Phase I Environmental Site Assessment Report – Andy's Pet Shop

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Andy's Pet Shop

51 Notre Dame Avenue and
North Almaden Boulevard
San Jose, California 95113

Report Date: September 10, 2019
Partner Project No. 19-257342.1

Prepared for:

Acquity Realty, Inc.

333 West Santa Clara Street, Suite 810
San Jose, California 95113

September 10, 2019

Dennis Randall
Acquity Realty, Inc.
333 West Santa Clara Street, Suite 810
San Jose, California 95113

Subject: Phase I Environmental Site Assessment
Andy's Pet Shop
51 Notre Dame Avenue and North Almaden Boulevard
San Jose, California 95113
Partner Project No. 19-257342.1

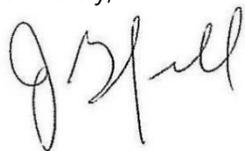

Dear Dennis Randall:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (415) 992-3755.

Sincerely,

Jay Grenfell
Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Acquity Realty, Inc. for the property located at 51 Notre Dame Avenue in San Jose, Santa Clara County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Acquity Realty, Inc. with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southwest side of Notre Dame Avenue, northwest side of Carlisle Street and the northeast side of Almaden Boulevard within a mixed commercial/residential area of the City of San Jose. Please refer to the table below for further description of the subject property:

Subject Property Data

| | |
|--|---|
| Address: | 51 Notre Dame Avenue, San Jose, California |
| Additional Addresses: | 65 Notre Dame Avenue |
| Historical Addresses: | 59 Notre Dame Avenue |
| Property Use: | Retail |
| Land Acreage: | 0.52 Acres |
| Number of Buildings: | One |
| Number of Floors: | One |
| Gross Building Area: | 6,660 Square Feet |
| Date of Construction: | 1937 |
| Assessor's Parcel Number (APN): | 259-35-027 (Parcel A); 259-35-032 (Parcel B); 259-35-033 (Parcel C) |
| Type of Construction: | Wood-Framed |
| Current Tenants: | Andy's Pet Shop |
| Site Assessment Performed By: | Christopher Olsen of Partner |
| Site Assessment Conducted On: | September 4, 2019 |

The subject property is currently occupied by Andy's Pet Shop for retail use. Onsite operations consist of typical pet care operations, retail activities, and building maintenance. The subject property consists of a one-story building located on the east side of the property. In addition to the current structure, the subject property is also improved with an asphalt-paved parking lot located on the northwest side of the subject property.

According to available historical sources, the subject property was formerly undeveloped as early as 1884; developed with a children's playground between 1899 and circa 1891; developed with gardens associated with the Convent of the Sacred Heart Boarding School to the northeast between 1891 and 1915; and developed with the current one-story commercial building in 1937. Tenants of the subject property have included Scilla W J Grocery (Mid 1940s); Lesser Moses Meats, Notre Dame Market (early 1950s); Notre Dame Cleaners 1955 –1960); Bob's Auto Driving School (early 1950s – mid 1960s); The Country Store, Esparza

Meat Market (late 1950s – early 1960s); International Business Machines (1964 – late 1960s); Vacant (early 1970s); Hope for Retarded Children and Adults (mid 1970s); Fireside Friendship Center (Early 1980s); Salvation Army Christmas Center (mid 1980s); Value Business Products (mid 1990s – early 2000s); Discount Office Supply (early 2000s); and Andy’s Pet Shop (2010-Present).

The immediately surrounding properties consist of a high-rise residential apartment building occupied by Centerra Apartments (77 North Almaden Avenue) to the northeast across Notre Dame Avenue; a high-rise apartment building (38 Almaden Boulevard) to the southeast across Carlisle Street; an asphalt-paved parking lot beyond which is a one-story vacant commercial building (unmarked) and a one-story commercial building occupied by Dark Horse Gym (96 Almaden Boulevard) to the northwest; and a municipal dog park to the southwest.

According to a previous subsurface investigation conducted on a nearby property (211 West Santa Clara Street and GeoTracker Case # T0608502045), the depth to groundwater in the vicinity of the subject property is inferred to be approximately 65 feet below ground surface (bgs) and flows towards the northwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on a review of historical records, a dry-cleaning facility operating under the name Notre Dame Cleaners was located on the subject property at 65 Notre Dame Avenue (APN 259-35-032) from at least 1955 to 1960. Based on a city directory review, the subject property address of 65 Notre Dame was also occupied by a driving school during this timeframe. No city directories were available prior to 1955; however, a 1950 Sanborn map depicted the space as being occupied by a grocery warehouse and isn’t subdivided into separate units, as was later depicted in the 1969 Sanborn map. Therefore, based on the information available, it appears the former dry cleaning tenant occupied the subject property for a relatively limited duration. Furthermore, no documentation was available during this assessment to confirm whether on-site dry cleaning was conducted. However, the dry cleaner operated prior to a time of common environmental regulatory oversight. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry-cleaning process. These solvents, even when properly stored and disposed, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility, the presence of a dry-cleaning facility on the subject property represents evidence of a *recognized environmental condition*.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable

regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on site. The EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.
- Due to the age of the subject property building, there is a potential that lead-based paint (LBP) is present. Partner understands that demolition activities of the subject property building are planned. Partner recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible lead-based paint hazards. Stringent local and State regulations may apply to lead-based paint in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 51 Notre Dame Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and/or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted in association with planned development in an effort to determine the presence or absence of subsurface impacts due to the historical use of the subject property.
- Compliance with applicable regulations pertaining to suspect ACMs and LBP prior to any demolition or renovation activities that may disturb suspect materials or painted surfaces.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 51 Notre Dame Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent

activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Acquity Realty, Inc. engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Acquity Realty, Inc. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated

as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire was not provided at the time of the assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 51 Notre Dame Avenue in San Jose, California is located on the southwest side of Notre Dame Avenue, northwest side of Carlysle Street and the northeast side of Almaden Boulevard. According to the Santa Clara County Assessor, the subject property is described as Assessor's Parcel Numbers (APNs): 259-35-027, 259-35-032, and 259-35-033, and ownership is currently vested in Joseph Rubino since January 2009.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Andy's Pet Shop for retail use. Onsite operations consist of typical pet care operations, retail activities, and building maintenance. The subject property consists of a one-story building located on the east side of the property. In addition to the current structure, the subject property is also improved with an asphalt-paved parking lot located on the northwest side of the subject property.

