generator belly tanks, 3x80 gallon fuel filter units and 875 gallons of oil within equipment (motor oil in generator oil pans). -- NOTE: IN BOTH E COPY AND HARD COPY OF PLAN, THERE IS NO INFO BEHIND TAB "FIGURE 2- SITE PLAN". Emergency generator tanks are double walled and equipped with overfill (high liquid) and leak (rupture) alarms. Fuel filter units are within contained cabinets and fitted with leak monitoring devices.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-13-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 9/8/2016 and concluded today. Facility walk-through and HMBP inspection was performed on 9/8/2016. Spent fluids and filters from servicing of generator motors are taken by service contractor, who serves as generator. Facility recently began in-house servicing that generates Used Oil and used oil filters from chillers. Used Oil is accumulated under point-of-generation (satellite) accumulation (6/1/2016 accumulation start date). No pickups have yet occurred, but facility has a contract with Safety-Kleen to ship waste every 180 days regardless of on-site quantity. Note: Equinix personnel present during the inspection on 9/8/2018 were William Moss and Sujanitha Sambasivan.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-16-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite for routine HMBP inspection, noted the following: -Current HMBP is on file via CERS -Facility Information and Inventory last updated 5/2/13 via CERS -Emergency Response and Training information updated in CERS 2/25/13 -UST Information was updated on 3/30/12 3 threshold quantity hazardous materials are maintained onsite at Equinix, including: 1. Battery Electrolyte (Facility backup power system - provides 12 minutes of supply to entire system) 2. Diesel (Backup generator fuel) 3. Sulfuric Acid (Cooling Tower additive) No outstanding violations were noted today.

Eval General Type: Other/Unknown
Eval Date: 06-21-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Construction inspection to document retrofitting of underground storage tank (UST) systems. The two remote fill lines were pressure...
tested today using nitrogen. The primary piping was tested @ 60 p.s.i.g. and the secondary piping was tested at 10 p.s.i.g. concurrently. Pressure held steady for 1 hour. Gauges returned to zero when pressure was released at end of testing. tests passed. Despite HMCD’s recommendation that the tank top sumps that are penetrated by the remote fills lines (UST 1 Sump C and UST 2 Sump C) be tested using vacuum to minimize stressing them, Lescure Company attempted to pressure test them today. This resulted in structural failure of the sump atop UST 1 (North tank) at the seam where the sump is attached to the tank top sump collar. Have the sump repaired per the Lescure Company’s Method of Procedure dated 6/26/2017. This work must be done by or under the direct supervision of a qualified individual possessing ICC UST Installation/Retrofitting [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-29-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 6/21/2017 and ended today. All underground storage tank (UST) system leak detection equipment was tested on 6/21/2017 by UST Service Technician Elmer Mortera of Balch Petroleum Contractors & Builders, Inc. and functioned properly except as noted above. Mr. Mortera has current ICC California UST Service Technician certification (exp. 1/4/2018) and Franklin Fueling Systems FMS Installation and Programming (Incon Level 1 & 2) certification (exp. 8/3/2018). The UST systems are equipped with continuous VPH monitoring. The 2 Incon model TS-HIS hydrostatic tank annular sensors were tested by raising them out of the tank interstitial fluid, then inverting them to obtain both low-liquid and high-liquid alarms on the Incon TS-5000 console handling UST leak detection (LCCE Console 3). Incon model TS-ULS liquid sensors located at the bottom of 4 tank top submersible turbine pump (STP) sumps, 2 tank top fill / piping sumps, fuel piping transition sump (TS-1), [Truncated]

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Final construction inspection to document retrofitting of underground storage tank (UST) systems. UST 1 Sump C and UST 2 Sump C interstitial spaces were vacuum tested today @ 10" Hg for 30 minutes per the sump manufacturer’s (Xerxes) test procedure. Both sumps passed. Test gauges returned to zero when vacuum was released at end of testing. Flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 has been replaced. The sump interstitial space has been flushed out and refilled with new pink glycol interstitial monitoring fluid. Interstitial communication was verified today by draining fluid from the sump bottom and observing a drop in fluid level in the reservoir for the sump’s interstitial sensor. CGRS performed enhanced leak detection (ELD) testing of the new remote fill piping primary containment using the IOTA Helium test method. No Helium was detected

Site Name: Equinix - SV5
Violation Date: 09-16-2013
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/18/2013. 1 x 55 gal. drum of used coolant adjacent to back-up generator E was not labeled properly. As co-generator of this hazardous waste, the storage requirements for your hazardous waste containers still applies. Make sure contract activities are managed in a way to include proper handling and storage of hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 28551
Site Name: Equinix - SV5
Violation Date: 09-16-2015
Citation: 23 CCR 18 2712(i) - California Code of Regulations, Title 23, Chapter 18, Section(s) 2712(i)
Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 11/17/2016. Plan submitted via CERS website on 12/13/2014 contains several errors and omissions. Refer to marked up copy of submittal provided via eMail today to Sujanitha Sambasivan. Correct all errors and omissions and resubmit within 30 days. Ensure that the plan addresses daily visual inspections of monitoring system leak detection consoles required to maintain Emergency Generator Tank System (EGTS) line leak detector exemption.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS
EQUINX - SV5 (Continued)

Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 09/08/2016. Spill containment (Simplex Fuel Port model 24055215) at new remote fill station does not provide the minimum required 5 gallon capacity and will not catch releases when the fill hose is disconnected because the hose connection fitting is located directly above the front edge of the cabinet. Remote fill shall not be used until approval is granted by HMCD.

Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 07/25/2017. The UST Certification of Financial Responsibility (CFR) form contains errors: 1) In Section A, the box for $1,000,000 annual aggregate coverage (not $2,000,000) should be checked since Equinix has fewer than 101 USTs nationwide; 2) Section B certifier information must identify the name of the UST owner/operator (Equinix, LLC), not Warren Weitz. Submit a corrected CFR within 30 days.

<td>Failure to maintain secondarily contained piping to allow liquid to flow into the sump in the event of a leak (i.e., failure to remove test boot).</td>
<td>Returned to compliance on 08/22/2017. The flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 was obstructed by what appears to be a precipitate of some sort. There was no interstitial communication between the sump interstitial space and the leak sensor on 6/21/2017. The sump’s interstitial monitoring fluid had a milky appearance. Have the sump interstitial space and sensor reservoir thoroughly flushed out and replace the interstitial monitoring fluid with fluid specified by the sump manufacturer to restore proper function to the leak detection system. This work must be done by or under the direct supervision of a qualified UST Service Technician.</td>
</tr>
</tbody>
</table>

**Violation Notes:**
- Returned to compliance on 10/08/2016. Repeat violation. Monitoring system certification form documenting annual testing done on 9/14/2015 did not include the required System Setup report and Alarm History Report. An addendum page is also required to document testing of vacuum monitored systems. An addendum was submitted last year, but it documented testing of 4 vacuum sensors (the system contains only 2) and noted incorrect sensor IDs. Notify your testing contractor of these deficiencies and ensure that this year’s testing and all future testing is properly documented. Per Franklin Fueling Systems (manufacturer of your Incon consoles), your testing contractor should be connecting a computer to the Incon TS-5000 console’s Ethernet port and downloading these reports to generate a PDF report.
- Returned to compliance on 08/22/2017. The flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 was obstructed by what appears to be a precipitate of some sort. MAP FINDINGS

**EQUINIX - SV5 (Continued)**

Violation Date: 03-15-2017
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to regularly test liquid level sensing devices to ensure proper operation.
Violation Notes: Returned to compliance on 03/17/2017. Annual testing of overfill sensors for emergency generator tanks not being noted in annual testing log provided by Balch Petroleum. Additionally, only 5 generator belly tank rupture alarms were noted as having been tested in 2016 (did not denote which 5 were tested).

Conduct daily visual inspections at least monthly. Maintain a log of inspection results for review by the CUPA.
Violation Notes: Since installation of transparent inspection plates was completed in
MAP FINDINGS

EQUINIX - SV5 (Continued)

June of this year, most of the piping downstream of Transition Sump TS-1 can now be visually inspected. However, an additional transparent plate must be installed in place of the steel plate located nearest the point where the piping surfaces from the trench system and enters the sheet metal enclosure shielding the aboveground piping adjacent to the wall by the Fuel Filtration System cabinets. Have this plate replaced within 30 days. Have Lescure Company supplement the information associated with the current UST retrofit plan check by submitting drawings or other information clearly documenting that the bottoms of the trenching near the standby generator return pump cabinets and the sheet metal enclosure behind the Fuel Filtration System cabinets are sloped to direct any fuel release to the portions of the trench that are able to be visually inspected through the transparent plates. Also submit a drawing [Truncated]

Violation Description: Failure of a UST system installed on or after July 1, 2004 to be designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes: Returned to compliance on 06/29/2017. The new remote fill piping secondary containment is not equipped with continuous vacuum, pressure, or hydrostatic as required. [Note: The piping is double walled, but it has a dry interstitial space which was left isolated from the monitored fill sumps by leaving the cores in the test boot Schrader valves.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 28551
Site Name: Equinix - SV5
Violation Date: 09-16-2015
Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test.

Returned to compliance on 10/14/2015. Monitoring System certification form documenting annual testing done on 9/15/2014 was not submitted as required. A copy was received during the inspection today. It does not include the Addendum page required to document testing of vacuum monitored systems, and is also missing the required System Setup report and Alarm History Report covering the previous 12 months.

Notify your testing contractor of these deficiencies and ensure that this year’s testing and all future testing is properly documented. Per Franklin Fueling Systems, your testing contractor should be connecting a computer to the Incon TS-5000 console’s Ethernet port and downloading these reports to generate a PDF report.

Review of the Emergency Generator Tank System Unburied Piping Exemption Log shows no documented inspections between 7/27/2017 and 9/5/2017. Ensure that an inspection of all unburied piping is performed every time the UST pumps operate, but no less often than monthly.

Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct visual inspections each time the tank is operated but no less than monthly and maintain a log of inspection results for review by the UPA.

Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.

Returned to compliance on 06/29/2017. Violation remains uncorrected.

The new remote fill piping secondary containment is not equipped with continuous vacuum, pressure, or hydrostatic as required. All piping systems associated with USTs installed on or after 7/1/2004 are required to be of the "Closed" type (i.e., monitored by a continuous vacuum, pressure, or hydrostatic leak detection system). Within 30 days, have Lescure Company extend the vacuum tubing associated with vacuum zone 1 to the secondary piping for the UST 1 remote fill line so the vacuum zone monitored by Sensor LS5 will include all piping.
Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).

