## **SECTION 1: INTRODUCTION**

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 26-36 South First Street in San Jose, California (Site) as shown on Figures 1 and 2. This work was performed for Urban Catalyst Operating Partnership, LLC (Urban Catalyst) in accordance with our February 25, 2019 Agreement (Agreement).

### **1.1 PURPOSE**

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Urban Catalyst is considering purchasing the Site for commercial use. We performed this Phase I ESA to support Urban Catalyst in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

### **1.2 SCOPE OF WORK**

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.
- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.

- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of existing and prior Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10; the terms and conditions of our Agreement are presented in Appendix A.

### **1.3 ASSUMPTIONS**

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by Urban Catalyst, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

### **1.4 ENVIRONMENTAL PROFESSIONAL**

This Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

## **SECTION 2: SITE DESCRIPTION**

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

### **2.1 LOCATION AND OWNERSHIP**

Table 1 describes the physical location, and ownership of the property, based on information provided by Urban Catalyst.

**Table 1. Location and Ownership**

<b>Assessor’s Parcel No. (APN)</b>	467-22-002, -003 and -004
<b>Reported Address/Location</b>	26-36 South First Street, San Jose, California
<b>Owner</b>	Not reported
<b>Approximate Lot Size</b>	0.4 acres

In addition to the current address listed in Table 1, several historical addresses for the Site were identified during our review of historical Sanborn fire insurance maps. These include 24 and 38 South 1<sup>st</sup> Street and 18 to 26 Fountain Alley. These historical addresses also were researched during this Phase I ESA.

**2.2 CURRENT/PROPOSED USE OF THE PROPERTY**

The current and proposed uses of the property are summarized in Table 2.

**Table 2. Current and Proposed Uses**

<b>Current Use</b>	26-28 South First Street-Parking lot/construction staging. 30-32 South First Street-Unoccupied commercial space 34-36 South First Street-Unoccupied commercial space (1 <sup>st</sup> floor), Ego Mechanix Salon (2 <sup>nd</sup> floor) and Analog Tattoos (3 <sup>rd</sup> Floor).
<b>Proposed Use</b>	Commercial

**2.3 SITE SETTING AND ADJOINING PROPERTY USE**

Land use in the general Site vicinity appears to be primarily commercial. Based on our Site vicinity reconnaissance, adjoining Site uses are summarized below in Table 3.

**Table 3. Adjoining Property Uses**

<b>Northeast</b>	Fountain Alley and commercial buildings
<b>Northwest</b>	At-grade parking lot
<b>Southeast</b>	Commercial buildings
<b>Southwest</b>	Commercial buildings (across South 1 <sup>st</sup> Street)

**SECTION 3: USER PROVIDED INFORMATION**

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Urban Catalyst. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

### **3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS**

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E 1527-13 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA.

### **3.2 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION**

Based on information provided by or discussions with Urban Catalyst, we understand that Urban Catalyst does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions.

## **SECTION 4: RECORDS REVIEW**

### **4.1 STANDARD ENVIRONMENTAL RECORD SOURCES**

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix B.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

#### 4.1.1 On-Site Database Listings

The Site was not identified in the researched regulatory agency databases.

#### 4.1.2 Nearby Spill Incidents

Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

### 4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

#### 4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to the Site at the following public agencies: the San Jose Building Department (BD), San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH). The information reviewed is summarized in Table 4. The DEH indicated that they have no files pertaining to the Site.

Information obtained from the City's website (<https://www.sanjoseca.gov>) indicates that the Site is located in the Downtown Commercial Historic District, which is listed in the National Register of Historic Places and composed of both architecturally and historically significant buildings dating from the 1870s to the early 1940s. The District is composed of two city blocks located between East Santa Clara Street to the north, East San Fernando Street to the south, South Third Street to the east, and South First Street to the west. The District continues on the south side of East Santa Clara between South Third and South Fourth Streets.

The City of San Jose Historic Resources Inventory lists the building at 30-32 South 1<sup>st</sup> Street (APN 467-22-003) as a Structure of Merit (O'Brien's Candy Store, built in 1912), and the building at 34-36 South 1<sup>st</sup> Street (APN 467-22-004) is identified as a City Landmark Site/Structure and as a Contributing Site/Structure (Knox/Goodrich Building, built circa 1889).

## SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

### 5.1 RECENT USGS TOPOGRAPHIC MAP

A 1980 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 85 to 90 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northwest towards the San Francisco Bay.

### 5.2 HYDROGEOLOGY

Based on our experience and information presented in the California Geotracker database pertaining to nearby properties, the shallow ground water beneath the Site is likely present at depths of approximately 10 to 20 feet. A northwesterly ground water flow direction has been reported in the Site vicinity.

## SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

### 6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 5.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2012 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix C.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historical topographic maps dated between 1889 and 2012; copies of historical topographic maps reviewed are presented in Appendix C.
- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1884, 1891, 1915, 1950, 1969 and 1984 obtained from EDR; copies of Sanborn maps are presented in Appendix C.
- **Local Street Directories:** We reviewed city directories obtained from EDR that were researched at approximately 5 year intervals between 1922 and 2014 to obtain information pertaining to past Site occupants. As shown in the city directory summary presented in Appendix D, listed occupants of the on-Site buildings included multiple restaurants, retail stores (shoes, clothing and jewelry, etc.), optometrists, beauty salons, a photography studio, and other commercial businesses that likely occupied the office space portions of the Site.

**Table 5. Summary of Historical Source Information for Site**

Date	Source	Comment
1884, 1891 and 1915	Sanborn maps	In 1884, the Site is shown to be developed with several buildings that are occupied by stores, offices, a restaurant, an upholstering business and a candy manufacturer.  By 1891, the former 1-story building at 36-38 South 1 <sup>st</sup> Street is shown have been replaced with the existing 3-story building occupied by a store and overlying office space. The other buildings are shown to be occupied by stores, offices, lodgings, a photo parlor, a card reader, a saloon and a candy factory. A "gasoline engine" is shown to have been located in a shed on the northeast side of the Site near the candy factory; the area of the shed is shown to have been occupied by an ice cream factory by 1915. In 1915, the 36 South 1 <sup>st</sup> Street building is shown to be occupied by a glove factory.
1950, 1969 and 1984	Sanborn maps	In 1950, the Site is shown to be developed with buildings occupied by stores and a photo studio. By 1969, the building at 24-28 South 1 <sup>st</sup> Street is shown to have been removed and replaced by the existing parking lot.
1889 to 2012	Topographic maps	The Site is shown within the urban developed area of San Jose.
1939 to 2012	Aerial photographs	The Site appears to be developed with the existing buildings. The existing parking lot is shown to have previously been occupied by a building that appears to have been demolished during the late 1960s or 1970s.

