

Report of Phase I Environmental Site Assessment

Great Oaks Boulevard Parcels
San Jose, California

Prepared for:

EQUINIX

One Lagoon Drive, 4th Floor
Redwood City, California 94065

Prepared by:

Amec Foster Wheeler Environment & Infrastructure, Inc.

1670 Corporate Circle, Suite 101
Petaluma, California 94954

February 23, 2015

Project No. 8415180020

**Report of Phase I Environmental Site
Assessment**

Great Oaks Boulevard Parcels
San Jose, California

February 23, 2015
Project 8415180020

This report was prepared by the staff of Amec Foster Wheeler under the supervision of the Environmental Professional whose signatures appear hereon.

The findings, recommendations, specifications, or professional opinions are presented within the limits described by the client, in accordance with generally accepted professional engineering and geologic practice. No warranty is expressed or implied.

REPORT OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

Great Oaks Boulevard Parcels

San Jose, California

1.0 EXECUTIVE SUMMARY

PROPERTY NAME: Great Oaks Boulevard Parcels

LOCATION: San Jose, California

This executive summary is provided for convenience and should not substitute for review of the complete report, including all attachments.

Amec Foster Wheeler Environment & Infrastructure, Inc. (Amec Foster Wheeler) conducted a Phase I Environmental Site Assessment (ESA) at the property located at the intersection of Great Oaks Boulevard and Santa Theresa Boulevard in San Jose, California (the Site). The Phase I was conducted in material compliance with the scope and limitations of American Society for Testing and Materials (ASTM) E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report.

Based on the data collected during the assessment, our findings and conclusions are summarized as follows:

1.1 ON-SITE

The 33.8-acre Site is currently a vacant lot with no structures present onsite. Several utility boxes (City owned) and monitoring wells related to the offsite environmental investigation associated with the Fairchild facility are the only improvements on the Site.

The Site was not identified on lists reviewed by Environmental Data Resources (EDR).

Based on historical topographic maps, the Site appears as undeveloped land as early as the early 1900's and appears as orchards in a 1939 aerial photograph, which is the earliest readily available aerial photograph. It cannot be determined if the Site was agricultural prior 1939. With the exception of several farm structures, the Site use is agricultural through the present day. The farm related structures were removed from the Site sometime between 1998 and 2005.

No recognized environmental conditions (RECs) were identified in connection with the Site.

1.2 OFF-SITE

Surrounding land use is light industrial with residential areas to the southwest of the property. Directly to the northeast, the property is bound by Via Del Oro (Boulevard); four light industrial office buildings and a vacant lot are present beyond Via Del Oro. Directly north of the Site

Amec Foster Wheeler

(across the intersection of Via Del Oro and San Ignacio Avenue) are the San Jose offices for Northrop Grumman. Three office buildings occupied by Semiconductor Tooling Services (STS), Semifab, Inc., Seminet Automation, Inc., Battle Precision Manufacturing, Inc., Keller Williams Realty, and United Administrative Services are located to the southeast of the Site across Great Oaks Boulevard. Single-family residences are present across Santa Teresa Boulevard southwest of the Site. Properties to the northwest of the Site consist of light industrial and business offices and include Exact Bid, EnGeo, AmTech Microelectronics, and Modutek Corporation.

The surrounding properties were undeveloped from at least 1939 until approximately 1974 when residential development began south-southwest of the Site. Industrial development of the surrounding area began in approximately 1982.

The former Fairchild Site (also listed as Shell Service Station in the EDR) present at 101 Bernal Road is located approximately 0.22 miles east-southeast and hydraulically downgradient from the Site and is suspected of previously impacting groundwater below the Site. However, based on the latest groundwater monitoring data and a Phase II investigation conducted at the Site in 2006, this release is no longer considered an environmental concern for the Site. By definition, the former Fairchild facility is considered a controlled REC.

Dastek is located at 6580 Via Del Oro Boulevard immediately north-northeast and cross- to downgradient of the Site. According to Geotracker records (geotracker.waterboards.ca.gov), there are no records of sources (i.e. underground storage tanks [USTs]) or releases for the property and the case was closed (May 3, 1989) the same day it was “discovered.” It is Amec Foster Wheeler’s opinion that the case originally assigned to Dastek was associated with the Fairchild case. Based on the regulatory status of the Dastek property it is not expected to result in a REC that would affect the subject Site.

AT&T Mobility is located at 6578 Santa Theresa Boulevard and is immediately south-southwest and upgradient of the Site. According to Geotracker records, the responsible party for this property was the Oak Grove School District and the source of the release was a leaking diesel UST that was identified in August 1987. The UST was subsequently removed, the impacted soil excavated, and case closure was granted on June 13, 1996. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the Site.

Pacific Gas and Electric Company (PG&E) located at 6402 Santa Theresa Boulevard is immediately west and upgradient of the Site. According to Geotracker records, the source of the release was leaking USTs that were identified in December 1990 during UST removal at the property. The impacted soil was excavated and the San Francisco Bay Regional Water Quality Control Board (Water Board) determined there was not a threat to groundwater from Amec Foster Wheeler

the past release and case closure was granted on January 17, 1992. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the Site.

1.3 CONCLUSIONS

Based on the information made available to Amec Foster Wheeler or obtained during the assessment of the subject property, Amec Foster Wheeler offers the following conclusions:

- The former Fairchild Site is suspected of having previously impacting groundwater below the subject Site. However, based on the latest groundwater monitoring data and a Phase II investigation conducted at the subject Site in 2006, this release is no longer considered an environmental concern for the Site and no further assessment is warranted.

2.0 INTRODUCTION

On behalf of EQUINIX, Amec Foster Wheeler has completed a Phase I ESA for the property consisting of Assessor Parcel Numbers (APNs) 706-0-053, 706-0-054, 706-0-055, and 706-0-056 located at the intersection of Great Oaks Boulevard and Santa Theresa Boulevard in San Jose, California.

