Re: 5-Year Budget Projections for Federated

Dear Members of the Board:

The purpose of this letter is to provide estimated future contributions expected to be required of the City of San José to the City of San José Federated City Employees' Retirement System (Pension) and the City of San José Federated City Employees' Health Care Plan (OPEB) for the next five years. As requested, these projections do not reflect any changes due to Measure F. This letter shows the projections with the current frozen OPEB contribution rates and shows the amounts separately for Tier 1 and Tier 2. This letter provides the projected City pension contributions for Tier 1 separately for normal cost (including expenses) and payments toward the Unfunded Actuarial Liability (UAL).

The table below summarizes our estimated contribution amounts and contribution rates as a percent of payroll assuming contributions are made throughout the fiscal year. In addition, as requested, we have attached 20-year projections of City pension contributions.

San José Federated City Employees' Retirement System and Health Care Plan							
FYE	Payroll	Pension		OPEB		Total

Please note that these projections are based on the June 30, 2016 actuarial valuations, and assume that all assumptions were exactly met since June 30, 2016, and are exactly met each and every year into the future. In reality, experience will deviate from the assumptions with the expectation that overall favorable deviations will be offset by unfavorable deviations over time. Finally, except as noted above, we have not adjusted the projections for any events, transactions

or experience, including investment experience, after June 30, 2016. If the Board or the City is aware of any significant event since June 30, 2016 that could alter these projections, please let us know. Please refer to the valuation reports for a description of the plan provisions, a summary of the data, a summary of the methods and assumptions used in each of the valuations, and additional disclosures that also apply to the projections reported in this letter.

The tables below summarize the estimated contributions by tier assuming they are made throughout the year.