Returned to compliance on 06/21/2017. Interstitial communication still has not been verified and documented as required during annual monitoring system certification testing. Within 30 days, have Lescure Company install the proposed interstitial monitoring drain valves at the bottoms of all 9 hydrostatically monitored sumps and install the proposed vacuum end of line vacuum release valves inside Transition Sumps TS-1, TS-2, and TS-3. Testing of the 2 Incon model TS-SCCM vacuum sensors monitoring the secondary containment for the underground fuel piping was not done on 9/8/2016. The sensors must be tested and certified as operational after the vacuum valves are installed by dropping vacuum until low vacuum alarms occur. Contact Greg Breshears @ (408) 918-1978 to schedule a follow-up inspection to witness this testing within 30 days. [Note: Qualifying the unburied piping for the Emergency Generator Tank System (EGTS) unburied piping exemption pursuant to Health and Safety Code section 25281.5(b)(3) eliminates [Truncated]

Eval Notes: Construction inspection to document retrofitting of underground storage tank (UST) systems. The two remote fill lines were pressure tested today using nitrogen. The primary piping was tested @ 60 p.s.i.g. and the secondary piping was tested at 10 p.s.i.g. concurrently. Pressure held steady for 1 hour. Gauges returned to zero when pressure was released at end of testing. tests passed. Despite HMCD’s recommendation that the tank top sumps that are penetrated by the remote fills lines (UST 1 Sump C and UST 2 Sump C) be tested using vacuum to minimize stressing them, Lescure Company attempted to pressure test them today. This resulted in structural failure of the sump atop UST 1 (North tank) at the seam where the sump is attached to the tank top sump collar. Have the sump repaired per the Lescure Company’s Method of Procedure dated 6/26/2017. This work must be done by or under the direct supervision of a qualified individual possessing ICC UST Installation/Retrofitting [Truncated]

Eval Notes: Final construction inspection to document retrofitting of underground storage tank (UST) systems. UST 1 Sump C and UST 2 Sump C interstitial
spaces were vacuum tested today @ 10" Hg for 30 minutes per the sump manufacturer’s (Xerxes) test procedure. Both sumps passed. Test gauges returned to zero when vacuum was released at end of testing. Flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 has been replaced. The sump interstitial space has been flushed out and refilled with new pink glycol interstitial monitoring fluid.

Interstitial communication was verified today by draining fluid from the sump bottom and observing a drop in fluid level in the reservoir for the sump’s interstitial sensor. CGRS performed enhanced leak detection (ELD) testing of the new remote fill piping primary containment using the IOTA Helium test method. No Helium was detected in secondary containment, including the remote fill transition sump (TS-3), UST 1 Sump C and 2. [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to regularly test liquid level sensing devices to ensure proper operation.
Violation Notes: Returned to compliance on 03/17/2017. Annual testing of overfill sensors for emergency generator tanks not being noted in annual testing log provided by Balch Petroleum. Additionally, only 5 generator bely tank rupture alarms were noted as having been tested in 2016 (did not denote which 5 were tested).

Site Name: Equinix - SV5
Violation Date: 06-28-2017
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 07/25/2017. The UST Certification of Financial Responsibility (CFR) form still contains an error. In Section B, the certifier information must identify the name of the UST owner/operator as “Equinix, LLC” not Rakhbir Dhillon. Submit a corrected CFR via CERS within 30 days.

Violation Division: Santa Clara County Environmental Health

Violation Date: 09-16-2015
Citation: 23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712
Violation Description: Failure to obtain permit to install, replace, repair, or modify part of the UST system containment or leak detection equipment.
Violation Notes: Returned to compliance on 03/23/2017. A new remote fill line, an additional tank overfill alarm station, and additional Incon leak detection sensors associated with a new standby generator were installed earlier this year without plan check approval or installation inspection sign-off from HMCID.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS
Violation Date: 09-16-2015
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 08/22/2017. Violation remains uncorrected. UST systems are not yet equipped with methods for confirming interstitial communication within vacuum zones and hydrostatically monitored sumps. Within 30 days, have Lescure Company install the proposed interstitial monitoring drain valves at the bottoms of all 9 hydrostatically monitored sumps and install the proposed vacuum end of line vacuum release valves inside Transition Sumps TS-1, TS-2, and TS-3. The printer for Incon TS-5000 LCC E Console 3 was not working properly on 9/8/2016 (possibly due to incorrect paper being used). Have Lescure Company or Balch Petroleum restore proper functionality to the printer within 30 days.

Citation: HSC 6.7 25281.5(b)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25281.5(b)(3)
Violation Description: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated. Conduct daily visual inspections at least monthly. Maintain a log of inspection results for review by the CUPA.
Violation Notes: Since installation of transparent inspection plates was completed in June of this year, most of the piping downstream of Transition Sump TS-1 can now be visually inspected. However, an additional transparent plate must be installed in place of the steel plate located nearest the point where the piping surfaces from the trench system and enters the sheet metal enclosure shielding the aboveground piping adjacent to the wall by the Fuel Filtration System cabinets. Have this plate replaced within 30 days. Have Lescure Company supplement the information associated with the current UST retrofit plan check by submitting drawings or other information clearly documenting that the bottoms of the trenching near the standby generator return pump cabinets and the sheet metal enclosure behind the Fuel Filtration System cabinets are sloped to direct any fuel release to the portions of the trench that are able to be visually inspected through the transparent plates. Also submit a drawing [Truncated]

Violation Description: Failure to submit the Annual Monitoring System Certification Form to the UPA within 30 days of completion of the test.
Violation Notes: Repeat Violation: The Monitoring System Certification form documenting annual testing done on 6/21/2017 was not submitted until 9/11/2017 and did not include the required System Setup report and Alarm History Report. Notify your testing contractor of these deficiencies and ensure that this year’s testing and all future testing is properly documented.

Violation Date: 09-16-2015
Citation: HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description: Failure of a UST system installed on or after July 1, 2004 to be designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes: Returned to compliance on 06/29/2017. The new remote fill piping secondary containment is not equipped with continuous vacuum, pressure, or hydrostatic as required. [Note: The piping is double walled, but it has a dry interstitial space which was left isolated from the monitored fill sumps by leaving the cores in the test boot Schrader valves.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-22-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Final construction inspection to document retrofitting of underground storage tank (UST) systems. UST 1 Sump C and UST 2 Sump C interstitial spaces were vacuum tested today @ 10” Hg for 30 minutes per the sump manufacturer’s (Xerxes) test procedure. Both sumps passed. Test gauges returned to zero when vacuum was released at end of testing. Flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 has been replaced. The sump interstitial space has been flushed out and refilled with new pink glycol interstitial monitoring fluid.

Interstitial communication was verified today by draining fluid from the sump bottom and observing a drop in fluid level in the reservoir for the sump’s interstitial sensor. CGRS performed enhanced leak detection (ELD) testing of the new remote fill piping primary containment using the IOTA Helium test method. No Helium was detected in secondary containment, including the remote fill transition sump (TS-3), UST 1 Sump C and 2 [Truncated].

Violation Date: 09-16-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 09/08/2016. Spill containment (Simplex Fuel Port model 24055215) at new remote fill station does not provide the minimum required 5 gallon capacity and will not catch releases when the fill hose is disconnected because the hose connection fitting is located directly above the front edge of the cabinet. Remote fill shall not be used until approval is granted by HMCD.

Site Name: Equinix - SV5
Violation Date: 09-13-2016
Citation: 23 CCR 16 2638(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(d)
Violation Description: Failure to submit the Annual Monitoring System Certification Form to the CUPA within 30 days of completion of the test.
Violation Notes: Returned to compliance on 10/08/2016. Repeat violation. Monitoring System certification form documenting annual testing done on 9/14/2015 did not include the required System Setup report and Alarm History Report. An addendum page is also required to document testing of vacuum monitored systems. An addendum was submitted last year, but it documented testing of 4 vacuum sensors (the system contains only 2) and noted incorrect sensor IDs. Notify your testing contractor of these deficiencies and ensure that this year’s testing and all future testing is properly documented. Per Franklin Fueling Systems (manufacturer of your Incon consoles), your testing contractor should be connecting a computer to the Incon TS-5000 console’s Ethernet port and downloading these reports to generate a PDF report.

Citation: HSC 6.7 25281.5(b)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25281.5(b)(3)
Violation Description: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping; Conduct daily visual inspections each time the tank is operated. Conduct daily visual inspections at least monthly. Maintain a log of inspection results for review by the CUPA.
Violation Notes: Since installation of transparent inspection plates was completed in June of this year, most of the piping downstream of Transition Sump TS-1 can now be visually inspected. However, an additional transparent plate must be installed in place of the steel plate located nearest the point where the piping surfaces from the trench system and enters the sheet metal enclosure shielding the aboveground piping adjacent to the wall by the Fuel Filtration System cabinets. Have this plate replaced within 30 days. Have Lescure Company supplement the information associated with the current UST retrofit plan check by submitting drawings or other information clearly documenting that the bottoms of the trenching near the standby generator return pump cabinets and the sheet metal enclosure behind the Fuel Filtration System cabinets are sloped to direct any fuel release to the portions of the trench that are able to be visually inspected through the transparent plates. Also submit a drawing [Truncated]

Violation Date: 09-16-2015
Citation: 23 CCR 16 2632, 2634, 2636, 2666 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632, 2634, 2636, 2666

Violation Description: Failure of the leak detection equipment to be properly programmed or properly operated.
Violation Notes: Returned to compliance on 08/22/2017. UST systems are not equipped with methods for confirming interstitial communication within vacuum zones and hydrostatically monitored sumps. Along with the plan check submittal covering installation of the remote fill line and additional leak sensors, include in the scope of work the installation of vacuum valves or gauges on the vacuum lines inside Transition Sumps 1 and 2, and the installation of interstitial fluid sight glasses connected via tubing to the bottom fluid fill ports inside each hydrostatically monitored sump. The hydrostatic sensor reservoir connections inside the 3 transition sumps must be switched to the upper interstitial space access port for each sump, not the bottom port.

Violation Date: 09-16-2015
Citation: HSC 6.7 25281.5(b)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25281.5(b)(3)
Violation Description: Failure to conduct daily visual inspections each time the tank is operated, but not less than monthly, and maintain a log of inspection results for review of the CUPA.
Violation Notes: The unburied piping associated with these EGTS UST systems does not meet California requirements for construction and monitoring of UST systems. The piping downstream of Transition Sump #2 can be exempted if Equinix performs and documents visual inspections of all portions of the unburied fuel piping every time the system is operated (i.e., whenever the submersible turbine pumps run) and not less than monthly.
This will necessitate either frequently removing many of the solid steel cover plates that are currently sealed to the top of the trench system to keep water out, or retrofitting the trench covering to facilitate the required visual inspections. The other alternative is to replace the current piping in the trench system with double wall lines that are monitored using an approved vacuum, pressure, or hydrostatic continuous monitoring method. Include your proposal for dealing with this issue in the scope of work for the plan check review covering installation of the [Truncated]

Violation Date: 09-13-2016
Citation: HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description: Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes: Returned to compliance on 06/29/2017. Violation remains uncorrected. The new remote fill piping secondary containment is not equipped with continuous vacuum, pressure, or hydrostatic as required. All piping systems associated with USTs installed on or after 7/1/2004 are required to be of the "Closed" type (i.e., monitored by a continuous vacuum, pressure, or hydrostatic leak detection system). Within 30 days, have Lescure Company extend the vacuum tubing associated with vacuum zone 1 to the secondary piping for the UST 1 remote fill line so the vacuum zone monitored by Sensor LS5 will include all piping associated with UST 1 [i.e., fuel oil supply (FOS), fuel oil return (FOR), fuel oil vent (FOV), and Remote Fill]; and extend the vacuum tubing associated with vacuum zone 2 to the secondary piping for the UST 2 remote fill line so the vacuum zone monitored by Sensor LS16 will include all piping associated with UST 2 [i.e., FOS, FOR, FOV, and Remote Fill].