The purpose of the Phase I ESA was to identify environmental concerns, RECs, and business environmental risks in connection with the parcels, based on readily available information and Site observations.

This assessment was performed substantially as outlined in our proposal numbered 15PROPINDC.0000 dated January 8, 2015. Written authorization was received from Mr. Stuart Thompson of EQUINIX on January 13, 2015.

2.1 BACKGROUND

The Phase I ESA performed at the Site is intended to provide EQUINIX with information regarding the environmental liabilities of the Site prior to the completion of the potential acquisition of the property.

2.2 PROCEDURES

The Phase I ESA was performed using the ASTM Practice E 1527-13. This practice was developed to address “all appropriate inquiry” as defined by the U.S. Environmental Protection Agency (EPA). Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report.

The following services were provided for the assessment:

- A qualitative hydrogeologic evaluation of the Site and vicinity using both published topographic and geologic maps and area observations to characterize the area drainage.

- A review of the history of the Site using readily available standard historical sources and an interview with an owner's representative.
- A review of available environmental reports published by state and federal agencies to determine if the Site or properties within specified search distances are listed as having a present or past environmental problem, are under investigation or are regulated by state or federal environmental regulatory agencies.
- A Site and adjacent property reconnaissance to look for surficial indications of activities involving hazardous substances and petroleum products.
- Preparation of this report presenting our findings and conclusions.

This Phase I ESA did not include ASTM non-scope items such as sampling or evaluating buildings for lead-based paint, radon, asbestos-containing materials or ambient air quality, identifying ecological conditions, compliance issues, health and safety issues or testing of the soil, air, surface water, drinking water, or groundwater for chemical contaminants.

2.3 QUALIFICATIONS

2.3.1 Limitations

The findings and opinions presented in this Phase I ESA are relative to the dates of our Site work and should not be relied on to represent conditions at substantially later dates.

The opinions included herein are based on information obtained during the study and our experience. If additional information becomes available which might impact our environmental conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted. If this assessment included a review of documents prepared by others it must be recognized that Amec Foster Wheeler has no responsibility for the accuracy of information contained therein.

Although we have to identify the potential for environmental impacts to the subject property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at the Site. This would require additional exploratory work, including sampling and laboratory analysis.

2.3.2 Definitions

ASTM E 1527-13 defines a "recognized environmental condition" (REC) as: the presence or likely presence of any hazardous substances or petroleum products in, on, or at a site: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the

environment. *De minimis* conditions are not RECs. A *de minimis* condition generally does not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Separate and distinct from a REC are two other types of conditions that may be noted in a Phase I ESA: a controlled REC (CREC) or an historical REC (HREC).

A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the current satisfaction of the applicable regulatory authority (for example, as evidenced by a no further action [NFA] letter or the equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls, such as site use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls.

An HREC is a REC from a past release of hazardous substances or petroleum products that has occurred in connection with the Site and has been addressed to the satisfaction of the applicable regulatory authority (using current criteria) or meets the unrestricted residential use criteria established by the regulatory authority and applicable at the time of this Phase I ESA without subjecting the Site to any required controls.

2.3.3 User Reliance

This report is intended for the use of EQUINIX only, subject to the contractual terms agreed to for this project. Reliance on this document by any other party is prohibited without the express consent of EQUINIX and that party's execution of mutually agreeable terms and conditions with Amec Foster Wheeler. Use of this report for purposes beyond those reasonably intended by EQUINIX and Amec Foster Wheeler will be at the sole risk of the user.

2.3.4 Significant Assumptions

Amec Foster Wheeler made no significant assumptions during the Site "walk-over."

2.3.5 Exception s/Data Gaps

One data gap (interview of current Site owner) was identified, but the data gap did not affect Amec Foster Wheeler's ability to identify RECs for the Site.

2.3.6 Deviations/Deletions

No deviations or deletions were encountered.

2.4 PREVIOUS ENVIRONMENTAL DOCUMENTS

Amec Foster Wheeler reviewed two previous environmental documents in relation to environmental conditions at the Site which were provided by EQUINIX:

Phase 1 Environmental Site Assessment Report for 300 Great Oaks Boulevard, San Jose California prepared by PIERS Environmental Services Inc. (PIERS) dated September 2006

In September 2006, on behalf of Xilinx, PIERS performed a Phase I ESA for the Site. At the time of the Phase I ESA, the Site was unimproved and used for agriculture (hay production). Four shallow wells, one recovery well, and three monitoring wells were the only improvements noted for the Site. These wells were reportedly associated with the groundwater cleanup at the Fairchild facility located approximately 1,500 feet west of the Site. Reports reviewed as part of the PIERS Phase I ESA indicated the groundwater below the Site had been impacted; however, the latest groundwater results indicated that the indicator chemicals 1,1,1-trichloroethane (TCA) and dichloroethene (DCE) had not been detected in onsite groundwater since at least 2001 and that past remedial activities at the Fairchild Facility have reduced concentrations of chemicals of concern to non-detectable levels.

Phase II Sampling Investigation Report, 300 Great Oaks Boulevard, San Jose California prepared by E2C Inc. (E2C) dated December 2006

In November 2006, on behalf of Xilinx, E2C performed an investigation consisting of eight shallow soil borings and three deeper borings to allow collection of grab groundwater samples. Soil samples from the eight shallow borings were analyzed for pesticides while soil and groundwater samples from the deeper borings were analyzed for volatile organic compounds (VOCs). Results of the shallow soil samples contained 4,4-dichlorodiphenyldichloroethylene (4,4-DDE) just above the laboratory reporting limit in six of eight samples at concentrations between 0.089 and 0.14 milligrams per kilogram (mg/kg), which is below the environmental screening level of 4.0 mg/kg for 4,4-DDE. No VOCs were detected in the soil samples. TCA (1.7 micrograms per liter; µg/L) and toluene (0.63 µg/L) were detected in groundwater samples at concentrations below their respective Environmental Screening Levels of 62 and 40 µg/L, respectively.