The subject property is designated downtown primary commercial district (DC) by the City of San Jose.

The subject property was identified as an EDR Historic Cleaners (EDR Hist Cleaners) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial/ residential area of the city of San Jose. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

- Northeast:** Norte Dame Avenue beyond which is a high-rise residential apartment building occupied by Centerra Apartments (77 North Almaden Avenue)
- Southeast:** Carlysle Street beyond which is a high-rise apartment building (38 Almaden Boulevard)
- Northwest:** Asphalt-paved parking lot beyond which is a one-story vacant commercial building (unmarked) and a one-story commercial building occupied by Dark Horse Gym (96 Almaden Boulevard)
- Southwest:** Dog park (no numerical address)

Several adjacent properties were identified in the regulatory database report, as discussed in Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *San Jose West, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 95 feet above mean sea level (MSL). The contour lines in the

area of the subject property indicate the area is sloping gently toward the west. The subject property is depicted on the 2015 map within an area with no site-specific details.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to a previous subsurface investigation conducted on a nearby property (211 West Santa Clara Street and GeoTracker Case # T0608502045), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 65 feet below ground surface (bgs) and flow towards the northwest.

The nearest surface water in the vicinity of the subject property is the Guadalupe River located approximately 900 feet west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the San Jose Water Company serves the subject property vicinity. According to a representative of the subject property, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of San Jose are surface water from Sacramento-San Joaquin Delta purchased from the Santa Clara Valley Water District.

2.4.3 Geology/Soils

The subject property is situated within the Coast Range physiographic province of the State of California. The Coast Ranges, extend approximately 600 miles from the Oregon Border to the Santa Ynez River near Santa Barbara, are characterized by elongated ranges and narrow valleys that are approximately parallel to the coast. Structural features, including faults and synclinal folds, largely control topography in the province and reflect both previous and existing regional tectonic regimes.

The Coast Ranges are northwest-trending mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level), and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. Strata dip beneath alluvium of the Great Valley. To the west is the Pacific Ocean. The coastline is uplifted, terraced and wave-cut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The Coast Ranges are subparallel to the active San Andreas Fault. The San Andreas is more than 600 miles long, extending from Pt. Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to the north of the Farallon Islands.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Bernard clay loam. The Bernard series consists of very deep, somewhat poorly drained, very slowly permeable soils that formed in thick clayey sediments on

marine terraces of Pleistocene age. These soils are on broad Coastal Prairies. Slopes range from 0 to 1 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06085C0234H, dated May 18, 2017, the subject property appears to be located in a shaded Zone X region, defined as an area of 0.2% annual chance flood, areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile, and areas protected by levees from 1% annual chance flood.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

| Historical Use Information | | |
|-----------------------------------|--|--|
| Period/Date | Source | Description/Use |
| 1884-1899 | Aerial Photographs, Interviews, Topographic Maps | Undeveloped/Native land |
| 1891 | Sanborn Maps | Children's Playground |
| 1915 | Sanborn Maps | Gardens (associated with Covenant of the Sacred Heart Boarding School) |
| 1937-Present | Sanborn Maps, Aerials Photographs, City Directories, Building Records, Interviews, Onsite Observations | Developed with current one-story commercial building |

Tenants on the subject property have included Scilla W J Grocery (Mid 1940s); Lesser Moses Meats, Notre Dame Market (early 1950s); Notre Dame Cleaners (at least 1955 –1960); Bob's Auto Driving School (early 1950s – mid 1960s); The Country Store, Esparza Meat Market (late 1950s – early 1960s); International Business Machines (1964 – late 1960s); Vacant (early 1970s); Hope for Retarded Children and Adults (mid 1970s); Fireside Friendship Center (Early 1980s); Salvation Army Christmas Center (mid 1980s); Value Business Products (mid 1990s – early 2000s); Discount Office Supply (early 2000s); and Andy's Pet Shop (2010-Present). Potential environmental concerns were identified in association with the former use of the subject property, as further discussed in Section 7.0 Findings and Conclusions.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on August 27, 2019. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

| Date: | 1939 | Scale: | 1"=500' |
|--------------------------|--|---------------|----------------|
| Subject Property: | The northeast side of the subject property appears to be developed with the current commercial building (as noted during the site reconnaissance). The remainder of the subject property appears to be undeveloped | | |
| Northeast: | Appears to be developed with a building (most likely commercial) across Notre Dame Avenue | | |
| Southeast: | Appears to be developed with a parking lot and undeveloped land across Carlisle Street | | |
| Northwest: | Appears to be undeveloped land | | |
| Southwest: | Vacant lot | | |
| Date: | 1948 | Scale: | 1"=500' |
| Subject Property: | No significant changes visible | | |
| Northeast: | No significant changes visible | | |
| Southeast: | Appears to be developed with a building (most likely commercial) across Carlisle Street | | |

Date: 1948 **Scale:** 1"=500'
Northwest: No significant changes visible
Southwest: No significant changes visible