Violation Date: 09-13-2016
Citation: 23 CCR 16 2715(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(i)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 06/21/2017. Interstitial communication still has not been verified and documented as required during annual monitoring system certification testing. Within 30 days, have Lescure Company install the proposed interstitial monitoring drain valves at the bottoms of all 9 hydrostatically monitored sumps and install the proposed vacuum end of line vacuum release valves inside Transition Sumps TS-1, TS-2, and TS-3. Testing of the 2 Incon model TS-SCCM vacuum sensors monitoring the secondary containment for the underground fuel piping was not done on 9/8/2016. The sensors must be tested and certified as operational after the vacuum valves are installed by dropping vacuum until low vacuum alarms occur. Contact Greg Breshears @ (408) 918-1978 to schedule a follow-up inspection to witness this testing within 30 days. [Note: Qualifying the unburied piping for the Emergency Generator Tank System (EGTS) unburied piping exemption pursuant to Health and Safety Code section 25281.5(b)(3) eliminates [Truncated]]

Construction inspection to document retrofitting of underground storage tank (UST) systems. The two remote fill lines were pressure tested today using nitrogen. The primary piping was tested @ 60 p.s.i.g. and the secondary piping was tested at 10 p.s.i.g. concurrently. Pressure held steady for 1 hour. Gauges returned to zero when pressure was released at end of testing. tests passed. Despite HMCD’s recommendation that the tank top sumps that are penetrated by the remote fills lines (UST 1 Sump C and UST 2 Sump C) be tested using vacuum to minimize stressing them, Lescure Company attempted to pressure test them today. This resulted in structural failure of the sump atop UST 1 (North tank) at the seam where the sump is attached to the tank top sump collar. Have the sump repaired per the Lescure Company’s Method of Procedure dated 6/26/2017. This work must be done by or under the direct supervision of a qualified individual possessing ICC UST Installation/Retrofitting [Truncated]

Eval Notes: Final construction inspection to document retrofitting of underground storage tank (UST) systems. UST 1 Sump C and UST 2 Sump C interstitial spaces were vacuum tested today @ 10" Hg for 30 minutes per the sump manufacturer’s (Xerxes) test procedure. Both sumps passed. Test gauges returned to zero when vacuum was released at end of testing. Flexible tubing connecting the hydrostatic sensor reservoir to sump TS-1 has been replaced. The sump interstitial space has been flushed out and refilled with new pink glycol interstitial monitoring fluid. Interstitial communication was verified today by draining fluid from the sump bottom and observing a drop in fluid level in the reservoir for the sump’s interstitial sensor. CGRS performed enhanced leak detection (ELD) testing of the new remote fill piping primary containment using the IOTA Helium test method. No Helium was detected in secondary containment, including the remote fill transition sump (TS-3), UST 1 Sump C and 2 [Truncated]

Hazardous Waste Summary:
- Waste code: 551
  - Waste name: Laboratory waste chemicals
- Waste code: P001
  - Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Biennial Reports:
Last Biennial Reporting Year: 2017

Annual Waste Handled:
- Waste code: P001
  - Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
  - Amount (Lbs): 4

Violation Status: No violations found

FINDS:
Registry ID: 110069631991

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Violations:

Site ID: 420043
Site Name: Equinix - SV10
Violation Date: 10-11-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 11/09/2018. Annual HMBP training documentation not available during inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 420043
Site Name: Equinix - SV10
Violation Date: 10-11-2018
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: Returned to compliance on 11/09/2018. Inspections (monthly and annual) conducted by Caterpillar are not equivalent to industry standards outlined in SP001. Plan does not include the forms or format by which inspections are to be conducted.
Violation Division: Santa Clara County Environmental Health

Compliance Evaluation Inspection
Eval Date: 10-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: SV10-7 GO CERS ID 10730206 Submittal dates 10/9/18, 5/24/18, 3/30/17 Inventory reported matches amounts and types of chemicals noted during inspection. NOTE: HMBP submittal notes storage of 21,600 gal of diesel within 3x8000 gallon tanks with overfill limits set at 90% - Site has
only 2x8000 gal tanks in service, have 5 more generators coming on
line ( Jan 2019). Please ensure that HMBP is updated within 30 days of
fuel being placed in the tanks. Reported R410 refrigerant. Observed
all refrigerant within a sealed system used for building cooling.
Battery rooms utilize Deka Unigy HR7500 model batteries. HMBP training
documented

Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval Notes: SV10 (7 GO) Site stores more than 10,000 gallons of petroleum in tanks
larger than 5000 gallons in size. Plan is dated June 2017. Inventory
submitted in SPCC plan confirmed during onsite inspection. Tanks are
double walled, UL listed, monitored for overfill and leak.
-Additionally overfill by visual monitoring of clock guage at point of
fill with read/inches product chart available at fill spill bucket.
Oil filled operation equipment (crankcase oil resevoirs) visually
monitored with spill kits available. - Drainage in crankcase area is
over top of fuel tank, within enclosure. Spill response materials
present. Oil filled operational equipment (elevator resevoirs) noted
in plan as being secondarily contained.-Observed non-integrally
contained tank in elevator room. Room noted as being single pour
concrete with no egress (drains). Oil filled electrical equipment is
exempt by size and PCB content Confirmed contacts/personel in plan are
still employed by [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: SV10 (7 GO) Site stores more than 10,000 gallons of petroleum in tanks larger than 5000 gallons in size. Plan is dated June 2017. Inventory
Submitted in SPCC plan confirmed during onsite inspection. Tanks are double walled, UL listed, monitored for overfill and leak. Additionally overfill by visual monitoring of clock guage at point of fill with read/inches product chart available at fill spill bucket. Oil filled operation equipment (crankcase oil resevoirs) visually monitored with spill kits available. Drainage in crackcase area is over top of fuel tank, within enclosure. Spill response materials present. Oil filled operational equipment (elevator resevoirs) noted in plan as being secondarily contained. -Observed non-integarly contained tank in elevator room. Room noted as being single pour concrete with no egress (drains). Oil filled electrical equipment is exempt by size and PCB content Confirmed contacts/personel in plan are still employed by [Truncated]

**Site Name:** Silicon Valley Design Center  
**Violation Date:** 04-10-2018  
**Citation:** Un-Specified  
**Violation Description:** Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance  
**Violation Notes:** Returned to compliance on 05/07/2018. Business generates hazardous waste and is currently operating without a valid Hazardous Waste Generator permit from our office. Upon receipt of payment of permit fees, the permit will be issued and mailed to the facility mailing address.

**Violation Division:** Santa Clara County Environmental Health  
**Violation Program:** HW  
**Violation Source:** CERS

**Eval General Type:** Other/Unknown  
**Eval Date:** 04-10-2018  
**Violations Found:** Yes  
**Eval Type:** Other, not routine, done by local agency  
**Eval Notes:** On-site to conduct a hazardous waste generation permit investigation. Walk through was conducted with John Overstreet, VP of Silicon Valley Design Center. Facility is a branch of Communications and Power Industries LLC, that specializes in design, sales, and marketing of their products. Facility uses acetone and IPA to clean and remove glues off of hardware. Waste contaminated wipes are accumulated in one step can. Facility will be permitted for generating hazardous waste based on these findings. Notes: Facility applied for EPA ID CAL000432915 in January 2018.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GREAT OAKS MIXED USE PROJECT (Continued)

Completed Area Name: Residential Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 10/09/2017
Comments: DTSC certified the completion of the removal action for Residential Parcels Operable Unit. The removal action consisted of the excavation of arsenic- and dieldrin-contaminated soil and disposal at an off-site permitted landfill. A land use covenant has been recorded for a portion of the Operable Unit where arsenic-contaminated soil could not be excavated because of the presence of a fiber-optic cable and will need to be monitored on an annual basis.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 04/22/2016
Comments: Based on the City of San Jose’s Environmental Impact Report for the Great Oaks Mixed Used Project, DTSC concluded in a Statement of Findings that the cleanup activities outlined in the Final Removal Action Workplan will not result in significant and unavoidable effects on the environment. A Notice of Determination was filed with the State Clearinghouse on April 25, 2016.

Completed Area Name: Residential Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/14/2017
Comments: A land use covenant (LUC) between iStar San Jose, LLC and DTSC was recorded with Santa Clara County on September 14, 2017. The LUC restricts land use and activities on a 912 square feet area of the site where impacted soil with arsenic concentrations above the residential cleanup level could not be excavated as required by the Removal Action Workplan due to the presence of a previously-unknown fiber-optic cable.

**Comments:** Not reported

**Completed Area Name:** Residential Parcels
**Completed Sub Area Name:** Not reported
**Completed Document Type:** Removal Action Completion Report
**Completed Date:** 02/13/2017
**Comments:** First phase of implementation of the Removal Action Workplan concluded on June 6, 2016.

**Completed Area Name:** PROJECT WIDE
**Completed Sub Area Name:** Not reported
**Completed Document Type:** Fieldwork
**Completed Date:** 08/01/2016
**Comments:** Phase II of the Removal Action Workplan implementation was completed.

**Completed Area Name:** Lots 6 and 7
**Completed Sub Area Name:** Not reported
**Completed Document Type:** Removal Action Completion Report
**Completed Date:** 12/07/2016
**Comments:** The removal action completion report documents the removal action at Lots 6 and 7. Soil contaminated with dieldrin and arsenic at levels over residential screening levels was excavated over an area of approximately 201,400 square feet. Approximately 12,300 cubic yards of soil was excavated and disposed at an off-site disposal facility. Confirmation sampling indicates that no further action is required at Lots 6 and 7.

**Completed Area Name:** PROJECT WIDE
**Completed Sub Area Name:** Not reported
**Completed Document Type:** Removal Action Workplan w/ESD
**Completed Date:** 03/09/2017
**Comments:** The Explanation of Significant Differences modifies the selected remedy for the Site (i.e. excavation and off-site disposal of contaminated soil at a permitted landfill) by adding a Land Use Covenant as a component. The Land Use Covenant will restrict the activities and land use in the 57 feet by 16 feet area of the Site where arsenic- and dieldrin-impacted soil could not be excavated due to the presence of the underground fiber optic cables.

**Completed Area Name:** PROJECT WIDE
**Completed Sub Area Name:** Not reported
**Completed Document Type:** Public Notice
**Completed Date:** 05/04/2017

**Completed Document Type:** Removal Action Workplan w/ESD

TC5725369.1s Page 630
Violated with regard to: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance

Returned to compliance on 06/07/2017. (PAINT SHOP) OBSERVED A PALLETT WITH VARIOUS 1 GALLON SIZE LATEX PAINT CANS THAT ACCORDING TO MR. VALDEZ THE PAINTS WERE BROUGHT BACK FROM ONE OF THEIR MIDDLE SCHOOLS (CAROLINE DAVIS INTERMEDIATE SCHOOL). ACCORDING TO MR. VALDEZ SOME OF THESE PAINT CANS CAN BE RE-USED. ADDITIONALLY, IN THIS SAME AREA OBSERVED OTHER VARIOUS 1-GALLON CONTAINERS IN SIZE WITH UNKNOWNS AS WELL AS A CABINET WITH VARIOUS CONTAINERS IN 1 GALLON IN SIZE AND 1-5 GALLON METAL CONTAINER WITH A FLAMMABLE LIQUID LABEL. MR. VALDEZ WAS UNSURE IF THESE WERE HAZARDOUS WASTE OR MATERIAL. LASTLY, THIS ROOM HAD MORE THAN 100 GALLONS IN 1-GALLON SIZE CONTAINERS STORED IN PALLETS ALL THROUGH OUT, IT WAS UNSURE AND MR. VALDEZ COULD NOT CONFIRM WHICH PAINT CANS WERE IN USE AND WHICH ONES WERE A HAZARDOUS WASTE. A BETTER SEPARATION NEEDS TO BE MADE IN THIS ROOM FOR THE LATEX PAINT CANS. DETERMINE WHICH PAINT CANS WILL BE RE-USED. FOR THOSE LATEX PAINT CANS NOT RE-USED, THESE MUST BE RECYCLED/OR DISPOSED OF.