Based on the results of the soil and groundwater sampling, no further sampling was recommended at the Site.

3.0 SITE SETTING

Understanding of a Site's physical setting is important to the recognition of environmental impacts to the property.

3.1 GENERAL DESCRIPTION

The Site is currently undeveloped. The Site is located in a mixed commercial and light industrial area with some residential areas to the south of the Site.

The Site is located in area with relatively flat topography.

3.2 HYDROGEOLOGY

A consideration of surface and subsurface drainage and geology are of interest because they provide an indication of the direction that contaminants, if present, could be transported. The term "upgradient" refers to a location hydraulically upstream of the Site.

Amec Foster Wheeler reviewed the following information in regard to the geology and hydrogeology of the Site and surrounding area:

- *USGS Topographic Map, Santa Theresa Hills Quadrangle*, dated 1968
- Department of Water Resources (DWR), 1967. *Evaluation of Groundwater Resources: South Bay, Volume 1: Geologic and Hydrologic Data. Bulletin No. 118.1*. August.
- *EDR Radius Map Report with Geocheck[®], Xilinx Site, San Jose, CA, Inquiry Number: 4183068.2s* dated January 15, 2015

3.2.1 Geologic Setting

Based on review of the geologic data, the Site is in the central portion of the Santa Teresa Groundwater Basin, an alluvium-filled bedrock basin bounded to the northeast, northwest, and southwest by bedrock hills (Diablo Range, Edenvale Ridge, and Santa Teresa Hills). It is bounded to the southeast by the Coyote Narrows, to the northwest by Edenvale Gap, and to the west by the Guadalupe River. Sediments in the Basin consist of Quaternary alluvial units, underlain by bedrock. The alluvial units thin toward the hills. The alluvium consists of deposits of more permeable sand and gravel zones separated by less permeable deposits of clay.

The Site has a topographic elevation of approximately 200 feet above mean sea level (MSL).

3.2.2 Groundwater

The direction and movement of groundwater through soil is dependent on soil type and the presence of relict structures and textures of the underlying rock. Fractures, faults, folds and foliation planes affect the migration of groundwater in rock. It is reasonable to assume that the direction of near-surface groundwater flow under static conditions (no pumping interference) approximates the surface topography of the Site.

Groundwater recharge into the Basin occurs mainly through underflow at Coyote Narrows, and at the Santa Clara Valley Water District (SCVWD) recharge ponds along Coyote Creek. Groundwater exits the Santa Teresa Basin through Edenvale Gap into the San Jose Plain. Groundwater is expected to flow to the east and was encountered at depths of approximately 40 feet below ground surface during the 2006 E2C investigation at the Site.

3.2.3 Wetlands

We evaluated Site conditions for the presence of wetland areas the National Wetlands Inventory (NWI) Map. Wetlands are defined as areas that are sufficiently saturated by surface or groundwater to support a prevalence of vegetation adapted for saturated soil conditions. As such, there are three parameters which are used in determining whether an area is a wetland:

- evidence of wetland hydrology (inundation or saturation of the ground)
- prevalence of hydrophytic (water-loving) vegetation which is capable of living in soils lacking oxygen for at least part of the growing season
- presence of hydric (water-logged) soils

Soils at the Site consist of the Botella silt clay loam, a well-drained soil with moderately course textures and slow infiltration rates.

Based on a review of the NWI Map and observations, wetlands are not located at the Site.

4.0 USER/ OWNER PROVIDED INFORMATION

The following information is based on the Environmental Questionnaire appended to this report.

4.1 TITLE RECORDS

EDR provided Amec Foster Wheeler with a legal description of the Site which is included in Appendix D as part of the Environmental Lien Search Report. The property was owned by Synopsys Inc. until February 2007 when it was transferred to Xilinx Inc. Xilinx Inc. is listed as the current property owner on the lien search report.

4.2 ENVIRONMENTAL LIENS

An environmental lien search was performed by EDR for this assessment. No environmental liens or AULs were identified for the Site (Appendix D). Amec Foster Wheeler's Site contact, Mr. Stuart Thompson, Director, Real Estate – Americas for EQUINIX did not have knowledge of environmental liens held against the property.

4.3 SPECIALIZED KNOWLEDGE

Mr. Thompson indicated he did not have knowledge of past or present environmental concerns at the Site other than what was presented in the previous ESA and Phase II investigative report prepared for the Site.

4.4 COMMONLY KNOWN INFORMATION

Amec Foster Wheeler did not discover commonly known information related to environmental issues with respect to the Site.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Amec Foster Wheeler is not aware of and the Environmental Questionnaire did not indicate knowledge of a reduction in value of the Site due to past or present environmental issues.

4.6 OWNER/PROPERTY MANAGER OCCUPANT INFORMATION

The Environmental Questionnaire did not provide knowledge of past environmental concerns at the Site.

4.7 REASON FOR PERFORMING THE PHASE I

The Phase I ESA performed at the Site is intended to provide the buyer with information regarding the environmental liabilities of the Site prior to the potential acquisition of the Site.

5.0 REGULATORY INFORMATION

On January 22, 2015, Amec Foster Wheeler contacted the Water Board regarding the former Fairchild facility which was the suspected source of impacted groundwater that was previously identified at the Site. Mr. Max Shahbazian, Water Board staff for the Fairchild case, indicated that groundwater monitoring (semiannual) is still taking place; however, all groundwater pump and treat operations were terminated in the late 1990's due to the effectiveness of the slurry wall containment at the former facility. VOC concentrations in soil and groundwater have decreased. No other local sources were consulted based on Amec Foster Wheeler's opinion regarding their usefulness and/or accessibility.

Amec Foster Wheeler reviewed regulatory search information prepared by EDR as contained in Appendix D. The regulatory records search is based on information published by State and Federal regulatory agencies and is used to evaluate if the Site or nearby properties are listed as having a past or present record of actual or potential environmental impact. Please note that regulatory listings include only those sites which are known to the regulatory agencies at the time of publication to be (1) contaminated, (2) in the process of evaluation for potential contamination, or (3) regulated.