Date: 1950 **Scale:** 1"=500'
Subject Property: No significant changes visible
Northeast: No significant changes visible
Southeast: No significant changes visible
Northwest: Appears to be undeveloped land beyond which is a building (most likely commercial)
Southwest: No significant changes visible

Date: 1956 **Scale:** 1"=500'
Subject Property: The northeast side of the subject property appears to be developed with the current commercial building (as noted during the site reconnaissance). The west side of the subject property appears to be developed with an asphalt-paved parking lot.
Northeast: No significant changes visible
Southeast: No significant changes visible
Northwest: Appears to be developed with a building (most likely commercial) with an associated asphalt-paved parking lot
Southwest: No significant changes visible

Date: 1963 **Scale:** 1"=500'
Subject Property: The northeast side of the subject property appears to be developed with the current commercial building (as noted during the site reconnaissance). The west side of the subject property appears to be developed with an asphalt-paved parking lot.
Northeast: No significant changes visible
Southeast: No significant changes visible
Northwest: Appears to be developed with a building (most likely commercial) with an associated asphalt-paved parking lot
Southwest: Developed with an L-shaped commercial-type building

Date: 1968 **Scale:** 1"=500'
Subject Property: No significant changes visible
Northeast: Appears to be developed with an asphalt-paved parking lot and a small building (most likely commercial) across Santa Teresa Boulevard
Southeast: No significant changes visible
Northwest: No significant changes visible
Southwest: No significant changes visible

Date: 1974 **Scale:** 1"=500'
Subject Property: No significant changes visible
Northeast: No significant changes visible
Southeast: No significant changes visible
Northwest: No significant changes visible
Southwest: No significant changes visible

| Northeast: | No significant changes visible | | |
| Southeast: | Appears to be developed with the current high-rise residential apartment building across Carlysle Street | | |
| Northwest: | No significant changes visible | | |
| Southwest: | No significant changes visible | | |

| | | | |
|--------------------------|---|---------------|----------------|
| Date: | 2010, 2012 | Scale: | 1"=500' |
| Subject Property: | No significant changes visible | | |
| Northeast: | No significant changes visible | | |
| Southeast: | No significant changes visible | | |
| Northwest: | Appears to be developed with an asphalt-paved parking lot beyond which are two buildings (most likely commercial) | | |
| Southwest: | No significant changes visible | | |

Date: 2016 **Scale:** 1"=500'

Subject Property: No significant changes visible
Northeast: The area northeast of a road appears to be redeveloped with the existing apartment building.
Southeast: No significant changes visible
Northwest: No significant changes visible
Southwest: No significant changes visible

Copies of the aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on August 27, 2019. The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date: 1884

Subject Property: The subject property is depicted as undeveloped land
Northeast: Undeveloped
Southeast: Developed with several buildings and structures labeled "Covenant of the Sacred Heart," which appears to be a boarding school and church
Northwest: Undeveloped
Southwest: Undeveloped land

Date: 1891

Subject Property: The subject property is depicted as parcel of land labeled "Children's Play Ground"
Northeast: No significant changes depicted
Southeast: No significant changes depicted
Northwest: No significant changes depicted
Southwest: Depicted as a parcel of land labeled "Children's Play Ground"

Date: 1915

Subject Property: The subject property is depicted as a parcel of land labeled "Gardens" most likely associated with the Convent of Notre Dame boarding school to the east
Northeast: Developed with two structures labeled "Green House"
Southeast: No significant changes depicted. However, a small associated building on the south portion of the site appears to have been developed and is labeled "Steam Laundry."
Northwest: No significant changes depicted
Southwest: Unimproved land labeled "Gardens" most likely associated with the Convent of Notre Dame boarding school to the southeast

Date: 1950

Subject Property: The northeast portion of the subject property is depicted as a one-story building. The south portion of the building is depicted as a non-descript store front and the north

Date: 1950

portion of the building is depicted as a "Grow Ware House" (59 Notre Dame Avenue). The remainder of the subject property appears to be undeveloped.

- Northeast:** Notre Dame Avenue beyond which is a one-story building labeled "The Rosicrusian Press LTD. Book Press and Binding" (60 Notre Dame Avenue)
- Southeast:** Carlyle Street beyond which is a one-story building labeled "Dance Hall" (45 Notre Dame Avenue)
- Northwest:** Undeveloped land beyond which is a one-story building labeled "Printing" (99 Notre Dame Avenue)
- Southwest:** Vacant lot

Date: 1969

- Subject Property:** The northeast portion of the subject property is depicted as a one-story building. The south portion of the building is labeled "I.B.M Laboratory" (59 Notre Dame Avenue) and the north portion of the building is depicted as a non-descript storefront (65 Notre Dame Avenue). The remainder of the subject property is depicted as undeveloped.
- Northeast:** Notre Dame Avenue beyond which is a one-story building labeled "paper stock warehouse" (90 Notre Dame Avenue)
- Southeast:** No significant changes depicted
- Northwest:** Depicted as a one-story non-descript building and parking lot beyond which is a one-story vacant building (89-99 Santa Teresa Boulevard) and a one-story non-descript building (89-99 Santa Teresa boulevard)
- Southwest:** Depicted as a one-story building labeled "Fire Department Administrative Building."

Date: 1984

- Subject Property:** The northeast portion of the subject property is depicted as a one-story building. The south portion of the building is labeled "Vacant" (59 Notre Dame Avenue) and the north portion of the building is depicted as a non-descript storefront (65 Notre Dame Avenue). The remainder of the subject property is depicted as undeveloped.
- Northeast:** Notre Dame Avenue beyond which is a one-story building labeled "paper stock warehouse" (90 Notre Dame Avenue) and a parking lot
- Southeast:** No significant changes depicted
- Northwest:** No significant changes depicted
- Southwest:** Depicted as a one-story vacant building.