OAK GROVE SCHOOL DISTRICT (Continued)  S103668381

AMOUNT OF BROKEN FLUORESCENT TUBES ON THE FLOOR INSIDE THE WAREHOUSE. THESE BROKEN FLUORESCENT TUBES ARE NOT THE SAME TUBES I SAW DURING MY ORIGINAL INSPECTION BACK IN 2/2/2016. IMMEDIATELY CLEAN UP THE BROKEN FLUORESCENT TUBES, COLLECT IT IN A CONTAINER AND MANAGE IT AS UNIVERSAL WASTE. ENSURE THAT THERE ARE CONTAINERS AVAILABLE TO STORE ALL SIZE OF FLUORESCENT TUBES. ENSURE THAT PROCESSES ARE SET IN PLACE TO MINIMIZE THE RELEASE OF A HAZARDOUS WASTE. ADDITIONALLY, ENSURE THAT THIS ROOM IS ORGANIZED IN A WAY THAT WOULD ALLOW MOVEMENT OF PERSONNEL TO GET TO THE STORAGE BINS. NOTIFY OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.

Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2) By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled.

(f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Returned to compliance on 06/07/2017. (MAINTENANCE SHOP); -INSIDE THE SHOP, OBSERVED A 32 GALLON PLASTIC CONTAINER LABELED AS "AEROSOL CANS" WRITTEN WITH A BLACK SHARPIE. THE CONTAINERS HAD SEVERAL BRAKE CLEANER AEROSOL CANS THAT WERE NOT EMPTY. AFTER SPEAKING WITH EDUARDO (MECHANIC) THE PERSON IN CHARGE OF THESE CANS, HE EXPLAINED TO ME THAT BEFORE HE THROWS ANY AEROSOL CAN AWAY IN THE TRASH, HE FIRST MAKES SURE THAT IT IS EMPTY BY DEMONSTRATING TO ME HOW SPRAYED OUT THE EXCESS. HE ALSO TOLD ME THAT HE PUNCTURES THEM BEFORE HE THROWS THEM IN THE TRASH CAN. IT IS UNDETERMINED AT THIS TIME IF NON-EMPTY USED AEROSOL CANS ARE BEING THROWN IN THE DUMPSTER BASED ON THE MECHANICS EXPLANATION. ADDITIONALLY, IF AEROSOL CANS ARE BEING PUNCTURED THE CONTENT INSIDE THE CAN MUST BE COLLECTED AND MANAGED AS HAZARDOUS WASTE. PROVIDE TO OUR OFFICE IN WRITING THE PROCEDURE SET IN PLACE BY OAK GROVE SCHOOL DISTRICT ON HOW NON-EMPTY USED AEROSOL CANS ARE BEING PREVENTED FROM GETTING INTO TO THE LANDFILL.
### Violation Details

**Eval Notes:** On-site to oversee the annual monitoring system certification. Testing was conducted by Mike Stromecki with Advance Fuel Systems. Mr. Stromecki has the following certifications; ICC#8339168 exp., 02/03/19; VR#B45732 exp., 8/28/19 and INCON Level #2-1006623708 exp., 12/29/18. Prior to an after completion of testing there were no active alarms at the veeder root panel. The following components were tested during this inspection: - L1- 87 STP sump sensor - L2- Diesel STP sump sensor - L3- Annular sensor * All alarms above provided an audible/visual alarm at the veeder root panel. - 2 Spill buckets were hydrostatically tested for 60 minutes and passed. - 2 UDC's float and chain mechanism of the Bravo box were tested during this inspection and passed. - Overfill prevention was verified to be mechanical flapper valves. The following documentation was reviewed during this inspection; - 12 months of DO records - Employee training is current for all employees [Truncated]

<td>Returned to compliance on 09/17/2015. DURING THIS TESTING THERE WAS NO ALARM HISTORY PROVIDED BY THE TECHNICIAN. THE TECHNICIAN INFORMED ME THAT THERE WAS A COLD-START THAT TOOK PLACE ABOUT TWO MONTHS AGO AFTER A POWER OUTAGE. TECHNICIAN CAME OUT TO RESTORE THE PROGRAM FROM THE MEMORY CHIP BUT THE ALARM HISTORY WAS LOST. A PERMIT WITH OUR DEPARTMENT WAS NOT OBTAINED FOR THIS COLD-START. SUBMIT A RETRO-ACTIVE PERMIT APPLICATION TO OUR DEPARTMENT FOR THE COLD-START THAT TOOK PLACE OUT AT THIS SITE AND PAY THE NECESSARY FEES IMMEDIATELY.</td>

Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes: Returned to compliance on 06/07/2017. (PAINT SHOP) OBSERVED A PALLET WITH VARIOUS 1 GALLON SIZE LATEX PAINT CANS THAT ACCORDING TO MR. VALDEZ THE PAINTS WERE BROUGHT BACK FROM ONE OF THEIR MIDDLE SCHOOLS (CAROLINE DAVIS INTERMEDIATE SCHOOL). ACCORDING TO MR. VALDEZ SOME OF THESE PAINT CANS CAN BE RE-USED. ADDITIONALLY, IN THIS SAME AREA OBSERVED OTHER VARIOUS 1-GALLON CONTAINERS IN SIZE WITH UNKNOWNS AS WELL AS A CABINET WITH VARIOUS CONTAINERS IN 1 GALLON IN SIZE AND 1-5 GALLON METAL CONTAINER WITH A FLAMMABLE LIQUID LABEL. MR. VALDEZ WAS UNSURE IF THESE WERE HAZARDOUS WASTE OR MATERIAL. LASTLY, THIS ROOM HAD MORE THAN 100 GALLONS IN 1-GALLON SIZE CONTAINERS STORED IN PALLET ALL THROUGH OUT, IT WAS UNSURE AND MR. VALDEZ COULD NOT CONFIRM WHICH PAINT CANS WERE IN USE AND WHICH ONES WERE A HAZARDOUS WASTE. A BETTER SEPARATION NEEDS TO BE MADE IN THIS ROOM FOR THE LATEX PAINT CANS. DETERMINE WHICH PAINT CANS WILL BE RE-USED. FOR THOSE LATEX PAINT CANS NOT RE-USED, THESE MUST BE RECYCLED/OR DISPOSED OF [Truncated]

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: INSURANCE POLICY NEEDS TO BE UPDATED ON CERS. THE CURRENT POLICY AVAILABLE ON SITE EXPIRES ON JULY 2015. WHEN THE INSURANCE POLICY IS UPDATED IT NEEDS TO BE UPLOADED ON CERS.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 53255
Site Name: OAK GROVE SCHOOL DISTRICT
Violation Date: 01-28-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
OAK GROVE SCHOOL DISTRICT (Continued) S103668381

Violation Notes: Returned to compliance on 07/06/2016. BASED ON THE RECORDS REVIEWED AND THE INFORMATION PROVIDED DURING THIS INSPECTION. YOUR FACILITY IS REGULATED AS A SMALL QUANTITY GENERATOR. YOUR ACCUMULATION TIME LIMIT FOR ALL HAZARDOUS WASTE GENERATED AT THIS SITE IS IS 180 DAYS (ABOUT EVERY 6 MONTHS). THE FOLLOWING HAZARDOUS WASTE OBSERVED DURING THIS INSPECTION HAS EXCEEDED THE ACCUMULATION TIME LIMIT: (MAINTENANCE SHOP) - 55 GAL. DRUM OF USED ABSORBENT- NO RECORDS WERE FOUND THAT THIS WASTE STREAM HAS EVER BEEN DISPOSED OF. AT THE TIME OF THIS INSPECTION, THE DRUM WAS FULL. - ~100 GAL. CONTAINER OF USED ANTIFREEZE- THE ACCUMULATION DATE ON DRUM WAS, 3/12/15 WHICH CORRESPONDS TO THE DISPOSAL RECORD THAT WAS REVIEWED. - ~200 GAL. USED OIL TANK- THE ACCUMULATION DATE ON THE TANK AND WAS 3/12/15 WHICH CORRESPONDS TO THE DISPOSAL RECORD THAT WAS REVIEWED. (PRINTING SHOP) - 3 X 1 GAL. PLASTIC JUGS WITH A HAZARDOUS WASTE LABEL: "NON-PHOTOCHMICALLY REACTIVE TONER" ACCUMULATION DATE; 12/26/2005 - 1 X 1 GAL. JUG [Truncated]

Violation Division: Santa Clara County Environmental Health

Violation Date: 06-02-2016
Citation: HSC 6.5 25201.16(f) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(f)
Violation Description: Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.

Violation Notes: Returned to compliance on 07/06/2016. WAREHOUSE-OBSERVED A LARGE AMOUNT OF BROKEN FLUORESCENT TUBES ON THE FLOOR INSIDE THE WAREHOUSE. THESE BROKEN FLUORESCENT TUBES ARE NOT THE SAME TUBES I SAW DURING MY ORIGINAL INSPECTION BACK IN 2/2/2016. IMMEDIATELY CLEAN UP THE BROKEN FLUORESCENT TUBES, COLLECT IT IN A CONTAINER AND MANAGE IT AS UNIVERSAL WASTE. ENSURE THAT THERE ARE CONTAINERS AVAILABLE TO STORE ALL SIZE OF FLUORESCENT TUBES. ENSURE THAT PROCESSES ARE SET IN PLACE TO MINIMIZE THE RELEASE OF A HAZARDOUS WASTE. ADDITIONALLY, ENSURE THAT THIS ROOM IS ORGANIZED IN A WAY THAT WOULD ALLOW MOVEMENT OF PERSONNEL TO GET TO THE STORAGE BINS. NOTIFY OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 53255
Site Name: OAK GROVE SCHOOL DISTRICT
Violation Date: 05-11-2017
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following; (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner, or (4) By shipping the container or inner liner to a supplier
OAK GROVE SCHOOL DISTRICT (Continued)

or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled.