5.1 EPA NATIONAL PRIORITIES LIST (NPL)

The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) established the National Priorities List (NPL) of federal "superfund" sites. These are the contaminated sites that have been assigned a high ranking, in terms of potential public health effects, by the EPA.

- The Site did not appear on the NPL.
- One facility was identified on the NPL within a one-mile radius of the Site.

The former Fairchild Site (also listed as Shell Service Station) at 101 Bernal Road is located approximately 0.22 miles east-southeast and hydraulically downgradient from the Site. This facility was discussed above in Section 2.4, and it is suspected that groundwater below the Site had been impacted from the release from this facility. By definition, the former Fairchild facility is considered a controlled REC.

5.2 EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS) LIST

The CERCLIS list identifies documented and suspected contamination sites throughout the nation which were not ranked high enough to be listed on the NPL.

- The Site did not appear on CERCLIS list.
- One facility was identified on the NPL within a one-mile radius of the Site.

The former Fairchild Site was discussed above in Section 5.2, is on the CERCLIS list and was considered to be a controlled REC.

5.3 FEDERAL CERCLIS NFRAP

No Further Remedial Action Planned (NFRAP) is the EPA database of former CERCLIS sites where “no further remedial action is planned” under CERCLA.

- The Site did not appear on the NFRAP list.
- One facility was identified on the NFRAP list within one-half mile radius of the Site.

Magex Corporation at 6850 Santa Theresa Boulevard is located east-southeast and hydraulically downgradient from the Site. This facility was identified as a potential concern in May 1986 and a preliminary assessment was completed in November 1987. Based on the assessment the case was archived. No information was available indicating why the Magex Corporation property was identified as a potential concern. Based on the NFRAP status, this facility is unlikely to result in a REC for the Site.

5.4 RESOURCE CONSERVATION & RECOVERY INFORMATION SYSTEM (RCRIS)

RCRIS is the EPA database of facilities that generate, transport, store, or dispose of hazardous wastes. Generators are found on the Notifiers list. Treatment, Storage and Disposal (TSD) facilities are found on the TSD list.

- The Site did not appear on the RCRIS list.
- Five adjacent facilities were identified on the RCRIS small quantity generators list.
- One facility was identified on the RCRIS TSD list within a one-half mile radius of the Site.

None of the five RCRA-small quantity generators properties have had violations and none appear on lists indicating a release has occurred. Based on the regulatory status of these properties, none are expected to result in a REC that would affect the Site.

The former Fairchild Site was on the RCRIS TSD list and was discussed above in Section 5.2 and is considered to be a controlled REC.

5.5 EMERGENCY RESPONSE NOTIFICATION (ERNS) SYSTEM LIST

The ERNS list is a list of hazardous material spills reported to various State agencies.

The Site did not appear on the ERNS list.

5.6 FEDERAL ENGINEERING/INSTITUTIONAL CONTROLS REGISTRIES

EPA maintains lists of sites with engineering or institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to eliminated pathways for regulated substances to enter environmental media or adversely affect human health. Institutional controls include administrative measures, such as groundwater and land use restrictions intended to prevent exposure to contaminants on a site.

- The Site did not appear on the engineering or institutional controls registries.
- One facility was identified on the engineering or institutional controls registries within one-half mile of the Site.

The former Fairchild Site was discussed above in Section 5.2 and is considered to be a controlled REC.

5.7 STATE INSTITUTIONAL CONTROLS LIST

The State Institutional Controls list documents sites on Public Records Listings that have institutional controls or use limitations in place.

- The Site did not appear on the state institutional controls list.
- One facility was identified on the state institutional controls list within one-half mile of the Site.

The former Fairchild Site was discussed above in Section 5.2 and is considered to be a controlled REC.

5.8 LANDFILL LIST

Lists of active and inactive landfills, artificial fills, and disposal sites are maintained by the California Integrated Waste Board. The landfill listing does not include unpermitted landfills or dumps.

- The Site did not appear on the landfill list.

- No properties were identified on the landfill list within a one-half mile radius of the Site.

5.9 LEAKING UNDERGROUND STORAGE TANK (LUST) LIST

The Leaking Underground Storage Tank list documents UST systems within the State of California which have reported releases of UST contents. This list is maintained by the Water Board.

- The Site did not appear on the LUST list.
- Seven facilities were identified on the LUST list within a one-half mile radius of the Site.

Dastek, located at 6580 Via Del Oro Boulevard is immediately north-northeast and cross- to downgradient of the Site. According to Geotracker records (geotracker.waterboards.ca.gov), there are no records of sources (i.e. USTs) or releases for the property and the case was closed (May 3, 1989) the same day it was “discovered.” It is Amec Foster Wheeler’s opinion that the case originally assigned to Dastek was associated with the Fairchild case and based on the regulatory status of this property it is not expected to result in a REC that would affect the subject Site.

AT&T Mobility is located at 6578 Santa Theresa Boulevard and is immediately south-southwest and upgradient of the Site. According to Geotracker records, the case responsible party was the Oak Grove School District and the source of the release was a leaking diesel UST that was identified in August 1987. The UST was subsequently removed, the impacted soil excavated and case closure granted on June 13, 1996. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the Site.

PG&E (listed twice), located at 6402 Santa Theresa Boulevard, is immediately west and upgradient of the Site. According to Geotracker records, the source of the release was leaking USTs that were identified in December 1990 during UST removal at the property. The impacted soil excavated and the Water Board determined there was not a threat to groundwater from the past release and case closure was granted on January 17, 1992. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the Site.

The remaining three facilities identified on the LUST database are not located adjacent to the Site and are situated hydraulically downgradient from the Site and will not likely results in a REC to the Site.

5.10 REGISTERED STORAGE TANK LIST

The Registered Storage Tank List is a listing of UST systems which are registered with the State of California Water Resources Control Board.