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on August 27, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 51, 59, 65 Notre Dame Avenue, 245, 264-298 Carlyle (Subject Property)

| Year(s) | Occupant Listed |
|----------------|---|
| 1945 | Scilacci W J Grocery (51 Notre Dame Avenue) |

City Directory Search for 51, 59, 65 Notre Dame Avenue, 245, 264-298 Carlisle (Subject Property)

| Year(s) | Occupant Listed |
|----------------|---|
| 1950 | Lesser Moses Meats, Notre Dame Market (51 Notre Dame Avenue) |
| 1955 | Notre Dame Cleaners, Bob's Auto Driving School (65 Notre Dame Avenue) |
| 1957 | The Country Store, Esparza Bros Meat Market (51 Notre Dame Avenue) |
| 1960 | The Country Store, Esparza Bros Meat Market (51 Notre Dame Avenue); Notre Dame Cleaners, Bob's Auto Driving School (51 Notre Dame Avenue) |
| 1963 | Bob's Auto Driving School (51 Notre Dame Avenue) |
| 1966 | International Business Machines Sub OFC (51 Notre Dame Avenue); Bob's Auto Driving School (51 Notre Dame Avenue) |
| 1970 | Vacant (51 Notre Dame Avenue); Vacant (65 Notre Dame Avenue) |
| 1975 | Hope for Retarded Children and Adults, Inc. (51 Notre Dame Avenue) |
| 1980 | No listings |
| 1985 | Salvation Army Christmas Center (51 Notre Dame Avenue) |
| 1996 | Value Business Products (51 Notre Dame Avenue) |
| 2000 | Discount Office Supply, Value Business Products (51 Notre Dame Avenue) |
| 2014 | Andy's Pet Shop (51 Notre Dame Avenue) |

According to the city directory review, the subject property has been occupied by an IBM research lab, various grocery store/meat markets, dry cleaning business, and various retail businesses.

City Directory Search for Adjacent Properties

| Year(s) | Occupant Listed |
|----------------|--|
| 1945 | San Jose Mercury News (211 West Santa Clara Street) |
| 1950 | Huber Printing & Litho Co (99 Notre Dame Avenue); San Jose Evening News, Hayes Co, San Jose Mercury News (211 West Santa Clara Street); Palomar Ballroom (47 Notre Dame Avenue) |
| 1955 | International Business machines Corp Customer Engineering School (99 Notre Dame Avenue); San Jose News, Northwest Publications, San Jose Mercury News (211 West Santa Clara Street); Attractions, Inc. Amusements, Palomar gardens Ballroom (47 Notre Dame Avenue); County First Aid Station (245 Carlisle Street) |
| 1957 | International Business machines Corp Customer Engineering School (99 Notre Dame Avenue); Palomar Gardens (47 Notre Dame Avenue) |
| 1960 | International Business machines Corp Advanced Systems Development Systems (99 Notre Dame Avenue); Northwest Publications, San Jose News, San Jose Mercury News (211 West Santa Clara Street); County Emergency First Aid Station (245 Carlisle Street) |
| 1966 | Rosicrucian Press LTD (76 Notre Dame Avenue); International Business Machines Corp Development Lab (99 Notre Dame Avenue); City Fire Department Admin Office (245 Carlisle Street) |
| 1970 | Rosicrucian Press LTD (76 Notre Dame Avenue); Vacant (99 Notre Dame Avenue); Astaire Fred Dance Studio, Starlight Ball Room (47 Notre Dame Avenue); City Fire Department Admin Office (245 Carlisle Street) |
| 1975 | Rosicrucian Press LTD (76 Notre Dame Avenue); Vacant (99 Notre Dame Avenue); Starlight Ballroom (47 Notre Dame Avenue); USO O, San Jose US (245 Carlisle Street) |
| 1980 | Fireside Friendship Center (245 Carlisle Street) |
| 1985 | Rosicrucian Press LTD (76 Notre Dame Avenue); American Safe Corp, Victory Outreach (99 Notre Dame Avenue); Studio Disco (47 Notre Dame Avenue) |

City Directory Search for Adjacent Properties

| Year(s) | Occupant Listed |
|---------|--|
| 1986 | Rosicrucian Press LTD (76 Notre Dame Avenue); American Safe Corp (99 Notre Dame Avenue); Tiffany Disco (47 Notre Dame Avenue) |
| 1991 | Rosicrucian Press LTD (76 Notre Dame Avenue); American Safe Corp, Victory Outreach (99 Notre Dame Avenue); The Fizz (47 Notre Dame Avenue) |
| 1996 | Rosicrucian Press LTD, Regency Tiernographers (76 Notre Dame Avenue); A Praise Chapel Christian Fellowship (99 Notre Dame Avenue); Hollywood Junction (47 Notre Dame Avenue) |
| 2000 | The Press, Super Parking, Inc. (76 Notre Dame Avenue); A Praise Chapel Christian Fellowship (99 Notre Dame Avenue); Tropicana (47 Notre Dame Avenue) |
| 2006 | The Press (76 Notre Dame Avenue) |
| 2010 | Livingston Block, Inc., The Press (76 Notre Dame Avenue); Santa Clara County Superior Court (99 Notre Dame Avenue) |
| 2014 | Santa Clara County Superior Court (99 Notre Dame Avenue) |

According to the city directory review, the adjacent properties have been occupied by various dance hall businesses, printing press businesses, a municipal first aid and fire administration office, and an IBM research laboratory.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on August 26, 2019. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1889, 1897, 1899

| | |
|--------------------------|---|
| Subject Property: | The subject property is shown as undeveloped land |
| Northeast: | Shown as undeveloped land |
| Southeast: | Shown as a large non-descript building and four small non-descript buildings |
| Northwest: | Shown as undeveloped land |
| Southwest: | Shown as a block entirely developed with non-descript buildings across Santa Teresa Boulevard |