## 6.2 HISTORICAL SUMMARY OF SITE VICINITY

Based on our review of the information described in Section 6.1, the general Site vicinity was developed with a variety of commercial businesses by the late 1800s, including stores, offices, restaurants, hotels and banks, among others. During the 1960s, former structures to the northeast of the Site were removed and the existing surface parking lot was constructed.

## SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 6. Photographs of the Site are presented in Section 7.2.1.

### 7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on March 15 and 19, 2019. The Site reconnaissance was conducted by walking representative areas of the Site, including the interiors of the on-Site structures, the periphery of the structures and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing buildings and associated asphalt paved parking areas (typical of developed properties).

## 7.2 OBSERVATIONS

At the time of our visit, the 26-28 South First Street parcel was observed to be developed with an asphalt paved parking lot that was being used for construction staging. The 30-32 South First Street parcel was developed with a two-story commercial building that was unoccupied and being renovated for commercial use; the building additionally had an unfinished basement with a concrete floor slab. The 34-36 South First Street parcel was developed with a three-story commercial building. The ground floor was unoccupied. Ego Mechanix Salon and Analog Tattoos occupied the 2nd and 3rd floors, respectively; a basement in the building was observed to be used for storage purposes.

Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The buildings presumably are connected to the publically owned sanitary sewer system; no on-Site septic systems were obvious. A hydraulic powered elevator was observed within the 34-36 South First Street building. The hydraulic elevator equipment was observed within the basement. No evidence of hydraulic fluid leaks was readily apparent. No other hazardous materials were observed at the Site.

**Table 6. Summary of Readily Observable Site Features**

General Observation	Comments
Aboveground Storage Tanks	Not Observed
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Not Observed
Burning Areas	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Not Observed
Clean Rooms	Not Observed
Drainage Ditches	Not Observed
Elevators	Observed as described above
Emergency Generators	Not Observed
Equipment Maintenance Areas	Not Observed

## **SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS**

### **8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW**

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided environmental questionnaires to representatives of the Site owners. The completed questionnaires were not returned to us as of the date of this report.

### **8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS**

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

## **SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)**

Cornerstone performed this Phase I ESA in general accordance with ASTM E1527-13 to support Urban Catalyst in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

### **9.1 HISTORICAL SITE USAGE**

Based on the information obtained during this study, by 1884, the Site was developed with commercial structures occupied by stores, offices, a restaurant, an upholstering business and a candy manufacturer. In 1889, the former 1-story building at 34-36 South 1<sup>st</sup> Street was replaced with the existing 3-story building occupied by a store and overlying office space. Other prior occupants/uses included lodgings, a photo parlor, a card reader, a saloon, an ice cream factory, a glove factory, optometrists, and beauty salons, among others. During the late 1960s or early 1970s, the former building at 24-28 South 1<sup>st</sup> Street was removed and replaced by the existing parking lot. The 30-32 South 1<sup>st</sup> Street building currently is unoccupied and is being renovated for commercial use. The 34-36 South 1<sup>st</sup> Street building currently consist of unoccupied commercial space on the 1<sup>st</sup> floor; Ego Mechanix Salon and Analog Tattoos occupy the 2nd and 3rd floors, respectively.

### **9.2 CHEMICAL STORAGE AND USE**

Except for hydraulic fluid in elevator equipment, no hazardous materials were observed on-Site during our visit. In 1891, a “gasoline engine” was located in a shed on the northeast side of the Site near the former candy factory; the area of the shed was occupied by an ice cream factory by 1915.

The Site does not appear to have historically been occupied by businesses typically associated with the use or storage of significant quantities of hazardous materials. However, the Site is located in the Downtown Commercial Historic District which has been used for commercial purposes since the mid- to late-1800s. There is an increased potential for residual contaminants to be present in soil on properties located in areas with a long developed history. The Site currently is capped by the existing structures and pavements; thus, no significant adverse impacts to the planned continued commercial use of the Site would be anticipated. If earthwork activities are planned at the Site, or if a higher degree of confidence regarding soil quality is desired, soil sampling should be performed to establish appropriate soil management/disposal practices. If groundwater dewatering activities are anticipated, ground water quality also should be evaluated.

### **9.3 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY**

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. However, as is typical to many commercial areas, several facilities in the vicinity were reported as hazardous materials users. If leaks or spills occur at these facilities, contamination could impact the Site, depending upon the location of the property, the magnitude of the release, and the effectiveness of cleanup efforts.

## **9.4 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)**

Due to the age of the on-Site structures, building materials may contain asbestos. If demolition, renovation, or re-roofing of the building is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

## **9.5 LEAD-BASED PAINT**

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the building, lead-based paint may be present. If demolition is planned, the removal of lead-based paint isn't required if it is bonded to the building materials. However, if the lead-based paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

## **9.6 DATA GAPS**

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. Additionally, the environmental questionnaires provided for completion by the Site owners were not returned to us as of the date of this report. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider these data gaps to be significant.

## **9.7 DATA FAILURES**

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

## 9.8 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 of 26-36 South First Street, San Jose, California. This assessment revealed no significant Recognized Environmental Conditions<sup>1</sup>.

Note, however, that the Site is located in the Downtown Commercial Historic District which has been used for commercial purposes since the mid- to late-1800s. There is an increased potential for residual contaminants to be present in soil on properties located in areas with a long developed history. The Site currently is capped by the existing structures and pavements; thus, no significant adverse impacts to the planned continued commercial use of the Site would be anticipated. If earthwork activities are planned at the Site, or if a higher degree of confidence regarding soil quality is desired, soil sampling should be performed to establish appropriate soil management/disposal practices. If groundwater dewatering activities are anticipated, ground water quality also should be evaluated.

## SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support Urban Catalyst in evaluation of Recognized Environmental Conditions associated with the Site. Urban Catalyst understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Urban Catalyst understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

---

<sup>1</sup> The presence or likely presence of hazardous substances or petroleum products on the Site: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

Urban Catalyst may have provided Cornerstone environmental documents prepared by others. Urban Catalyst understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Urban Catalyst and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/12/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 70 CA LUST sites within approximately 0.5 miles of the target property.

CA HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the CA HWT list, as provided by EDR, and dated 10/09/2018 has revealed that there is 1 CA HWT site within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 13 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. **Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating, \* Metals  
Site History: The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

File Location: Regional Board  
 Potential Media Affected: Other Groundwater (uses other than drinking water)  
 Potential Contaminants of Concern: \* Petroleum - Automotive gasolines, \* Solvents, Stoddard solvent / Mineral Sprits / Distillates  
 Site History: Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline  
Site History: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non

Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293  
Violation Description: Failure to maintain UST records of monitoring, testing, repairing, and closure in sufficient detail to enable the CUPA to determine whether the UST systems are in compliance.  
Violation Notes: Fuel alarm for L15 Dispenser 7-8 occurred on 10-16-15 however there is only acknowledgment of alarm without resolution. DO indicates that another contractor was hired to address the alarm but failed to leave documentation as to how it was addressed. Keep records in sufficient detail to indicate how an alarm was addressed.