- The Site did not appear on the Registered Storage Tank list.
- Three adjoining facility were identified on the Registered Storage Tank list.

Oak Grove School District and PG&E (listed twice), were discussed above in the LUST section (Section 5.9) and have received closure and are not expected to result in a REC that would affect the Site.

5.11 STATE DRYCLEANERS

A list of drycleaners in California is maintained by the Department of Toxic Substances Control.

- No dry cleaning facilities were identified on or adjacent to the Site.

5.12 HISTORICAL GAS STATIONS AND DRYCLEANERS

Historical auto stations and drycleaners are facilities identified by EDR from categorically searching selected national collections of business directories. Facilities are identified based on categories which might suggest, however not exclusively identify, gas/filling/service stations or dry cleaning establishments.

- No historical auto stations were identified on or adjacent to the Site.
- No historical drycleaners were identified on or adjacent to the Site.

5.13 TRIBAL LISTINGS

The Site is not located within a Native American Tribal Jurisdiction.

5.14 OTHER LISTED FACILITIES

Orphan sites are those sites which are not mapped by EDR due to poor or inadequate address information. No orphan sites were identified during the list search.

Multiple other non-ASTM regulatory lists summarized in Appendix C were reviewed. None of the properties identified on those lists were determined to have a potential to impact the Site. For more information regarding these sites and orphan facilities see the EDR Regulatory Search Information in Appendix D.

6.0 HISTORICAL RECORDS REVIEW

Amec Foster Wheeler reviewed reasonably ascertainable, standard historical sources to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses that could have led to RECs in connection with the Site. Amec Foster Wheeler has attempted to identify the past uses of the Site at intervals defined by ASTM from the present back to the Site's first developed use or 1940, whichever is earlier. Information was obtained dating back to 1919.

Based on historical topographic maps, the Site was undeveloped land as early as the early 1900's and appears as orchards in a 1939 aerial photograph, which is the earliest readily available aerial photograph. It cannot be determined if the Site was agricultural prior 1939. With the exception of several farm structures, the Site use is agricultural through the present day. The farm related structures were removed from the Site sometime between 1998 and 2005.

According to information provided by EDR, the Site was owned by Synopsys Inc. until February 2007 when it was transferred to Xilinx Inc. Xilinx Inc. is listed as the current property owner on the lien search report.

6.1 TITLE RECORDS

EQUINIX did not provide Amec Foster Wheeler with the results of a reasonably ascertainable recorded land title records search for the Site that could be reviewed to identify environmental liens and AULs, if any, that are currently recorded against the Site. However, the environmental lien report provided by EDR did not identify environmental liens or activity use limitations for the Site.

6.2 LOCAL STREET DIRECTORY

EDR completed a local street directory search for 300 Great Oaks Boulevard as a screening tool to assist in evaluating potential liability resulting from past activities on or near the Site. The Site is not listed in the EDR local street directory during the span of the directory. EDR also completed a local street director search for surrounding properties on San Ignacio Avenue, Via Del Oro Boulevard, Santa Teresa Boulevard, and Great Oaks Boulevard.

The local street directory report is summarized below and is included in Appendix D.

Table 1: Street Directory Search Results

Date	Property	Adjoining Properties
2008 and 2006	Not Listed	Oak Grove School District, Microelectronic, Communications XCI
2000	Not Listed	Oak Grove School District, Candescant Technologies
1991	Not Listed	Oak Grove School District, Dastek Corporation, Corvus Systems, Zentec Corporation, Exsil, South Valley Christian Church
1985	Not Listed	Oak Grove School District, Advanced Storage Technology, Cybernex Corporation, Actrix Computer Corporation
1975	Not Listed	Oak Grove School District

Street directory listings for surrounding properties includes a school district office and commercial and light industrial properties. Amec Foster Wheeler’s review of the local street directory records did not identify historical usage that would be considered a REC in connection with the Site.

6.3 AERIAL PHOTOGRAPHS

Aerial photographs are photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities of areas encompassing the Site. Amec Foster Wheeler reviewed available aerial photographs of the Site and surrounding area dated 1939, 1948, 1950, 1956, 1968, 1974, 1982, 1993, 1998, 2005, 2006, 2009, 2010, and 2012. The table below summarizes the information obtained from review of the aerial photographs. It should be noted that Site features may not be discernible on the aerial photographs due to the scale or degree of clarity of a given photograph. Copies of the aerial photographs are included in Appendix D.

Table 2: Aerial Photograph Search Results

Date	Scale	Property	Adjoining Properties
1939	1:500	The Site appears to be part of a larger orchard. Up to five structures which appear to be a farm house and sheds also appear to be present onsite. No parcel boundaries are evident.	The surrounding area is orchard and agricultural fields.
1948	1:500	Same as 1939.	Same as 1939.
1950	1:500	Same as 1939.	Same as 1939.
1956	1:500	Same as 1939.	Same as 1939.
1968	1:500	Additional sheds appear to be present on the property, otherwise no changes are evident.	Some grading on properties to the south-southwest is taking place, otherwise no changes are evident.
1974	1:500	Same as 1968.	Significant residential development has taken place south-southwest of the Site and Santa Teresa Boulevard has been constructed.
1982	1:500	The Site boundaries are now present and the Site is bounded by San Ignacio Avenue, Via Del Oro Boulevard, Santa Teresa Boulevard, and Great Oaks Boulevard. Orchards are present on the north, east, and west portions of the Site; however, the southern portions of the Site have been graded.	The properties to the north, east, and west have multiple large light industrial/commercial structures and associated parking lots present. Grassy fields remain immediately north of the Site.
1993	1:500	Same as 1982.	Additional commercial park development has taken place immediately north, east, and west of the Site.