Date: 1953, 1961, 1968, 1973, 1980

| | |
|--------------------------|---|
| Subject Property: | The subject property is shown within a shaded region designated "urban development" with no site-specific details |
| Northeast: | Shown within a shaded region designated "urban development" with no site-specific details |
| Southeast: | Shown within a shaded region designated "urban development" with no site-specific details |
| Northwest: | Shown within a shaded region designated "urban development" with no site-specific details |
| Southwest: | Shown within a shaded region designated "urban development" with no site-specific details |

Date: 2012

Subject Property: Shown within an area with no site-specific details
Northeast: Shown within an area with no site-specific details
Southeast: Shown within an area with no site-specific details
Northwest: Shown within an area with no site-specific details
Southwest: Shown within an area with no site-specific details

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | Santa Clara County Environmental Health Department (SCEHD) |
| Point of Contact: | Ms. Melissa Belloso |
| Agency Address: | 1555 Berger Drive, San Jose, California |
| Agency Phone Number: | (408) 918-3400 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Email |
| Summary of Communication: | No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the SCCEHD. |

4.1.2 Fire Department

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | San Jose Fire Department (SJFD) |
| Point of Contact: | Mr. Michael Murtiff |
| Agency Address: | 1661 Senter Road, San Jose, California |
| Agency Phone Number: | (408) 535-3500 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Email |
| Summary of Communication: | The SJFD file included multiple inspection records of the Purple Heart Center and a children and adult day care facility, which did not include any environmentally significant information. The file contained multiple inspection detailing fire prevention violations. A Bureau of Fire Prevention inspection, dated 1953, indicated that the subject property consisted of a vacant country store. No environmentally significant information was included in the file. |

4.1.3 Air Pollution Control Agency

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | Bay Area Air Quality Management District (AQMD) |
| Point of Contact: | Rochelle Reed |
| Agency Address: | 939 Ellis Street, San Francisco, California |
| Agency Phone Number: | (415) 771-6000 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Email |
| Summary of Communication: | No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the BAAQMD |

4.1.4 Regional Water Quality Agency

Regulatory Agency Data

| | |
|----------------------------------|--|
| Name of Agency: | Regional Water Quality Control Board (RWQCB) |
| Point of Contact: | https://geotracker.waterboards.ca.gov/ |
| Agency Address: | 1515 Clay Street Unit#: 1400, Oakland, California |
| Agency Phone Number: | (510) 622-2300 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Online |
| Summary of Communication: | No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB. |

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | California Department of Toxic Substances Control (DTSC) |
| Point of Contact: | https://www.envirostor.dtsc.ca.gov/public/ |
| Agency Address: | 700 Heinz Avenue unit #: 200, Berkeley, California |
| Agency Phone Number: | (510) 540-2122 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Online |
| Summary of Communication: | No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC. |

4.1.6 Building Department

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | Santa Clara Building Department (SCBD) |
| Agency Address: | 70 West Hedding, Santa Clara, California |
| Agency Phone Number: | (408) 299-5700 |
| Date of Contact: | January 17, 2018 and August 26, 2019 |
| Method of Communication: | Online |
| Summary of Communication: | Records were available for review, as further discussed in the following table. |

Building Records Reviewed for 51 and 61 Notre Dame Avenue (Subject Property)

| Year(s) | Owner/Applicant | Description |
|---------|----------------------------|--|
| 1900 | N/A | Certificate of occupancy permit for supermarket (51 Notre Dame Avenue) |
| 1949 | N/A | New building permit for a one-story retail sale and storage building (65 Notre Dame Avenue) |
| 1964 | I.B.M | Permit for building improvements. Use of the building is noted as research. (51 Notre Dame Avenue) |
| 1970 | Hope for Retarded Children | Permit for tenant improvements for an adult training school (51 Notre Dame Avenue) |

Building Records Reviewed for 51 and 61 Notre Dame Avenue (Subject Property)

| Year(s) | Owner/Applicant | Description |
|----------------|------------------------|---|
| 1986 | Dai Chung Market | Permit to alter interior for supermarket (51 Notre Dame Avenue) |
| 1993 | N/A | Permit for emergency shelter with support services (65 Notre Dame Avenue) |

4.1.7 Oil & Gas Exploration

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | California Division of Oil, Gas and Geothermal Resources (DOGGR) |
| Point of Contact: | https://maps.conservation.ca.gov/doggr/wellfinder/#close |
| Agency Address: | 801 K Street, Sacramento, California |
| Agency Phone Number: | (916) 322-1080 |
| Date of Contact: | January 18, 2018 and August 26, 2019 |
| Method of Communication: | Online |
| Summary of Communication: | According to DOGGR, no oil or gas wells are located on or adjacent to the subject property. |

4.1.8 Assessor's Office

Regulatory Agency Data

| | |
|----------------------------------|---|
| Name of Agency: | Santa Clara County Assessor (SCCA) |
| Agency Address: | 70 West Hedding Street, San Jose, California |
| Agency Phone Number: | (408) 299-5500 |
| Date of Contact: | January 18, 2018 and August 26, 2019 |
| Method of Communication: | Telephone |
| Summary of Communication: | According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 259-35-027, 259-35-032, and 259-35-033, and is currently owned by Joseph Rubino, since January 2009. The current building was constructed in 1937 and totals approximately 6,660 square feet on three parcels that total 0.52 acre. |