Eval Type: Routine done by local agency  
Eval Notes: On-site today to oversee annual monitoring certification and spill bucket testing. Technician Jeff Conger from Pinnacle Fuel Compliance Service performed the testing and has valid ICC, Veeder-Root, and VMI testing certifications. Site consists of: 1x10,000 gal 87 Gasoline 1x10,000 gal 91 Gasoline 1x10,000 gal Diesel Facility recently switched (approximately 4 months ago) from 89 to diesel. Tested annular space sensors (Veeder Root 409) of all gasoline and diesel tanks. Annular space of the used oil tank is currently monitored by a Veeder-Root 407 sensor. All sensors were tested in water and performed as designed. STP sump sensors (Veeder-Root 208) were tested in water and performed as designed. Positive shutdown of turbines was observed. UDCs are monitored by a Veeder-Root 208 sensors. Sensors were tested in water and positive shutdown of turbines was observed. Fail Safe and sensor out was performed shutting down all turbines. Overfill prevention is provided [Truncated]

Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130

Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.

Violation Notes: THE 55 GALLON DRUM USED TO COLLECT USED OIL FILTERS WAS FOUND WITH APPROXIMATELY 2 INCHES OF WASTE OIL IN THE BOTTOM OF A 1/6TH FILLED DRUM. THIS SHOWS THAT OIL FILTERS ARE NOT BEING PROPERLY DRAINED. RE-DRAIN ALL FILTERS IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. UNLESS THIS DRUM AND THE CURRENT CONTENTS IS TO BE MANAGED AS HAZARDOUS WASTE, THIS DRUM SHALL HAVE ALL OF FILTERS REMOVED AND DRAINED COMPLETELY, IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. THEN REMOVE THE POUR-ABLE WASTE OIL AND MANAGED AS HAZARDOUS WASTE. THE PAPER FILTERS SHALL BE SEPARATED FROM THE METAL FILTERS AND DISPOSED OF AS SOLID HAZARDOUS WASTE. BRAKE PARTS SHALL BE SEPARATED FROM THE METAL FILTERS AND RECYCLED OR DISPOSED OF PROPERLY.

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Registry ID: 110002935245

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On site to conduct a routine hazardous materials business plan inspection CERS ID: 10416403 Facility's last HMBP submittal was via CERS 4/20/17 No reportable quantities of material were observed on site CERS submittal 4/20/17 included reportable quantities of material that belong to DataPipe located in Suite 100 of 150 South First Street. 150 South First Street does own 1 generator on site, located on the roof and accessed via ladder. A photograph was taken of the tank tag by Ron Cabanayan and it indicated that the generator capacity was 40 gallons. Facility no longer has reportable quantities of material. BP01 permit will be removed from facility.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-02-2018  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site with Robin Ward of HMCD to conduct a routine APSA inspection. On facility's 2/28/18 CERS submittal, 20,240 gallons of diesel fuel, 1,100 gallons of hydraulic oil and 350 gallons of motor oil were reported. During inspection it was clarified that the 20,240 gallons of diesel fuel and 350 gallons of motor oil belong to DataPipe, a tenant in the same building. DataPipe has their own CERS ID# and facility information and is correctly permitted for APSA. 150 South First Street maintains control of 4 elevator rooms, each with one oil-containing hydraulic lift tank. Tank capacities are equal to 1,100 gallons, which is below SPCC and APSA thresholds. Facility's APSA permit will be inactivated.

Eval Type: Other, not routine, done by local agency  
Eval Notes: On site with Robin Ward of HMCD to conduct a follow up hazardous materials business plan inspection. Facility's HMBP submittal on 2/28/18 indicated that 8 reportable chemicals are located at this facility and that they are subject to APSA. Mr. Cabanayan indicated that some of the inventory items submitted on CERS actually belong to DataPipe, which has their own CERS ID# and facility information. Observed the following reportable chemicals on site: 65 gallons of hydraulic oil Facility is incorrectly permitted at BP02. Permit will be revised to reflect 1 reportable chemical, BP01.

was 40 gallons. Facility no longer has reportable quantities of material. BP01 permit will be removed from facility.

Eval Division: Santa Clara County Environmental Health  
Eval Program: HMRRP  
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-02-2018  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site with Robin Ward of HMCD to conduct a routine APSA inspection. On facility's 2/28/18 CERS submittal, 20,240 gallons of diesel fuel, 1,100 gallons of hydraulic oil and 350 gallons of motor oil were reported. During inspection it was clarified that the 20,240 gallons of diesel fuel and 350 gallons of motor oil belong to DataPipe, a tenant in the same building. DataPipe has their own CERS ID# and facility information and is correctly permitted for APSA. 150 South First Street maintains control of 4 elevator rooms, each with one oil-containing hydraulic lift tank. Tank capacities are equal to 1,100 gallons, which is below SPCC and APSA thresholds. Facility's APSA permit will be inactivated.

Eval General Type: Other/Unknown  
Eval Date: 05-02-2018  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: On site with Robin Ward of HMCD to conduct a follow up hazardous materials business plan inspection. Facility's HMBP submittal on 2/28/18 indicated that 8 reportable chemicals are located at this facility and that they are subject to APSA. Mr. Cabanayan indicated that some of the inventory items submitted on CERS actually belong to DataPipe, which has their own CERS ID# and facility information. Observed the following reportable chemicals on site: 65 gallons of hydraulic oil Facility is incorrectly permitted at BP02. Permit will be revised to reflect 1 reportable chemical, BP01.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General  
Violation Notes: waste containers must be inspected weekly when placed in the hazardous waste storage area (not in Point of Generation accumulation areas, where they are at or near the point of generation). Per discussion with Chief Engineer, weekly inspections have not been performed in the hazardous waste storage area on P1 Level when waste containers were stored there. However, monthly inspections have been performed. One container of spent DF2000 filters generated in 2014 was reportedly stored in this waste storage area prior to the 1/31/2015 waste pick up by Safety Kleen. Hazardous

Aboveground petroleum storage includes: -4,000 gallon diesel tank on P2 Level -200 gallon diesel tank on P2 Level -493 gallon diesel tank in a generator unit at the South Tower ground level \*Note: The 4,000 gallon diesel tank on P2 level contains approximately 300 gallons according to the tank level measuring device. This tank was previously used to fuel boilers prior to switching to natural gas as a fuel. This tank is reportedly not in use at this time and has been disconnected from discharge piping. It is no longer capable of being used as originally designed. If this tank is emptied, cleaned and designated as "Permanently Closed", this facility will no longer be subject to APSA requirements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
 Potential Contaminants of Concern: Lead, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)  
 Site History: Site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site. Please refer to the Soil and Groundwater Management Plan to review details of the reported contamination as well as the mitigation measures proposed to protect human health and the environment.

and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlyle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'). On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

 Potential Contaminants of Concern: Diesel  
 Site History: The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of

oxygen-releasing compound (ORC) into the subsurface to promote biodegradation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

 Violation Date: 09-27-2016  
 Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 01/03/2017. The U001 (East) fill spill bucket failed hydrostatic testing today. Air bubbles were observed to migrate from the drain valve area to the water s surface at a consistent rate and water was visually confirmed to be entering the fill pipe. Investigate the scope of work needed to repair the spill bucket and apply for a permit from HMCD if needed. Please note that a permit from HMCD is not required for a drain valve replacement.