Date	Scale	Property	Adjoining Properties
1998	1:500	The majority of the Site contains a fallow field except for the northeast corner which has multiple sheds present.	Same as 1993 except for additional commercial park development in the surrounding area.
2005	1:500	The sheds are absent and the Site is a tilled field.	Same as 1998 except for additional commercial park development in the surrounding area.
2006	1:500	Same as 2006.	Same as 2005.
2009	1:500	Same as 2006.	Same as 2005.
2010	1:500	Same as 1982.	Same as 2005.
2012	1:500	Same as 1982.	Same as 2005.

Amec Foster Wheeler's review of the aerial photographs did not identify historical usage that is considered to be a REC in connection with the Site.

6.4 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps of the Site and surrounding area were reviewed for the years 1919, 1947, 1953, 1968, and 1980. The table below summarizes the information obtained from review of the topographic maps. Copies of the topographic maps are included in Appendix D.

Table 3: Historical Topographic Map Search Results

Date	Scale	Property	Adjoining Properties
1919 (2 maps)	1:62500	Undeveloped. Due to the scale of the map specific features are not discernible.	Undeveloped. Due to the scale of the map specific features are not discernible.
1947	1:50000	Same as 1919.	Same as 1919.
1953	1:24000	The Site is depicted as agricultural. Two small structures appear to be within the Site boundary.	The surrounding area is depicted as agricultural. Interspersed structures are depicted.
1968	1:24000	Same as 1953.	Same as 1953.
1980	1:24000	Same as 1947.	With the exception of a residential development south- southwest of the Site, the same as 1953.

Amec Foster Wheeler's review of the historical topographic maps did not identify historical usage that is considered to be a REC in connection with the Site.

6.5 FIRE INSURANCE MAPS

On January 15, 2015, Amec Foster Wheeler requested EDR to search for available Sanborn fire insurance maps. A reply was received on the same day, stating that Sanborn fire insurance map coverage is not available for this area. A copy of the EDR response is included in Appendix D.

6.6 BUILDING DEPARTMENT RECORDS

On January 15, 2015, Amec Foster Wheeler requested EDR to search for available building permits at the Site and surrounding areas. A Building Permit Report was received on January 15, 2015 that indicated no permits were issued for the Site property. A copy of the EDR report is included in Appendix D.

7.0 SITE INFORMATION AND USE

Amec Foster Wheeler performed a Site and vicinity reconnaissance, conducted interviews and reviewed available historical information to evaluate the current and historical uses of the Site and surrounding properties and to evaluate past or present activities of potential environmental concern. Mr. Scott Graham, an environmental professional with Amec Foster Wheeler experienced in conducting ESAs, conducted a Site and area visit on January 20, 2015. The Site reconnaissance was performed on foot and the area reconnaissance was a driving tour on public access roads.

7.1 CURRENT SITE USE

The 33.8-acre site is currently a vacant lot with no structures present onsite. Several utility boxes (City owned) and monitoring wells related to the offsite environmental investigation associated with the former Fairchild facility are the only improvements on the Site. The Site is located in a light industrial area with residential areas to the southwest of the property. Photographs of the Site are included in Appendix B.

The following conditions were specifically assessed for their potential to result in a REC.

7.1.1 Storage Tanks

No evidence of existing USTs or above ground storage (ASTs) tanks was observed on the property.

7.1.2 Hazardous and Petroleum Containers/Drums

Amec Foster Wheeler did not observe any containers or drums on the property.

7.1.3 Unidentified Substance Containers

Amec Foster Wheeler did not observe unidentified substance containers on the property.

7.1.4 Heating/Cooling Fuels and Chemicals

No heating or cooling fuels or chemicals were observed on the Site during Amec Foster Wheeler's reconnaissance activities.

7.1.5 Solid Waste

Amec Foster Wheeler observed small amounts of construction debris and household waste dumped on the Site. Concrete debris, particle board/wooden materials, and what appeared to

Amec Foster Wheeler

be a demolished microwave were noted onsite at the time of the inspection (Photographs 7 and 11).

7.1.6 Sewage Disposal/Septic Tanks

The Site is an empty lot and not currently hooked up to the City sewage system. No evidence of a septic system was observed at the Site at the time of the inspection.

7.1.7 Hydraulic Equipment

No hydraulic equipment was observed onsite during the time of the inspection.

7.1.8 Contracted Maintenance Services

It is unknown whether contracted maintenance services are employed at the Site.

7.1.9 Electrical Transformers

Electrical transformers are a potential source of environmental concern due to the potential presence of polychlorinated biphenyls (PCB) contained in dielectric fluids used in some units. Two electrical transformers, owned by PG&E, (Photographs 8 and 13) were observed in good condition at the Site.

7.1.10 Water Supply and Wells

The Site is currently vacant and no water supply wells are known to be or were observed onsite. Three groundwater monitoring/recovery wells are located onsite (Photographs 4, 5, and 14) that are related to an offsite groundwater investigation at the former Fairchild facility (Section 2.4).

7.1.11 Drains, Sumps, and Pooled Liquids

No drains, sumps, or pooled liquids were observed onsite during the time of the Site reconnaissance. Several storm drains were located on the surrounding streets, all of which were marked as draining to Canoas Creek.

7.1.12 Pits, Ponds Lagoons and Surface Waters

No pits, ponds, lagoons, or other surface waters were noted onsite during the time of the Site reconnaissance.

7.1.13 Stained/Corroded Surfaces

No stained or corroded surfaces were observed onsite during the time of the Site reconnaissance.

7.1.14 Stressed Vegetation

Amec Foster Wheeler did not observe stressed vegetation during the Site reconnaissance.

7.1.15 Odors

Amec Foster Wheeler did not observe unusual odors during the Site reconnaissance.

7.2 PAST SITE USE

Based on historical aerial photographs and notes from a previous ESA conducted for the Site in 2006 (PIERS, 2006), the Site was used as part of an orchard from at least the late 1940s until the early 1980s. Between at least the late 1990s and 2005, the Site was either fallow or used as an agricultural field.

7.3 SURROUNDING LAND USE

Nearby property usage could potentially impact the surface and subsurface conditions of a property. Developing a history of past to present uses or occupancies can provide an indication of the likelihood of environmental concern.