(f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes:

Returned to compliance on 06/07/2017. (MAINTENANCE SHOP): INSIDE THE SHOP, OBSERVED A 32 GALLON PLASTIC CONTAINER LABELED AS "AEROSOL CANS" WRITTEN WITH A BLACK SHARPIE. THE CONTAINERS HAD SEVERAL BRAKE CLEANER AEROSOL CANS THAT WERE NOT EMPTY. AFTER SPEAKING WITH EDUARDO (MECHANIC) THE PERSON IN CHARGE OF THESE CANS, HE EXPLAINED TO ME THAT BEFORE HE THROWS ANY AEROSOL CAN AWAY IN THE TRASH, HE FIRST MAKES SURE THAT IT IS EMPTY BY DEMONSTRATING TO ME HOW SPRAYED OUT THE EXCESS. HE ALSO TOLD ME THAT HE PUNCTURES THEM BEFORE HE THROWS THEM IN THE TRASH CAN. IT IS UNDETERMINED AT THIS TIME IF NON-EMPTY USED AEROSOL CANS ARE BEING THROWN IN THE DUMPSTER BASED ON THE MECHANICS EXPLANATION. ADDITIONALLY, IF AEROSOL CANS ARE BEING PUNCTURED THE CONTENT INSIDE THE CAN MUST BE COLLECTED AND MANAGED AS HAZARDOUS WASTE. PROVIDE TO OUR OFFICE IN WRITING THE PROCEDURE SET IN PLACE BY OAK GROVE SCHOOL DISTRICT ON HOW NON-EMPTY USED AEROSOL CANS ARE BEING PREVENTED FROM GETTING INTO THE LANDFILL.

Eval Notes: Conducted a follow-up inspection today from my original inspection back in 06/02/2016. Miguel Cruz is no longer employed with the school district. I conducted this walk-through with Mr. Anthony Valdez, manager of transportation and custodial and Mr. Fred Dickey. Notes: 1) (VCG020- marking of a hazardous waste (corrected)- in the maintenance shop observed 1 x 55 gal., and 1 x 15 gal. metal drum of used oil that were missing the physical state and hazardous properties on the label. This label was corrected by Mr. Valdez during this inspection. 2) Photographs were taken during this inspection. 3) According to Mr. Dickey, used fluorescent lamps and batteries are no longer being brought back from other schools to the district office. Each school now has container bins for collecting and disposing of these wastes at the point of generation. 4) A lot of the hazardous wastes that were noted on my inspection report from 02/02/2016 have been disposed of. The district did a [Truncated]

THIS INSPECTION BEGAN ON 2/25/2015 AND CONCLUDED TODAY. ON-SITE TO
WITNESS SECONDARY CONTAINMENT TESTING (SB989) OF THE UST SYSTEM ON
2/25/2015 AND 3/26/2015 PERFORMED BY UST SERVICE TECHNICIAN EDDIE
MARTINEZ OF ADVANCED FUEL SERVICES. MR. MARTINEZ HAS CURRENT ICC UST
SERVICE TECHNICIAN CERTIFICATION (EXP. 03/17/2016), VEEDER-ROOT LEVEL
4 CERTIFICATION (EXP. 08/11/2016) AND INCON SUMP TESTER (EXP.
10/2016). THE FOLLOWING UST SYSTEM COMPONENTS WERE TESTED: - ONE
ANNULAR SPACE ? VACUUM TEST AT 10 IN Hg, TEST RESULTS = PASS. - TWO
STP SUMPS ? HYDROSTATIC TEST USING AN INCON TEST APPARATUS. BOTH SUMPS
FAILED THE INITIAL TEST ON 2/25/2015. THE UST SERVICE TECHNICIAN
REPLACED THE TEST BOOTS INSIDE THE SUMPS AND RETESTED. RETEST RESULTS
= PASS. - TWO PIPING RUNS - PRESSURE TEST AT 5 PSI. BOTH PIPING RUNS
FAILED THE INITIAL TEST ON 2/25/2015. THE UST SERVICE TECHNICIAN
REPLACED THE TEST BOOTS AND RETESTED ON 3/26/2015. RETEST RESULTS =
PASS. - TWO UDC SUMPS ? HYDROSTATIC [Truncated]

On-site to oversee the annual monitoring system certification. Testing
was conducted by Mike Stromecki with Advance Fuel Systems. Mr.
Stromecki has the following certifications; ICC#8339168 exp.,
02/03/19; VR#B45732 exp., 8/28/19 and INCON Level #2-1006623708 exp.,
12/29/18. Prior to an after completion of testing there were no active
alarms at the veeder root panel. The following components were tested
during this inspection: - L1- 87 STP sump sensor - L2- Diesel STP sump
sensor - L3- Annular sensor * All alarms above provided an
audible/visual alarm at the veeder root panel. - 2 Spill buckets were
hydrostatically tested for 60 minutes and passed. - 2 UDC’s float and
chain mechanism of the Bravo box were tested during this inspection
and passed. - Overfill prevention was verified to be mechanical
flapper valves. The following documentation was reviewed during this
inspection: - 12 months of DO records - Employee training is current
for all employees [Truncated]

**Treat To Water:** Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

**Complexity:** Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Notes: INSURANCE POLICY NEEDS TO BE UPDATED ON CERS. THE CURRENT POLICY AVAILABLE ON SITE EXPIRES ON JULY 2015. WHEN THE INSURANCE POLICY IS UPDATED IT NEEDS TO BE UPLOADED ON CERS.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 53255
Site Name: OAK GROVE SCHOOL DISTRICT
Violation Date: 01-29-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violation Notes: Returned to compliance on 07/06/2016. BASED ON THE RECORDS REVIEWED AND THE INFORMATION PROVIDED DURING THIS INSPECTION. YOUR FACILITY IS REGULATED AS A SMALL QUANTITY GENERATOR. YOUR ACCUMULATION TIME LIMIT FOR ALL HAZARDOUS WASTE GENERATED AT THIS SITE IS 180 DAYS (ABOUT EVERY 6 MONTHS). THE FOLLOWING HAZARDOUS WASTE OBSERVED DURING THIS INSPECTION HAS EXCEEDED THE ACCUMULATION TIME LIMIT; (MAINTENANCE SHOP) - 55 GAL. DRUM OF USED ABSORBENT- NO RECORDS WERE FOUND THAT THIS WASTE STREAM HAS EVER BEEN DISPOSED OF. AT THE TIME OF THIS INSPECTION, THE DRUM WAS FULL. - ~100 GAL. CONTAINER OF USED ANTIFREEZE- THE ACCUMULATION DATE ON DRUM WAS, 3/12/15 WHICH CORRESPONDS TO THE DISPOSAL RECORD THAT WAS REVIEWED. - ~200 GAL. USED OIL TANK- THE ACCUMULATION DATE ON THE TANK AND WAS 3/12/15 WHICH CORRESPONDS TO THE DISPOSAL RECORD THAT WAS REVIEWED. (PRINTING SHOP) - 3 X 1 GAL. PLASTIC JUGS WITH A HAZARDOUS WASTE LABEL; "NON-PHOTOCHEMICALLY REACTIVE TONER" ACCUMULATION DATE; 12/26/2005 - 1 X 1 GAL. JUG [Truncated]

MAP FINDINGS

OAK GROVE SCHOOL DISTRICT (Continued)  S103668381

Site ID: 53255  
Site Name: OAK GROVE SCHOOL DISTRICT  
Violation Date: 05-11-2017  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7  
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2) By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclames its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled.  
(f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.  
Violation Notes: Returned to compliance on 06/07/2017. (MAINTENANCE SHOP): -INSIDE THE SHOP, OBSERVED A 32 GALLON PLASTIC CONTAINER LABELED AS "AEROSOL CANS" WRITTEN WITH A BLACK SHARPIE. THE CONTAINERS HAD SEVERAL BRAKE CLEANER AEROSOL CANS THAT WERE NOT EMPTY. AFTER SPEAKING WITH EDUARDO (MECHANIC) THE PERSON IN CHARGE OF THESE CANS, HE EXPLAINED TO ME THAT BEFORE HE THROWS ANY AEROSOL CAN AWAY IN THE TRASH, HE FIRST MAKES SURE THAT IT IS EMPTY BY DEMONSTRATING TO ME HOW SPRAYED OUT THE EXCESS. HE ALSO TOLD ME THAT HE PUNCTURES THEM BEFORE HE THROWS THEM IN THE TRASH CAN. IT IS UNDETERMINED AT THIS TIME IF NON-EMPTY USED AEROSOL CANS ARE BEING THROWN IN THE DUMPSTER BASED ON THE MECHANICS EXPLANATION. ADDITIONALLY, IF AEROSOL CANS ARE BEING PUNCTURED THE CONTENT INSIDE THE CAN MUST BE COLLECTED AND MANAGED AS HAZARDOUS WASTE. PROVIDE TO OUR OFFICE IN WRITING THE PROCEDURE SET IN PLACE BY OAK GROVE SCHOOL DISTRICT ON HOW NON-EMPTY USED AEROSOL CANS ARE BEING PREVENTED FROM GETTING INTO THE LANDFILL.

Violation Description:  
Failure to send hazardous waste offsite for treatment, storage, or 
disposal within 180 days (or 270 days if waste is transported over 200 
miles) for a generator who generates less than 1000 kilogram per month 
if all of the following conditions are met: (1) The quantity of 
hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) 
The generator complies with the requirements of 40 Code of Federal 
Regulations section 262.34(d); (e) and (f). (3) The generator does not 
hold acutely hazardous waste or extremely hazardous waste in an amount 
greater than one kilogram for more than 90 days.

Violation Notes:  
Returned to compliance on 06/07/2017. (PAINT SHOP) -OBSERVED THE 
FOLLOWING HAZARDOUS WASTES: - 1 X 1 GAL. PLASTIC JUG WITH A HAZARDOUS 
WASTE LABEL; "NON-PHOTOCHEMICAL REACTIVE TONER" WITH AN ACCUMULATION 
DATE; 07/30/03. - 1 X 1 GAL. PLASTIC JUG WITH A HAZARDOUS WASTE LABEL; 
"NON-PHOTOCHEMICAL REACTIVE" WITH AN ACCUMULATION DATE; 12/26/05. - 1 
X 1 GAL. METAL CONTAINER WITH A HAZARDOUS WASTE LABEL; 
"NON-PHOTOCHEMICAL REACTIVE TONER" WITH AN ACCUMULATION DATE; 
07/27/2003. ALL THE WASTE ABOVE HAVE EXCEEDED THE ACCUMULATION TIME 
LIMIT OF 180-DAYS. ADDITIONALLY, THE WASTES ABOVE WERE OBSERVED TO BE 
PRESENT AT THE PRINTING SHOP DURING THE INSPECTION BACK IN 02/02/2016. 
THIS IS A REPEAT VIOLATION FROM 02/02/2016. WITHIN 30 DAYS DISPOSE OF 
THE HAZARDOUS WASTES LISTED ABOVE AND PROVIDE A COPY OF THE DISPOSAL 
RECEIPT TO MY OFFICE.

OAK GROVE SCHOOL DISTRICT (Continued)

Site Name: OAK GROVE SCHOOL DISTRICT
Violation Date: 09-17-2014
Citation: Un-Specified
Violation Description: UST Program - Design/Construction - For use of Local Ordinance only.
Violation Notes: Returned to compliance on 09/17/2015. DURING THIS TESTING THERE WAS NO ALARM HISTORY PROVIDED BY THE TECHNICIAN. THE TECHNICIAN INFORMED ME THAT THERE WAS A COLD-START THAT TOOK PLACE ABOUT TWO MONTHS AGO AFTER A POWER OUTAGE. TECHNICIAN CAME OUT TO RESTORE THE PROGRAM FROM THE MEMORY CHIP BUT THE ALARM HISTORY WAS LOST. A PERMIT WITH OUR DEPARTMENT WAS NOT OBTAINED FOR THIS COLD-START. SUBMIT A RETRO-ACTIVE PERMIT APPLICATION TO OUR DEPARTMENT FOR THE COLD-START THAT TOOK PLACE OUT AT THIS SITE AND PAY THE NECESSARY FEES IMMEDIATELY.

Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes: Returned to compliance on 06/07/2017. (PAINT SHOP) OBSERVED A PALLETS, ETC., THAT WERE BLOCKING IT. (PAINT SHOP) - UNABLE TO MANIPULATE THE WASTE COOLANT DRUM, I WAS UNABLE TO REACH IT DUE TO BOXES,

TC5725369.1s Page 718
OAK GROVE SCHOOL DISTRICT (Continued)  

S103668381

THESE PAINT CANS CAN BE RE-USED. ADDITIONALLY, IN THIS SAME AREA OBSERVED OTHER VARIOUS 1-GALLON CONTAINERS IN SIZE WITH Unknowns AS WELL AS A CABINET WITH VARIOUS CONTAINERS IN 1 GALLON IN SIZE AND 1-5 GALLON METAL CONTAINER WITH A FLAMMABLE LIQUID LABEL. MR. VALDEZ WAS UNSURE IF THESE WERE HAZARDOUS WASTE OR MATERIAL. LASTLY, THIS ROOM HAD MORE THAN 100 GALLONS IN 1-GALLON SIZE CONTAINERS STORED IN PALLETS ALL THROUGH OUT, IT WAS UNSURE AND MR. VALDEZ COULD NOT CONFIRM WHICH PAINT CANS WERE IN USE AND WHICH ONES WERE A HAZARDOUS WASTE. A BETTER SEPARATION NEEDS TO BE MADE IN THIS ROOM FOR THE LATEX PAINT CANS. DETERMINE WHICH PAINT CANS WILL BE RE-USED. FOR THOSE LATEX PAINT CANS NOT RE-USED, THESE MUST BE RECYCLED OR DISPOSED OF. [Truncated]

Violation Date: 05-11-2017
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2) By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 06/07/2017. (MAINTENANCE SHOP) - INSIDE THE SHOP, OBSERVED A 32 GALLON PLASTIC CONTAINER LABELED AS "AEROSOL CANS" WRITTEN WITH A BLACK SHARPIE. THE CONTAINERS HAD SEVERAL BRAKE CLEANER AEROSOL CANS THAT WERE NOT EMPTY. AFTER SPEAKING WITH EDUARDO (MECHANIC) THE PERSON IN CHARGE OF THESE CANS, HE EXPLAINED TO ME THAT BEFORE HE THROWS ANY AEROSOL CAN AWAY IN THE TRASH, HE FIRST MAKES SURE THAT IT IS EMPTY BY DEMONSTRATING TO ME HOW SPRAYED OUT IT IS. AT THE TIME IF NON-EMPTY USED AEROSOL CANS ARE BEING THROWN IN THE DUMPSTER BASED ON THE MECHANICS.
OAK GROVE SCHOOL DISTRICT (Continued)

EXPLANATION. ADDITIONALLY, IF AEROSOL CANS ARE BEING PUNCTURED THE
CONTENT INSIDE THE CAN MUST BE COLLECTED AND MANAGED AS HAZARDOUS
WASTE. PROVIDE TO OUR OFFICE IN WRITING THE PROCEDURE SET IN PLACE BY
OAK GROVE SCHOOL DISTRICT ON HOW NON-EMPTY USED AEROSOL CANS ARE BEING
PREVENTED FROM GETTING INTO THE LANDFILL.

Return to compliance on 07/06/2016. (GROUNDS EQUIPMENT STORAGE SHED) - OBSERVED 1 X 55 GAL METAL DRUM WITH LIQUID IN IT THAT THE METAL WAS DECAYING AND THERE WAS BUILD UP AROUND THE DRUM. THE DRUM WAS LOCATED NEXT TO A FORKLIFT. ACCESS TO THE THIS DRUM WAS DIFFICULT. ENSURE THAT THIS DRUM IS MANAGED ACCORDINGLY AND THAT THE AREA AROUND IT IS CLEANED UP AND ALL CLEANED UP MATERIAL IS MANAGED AS HAZARDOUS WASTE.

Return to compliance on 06/07/2017. UPDATE THE SITE MAP ON CERS TO INCLUDE ALL OF THE LOCATIONS WHERE HAZARDOUS MATERIALS/ HAZARDOUS WASTE ARE STORED TO INCLUDE LOCATIONS OF WHERE EMERGENCY CONTROL EQUIPMENT, INTERNAL ROADS, ADJACENT STREETS, ETC. THE MAP CURRENTLY AVAILABLE ON CERS IS THE PLOT PLAN FOR THE UST SYSTEM.

Return to compliance on 06/07/2017. UPDATE THE SITE MAP ON CERS TO INCLUDE ALL OF THE LOCATIONS WHERE HAZARDOUS MATERIALS/ HAZARDOUS WASTE ARE STORED TO INCLUDE LOCATIONS OF WHERE EMERGENCY CONTROL EQUIPMENT, INTERNAL ROADS, ADJACENT STREETS, ETC. THE MAP CURRENTLY AVAILABLE ON CERS IS THE PLOT PLAN FOR THE UST SYSTEM.

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Failure to submit, obtain approval, or maintain a complete/accurate response plan.

Failure to complete and electronically submit a site map with all required content.

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month.
OAK GROVE SCHOOL DISTRICT  (Continued) S103668381

if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/07/2017. (PAINT SHOP) - OBSERVED THE FOLLOWING HAZARDOUS WASTES: - 1 X 1 GAL. PLASTIC JUG WITH A HAZARDOUS WASTE LABEL; "NON-PHOTOCHEMICAL REACTIVE TONER" WITH AN ACCUMULATION DATE; 07/30/03. - 1 X 1 GAL. PLASTIC JUG WITH A HAZARDOUS WASTE LABEL; "NON-PHOTOCHEMICAL REACTIVE" WITH AN ACCUMULATION DATE; 12/28/05. - 1 X 1 GAL. METAL CONTAINER WITH A HAZARDOUS WASTE LABEL; "NON-PHOTOCHEMICAL REACTIVE TONER" WITH AN ACCUMULATION DATE; 07/27/2003. ALL THE WASTE ABOVE HAVE EXCEEDED THE ACCUMULATION TIME LIMIT OF 180-DAYS. ADDITIONALLY, THE WASTES ABOVE WERE OBSERVED TO BE PRESENT AT THE PRINTING SHOP DURING THE INSPECTION BACK IN 02/02/2016. THIS IS A REPEAT VIOLATION FROM 02/02/2016. WITHIN 30 DAYS DISPOSE OF THE HAZARDOUS WASTES LISTED ABOVE AND PROVIDE A COPY OF THE DISPOSAL RECEIPT TO MY OFFICE.

- **Violation Notes:** Returned to compliance on 06/07/2017. ELECTRICIAN SHOP: - OBSERVED BROKEN PIECES FROM A FLUORESCENT TUBE ON THE FLOOR. THIS WAS CLEANED UP BY FACILITY PERSONNEL DURING THIS INSPECTION. HOWEVER, AS STATED ON MY INSPECTION REPORT FROM 02/02/16 AND 06/02/16 IT IS UNDETERMINED AT THIS TIME IF THERE IS A PROCESS IN PLACE ON HOW THIS WILL BE PREVENTED FROM HAPPENING IN THE FUTURE. PROVIDE TO MY OFFICE IN WRITING A WRITTEN PROCEDURE ON HOW OAK GROVE SCHOOL DISTRICT WILL MINIMIZE THE
RELEASE OF HAZARDOUS WASTE FROM BROKEN FLUORESCENT TUBES.

Failure of the universal waste handler to transfer universal waste to the appropriate designation facility.

Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.

Failure to complete and electronically submit a site map with all required content.

Failure to include all of the location of where the hazardous materials and hazardous wastes are stored as well as emergency control equipment. The current maps found on CERS provide insufficient information and in some cases the information is faded and cannot be read.

Returned to compliance on 06/07/2017. THE SITE MAP CURRENTLY FOUND ON CERS NEEDS TO BE REVISED TO INCLUDE ALL OF THE LOCATION OF WHERE THE HAZARDOUS MATERIALS AND HAZARDOUS WASTES ARE STORED AS WELL AS EMERGENCY CONTROL EQUIPMENT. THE CURRENT MAPS FOUND ON CERS PROVIDE INSUFFICIENT INFORMATION AND IN SOME CASES THE INFORMATION IS FADED AND CANNOT BE READ.

Returned to compliance on 07/06/2016. (ELECTRICIAN SHOP) - OBSERVED BROKEN GLASS FROM A BROKEN FLUORESCENT TUBE OUTSIDE THE DOOR. OBSERVED BROKEN GLASS FROM A BROKEN FLUORESCENT TUBE INSIDE THE SHOP. ADDITIONALLY OBSERVED A BROKEN FLUORESCENT TUBE INSIDE A TRASH CAN INSIDE THE SHOP. CLEAN UP ALL BROKEN GLASS IMMEDIATELY AND MANAGE IT AS UNIVERSAL WASTE. LASTLY CEASE THE PRACTICE OF BREAKING FLUORESCENT TUBES OR THROWING THEM IN THE TRASH CAN. USED FLUORESCENT LAMPS MUST BE MANAGED AS UNIVERSAL WASTE. PROVIDE A WRITTEN EXPLANATION TO OUR OFFICE AS TO HOW THIS ISSUE WILL BE RESOLVED AND NOT AVOID FROM HAPPENING IN THE NEAR FUTURE.

Excavated and disposed offsite in June 1982. Approximately 3,400 cubic yards of contaminated soil was removed from the site. The site was listed on the National Priority List (NPL) by the United States Environmental Protection Agency (U.S. EPA). The Regional Water Quality Control Board (RWQCB) was named the lead agency.

Fairchild operated an electronics manufacturing plant from 1977 to 1983 at the 22-acre site. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and underground storage tanks. In 1981, leaks discovered in pipelines and underground tanks resulted in releases of 1,1,1 trichloroethane (TCA), xylene, isopropanol, acetone and freon to soil and groundwater. Not reported

The site was listed on the National Priority List (NPL) by the United States Environmental Protection Agency (U.S. EPA). The Regional Water Quality Control Board (RWQCB) was named the lead agency.

Not reported

Approximately 3,400 cubic yards of contaminated soil was excavated and disposed offsite in June 1982. A soil vapor
In 1981, soil and ground water contamination was discovered at the site. Site Activity Status:

Fairchild, the responsible party, has been conducting remedial activities under the direction of the RWQCB. DHS has budgeted $50,000 for development, review, and approval of a remedial action plan and for oversight/monitoring of cleanup efforts. The responsible party will pay all costs associated with remedial investigations and cleanup activities.

Hazardous Waste Desc: In 1981, Fairchild discovered that leaks in pipelines and underground tanks had resulted in the release of trichloroethane (TCA), xylene, isopropanol, acetone and Freon to soil and ground water.