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violation Notes: Returned to compliance on 02/13/2016. Business Activities page incorrectly states that this facility is subject to the Aboveground Petroleum Storage Act (APSA). The only aboveground petroleum storage at the site that is not APSA-exempt is the Diesel storage in the trailered generator (103 gallons) and in the Day Tanks (240 gallons in Basement, and 100 and 200 gallon tanks on 9th Floor). Aggregate storage is less than the 1,320 gallon APSA threshold. Petroleum in oil-filled electrical equipment (i.e., transformers) is not subject to APSA if the aggregate quantity on-site of such oil is less than 10,000 gallons.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/13/2016. The only Diesel storage included in the inventory is the fuel in the USTs and in the trailered generator. Add the fuel in the aboveground day tanks. Report HazMat inventory by storage location as you did previously (i.e., separate inventory page for each floor, rather than simply reporting aggregated information on one page for the facility as a whole).

Violation Description: Failure to maintain on site an approved monitoring plan.

Violation Notes: Returned to compliance on 05/19/2016. AT&T is introducing errors by submitting information that is not required and which is either incomplete or inaccurate. Limit information in the Leak Sensor Model # information to identifying the model #(s) and do not include the sensor ID (e.g., "L1" etc.). Specific sensors are identified in the monitoring Site Plan so there is no need to be redundant. Sensor Model Numbers monitoring the piping at this facility are Models 794380-208 and 794390-420, not merely 794380-208. Overfill prevention is covered in the UST Tank Information data and does not need to be addressed in the UST Monitoring Plan.

Eval Notes: On-site for an Annual Monitoring System Certification on 9/26/2016 performed by Tait Environmental Services, Inc. Service Technician Garrett Warren. Mr. Warren has a current ICC Service Technician Certification (exp. 6/9/2017) and Veeder-Root Level 4 certification (#B42126 exp. 1/18/2017). This inspection report was issued on 9/27/2016. The underground storage tank (UST) system is comprised of three, 20,000 gallon, double-walled steel primary, fiberglass secondary tanks that are used for emergency generator fueling. All tanks have a reported installation date of 11/1/1992. Additionally, there are two day tanks (1 x 200 gallon, 1 x 100 gallon) located on the roof and are used in association with each of the two roof generators. A separate, 240 gallon day tank is located within the sub-basement. The UST system has conventional suction piping. Observed testing of the following components on 9/26/2016\*: - 3 Annular space sensors (Veeder-Root (VR) 794390-420) - 3 Fill [Truncated]

Mr. Guerrero has current ICC UST Service Technician certification (exp. 6/11/2015) and Veeder-Root level 4 certification (exp. 7/31/2015). Sensors were tested using water and triggered audible and visual alarms. The 3 UST fill spill buckets were hydrostatically tested for 1 hour and passed. Presence of mechanical overfill prevention valves in tank fill drop tubes was visually confirmed. Notes: 1. Designated UST operator monthly inspection and facility employee training records are in order. 2. Records of visual inspections of unburied piping (routine #1) monthly and each time the system is operated are in order, as are inspections of fuel tank in basement to maintain exemption from UST Regulations pursuant to Health and Safety Code Section 25281.6. 3. Eval Notes: All underground storage tank (UST) monitoring equipment was tested today by UST Service Technician Garrett Warren of Tait Environmental Services and functioned properly. Mr. Warren has current ICC California UST Service Technician certification (exp. 10/2/2017) and Veeder-Root certification (exp. 1/23/2019). Sensors were tested using water and triggered audible and visual alarms. The 3 UST fill spill buckets were hydrostatically tested for 1 hour and passed. Presence of mechanical overfill prevention valves in tank fill drop tubes was visually confirmed. Notes: 1. Designated UST operator monthly inspection and facility employee training records are in order. There have been no unexplained leak alarms since the last monitoring system certification testing on 9/26/2016. 2. Records of visual inspections

Eval Notes: This inspection began on 10/1/2015 with facility walk-through and concluded today. The most recent electronic submittal of Hazardous Materials Business Plan (HMBP) information via California Environmental Reporting System (CERS) website for AT&T Corp. - CAK166 (CERSID 10420972) was made on 3/22/2013. Submittal was "Accepted" on 4/8/2013. Per Rose Blackmer, the equipment and backup power batteries owned by AT&T Corp. with the Facility ID CAK166 is now being operated by Pacific Bell Telephone Company dba AT&T California. Disclosure of those batteries has been incorporated into the HMBP for AT&T California Site N1011 (CERSID 10091848) as part of an internal reorganization that occurred in 2014. The HMBP permit that was issued to AT&T Corp. CAK166 will be inactivated.

Violation Date: 09-27-2016  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 01/03/2017. The U001 (East) fill spill bucket failed hydrostatic testing today. Air bubbles were observed to migrate from the drain valve area to the water s surface at a consistent rate and water was visually confirmed to be entering the fill pipe. Investigate the scope of work needed to repair the spill bucket and apply for a permit from HMCD if needed. Please note that a permit from HMCD is not required for a drain valve replacement.

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violation Notes: Returned to compliance on 02/13/2016. Business Activities page incorrectly states that this facility is subject to the Aboveground Petroleum Storage Act (APSA). The only aboveground petroleum storage at the site that is not APSA-exempt is the Diesel storage in the trailered generator (103 gallons) and in the Day Tanks (240 gallons in Basement, and 100 and 200 gallon tanks on 9th Floor). Aggregate storage is less than the 1,320 gallon APSA threshold. Petroleum in oil-filled electrical equipment (i.e., transformers) is not subject to APSA if the aggregate quantity on-site of such oil is less than 10,000 gallons.

Violation Notes: inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Returned to compliance on 02/13/2016. The only Diesel storage included in the inventory is the fuel in the USTs and in the trailered generator. Add the fuel in the aboveground day tanks. Report HazMat inventory by storage location as you did previously (i.e., separate inventory page for each floor, rather than simply reporting aggregated information on one page for the facility as a whole).

Violation Description: Failure to maintain on site an approved monitoring plan.