7.3.1 Northeast

Directly to the northeast, the Site is bound by Via Del Oro (street). On the other side of Via Del Oro, the property to the northeast is presently occupied by four light industrial office buildings, and a vacant lot. Two of the buildings northeast of the Site were vacant, and one of these two was undergoing remodeling at the time of the inspection. The other two properties were occupied by Kaiser Permanente (medical clinic) and Linotext, which is a commercial printing and lithographic company according to their website.

Directly north of the Site (across the intersection of Via Del Oro and San Ignacio Avenue) is the San Jose offices for Northrop Grumman.

7.3.2 Southeast

Across Great Oaks Boulevard, the properties to the southeast consist of three office buildings. STS, Semifab, Inc., Seminet Automation, Inc., Battle Precision Manufacturing, Inc., Keller Williams Realty, and United Administrative Services are located in the buildings to the southeast of the Site.

7.3.3 Southwest

Across Santa Teresa Boulevard, the properties to the southwest of the Site consist of single-family residences.

7.3.4 Northwest

Across San Ignacio Avenue, the properties to the northwest of the Site consist of light industrial and business offices. Businesses include Exact Bid (a software company), EnGeo, Incorporated (an environmental and geotechnical consultant company), AmTech

Micorelectronics, Inc. (a packaging and microelectronics manufacturer), and Modutek Corporation (a semiconductor equipment manufacturer).

8.0 INTERVIEWS

The following interviews were conducted with knowledgeable persons, as available.

8.1 PROPERTY OWNER

The current property owner was not available to interview.

8.2 SITE MANAGER/TENANTS

There is no Site manager or tenant.

8.3 PAST OWNER/TENANTS

Amec Foster Wheeler did not interview past tenants.

8.4 SURROUNDING PROPERTY/OWNERS/TENANTS

Amec Foster Wheeler did not interview surrounding property owners/tenants.

8.5 LOCAL GOVERNMENT OFFICIALS

On January 22, 2015, Amec Foster Wheeler contacted the San Jose Fire Department regarding spills reported at the Site. No spills were reported at the Site.

9.0 OPINION

Based on the findings of our Phase I ESA, we offer the following opinion relative to potential environmental concerns.

9.1 ON-SITE CONDITIONS

The 33.8-acre site is currently a vacant lot with no structures present onsite. Several utility boxes (City owned) and monitoring wells related to the offsite environmental investigation associated with the former Fairchild facility are the only improvements on the Site.

The Site was not identified on lists reviewed by EDR.

Based on historical topographic maps, the Site appears as undeveloped land as early as the early 1900's and appears as orchards in a 1939 aerial photograph, which is the earliest readily available aerial photograph. It cannot be determined if the Site was agricultural prior 1939. With the exception of several farm structures, the Site use was agricultural through the present day. The farm related structures were removed from the Site sometime between 1998 and 2005.

No recognized environmental conditions (RECs) were identified in connection with the Site.

9.2 OFF-SITE CONDITIONS

Surrounding land use is light industrial with residential areas to the southwest of the property. Directly to the northeast, the property is bound by Via Del Oro (Boulevard), four light industrial office buildings, and a vacant lot is present beyond Via Del Oro. Directly north of the Site (across the intersection of Via Del Oro and San Ignacio Avenue) is the San Jose offices for Northrop Grumman. Three office buildings occupied by STS, Semifab, Inc., Seminet Automation, Inc., Battle Precision Manufacturing, Inc., Keller Williams Realty, and United Administrative Services are located to the southeast of the Site across Great Oaks Boulevard. Single-family residences are present across Santa Teresa Boulevard southwest of the Site. Properties to the northwest of the Site consist of light industrial and business offices and include Exact Bid, EnGeo, AmTech Microelectronics, and Modutek Corporation.

The surrounding properties were undeveloped from at least 1939 until approximately 1974 when residential development has taken place south-southwest of the Site. Industrial development of the surrounding area began in approximately 1982.

The former Fairchild Site (also listed as Shell Service Station) at 101 Bernal Road is located approximately 0.22 miles east-southeast and hydraulically downgradient from the subject Site and is suspected of impacting groundwater below the subject Site. However, based on the latest groundwater monitoring data and a Phase II investigation conducted at the subject Site in 2006, this release is no longer considered an environmental concern for the Site. By definition, the former Fairchild facility is considered a controlled REC.

Dastek is located across Via Del Oro Boulevard at 6580 Via Del Oro Boulevard immediately north-northeast and cross- to downgradient of the Site. According to Geotracker records, there are no records of sources (i.e. USTs) or releases for the property and the case was closed (May 3, 1989) the same day it was “discovered”. It is Amec Foster Wheeler’s opinion that the case was associated with the Fairchild case and based on the regulatory status of this property it is not expected to result in a REC that would affect the subject Site.

AT & T Mobility is located across Santa Theresa Boulevard at 6578 Santa Theresa Boulevard and immediately south-southwest and upgradient of the Site. According to Geotracker records, the case responsible party was the Oak Grove School District and the source of the release was a leaking diesel UST that was identified in August 1987. The UST was subsequently removed, the impacted soil excavated and case closure granted on June 13, 1996. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the subject Site.

PG&E is located across Santa Theresa Boulevard at 6402 Santa Theresa Boulevard and immediately west and upgradient of the Site. According to Geotracker records, the source of

the release was leaking USTs that were identified in December 1990 during UST removal at the property. The impacted soil was excavated and the Water Board determined there was not a threat to groundwater from the past release and case closure was granted on January 17, 1992. Based on the regulatory status of this property, it is not expected to result in a REC that would affect the Site.