Threat To Public Health & Env: The contaminants which have migrated from the site into the ground water represent a threat to the public health and environment. Five municipal and 22 private wells exist within a one-mile radius of the site. One public water well (Great Oaks Water Company No. 13) was contaminated and has been removed from service. Three irrigation wells have also been contaminated and taken out of service.

Site Description: Fairchild operated an electronics manufacturing plant at this 20-acre site from 1977 to 1983. Chemical used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and underground storage tanks. The site is located adjacent to agricultural, residential and commercial development.

Owner/Op start date: 10/01/1990
Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Universal Waste Summary:
- Waste type: Lamps
  Accumulated waste on-site: Yes
  Generated waste on-site: Not reported
- Waste type: Batteries
  Accumulated waste on-site: Yes
  Generated waste on-site: Not reported
- Waste type: E
  Accumulated waste on-site: Yes
  Generated waste on-site: No

. Waste name: CRESOL
. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE
. Waste code: D028
. Waste name: 1,2-DICHLOROETHANE
. Waste code: D029
. Waste name: 1,1-DICHLOROETHYLENE
. Waste code: D035
. Waste name: METHYL ETHYL KETONE
. Waste code: D038
. Waste name: PYRIDINE
. Waste code: D039
. Waste name: TETRACHLOROETHYLENE
. Waste code: D040
. Waste name: TRICHLOROETHYLENE
. Waste code: D042
. Waste name: 2,4,6-TRICHLOROPHENOL
. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
IBM CORP. (SAN JOSE PLANT) (Continued) 1000109345

- Waste code: F005
- Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

- Waste code: F006
- Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

- Waste code: P030
- Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

- Waste code: P113
- Waste name: THALLIC OXIDE (OR) THALLIUM OXIDE TL2O3

- Waste code: P120
- Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

- Waste code: U002
- Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

- Waste code: U003
- Waste name: ACETONITRILE (I,T)

- Waste code: U031
- Waste name: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

- Waste code: U035
- Waste name: BENZENE, BUTANOC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

- Waste code: U037
- Waste name: BENZENE, CHLORO- (OR) CHLOROBENZENE

- Waste code: U044
- Waste name: CHLOROFORM (OR) METHANE, TRICHLORO-

- Waste code: U080
- Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

- Waste code: U112
- Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

- Waste code: U123
- Waste name: FORMIC ACID (C,T)

- Waste code: U134

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

IBM CORP. (SAN JOSE PLANT) (Continued)

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 122437
Site Name: HGST SUBSTATION
Violation Date: 06-05-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22,
IBM CORPORATION, GRS (Continued)

Violation Description: Chapter 12, Section(s) 66262.34(f)
Failure to properly label hazardous waste accumulation containers with
the following requirements: "Hazardous Waste", name and address of the
generator, physical and chemical characteristics of the Hazardous
Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 06/05/2014. Label on 5 gallon container
oil/diesel waste was marked with properties during inspection. NO
CORRECTIVE ACTION REQUIRED.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 122437
Site Name: HGST SUBSTATION
Violation Date: 06-05-2014
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95,
Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 07/01/2014. The HMBP submitted is incomplete
in that the inventory is not reflective of chemicals stored at the
site. The following chemical was noted being stored, but not reported:
80 gallons diesel fuel in mobile compressor belly tank, waste water in
tank T101, oils contained within transformers and other oil filled
equipment.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-31-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Building is part of contiguous facility HGST CAR00012879. This
location consists of a substation and may generate oil/diesel
contaminated debris waste stream. No hazardous waste observed at time
of inspection. NOTE: Facility does not have a permit to generate
hazardous waste as County billing system had an incorrect entry for
last billed date resulting in invoices not being sent to facility.
Problem has been resolved by the County and an invoice has been
generated. Once invoice is paid, a permit will be sent to facility.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-05-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: SUBSTATION Facility submitted HMBP via CERS 2/28/2014. CERS ID
10353991. Emergency and training plans submitted were reviewed
Training for HGST and CH2M Hill personnel was reviewed. Substation is
used as the ?home location? for a mobile compressor that is on a
trailer and can/is deployed throughout the facility as needed. In
accordance with Santa Clara County guidance, this location should be
considered the point at which any reportable chemical inventory is
housed. Provided guidance during inspection. Many transformers have
IBM CORPORATION, GRS (Continued) S109936442

nitrigenous blankets to reduce oxidation upon volume fluctuations with heating/contraction of transformer oils. No central nitrogen feeds, each piece has own nitrogen reservoir which is maintained/refilled from cylinders onsite as needed.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-31-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility last made a complete submission on CERS on 2-26-2017. Documented training was reviewed during prior inspection on 1-31-2017. Facility operator also owns property. The following reportable hazardous materials observed on-site include but are not limited to: Nickel Cadmium liquid filled batteries Diesel Fuel NOTE: Facility does not have a hazardous materials business plan permit as County billing system had an incorrect entry for last billed date resulting in invoices not being sent to facility. Problem has been resolved by the County and an invoice has been generated. Once invoice is paid, a permit will be sent to facility.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-05-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Building is part of contiguous facility: HGST, CAR000128793 Location generates small quantities of oily materials contaminated with water and diesel. Wastes managed as hazardous waste. Rainwater collected and manged as contaminated waste in RCRA permitted tank/unit.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW

**IBM CORPORATION, GRS (Continued)**

| Violation Notes: | Returned to compliance on 06/05/2014. Label on 5 gallon container oil/diesel waste was marked with properties during inspection. NO CORRECTIVE ACTION REQUIRED. |
| Violation Division: | Santa Clara County Environmental Health |
| Violation Program: | HW |
| Violation Source: | CERS |

**Evaluation:**

| Eval General Type: | Compliance Evaluation Inspection |
| Eval Date: | 05-31-2017 |
| Violations Found: | No |
| Eval Type: | Routine done by local agency |
| Eval Notes: | Building is part of contiguous facility HGST CAR00012879. This location consists of a substation and may generate oil/diesel contaminated debris waste stream. No hazardous waste observed at time of inspection. NOTE: Facility does not have a permit to generate hazardous waste as County billing system had an incorrect entry for last billed date resulting in invoices not being sent to facility. Problem has been resolved by the County and an invoice has been generated. Once invoice is paid, a permit will be sent to facility. |
| Eval Division: | Santa Clara County Environmental Health |
| Eval Program: | HW |
| Eval Source: | CERS |

| Eval General Type: | Compliance Evaluation Inspection |
| Eval Date: | 06-05-2014 |
| Violations Found: | Yes |
| Eval Type: | Routine done by local agency |
| Eval Notes: | SUBSTATION Facility submitted HMBP via CERS 2/28/2014. CERS ID 10353991. Emergency and training plans submitted were reviewed. Training for HGST and CH2M Hill personnel was reviewed. Substation is used as the "home location" for a mobile compressor that is on a trailer and can/is deployed throughout the facility as needed. In accordance with Santa Clara County guidance, this location should be considered the point at which any reportable chemical inventory is housed. Provided guidance during inspection. Many transformers have nitrogen blankets to reduce oxidation upon volume fluctuations with heating/contraction of transformer oils. No central nitrogen feeds, each piece has own nitrogen reservoir which is maintained/refilled from cylinders onsite as needed. |
| Eval Division: | Santa Clara County Environmental Health |

Eval Program: HMRRP
Eval Source: CERS
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-31-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility last made a complete submission on CERS on 2-26-2017. Documented training was reviewed during prior inspection on 1-31-2017. Facility operator also owns property. The following reportable hazardous materials observed on-site include but are not limited to: Nickel Cadmium liquid filled batteries Diesel Fuel NOTE: Facility does not have a hazardous materials business plan permit as County billing system had an incorrect entry for last billed date resulting in invoices not being sent to facility. Problem has been resolved by the County and an invoice has been generated. Once invoice is paid, a permit will be sent to facility.

Hazardous Waste Summary:

- Waste code: 121
  Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

- Waste code: 122
  Waste name: Alkaline solution without metals (pH > 12.5)

- Waste code: 123
  Waste name: Unspecified alkaline solution

- Waste code: 132
  Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

- Waste code: 133
  Waste name: Aqueous solution with 10% or more total organic residues

- Waste code: 134
  Waste name: Aqueous solution with <10% total organic residues

- Waste code: 135
  Waste name: Unspecified aqueous solution

- Waste code: 141
  Waste name: Off-specification, aged, or surplus inorganics

- Waste code: 151
  Waste name: Asbestos-containing waste

- Waste code: 171
  Waste name: Metal sludge (see 121)

- Waste code: 181
  Waste name: Other inorganic solid waste

- Waste code: 211
  Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

<tbody>
<tr>
<td>D001</td>
<td>IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.</td>
<td>81973</td>
</tr>
<tr>
<td>D002</td>
<td>A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.</td>
<td>29388</td>
</tr>
<tr>
<td>D003</td>
<td>A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.</td>

Contact country: US
Contact telephone: 408-717-6196
Contact email: DENISE.LLOYD@WDC.COM
EPA Region: 09
Land type: Private
Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

**Hazardous Waste Summary:**

- **Waste code:** 121
  - **Waste name:** Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

- **Waste code:** 122
  - **Waste name:** Alkaline solution without metals (pH > 12.5)

- **Waste code:** 123
  - **Waste name:** Unspecified alkaline solution
HGST INC (Continued)

Biennial Reports:

- **Last Biennial Reporting Year:** 2017
- **Annual Waste Handled:**
  - **Waste code:** D001
  - **Waste name:** IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
  - **Amount (Lbs):** 81973

- **Waste code:** D002
  - **Waste name:** A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
  - **Amount (Lbs):** 29388

- **Waste code:** D003
  - **Waste name:** A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES
### HGST INC (Continued)

WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: REDEVELOPMENT PROPERTY
Completed Document Type: Remedy Selection and Statement of Basis
Completed Date: 12/20/2006
Comments: DTSC approved the Corrective Measures Study (CMS) Report and approved
the remedy for soil contamination in the Redevelopment Property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/01/2000
Comments: Not reported

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Corrective Action Completion Determination
Completed Date: 10/17/2016
Comments: Acknowledgment of Termination and Satisfaction for Corrective Action
Consent Agreement was fully executed.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 04/18/2014
Comments: Soil Inspection/Sampling Plan that identifies procedures for soil and
soil gas sampling in areas needing additional investigation in the vicinity of Building 40 on Parcel A and on all of Parcel D (Buildings
013, 014 and 015) was approved.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 08/14/2014
Comments: This report documents the current environmental conditions of the
subsurface beneath and within the vicinity of Buildings 005 and 100
located on Parcel E and Parcel F of the HGST Revitalization Project
Area

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 08/14/2014
Comments: Soil Inspection/Sampling Plan that identifies procedures for soil and
soil gas sampling in areas needing additional investigation in the vicinity of Buildings 005 and 100 located on Parcel E and Parcel F of

TC5725369.1s Page 908
the HGST Revitalization Project Area was approved.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/13/2015
Comments: The Soil Inspection and Sampling Report for Building 100 Located on Parcel F presents the results of sampling performed at Building 100. Considering the prior history in the area of Building 100 and the results of soil and soil gas sampling that were performed, no evidence of a release from Building 100 was found. Based on these findings, DTSC determined that no further investigation/remediation is required for Parcel F.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 01/22/2016
Comments: The Soil Inspection and Sampling Report for Parcel D and Building 040 is one of two reports that present the results of sampling performed in the Revitalization Project Area where HGST is demolishing several buildings and associated infrastructure, realigning and upgrading transportation routes and constructing new commercial/industrial buildings. The other report that was prepared addressed Building 100 on Parcel F. Considering the prior history in the area of Buildings 013, 015 (located on Parcel D) and Building 040 and the results of soil and soil gas sampling conducted as part of the Site Inspection/Sampling Plan, no evidence of any releases from Buildings 013, 015, and 040 was identified. Based on these findings, DTSC determined no further investigation/remediation is required for Parcel D and Building 040 in Parcel A.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: CHLOROFORM RELEASE AREA
Completed Document Type: Corrective Measure Implementation Workplan
Completed Date: 03/07/2008
Comments: The Operation, Maintenance, and Monitoring Plan for 2-Phase Extraction System for the Chloroform Release Area was approved by DTSC on 3/07/08 and provides guidance and procedures for start-up, shutdown, service and monitoring of the 2-Phase extraction system.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: REDEVELOPMENT PROPERTY
Completed Document Type: Corrective Measures Study Report
Completed Date: 12/30/2006
Comments: The Corrective Measures Study Report for the Redevelopment Property was approved on 12/20/07.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/29/2014
Comments: 1/4 miles radius mailing list and other interested party mailing list. In addition to these lists, DTSC Berkeley mandatory mailing list and statewide list should also be used.