Violation Notes: Returned to compliance on 05/19/2016. AT&T is introducing errors by submitting information that is not required and which is either incomplete or inaccurate. Limit information in the Leak Sensor Model # information to identifying the model #(s) and do not include the sensor ID (e.g., "L1" etc.). Specific sensors are identified in the monitoring Site Plan so there is no need to be redundant. Sensor Model Numbers monitoring the piping at this facility are Models 794380-208 and 794390-420, not merely 794380-208. Overfill prevention is covered in the UST Tank Information data and does not need to be addressed in the UST Monitoring Plan.

Violation Date: 09-27-2016  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665  
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.  
Violation Notes: Returned to compliance on 01/03/2017. The U001 (East) fill spill bucket failed hydrostatic testing today. Air bubbles were observed to migrate from the drain valve area to the water s surface at a consistent rate and water was visually confirmed to be entering the fill pipe. Investigate the scope of work needed to repair the spill bucket and apply for a permit from HMCD if needed. Please note that a permit from HMCD is not required for a drain valve replacement.

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.  
Violation Notes: Returned to compliance on 02/13/2016. Business Activities page incorrectly states that this facility is subject to the Aboveground Petroleum Storage Act (APSA). The only aboveground petroleum storage at the site that is not APSA-exempt is the Diesel storage in the trailered generator (103 gallons) and in the Day Tanks (240 gallons in Basement, and 100 and 200 gallon tanks on 9th Floor). Aggregate storage is less than the 1,320 gallon APSA threshold. Petroleum in oil-filled electrical equipment (i.e., transformers) is not subject to APSA if the aggregate quantity on-site of such oil is less than 10,000 gallons.

Violation Notes: Returned to compliance on 05/19/2016. AT&T is introducing errors by submitting information that is not required and which is either incomplete or inaccurate. Limit information in the Leak Sensor Model # information to identifying the model #(s) and do not include the sensor ID (e.g., "L1" etc.). Specific sensors are identified in the monitoring Site Plan so there is no need to be redundant. Sensor Model Numbers monitoring the piping at this facility are Models 794380-208 and 794390-420, not merely 794380-208. Overfill prevention is covered in the UST Tank Information data and does not need to be addressed in the UST Monitoring Plan.

Mr. Warren has a current ICC Service Technician Certification (exp. 6/9/2017) and Veeder-Root Level 4 certification (#B42126 exp. 1/18/2017). This inspection report was issued on 9/27/2016. The underground storage tank (UST) system is comprised of three, 20,000 gallon, double-walled steel primary, fiberglass secondary tanks that are used for emergency generator fueling. All tanks have a reported installation date of 11/1/1992. Additionally, there are two day tanks (1 x 200 gallon, 1 x 100 gallon) located on the roof and are used in association with each of the two roof generators. A separate, 240 gallon day tank is located within the sub-basement. The UST system has conventional suction piping. Violation Description: Failure to maintain on site an approved monitoring plan.  
Violation Notes: Returned to compliance on 05/19/2016. AT&T is introducing errors by submitting information that is not required and which is either incomplete or inaccurate. Limit information in the Leak Sensor Model # information to identifying the model #(s) and do not include the sensor ID (e.g., "L1" etc.). Specific sensors are identified in the monitoring Site Plan so there is no need to be redundant. Sensor Model Numbers monitoring the piping at this facility are Models 794380-208 and 794390-420, not merely 794380-208. Overfill prevention is covered in the UST Tank Information data and does not need to be addressed in the UST Monitoring Plan.

Eval Notes: On-site for an Annual Monitoring System Certification on 9/26/2016 performed by Tait Environmental Services, Inc. Service Technician Garrett Warren. Mr. Warren has a current ICC Service Technician Certification (exp. 6/9/2017) and Veeder-Root Level 4 certification (#B42126 exp. 1/18/2017). This inspection report was issued on 9/27/2016. The underground storage tank (UST) system is comprised of three, 20,000 gallon, double-walled steel primary, fiberglass secondary tanks that are used for emergency generator fueling. All tanks have a reported installation date of 11/1/1992. Additionally, there are two day tanks (1 x 200 gallon, 1 x 100 gallon) located on the roof and are used in association with each of the two roof generators. A separate, 240 gallon day tank is located within the sub-basement. The UST system has conventional suction piping. Observed testing of the following components on 9/26/2016\*: - 3 Annular space sensors (Veeder-Root (VR) 794390-420) - 3 Fill [Truncated]

Eval Notes: Inspection to witness triennial testing of underground storage tank (UST) system secondary containment components. Testing is being overseen by UST Service Technician Samantha McMahan of Tait Environmental Services. Ms. McMahan has current ICC California UST Service Technician certification (#8487177, exp. 12/29/2018) and Franklin Fueling Systems Incon Level 4 (TS-STC Sump Test System) certification (exp. 4/28/2018). The USTs are steel tanks manufactured by Modern Welding. Test protocol was vacuum testing the tank annular spaces @ 10" Hg for 2 hours. Results: - Tank N1011U001 (East tank) = Testing underway at end of inspection. - Tank N1011U002 (Center tank) = PASS - Tank N1011U003 (West tank) = PASS The underground product piping is double-wall Western Fiberglass flexible pipe. Test protocol was pressure testing the secondary containment pipe @ 5 p.s.i. for 1 hour. Results: - Tank N1011U001 Fuel Supply Line = Visual FAIL due to defective test boot. [Truncated]

This inspection began on 10/1/2015 with facility walk-through and concluded today. The most recent electronic submittal of Hazardous Materials Business Plan (HMBP) information via California Environmental Reporting System (CERS) website for AT&T Corp. - CAK166 (CERSID 10420972) was made on 3/22/2013. Submittal was "Accepted" on 4/8/2013. Per Rose Blackmer, the equipment and backup power batteries owned by AT&T Corp. with the Facility ID CAK166 is now being operated by Pacific Bell Telephone Company dba AT&T California. Disclosure of those batteries has been incorporated into the HMBP for AT&T California Site N1011 (CERSID 10091848) as part of an internal reorganization that occurred in 2014. The HMBP permit that was issued to AT&T Corp. CAK166 will be inactivated.

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Heating Oil / Fuel Oil  
Site History: UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately

Case Worker: TLF  
RB Case Number: 14-294  
Local Agency: SANTA CLARA COUNTY LOP  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 07S1E08F01f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: 1985 In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain 740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collected and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted. In November 2010, air sparge feasibility testing and vapor extraction feasibility testing was conducted. High concentrations were reported in the recovered soil vapor, which demonstrates mass is

still present in areas near the building onsite. CAP to do SVE, AS and GWE at the site was approved 5/1/13. Delays have been encountered with obtaining necessary permits for the City of San Jose Building department. Proposed remedial action should be successful in reducing the mass remaining near and possibly under the onsite building.