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

| Database | Search Radius (mile) | Subject Property | Adjacent Properties | Sites of Concern |
|--|-----------------------------|-------------------------|----------------------------|-------------------------|
| Federal NPL or Delisted NPL Site | 1.00 | N | N | N |
| Federal CERCLIS Site | 0.50 | N | N | N |
| Federal CERCLIS-NFRAP Site | 0.50 | N | N | N |
| Federal RCRA CORRACTS Facility | 1.00 | N | N | N |
| Federal RCRA TSD Facility | 0.50 | N | N | N |
| Federal RCRA Generators Site (LQG, SQG, CESQG) | 0.25 | N | Y | N |
| Federal IC/EC Registries | 0.50 | N | N | N |
| Federal ERNS Site | Subject Property | N | N | N |
| State/Tribal Equivalent NPL | 1.00 | N | N | N |
| State/Tribal Equivalent CERCLIS | 1.00 | N | N | N |
| State/Tribal Landfill/Solid Waste Disposal Site | 0.50 | N | N | N |
| State/Tribal Leaking Storage Tank Site | 0.50 | N | Y | N |
| State/Tribal Registered Storage Tank Sites (UST/AST) | 0.25 | N | N | N |
| State/Tribal Voluntary Cleanup Sites (VCP) | 0.50 | N | N | N |
| State/Tribal Spills | 0.50 | N | Y | Y |
| Federal Brownfield Sites | 0.50 | N | N | N |
| State Brownfield Sites | 0.50 | N | N | N |
| EDR MGP | 1.00 | N | N | N |
| EDR US Hist Auto Station | 0.125 | N | N | N |
| EDR US Hist Cleaners | 0.125 | Y | N | N |
| Miscellaneous | Varies | Y | Y | Y |

4.2.2 Subject Property Listings

The subject property is identified as an EDR Historic Cleaners (EDR Hist Cleaners) site in the regulatory database report, as discussed below:

- Based on a review of historical records, a dry-cleaning facility operating under the name Notre Dame Cleaners was located on the subject property at 65 Notre Dame Avenue (APN 259-35-032) from at least 1955 to 1960. Based on a city directory review, the subject property address of 65 Notre Dame was also occupied by a driving school during this timeframe. No city directories were available prior to 1955; however, a 1950 Sanborn map depicted the space as being occupied by a grocery warehouse and isn't subdivided into separate units, as was later depicted in the 1969 Sanborn map. Therefore, based on the information available, it appears the former dry cleaning tenant occupied the subject property for a relatively limited duration. Furthermore, no documentation was available during this assessment to confirm whether on-site dry cleaning was conducted. However, the dry cleaner operated prior to a time of common environmental regulatory oversight. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry-cleaning process. These solvents, even when properly stored and disposed, can be released from these facilities in small, frequent releases through floor

drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility, the presence of a dry-cleaning facility on the subject property represents evidence of a *recognized environmental condition*.

4.2.3 Adjacent Property Listings

The adjacent property to the northeast is identified as Cleanup Program Sites Spills Leaks Investigations and Cleanups (CPS-SLIC), DEED, Emissions Inventory (EMI), Certified Unified Program Agency (CUPA) Listings and California Environmental Reporting System (CERS) sites in the regulatory database report, as discussed below:

- The property, identified as The Press at 76 Notre Dame Avenue, is located adjacent to the northeast side of the subject property. This site is listed as emitting total organic hydrocarbon gases and reactive organic gases from 1990 to 2009. This site also listed as a case closed SLIC site. According to the Regional Water Quality Control Board's (RWQCB) GeoTracker website, in December 1997, 31 soil vapor samples were collected on site as part of an investigation to determine if former printing press operations on site had impacted the site. Further sampling to delineate the extent of the contamination plume were conducted in December 1997 and September 1999. In February 2006 soil and groundwater samples were collected through the site at eight locations. The results of the investigation indicated that with the exception of the dissolved groundwater plume most of the detected contamination would be removed during the excavation for the below-grade parking garage.

From September through October of 2013 an estimated 27,000 cubic yards of soil was excavated and removed from the site as part of the construction activities related to the underground parking garage. The footprint of the excavation was 1.2 acres and the excavation depth varied between 11 and 13 feet bgs. The contaminated soil were transported off site to ECDC Environmental landfill located in East Carbon, Utah. In October 2013, post excavation soil samples were collected along the base of the excavation. Analytical results for hydrocarbon and VOC compounds were below their respective ESLs. The only metal which exceeded its ESL was arsenic which was detected at a maximum concentration of 10 parts per million (ppm). It was theorized that arsenic at this concentration is within its background levels for this area. Following remedial activities residual contaminants at the site were found to be at 7,700 parts per billion (ppb) Total Petroleum Hydrocarbons (TPH) as gasoline (TPHg), 1,500 ppb TPH as diesel (TPHd), 470 ppb TPH as motor oil (TPHmo), 1,300 ppb benzene, 8.2 ppb toluene, 83 ppb xylene, 240 ppb ethylbenzene, 210 ppb naphthalene, and non-detect MTBE. The closest groundwater monitoring well to the subject property is MW-2S/D, located approximately 52 feet northeast of the subject property. The most recent sampling event in which MW-2S/D was tested was on March 22, 2013, and was performed by PES Environmental, Inc. The sampling event indicated that all contaminants tested were non-detect with the exception of 6.0 ppb 1,2-dichloroethane.