<td>Extensive soil, soil gas and groundwater investigations were conducted a portion of the site that is planned to be rezoned, sold, and redeveloped into a mixed residential, commercial, and recreational open space area. The area to be redeveloped is divided into five Parcels (Parcel O-1 through O-5), which is referred to as the Redevelopment Property. The purpose of the Final Remedy Completion Report was to characterize the current condition of the Redevelopment Property in order to ensure that the property is appropriately characterized and remediated prior to removal from the RCRA Permit. In regards to Site-wide groundwater on the Redevelopment Property, IBM, the previous owner/operator, will continue remediation under the oversight of the Regional Water Quality Control Board, San Francisco Bay Region. Remediation of chloroform in the Building 028J Area on Parcel O-4 is remediated under the Chloroform Release Area. All remaining areas on the Redevelopment Property have been determined to meet residential standards.</td>

2020 COR ACTION:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

**Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Date of Government Version: 04/11/2019 | Source: EPA |
| Date Data Arrived at EDR: 04/18/2019 | Telephone: N/A |
| Date Made Active in Reports: 05/14/2019 | Last EDR Contact: 07/02/2019 |
| Number of Days to Update: 26 | Next Scheduled EDR Contact: 10/14/2019 |
| Data Release Frequency: Quarterly |

**NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
**Federal Delisted NPL site list**

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**SEMS: Superfund Enterprise Management System**

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

</thead>
</table>

**Federal CERCLIS NFRAP site list**

SEMS-ARCHIVE: Superfund Enterprise Management System Archive
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

**Federal RCRA CORRACTS facilities list**

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

**Federal RCRA non-CORRACTS TSD facilities list**

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

**Federal RCRA generators list**

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### Additional Environmental Records

#### Local Brownfields lists

**US BROWNFIELDS: A Listing of Brownfields Sites**
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

TOXIC PITS: Toxic Pits Cleanup Act Sites
Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.
US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019

| Date Data Arrived at EDR: 09/12/2018 | Telephone: 415-252-3896 |
| Date Made Active in Reports: 10/11/2018 | Last EDR Contact: 05/02/2019 |
| Number of Days to Update: 29 | Next Scheduled EDR Contact: 08/19/2019 |
| Data Release Frequency: Varies |

### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

| Date of Government Version: 10/31/1994 | Source: California Environmental Protection Agency |
| Date Data Arrived at EDR: 09/05/1995 | Telephone: 916-341-5851 |
| Date Made Active in Reports: 09/29/1995 | Last EDR Contact: 12/28/1998 |
| Number of Days to Update: 24 | Next Scheduled EDR Contact: N/A |
| Data Release Frequency: No Update Planned |

### CERS TANKS: California Environmental Reporting System (CERS) Tanks

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

| Date of Government Version: 04/09/2019 | Source: California Environmental Protection Agency |
| Date Data Arrived at EDR: 04/11/2019 | Telephone: 916-323-2514 |
| Date Made Active in Reports: 05/08/2019 | Last EDR Contact: 04/11/2019 |
| Number of Days to Update: 27 | Next Scheduled EDR Contact: 08/05/2019 |
| Data Release Frequency: Quarterly |

### Local Land Records

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

| Date of Government Version: 02/28/2019 | Source: Department of Toxic Substances Control |
| Date Data Arrived at EDR: 03/01/2019 | Telephone: 916-323-3400 |
| Date Made Active in Reports: 04/02/2019 | Last EDR Contact: 06/03/2019 |
| Number of Days to Update: 32 | Next Scheduled EDR Contact: 09/16/2019 |
| Data Release Frequency: Varies |

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

| Date of Government Version: 04/11/2019 | Source: Environmental Protection Agency |
| Date Data Arrived at EDR: 04/18/2019 | Telephone: 202-564-6023 |
| Date Made Active in Reports: 05/23/2019 | Last EDR Contact: 07/02/2019 |
| Number of Days to Update: 35 | Next Scheduled EDR Contact: 10/14/2019 |
| Data Release Frequency: Semi-Annually |

### DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/04/2019  
Date Data Arrived at EDR: 03/05/2019  
Date Made Active in Reports: 04/01/2019  
Number of Days to Update: 27  
Next Scheduled EDR Contact: 09/16/2019  
Data Release Frequency: Semi-Annually

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/25/2019  
Date Data Arrived at EDR: 03/26/2019  
Date Made Active in Reports: 05/14/2019  
Number of Days to Update: 49  
Next Scheduled EDR Contact: 10/07/2019  
Data Release Frequency: Quarterly

CHMIRS: California Hazardous Material Incident Report System
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 10/24/2018  
Date Data Arrived at EDR: 01/24/2019  
Date Made Active in Reports: 03/05/2019  
Number of Days to Update: 40  
Next Scheduled EDR Contact: 08/05/2019  
Data Release Frequency: Semi-Annually

LDS: Land Disposal Sites Listing (GEOTRACKER)
Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018  
Date Data Arrived at EDR: 12/11/2018  
Date Made Active in Reports: 01/15/2019  
Number of Days to Update: 35  
Next Scheduled EDR Contact: 09/23/2019  
Data Release Frequency: Quarterly

MCS: Military Cleanup Sites Listing (GEOTRACKER)
Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.
US FIN ASSUR: Financial Assurance Information
All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.
SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.
PRP: Potentially Responsible Parties
A listing of verified Potentially Responsible Parties
Date of Government Version: 04/11/2019
Date Data Arrived at EDR: 04/18/2019
Date Made Active in Reports: 05/23/2019

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The
information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA
(Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions
are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters
with updated records, it was decided to create a HIST FTTS database. It included records that may not be included
in the newer FTTS database updates. This database is no longer updated.
- Date of Government Version: 10/19/2006
- Source: Environmental Protection Agency
- Telephone: 202-564-2501
- Last EDR Contact: 12/17/2007
- Next Scheduled EDR Contact: 03/17/2008
- Data Release Frequency: No Update Planned

HIST FTTS INSPI: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA
regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation
of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some
EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing
EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that
may not be included in the newer FTTS database updates. This database is no longer updated.

| | Data Release Frequency: Varies |

**UMTRA: Uranium Mill Tailings Sites**
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.
LEAD SMELTER 1: Lead Smelter Sites
A listing of former lead smelter site locations.

LEAD SMELTER 2: Lead Smelter Sites
A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931 and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US AIRS MINOR: Air Facility System Data
A listing of minor source facilities.

US MINES: Mines Master Index File
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

US MINES 2: Ferrous and Nonferrous Metal Mines Database Listing
This map layer includes ferrous (ferrous metal mines are facilities that extract ferrous metals, such as iron ore or molybdenum) and nonferrous (Nonferrous metal mines are facilities that extract nonferrous metals, such as gold, silver, copper, zinc, and lead) metal mines in the United States.
### US MINES 3: Active Mines & Mineral Plants Database Listing
Active Mines and Mineral Processing Plant operations for commodities monitored by the Minerals Information Team of the USGS.

| Date of Government Version: 04/14/2011 | Source: USGS |
| Date Data Arrived at EDR: 06/08/2011 | Telephone: 703-648-7709 |
| Date Made Active in Reports: 09/13/2011 | Last EDR Contact: 05/31/2019 |
| Number of Days to Update: 97 | Next Scheduled EDR Contact: 09/09/2019 |
| Data Release Frequency: Varies |

### ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

| Date of Government Version: 03/27/2019 | Source: Department of Interior |

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.
### CIWQS: California Integrated Water Quality System

The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials.

### SAMPLING POINT: Sampling Point ? Public Sites (GEOTRACKER)

Sampling point - public sites
WELL STIM PROJ: Well Stimulation Project (GEOTRACKER)
Includes areas of groundwater monitoring plans, a depiction of the monitoring network, and the facilities, boundaries, and subsurface characteristics of the oilfield and the features (oil and gas wells, produced water ponds, UIC wells, water supply wells, etc?) being monitored.

EDR HIGH RISK HISTORICAL RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
## EDR Recovered Government Archives

**Exclusive Recovered Govt. Archives**

**RGA LF:** Recovered Government Archive Solid Waste Facilities List  
The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health.

Date of Government Version: 04/30/2012
Date Data Arrived at EDR: 04/17/2019

CUPA SAN BENITO: CUPA Facility List

SAN BERNARDINO COUNTY:
PERMITS SAN BERNARDINO: Hazardous Material Permits
This listing includes underground storage tanks, medical waste handlers/generators, hazardous materials handlers, hazardous waste generators, and waste oil generators/handlers.

SAN DIEGO COUNTY:
HMMD SAN DIEGO: Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)
GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LF SAN DIEGO: Solid Waste Facilities
San Diego County Solid Waste Facilities.
Date of Government Version: 04/18/2018
Date Data Arrived at EDR: 04/24/2018
Date Made Active in Reports: 06/19/2018

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be
complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the
area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily
mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through
transporters to a tsd facility.

Date of Government Version: 02/11/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.
AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE**

**HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

*Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

**AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA
Soil Surface Texture: clay loam
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class: Not reported
Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: MODERATE
Depth to Bedrock Min: > 60 inches
Depth to Bedrock Max: > 60 inches
OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:  No Other Soil Types
Surficial Soil Types:  No Other Soil Types
Shallow Soil Types:  No Other Soil Types
Deeper Soil Types:  No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.
EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

May 20, 2019
The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

**Certified Sanborn Results:**

Certification #: 9D1E-4BED-A767  
PO #: 118-109-1  
Project: 6321 and 6325 San Ignacio Ave

**UNMAPPED PROPERTY**

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

**Limited Permission To Make Copies**

Cornerstone Earth Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR’s copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION
Environmental Data Resources, Inc.’s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES
EDR’s Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY
The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