Local Case Number: 07S1E08G02f  
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Diesel, Gasoline  
Site History: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to include determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

Violation Date: 03-07-2014  
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637

Violation Description: Failure to comply with one or more of the following: conduct secondary containment testing, within six months of installation and every 36 months thereafter, conducted in accordance with proper practices, protocols, or test methods.

Violation Notes: Returned to compliance on 04/10/2014.

The

last secondary containment testing report on file was after a repair/install that was done on 3/11/2013. Newly installed secondary containment systems must be tested again at 6 months. Have the secondary containment tested or supply more recent testing report showing that the 6 month interval has not been exceeded.

Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.

Violation Notes: \_\_\_\_\_ The DUSTO  
Monthly Inspection Report for 11/7/2016 incorrectly listed N/A to the question of whether secondary containment tests have been completed within the required timeframe. Additionally, the DUSTO Inspection Report from 4/4/2016 incorrectly listed N/A to the question of whether each alarm for the previous month has been responded to appropriately (alarms occurred due to annual monitoring system certification and the correct answer should be yes ).

Violation Description: Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).  
Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

Violation Notes: \_\_\_\_\_ Facility  
did not submit a complete HMBP to CERS as noted in the 3/24/2015 Notice of Inspection (NOI). Ensure all items noted in the 3/24/2015 inspection report are addressed and submit a complete HMBP to CERS. Ensure the HMBP is properly updated within 30 days of changes to personnel, chemicals stored or operations. Ensure the HMBP is certified at least annually. Complete the response to the 3/24/2015 NOI and submit with the response to today's report. A copy of the 3/24/2015 NOI was delivered during the inspection.

Violation Description: 16, Section(s) 2641(a)  
Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: \_\_\_\_\_ The  
Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensor s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. However, ensure that the sensor remains in the proper location.

Violation Notes: This is an uncorrected violation. Permit application information submitted via CERS on 3/13/2018 still identifies the UST Operator as San Jose Marriott, which appears to be an unregistered fictitious business name, not the name of a legal entity. Property records identify the owner of the real estate on which the hotel is located as CWI 2 San Jose Hotel LP / Ryan LLC since 5/10/2013 when the property was purchased from PR SJM Hotel LLC. Correct and resubmit the UST Facility Information in CERS. Along with your written response to this Notice of Violation, include an explanation of the current and historic relationships between Marriott International Inc., CWI 2 San Jose Hotel LP, CWI 2 San Jose Hotel GP LLC, Ryan LLC, SP6 San Jose Hotel Owner LLC, SP6 San Jose Hotel Lessee LLC, and SP6 TRS LLC (i.e., parent/subsidiary and/or partnership relationships, and exactly who currently owns and operates the hotel and the UST).

Secondary piping pressure test ports for supply line and return line in the tank top piping sump are pointed upwards. Brass compression fittings on the secondary piping for the flexible supply and return lines must be reoriented so that the test valve openings point downward. the piping sump, the Schrader valves were not removed from the test boots/fittings, therefore not allowing any potential leaks to be seen by the sump sensor. Have the Schrader valve assemblies removed by a UST Technician and ensure they are removed after secondary containment testing. -The VR -208 sensor in the day tank secondary containment on the 27th floor that monitors the secondary of the fuel supply and return lines is not connected to the Veeder-Root TLS-300C panel, but a remote annunciator/light in the engineering office which is not approved for use with UST systems. Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: The facility has not reviewed and submitted a complete HMBP on CERS since 2/21/2014, as noted in the 3/24/2015 and 3/22/2016 Official Notice of Inspection Reports. Ensure all items noted in the 3/24/2015 inspection report are addressed and submit a complete HMBP to CERS. Ensure that the HMBP is properly updated within 30 days of changes to personnel, chemicals stored, and operations. Ensure that the HMBP is certified at least annually and all hazardous materials/wastes at or above HMBP reportable thresholds are included. Violation Description: Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).

Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. The valve cores and plugs were removed today during this inspection. Ensure that the lines remain free to drain into monitored sumps when not undergoing triennial pressure testing.

Violation Notes: \_\_\_\_\_ The Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensor s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: This is an uncorrected Class I violation originally cited on 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line in the tank top piping sump are pointed upwards. Brass compression fittings on the secondary piping for the flexible supply and return lines must be reoriented so that the test valve openings point downward. Have a qualified contractor perform this work. (Note: Original supply and return lines have been disconnected inside the tank top piping sump.)

Inspection began on 3/13/2018 and finished today. On site yesterday with Greg Breshears of HMCDD to witness the annual monitoring system certification performed by Brent Bowen of Tanknology Inc. Verified Mr. Bowen's ICC (#8211862, expires 6/23/19), and Veeder Root (#B48215, expires 4/26/19). 1 tank : Diesel The UST system s piping is a conventional suction system. Observed testing of the following components yesterday: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR 794380-208) - 1 Piping Transition Sump sensor (VR 794380-208) - 1 Pump Room sensor (VR 794380-208) All sensors listed above provided audible and visual alarms when tested. The spill bucket was tested using Tanknology's Vacuum testing apparatus. The spill bucket held at 30" water column for 60 seconds without loss. The diesel tank uses mechanical overflow prevention valve in the drop tube. The unburied fuel piping connected to the emergency generator tank [Truncated]

Violation Notes: and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained. \_\_\_\_\_ The DUSTO

Monthly Inspection Report for 11/7/2016 incorrectly listed N/A to the question of whether secondary containment tests have been completed within the required timeframe. Additionally, the DUSTO Inspection Report from 4/4/2016 incorrectly listed N/A to the question of whether each alarm for the previous month has been responded to appropriately (alarms occurred due to annual monitoring system certification and the correct answer should be yes ).

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: \_\_\_\_\_ One black

55 gallon drum labeled only as Diesel 55 gallons 9-4-12 was observed next to the day tank in the emergency generator room on the 27th floor. Ms. Walker stated that she was unsure of the drum s contents. A hazardous waste determination must be conducted on the drum s contents. Determine if the contents are still usable or a waste. If determined to be a waste, determine whether the contents are a hazardous waste using generator knowledge or through laboratory testing as outlined below. If determined to still be usable contents, adequately label the container within 10 days. Provide documentation of the waste and hazardous waste determinations to HMCD for review.

Violation Description: UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system.  
Violation Notes: Secondary pipe for new supply line was found to be full of fuel when Schrader valve core in the tank top piping sump was removed today. Released fuel was also observed pooled in the piping transition sump. Released fuel was pumped out of the sumps today. Disregard directive below to immediately cease storing hazardous materials in the UST, but investigate the cause of the releases and obtain a repair permit as directed below. [Note: This project can be done as an amendment to existing pipe repair Service Request # SR0842955 for which the repair permit fee was paid on Invoice # IN1037896 by CalPhase Construction, Inc.]

Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the UPA, for the life of the UST.

Violation Notes: This is an uncorrected Minor violation that has been elevated to Class II. No Monitoring System Certification forms, spill bucket test reports, reports documenting periodic secondary containment testing, or other UST system maintenance records are available on-site. Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.