On April 14, 2014, the County of Santa Clara Department of Environmental Health issued the site (Carlyle Development, 76 Notre Dame Avenue) case closure which included a DEED restriction. The deed restriction was filed with the Santa Clara County Clerk-Recorded on July 18, 2014 which includes a legal description of the property. The DEED restriction notes that groundwater underlying the southern portion of the site is impacted by hydrocarbons, including benzene, at levels which represent a potential vapor intrusion risk to indoor occupants of the building. A garage ventilation system was designed and constructed by the owner of the building to protect occupants from potential vapor intrusion. It further notes that the owner shall at all times operate and maintain the garage exhaust ventilation system, notify the SCCEHD prior to any subsurface work, and notify the correct SCCEHD should damages to remedy and monitoring systems occur. Based on the most recent analytical results, remediation completed at the property, inferred hydraulic gradient (down) from the subject property, and regulatory closure, this listing is not expected to represent a significant environmental concern.

The adjacent property to the east is identified as a LUST, Hazardous Substances and Waste Sites (Cortese), Historical Cortese, CERS and Hist LUST site in the regulatory database report, as discussed below:

- The property, identified as San Jose Mercury News (SJMN) at 211 West Santa Clara Street, is located across the Notre Dame Avenue and Carlyle Street intersection and adjacent to the east of the subject property. The site is listed as an open LUST cleanup site. According to the Regional Water Quality Control Board's (RWQCB) GeoTracker website, The SJMN formerly operated a newspaper printing operation on the Site. Two gasoline underground storage tanks (USTs), approximately 8,000 and 1000 gallons, were removed from the northwestern portion of the Site in May 1998. The Santa Clara Valley Water District (SCVWD) granted closure for a leaking underground storage tank (LUST) case at the Site in August 2000. However, in August 2006 and May 2011 the SCCDEH requested that the SJMN by respond as a Responsible Party (RP) to groundwater contamination identified on the property at 50-98 Notre Dame Avenue (Carlyle Property) located approximately 50 feet northwest of the Site, across Carlyle Street. According to the April 7, 2014 directive, benzene was identified in groundwater beneath the Carlyle Property during redevelopment. The Carlyle Property included a historical printing operation, the Rosicrucian Press; however, the SCCDEH stated that no potential benzene sources had been identified on the Carlyle Property during redevelopment excavation which extended to a depth of 13 feet throughout that property.

In April 2014, the SCCDEH issued a directive to the SJMN requesting a workplan be prepared to determine the direction of groundwater flow, and the extent of groundwater contamination identified on the Carlyle Property. In May 2014, Versar prepared a workplan to install three groundwater monitoring wells. The well locations were selected in consultation with the SCCDEH and were intended to monitor the shallow water bearing unit. The most recent subsurface investigation was conducted by BSK Associates (BSK) on February 11, 2019. The closest groundwater monitoring well to the site, sampled during this investigation, is MW-1, located approximately 200 feet northeast of the subject property. Groundwater contaminants in MW-1 were found at 3,900 ppb TPHg, 3,300 ppb, TPHd, 3,800 ppb TPHk, 16 ppb benzene, 5.9 ppb toluene, 41

ppb ethylbenzene, 3.5 ppb xylenes, and <50 ppb MTBE. The report concluded that groundwater is flowing in a northwesterly direction. A now destroyed groundwater sampling point (MW-2S/D) sampled during the Carlyle Property is located between MW-1 and the subject property. The most recent sampling event in which MW-2S/D was sampled was on March 22, 2013, and was performed by PES Environmental, Inc. The sampling event indicated that all contaminants tested were non-detect with the exception of 6.0 ppb 1,2-dichloroethane. Based on this sampling event it appears that the SJMN plume is flowing away from the subject property. Based on the most recent analytical data, inferred flow direction of contamination plume (cross-gradient/away from subject property), and regulatory oversight, this listing is not expected to represent a significant environmental concern.

An adjacent property to the south was identified as a RCRA-SQG site, as discussed below:

- The property, identified as Almaden Boulevard SS Rehab at North Almaden Boulevard and Carlyle, was identified as being a small quantity generator of lead-containing waste beginning in 2004. This appears to be a result of street or sewer upgrades completed in the public right-of way. No violations were reported. Based on the regulatory oversight with a lack of violations or releases, this listing is not expected to represent a significant environmental concern.

An adjacent property to the east was identified as CUPA Listings, EMI, Haznet, Hazmat sites, as discussed below:

- The property, identified as San Jose Office Center and Harvest Properties 2 at 225 West Santa Clara Street, is located to the east of the subject property across the intersection. This site was identified as being regulated by SCCDEH and SJFD under an HMBP for storage of hazardous materials. The site is further identified as having reported low levels of regulated air emissions and as manifesting various small quantities of waste. No violations or releases were reported. Based on the regulatory oversight with a lack of identified violations or releases, this listing is not expected to represent a significant environmental concern.

An adjacent property to the south was identified as CUPA Listings and Hazmat sites, as discussed below:

- The property, identified as Axis Condominiums at 38 North Almaden Boulevard, was identified as being regulated by SCCDEH and SJFD under an HMBP for storage of hazardous materials. No violations or releases were reported. Based on the regulatory oversight with a lack of identified violations or releases, this listing is not expected to represent a significant environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

A nearby property to the southwest is identified as a as a Leaking Underground Storage Tank (LUST), Historic LUST (Hist LUST), Certified Unified Program Agency Listings (CUPA Listings), and San Jose Hazmat site in the regulatory database report, as discussed below:

- The property, identified as Comerica Bank Building at 333 West Santa Clara Street, is located across Almaden Boulevard and adjacent to the southwest of the subject property. The site is listed under the CUPA Santa Clara database as manifesting one to three chemicals. This site is also listed as a case closed LUST cleanup site. According to the Regional Water Quality Control Board's (RWQCB) Geotracker website, three underground storage tanks containing gasoline were removed from the site (along West Santa Clara Street) on June 20, 1993. During the time of removal tank corrosion and soil staining were observed. One soil sample was taken at the bottom of the excavation upon removal of the tanks and found contamination at maximum levels of 840 ppm TPHg and non-detect for TPHd and BTEX. In 2011, a follow-up soil and groundwater investigation was performed. The investigation indicated that all soil samples taken at depths of 5, 9.5, and 16 feet were all non-detect for TPHg, BTEX, and MTBE. Grab water samples of water encountered at 18 feet bgs was also non-detect for TPH-g, BTEX, and MTBE. On September 1, 2011, the County of Santa Clara Department of Environmental Health (SCCDEH) issued the site (City of San Jose Sidewalk, 333 West Santa Clara Street) case closure. The letter notes that residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or installation of water wells. Therefore, the closure letter requires that prior to any changes in land use, grading activities, excavations, or installation of water wells the SCEHD be notified. Based on the distance of the former USTs from the subject property, analytical results, and regulatory closure, this listing is not expected to represent a significant environmental concern.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Insight Realty Company, As Authorized Agent for Del Grande Properties (User of this report).

User Responsibilities

| Item | Provided By User | Not Provided By User | Discussed Below | Does Not Apply |
|--|-------------------------|-----------------------------|------------------------|-----------------------|
| Environmental Pre-Survey Questionnaire | | | X | |
| Title Records, Environmental Liens, and AULs | | | X | |
| Specialized Knowledge | | | X | |
| Actual Knowledge | | | X | |
| Valuation Reduction for Environmental Issues | | | X | |
| Identification of Key Site Manager | Section 5.1.3 | | | |
| Reason for Performing Phase I ESA | Section 1.1 | | | |
| Prior Environmental Reports | | X | | |
| Other | | | | X |

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2009, identified as Joseph Rubino, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

Ms. Lissa Shoun, key site manager and owner of Andy's Pet Shop, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Ms. Shoun, the subject property has been occupied by Andy's Pet Shop since 2010. Furthermore, Ms. Shoun indicated that the building was vacant from 2003 to 2010.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment, Andy's Pet Shop, Partner Engineering and Science, Inc. (January 30, 2018)

Partner Engineering and Science, Inc. (Partner) prepared this report on behalf of Insight Realty Company. The assessment was performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2018 assessment, the subject property was occupied by Andy's Pet Shop.
- According to the Partner report, the subject property had historically been occupied by a variety of retail and commercial tenants including a former dry cleaner.
- No current or former ASTs or USTs were identified on the subject property.
- No oil or hazardous substances were identified at the subject property.

Partner identified the former dry cleaner as a REC and recommended further investigation.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Christopher Olsen
Site Assessment Conducted On: September 4, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 51 Notre Dame Avenue (Subject Property)

| Name | Title/Role | Contact Number | Site Walk* Yes/No |
|-----------------|-------------------|-----------------------|------------------------------|
| Ms. Lissa Shoun | Key Site Manager | (408) 297-0840 | Yes |

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in a commercial dumpster located on the southwestern side of the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of San Jose services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by direction to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Pacific Gas & Electric. Hot water is provided by individual natural gas hot water heaters.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The subject property building was constructed in 1937. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

| Suspect ACM | Location | Friable Yes/No | Physical Condition |
|---------------------------|--------------------|----------------|--------------------|
| Drywall Systems | Building Interiors | No | Good |
| Floor Tiles | Building Interiors | No | Good |
| Floor Tile Mastic | Building Interiors | No | Good |
| Acoustical Ceiling Panels | Building Interiors | Yes | Good |
| Stucco | Building Exterior | Yes | Good |

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are

present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey should be completed.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

| EPA Radon Zones | | |
|------------------------|---------------------------------------|------------------|
| EPA Zones | Average Predicted Radon Levels | Potential |
| Zone 1 | Exceed 4.0 pCi/L | Highest |
| Zone 2 | Between 2.0 and 4.0 pCi/L | Moderate |
| Zone 3 | Less than 2.0 pCi/L | Low |

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by San Jose Water Company serves the subject property vicinity. According to a representative of the subject property, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of San Jose are surface water from Sacramento-San Joaquin Delta purchased from the Santa Clara Valley Water District. According to the 2018 Annual Water Quality Report, water supplied to the subject property is in compliance with the regulations pertaining to drinking water standards, including those lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Based on a review of historical records, a dry-cleaning facility operating under the name Notre Dame Cleaners was located on the subject property at 65 Notre Dame Avenue (APN 259-35-032) from at least 1955 to 1960. Based on a city directory review, the subject property address of 65 Notre Dame was also occupied by a driving school during this timeframe. No city directories were available prior to 1955; however, a 1950 Sanborn map depicted the space as being occupied by a grocery warehouse and isn't subdivided into separate units, as was later depicted in the 1969 Sanborn map. Therefore, based on the information available, it appears the former dry cleaning tenant occupied the subject property for a relatively limited duration. Furthermore, no documentation was available during this assessment to confirm whether on-site dry cleaning was conducted. However, the dry cleaner operated prior to a time of common environmental regulatory oversight. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry-cleaning process. These solvents, even when properly stored and disposed, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility, the presence of a dry-cleaning facility on the subject property represents evidence of a *recognized environmental condition*.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on site. The EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.
- Due to the age of the subject property building, there is a potential that lead-based paint (LBP) is present. Partner understands that demolition activities of the subject property building are planned. Partner recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible lead-based paint hazards. Stringent local and State regulations may apply to lead-based paint in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 51 Notre Dame Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and/or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted in association with planned development in an effort to determine the presence or absence of subsurface impacts due to the historical use of the subject property.
- Compliance with applicable regulations pertaining to suspect ACMs and LBP prior to any demolition or renovation activities that may disturb suspect materials or painted surfaces.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 51 Notre Dame Avenue in the City of San Jose, Santa Clara County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
