Site Visit Notes – Gallup Drive and Mesa Drive Affordable Housing Project site visit

Date: January 21, 2020

AECOM Staff: Michelle Dunn

Field Notes

General Observations:

- Site is vacant, with chain link fence along property perimeter.
- Site has mature trees around the sides of the property.
- Property primarily has grasses (weeds) growing
- Near fence entrance, there was rubble (rocks).
- Surrounding uses are apartments.
- Across from property is a commercial area with parking lot.
- Alley along north side of property has six existing parallel parking spaces.
- Alley along north side allows access to adjacent apartment uses to access their car-ports and is an area for the trash receptacles.
- There are overhead utilities along alley.
- Parking is partially restricted along Gallup Drive and Mesa Drive for street sweeping.
Field Notes

Gallup and Mesa Drive Property Site Visit

January 21, 2020

AECOM Staff: John Chamberlain

Cloudy conditions; 60 degrees (no rain)

General Observations:

- The project site has temporary chain-link fencing. Debris, litter and discarded appliances were present and visible on adjacent properties. NO DUMPING signs are present in the vicinity.
- A large, single stand of mailboxes (about 60) is located on Mesa Drive (near corner with Gallup).
- Conifers with trunk clusters (about 11) are present on-site and others in the surrounding area, many with substantial exposed root zones. Otherwise the site is cover in grasses and some small, remnant cement pieces from prior demolition efforts and used for a short demolition haul route or driveway.
- Peaty soils are present; thick in some locations with taller grasses (near ally side). No other natural resources observed.
Site Visit Notes – Gallup Drive and Mesa Drive Affordable Housing Project site visit

Date: January 21, 2020

AECOM Staff: Joe Bandel

Field Notes

- There are about a dozen sequoias around the perimeter of the site.
- The remainder of the site contains nonnative grasses and ruderal vegetation.
- The site does not support aquatic features (e.g., ephemeral wetland features).
- There is a chain link fence surrounding the property.
- There is little evidence of use of the site by wildlife.
- The greatest potential for wildlife use of the site is by nesting birds, which could nest in the sequoias.
- Surrounding area (apartments, a church, and a shopping center) has low habitat value for wildlife.
- The nearest aquatic feature is the Los Alamitos Percolation Ponds, across the Alamitos Expressway.