Violation Notes: This is a violation originally cited on 3/20/2017, 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line have had their valve cores removed as required to allow drainage of the secondary lines into the monitored sump, but valves for both lines appeared to be in the closed position at the time of inspection, isolating them from the fuel in the UST. Ms. Walker stated during the inspection that repairs have been made, but no records are available to document any repairs. Submit documentation showing how, when, and by whom any repairs to these lines were made. (Note: No work plan was submitted as directed in the 3/20/2017 Official Notice of Inspection.)

Violation Notes: \_\_\_\_\_ Diesel was observed to be pooling the piping sump and pipe transition sump during today s inspection. In aggregate, approximately 0.5 gallons of diesel was removed from the piping sump and pipe transition pump. Violation Description: Failure to maintain secondarily contained piping to allow liquid in  
the event of a leak to drain into sump (i.e. failure to remove test  
boot, pipe swelling).

Violation Notes: Schrader valve secondary piping pressure test ports for both supply  
lines and both return lines in the tank top piping sump had valve  
cores left installed after last secondary containment test. Secondary  
piping for the new supply and return lines were similarly plugged in  
the piping transition sump. This prevented the secondary pipes from  
draining into the monitored sumps. The valve cores and plugs were  
removed today during this inspection. Ensure that the lines remain  
free to drain into monitored sumps when not undergoing triennial  
pressure testing.

Violation Notes: \_\_\_\_\_ The  
Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensor s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Inspection began on 3/13/2018 and finished today. On site yesterday with Greg Breshears of HMCD to witness the annual monitoring system certification performed by Brent Bowen of Tanknology Inc. Verified Mr. Bowen's ICC (#8211862, expires 6/23/19), and Veeder Root (#B48215, expires 4/26/19). 1 tank : Diesel The UST system s piping is a conventional suction system. Observed testing of the following components yesterday: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR 794380-208) - 1 Piping Transition Sump sensor (VR 794380-208) - 1 Pump Room sensor (VR 794380-208) All sensors listed above provided audible and visual alarms when tested. The spill bucket was tested using Tanknology's Vacuum testing apparatus. The spill bucket held at 30" water column for 60 seconds without loss. The diesel tank uses mechanical overflow prevention valve in the drop tube. The unburied fuel piping connected to the emergency generator tank [Truncated]

Eval Notes: On site to witness the annual monitoring system certification and spill bucket test performed by Mr. Michael Gathright (certifications current) of Petro-Analytical. UST is a conventional suction system for an emergency generator. The annular and 3 sump sensors (piping sump, transition sump from loading dock down to pump room and pump room floor containment) were tested in water and provided audible and visible alarms. The spill bucket was hydrostatically tested for one hour with no loss. Observed the schrader valves removed from all of the test boots and brass connections. Observed the reducer fitting on the supply line removed at the transition sump. A copy of the 3/24/2015 Notice of Inspection was delivered with this report. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation and daily Emergency Generator Tank System unburied piping inspection logs. NOTE: Secondary containment (SB989) testing is due in [Truncated]

The approximately 0.65-acre Site is located at 235 West Julian Street near the intersection of Terraine Street and West Julian Street in San Jos, California in a commercial/light industrial area. The Site was occupied by Ropers Fruit Packing Depot in 1891; Bean Spray and Pump Company (with on-Site spray mixing, spray storage and machine shop activities) in 1915; a U.S. Government Warehouse in 1950; and foundry and lithograph businesses in 1969. A 2005 SECOR environmental

investigation (Phase I and II) revealed elevated metal concentrations (arsenic, chromium, copper, lead, nickel and zinc in the upper 2 feet of soil. Diesel ranged petroleum hydrocarbons also were at depths ranging from 15 to 20 feet. Secor also reported elevated diesel ranged petroleum hydrocarbons in ground water (SB-8 @ 12,000 ppm). The results of the human health risk assessment indicated that potential on-Site construction workers and potential future residents will not incur significant carcinogenic or noncarcinogenic health effects via indoor and outdoor inhalation of the Chemicals of Concern in soil, soil vapor and ground water. The Site is zoned for commercial/industrial use but will be rezoned to high density residential use. The proposed Site use is for a 10 to 16 story residential tower. Construction is planned to commence in 2014 but could be as early as 2011. The discharger is proposing capping the Site with the development effectively limiting exposure to future residents.

Potential Contaminants of Concern: Not reported  
Site History: August 2018 Block BF LLC is planning to construct a 5-story podium-style apartment building with one full level of ventilated, subterranean parking. Prior commercial operations at the site date back to 1884 and have included underground storage tanks, oil water separators, associated piping, a railroad spur(s), and manufacturing of specialty bicycle parts. The Regional Water Board has issued several no further action letters for parcels within the site when the site was zoned for commercial use. Block BF LLC has submitted a vapor intrusion mitigation system (VIMS) VIMS Design Report that includes the following elements: Excavation of soil at the entire site to approximately 10 feet below ground surface (bgs) to allow for the subterranean parking Excavation of soil at the elevator pit locations to approximately 15 feet bgs Vapor barrier under the entire building footprint Vapor collection system installed beneath the vapor barrier with 50 spacing Ventilation risers to the roof fitted with active fans on the rooftop Implementation of a construction quality assurance plan under the oversight of VIMS design engineer Subslab sampling layer and four subslab sampling points Two rounds of indoor air and subslab sampling at four locations Submittal of a VIMS completion report and O&M plan

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: Reviewed inspection documents for hazardous materials storage areas, including results from the Laboratory Safety Audit checklist from the Spring 2015 semester. The Laboratory Safety Audit program does not include a mechanism to document closure of action items. It is recommended that a tracking system be implemented immediately to demonstrate compliance with applicable State and County requirements for managing hazardous materials. The following violations were corrected during the inspection; no further action is required.  
22G020: MARKING OF HAZARDOUS WASTE --Room 9: observed 2-containers missing the accumulation start date was missing; the date was added to the labels. --Room 435: 1x1 gallon container of hazardous waste not labeled; container was labeled. 22G022: CONTAINER COMPATIBILITY --Room 207: a licorice container was being used to collect solvent wipes contaminated with acetone; waste was repackaged in a glass container.

Violation Date: 09-15-2014  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/15/2014. Mechanical overfill prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats

Returned to compliance on 09/15/2014. Mechanical overflow prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats and all other mechanical components and reinstalled in the tank fill opening today. No permit or other corrective action is required.

Violation Date: 09-15-2014  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/15/2014. Mechanical overflow prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats and all other mechanical components and reinstalled in the tank fill opening today. No permit or other corrective action is required.

Julian Street, bounded on the west by the Guadalupe River, on the east by the Guadalupe Parkway (Route 87), on the north by the Union Pacific Railroad, and on the south by West Julian Street. The Site is under development by Sobrato Development Companies (SDC), the current owner. Two buildings and a parking structure have been completed. Construction on a third building was discontinued prior to completion due to economic reasons. FMC and predecessor companies occupied the Site from the early 1900s through 1986. Manufacturing operations, including production of agricultural machinery, food-processing equipment, and military tracked vehicles, occurred at the Site beginning in the early 1900s. Manufacturing operations at the Site ceased in 1986 and the facility was leased for warehousing and other storage purposes. In June 1998, FMC sold the property to SDC. FMC initiated environmental investigations at the Site in 1986. Soil sampling in former manufacturing and product storage areas revealed the presence of petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. Further investigations included the installation of groundwater monitoring wells that detected VOC constituents in two shallow water-bearing zones beneath the Site. Quarterly groundwater monitoring was conducted from the third quarter of 1989 through the first quarter of 2001. Semi-annual groundwater monitoring and reporting began in April 2001. On June 21, 1989, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Order Number 89-107, Site Cleanup Requirements for FMC Corporation-Ground Systems Division, 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 1989). On August 15, 1990, Order Number 90-122 (RWQCB, 1990) was adopted by the RWQCB, amending Order Number 89-107 with respect to the adoption of final Site cleanup levels. On January 21, 1998, Order Number 98-006 was adopted (RWQCB, 1998) for the Site, amending Orders 89-107 and 90-122 with respect to revising soil cleanup standards and adding additional tasks to protect groundwater and address risks associated with exposure to residual soil contamination. On March 21, 2001, Order No. 01-031, Final Site Cleanup Requirements and Rescission of Orders Nos. 89-107, 90-122, and 98-006 for FMC Corporation, for the property located at 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 2001) was adopted by the RWQCB. This annual compliance report is being submitted to the RWQCB as required by Order No. 01-031, Provision D.5. FMC implemented VOC source removal using a Soil Vapor Extraction system in the southwest portion of the Site from 1991 through March 1994. In addition, a groundwater extraction and treatment system for the A-level aquifer operated at the Site from March 1992 through January 1997, when it was discontinued due to changed groundwater flow directions, limited mass removal over time, and completion of effective source removal. Authorization to discontinue operation of the groundwater extraction and treatment system was given by the RWQCB in their letter to FMC, dated January 2, 1997 (RWQCB, 1997). The RWQCB documented the achievement of meeting the Site soil cleanup goals for chlorinated solvents in prior Order No. 98-006. FMC performed a natural attenuation evaluation in 2000 (HSI GeoTrans, 2000) to consider methods of remediating the residual VOCs present in Site groundwater. The evaluation concluded that VOC degradation could be accelerated through the introduction of an electron donor that would enhance the biodegradation. Cheese whey was selected as the electron donor material, and, in accordance with Task C.2. of Order Number 01-031 and the Work Plan for In-Situ Bioremediation Using Cheese Whey Injection (Work Plan) dated May 30, 2001 (GeoTrans,

2001), cheese whey injection was conducted at ten Site monitoring wells and piezometers in July 2001 to enhance biodegradation of VOCs in groundwater. Additional cheese whey was injected at nine monitoring wells and piezometers in May 2003 to increase the in-situ reactive zone and further promote an environment for biodegradation. Groundwater sampling was conducted to evaluate the effectiveness of enhanced biodegradation on a monthly basis from September through December 2001, and on a semi-annual basis from March 2002 to March 2005. Discharger was urged to evaluate the site for case closure under the low threat closure criteria in February 2015.

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Jarrod Cooke (certifications current) of Tanknology. The annular, sump, and under dispenser containment (UDC) sensors were tested in water and provided audible and visible alarms except as noted above. The sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI and provided audible and visible alarms and turbine shutdown. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill buckets are direct buried and passed a vacuum test at 30 inHg. The same issue noted in the 2015 inspection report with the L2 and L4 alarms not clearing occurred today. Maintenance records of another company troubleshooting the issue after the prior monitoring [Truncated]

Eval Notes: On-site to witness the underground storage tank system secondary containment (SB989) testing performed by Mr. Jarrod Cooke (certifications current) of Tanknology. Product piping is flexible pipe and the secondary was tested at 5 psi for one hour with no loss. The annular space of the tanks were tested at 10 inHg for one hour. The regular passed one hour with no loss. The Super test could not be completed due to time constraints. The piping sumps and under dispenser containment (UDC) were tested with a Tanknology VPLT accelerated test. The sumps passed a 30 minute test and the UDCs passed a 15 minute test. Contact our office at least two days prior to testing the Premium tank annular space. Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 05/30/2012  
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment Agency (SJRA) acquired 22 parcels in a former industrial area in downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifiers, and drums.

Completed Document Type: Site Screening  
Completed Date: 12/27/1991  
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHD) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 01/20/2017  
Comments: DTSC reviewed several Phase I Environmental Site Assessment reports as well as Limited Soil Sampling and Analysis Reports prepared for the site. Organochlorine pesticides and metals were detected at relatively low concentrations in soil samples collected from the site in June 2016. Lead was detected in 8 soil samples at concentrations greater than DTSC's screening level for residential land use. The lead screening exceedances were localized and limited in extent, with most of the exceedances at 1.5 feet below ground surface (bgs), with one exceedance at 3 feet bgs. The lead-impacted soil was removed when excavation for the construction of an underground parking garage occurred. The lead- and arsenic-impacted soil was disposed at Republic Services Newby Island Landfill in Milpitas, California. DTSC concluded that no further action is required at the Site and that the planned residential development is acceptable.

Comments: DTSC reviewed several Phase I Environmental Site Assessment reports as well as Limited Soil Sampling and Analysis Reports prepared for the site. Organochlorine pesticides and metals were detected at relatively low concentrations in soil samples collected from the site in June 2016. Lead was detected in 8 soil samples at concentrations greater than DTSC's screening level for residential land use. The lead screening exceedances were localized and limited in extent, with most of the exceedances at 1.5 feet below ground surface (bgs), with one exceedance at 3 feet bgs. The lead-impacted soil was removed when excavation for the construction of an underground parking garage occurred. The lead- and arsenic-impacted soil was disposed at Republic Services Newby Island Landfill in Milpitas, California. DTSC concluded that no further action is required at the Site and that the planned residential development is acceptable.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SW
Site Name:	River Park Development-Lincoln Props
Site EPA ID Number:	CAD981676430
Surficial Aquifer Flow Dir.:	SW. THIS FLOW APPLIES TO THE "A" AQUIFER.
Measured Depth to Water:	approximately 22 feet in the surficial "A" aquifer and approximately 95 feet in the underlying "B" aquifer.
Hydraulic Connection:	A silty clay layer separates the "A" and "B" aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### ROCK STRATIGRAPHIC UNIT

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