10.0 CONCLUSIONS

Amec Foster Wheeler has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 of property located at the intersection of Great Oaks Boulevard and Santa Theresa Boulevard in San Jose, California. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed evidence of *recognized environmental conditions* (RECs) in connection with the property as discussed in Section 8.0. Based on the information made available to Amec Foster Wheeler or obtained during the assessment of the subject property, Amec Foster Wheeler offers the following conclusions:

- The former Fairchild Site is suspected of having previously impacted groundwater below the Site. However, based on the latest groundwater monitoring data and a Phase II investigation conducted at the Site in 2006, this release is no longer considered an environmental concern for the Site and no further assessment is warranted.

11.0 RESTRICTIONS

This report was prepared for the exclusive use of EQUINIX, and is intended to provide a Phase I ESA of APNs 706-0-053, 706-0-054, 706-0-055, and 706-0-056 located at the intersection of Great Oaks Boulevard and Santa Theresa Boulevard in San Jose, California at the time of the Site visit. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of the third party. Should additional parties require reliance on this report, written authorization from Amec Foster Wheeler will be required. With respect to third parties, Amec Foster Wheeler has no liability or responsibility for losses of any kind whatsoever, including direct or consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The report is based on data and information collected during the Phase I ESA of the Site conducted by Amec Foster Wheeler. It is based solely on the conditions of the Site encountered at the time of the Site visit on January 20, 2015 supplemented by a review of historical information and data obtained by Amec Foster Wheeler as described in this report and discussion with a representative of the owner/occupant, as reported herein. Except as otherwise specified, Amec Foster Wheeler disclaims any obligation to update this report for events taking place, or with respect to information that becomes available to Amec Foster Wheeler after the time during which Amec Foster Wheeler conducted the Phase I ESA.

In evaluating the Site, Amec Foster Wheeler has relied in good faith on information provided by other individuals noted in this report. Amec Foster Wheeler has assumed that the information provided is factual and accurate. In addition, the findings in this report are based, to a large degree, upon information provided by the current owner/occupant. Amec Foster Wheeler accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted.

Amec Foster Wheeler makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and change. Such interpretations and regulatory changes should be reviewed with legal counsel.

This Report is also subject to the further Qualifications contained herein.

We trust that the information presented in this report meets your current requirements. If you have questions, or concerns, please contact the authors of the report.

12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in § 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX C

User/Owner Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT

ENVIRONMENTAL QUESTIONNAIRE

Amec Foster Wheeler

Introduction:

In order to comply with ASTM E 1527-13 and with the Standard for All Appropriate Inquires issued by the United States Environmental Protection Agency as set forth in the 40 CFR 312, the user, who is defined below, must provide the information that is requested below to the Environmental Professional. If the user fails to provide this information, a court could determine that the All Appropriate Inquiry was not complete.

User is defined as the party seeking to use ASTM E 1527-13 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations as outlined in Section 6 of ASTM E 1527-13. The User will normally be Amec Foster Wheeler's Client.

The User can obtain a copy of ASTM E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* at the ASTM web site <http://www.astm.org/>.

In any case where the questionnaire requests an explanation or the User believes that additional information is appropriate, please provide all relevant information on an attached sheet and identify the question to which the information pertains.

Site Information: Xilinx Land - Legal description attached.

1. Environmental cleanup liens that are filed or recorded against the site (CFR 312.25)

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? ___yes or Xno If yes, please explain.

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? ___yes or Xno If yes, please explain.

3. Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)

As the user of this Phase I, do you have any specialized knowledge or experience related to the property or nearby properties? ___yes or no If yes, please explain.

Are you involved in the same line or business as the current or former occupants of the property or an adjoining so that you would have specialized knowledge of the chemicals and processes used by the type of business? ___yes or no If yes, please explain.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? yes or ___no

If you answered the preceding question other than "yes", please answer the following question. If you concluded that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ___yes or ___no If yes, please explain.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of a release or threatened release? ___yes or no For example, as user:

- Do you know the past uses of the property? ___yes or no If yes, please explain.
- Do you know of specific chemicals that are present or once were present at the property?
___yes or no If yes, please explain.

- Do you know of spills or other chemical releases that have taken place at the property?
 yes or no If yes, please explain.
- Do you know of any environmental cleanups that have taken place at the property?
 yes or no If yes, please explain.

6. The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this Phase I, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? yes or no If yes, please explain.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AMEC Environment & Infrastructure, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

AMEC Environment & Infrastructure, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of AMEC Environment & Infrastructure, Inc. on Jan 15, 2015.

TARGET PROPERTY

Great Oaks Boulevard/Santa Teresa Boulevard
San Jose, CA 95119

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

ADJOINING PROPERTY DETAIL

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

SANTA TERESA BLVD

6578 SANTA TERESA BLVD

Date: **4/12/2013**
Permit Type:
Description: **INSTALL 3 RRU'S ON EXISTING ANTENNA Antenna/Cell Site**

Permit Description:
Work Class: Tenant Improvement
Proposed Use: Commercial/Industrial Antenna/Cell Site
Permit Number: 2013-102921-000-00-CI
Status: Under Inspection
Valuation: \$7,000.00
Contractor Company:
Contractor Name: VINCULUMS SERVICES

Date: **7/8/2011**
Permit Type:
Description: **NEW (3) LTE ANTENNAS MOUNTED BELOW EXISTING ANTENNA PLATFORM ON EXISTING MONOPOLE WITH ASSOCIATED EQUIPMENT. Antenna/Cell Site**

Permit Description:
Work Class: Tenant Improvement
Proposed Use: Commercial/Industrial Antenna/Cell Site
Permit Number: 2011-019332-000-00-CI
Status: Finaled
Valuation: \$15,000.00
Contractor Company:
Contractor Name:

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 10100000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/29/2014 has revealed that there is 1 NPL

EXECUTIVE SUMMARY

site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SHELL SERVICE STATION	101 BERNAL RD	ESE 1/8 - 1/4 (0.216 mi.)	0	8

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SHELL SERVICE STATION	101 BERNAL RD	ESE 1/8 - 1/4 (0.216 mi.)	0	8

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 09/18/2014 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 11/03/2014 has revealed that there are 5 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/10/2014 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

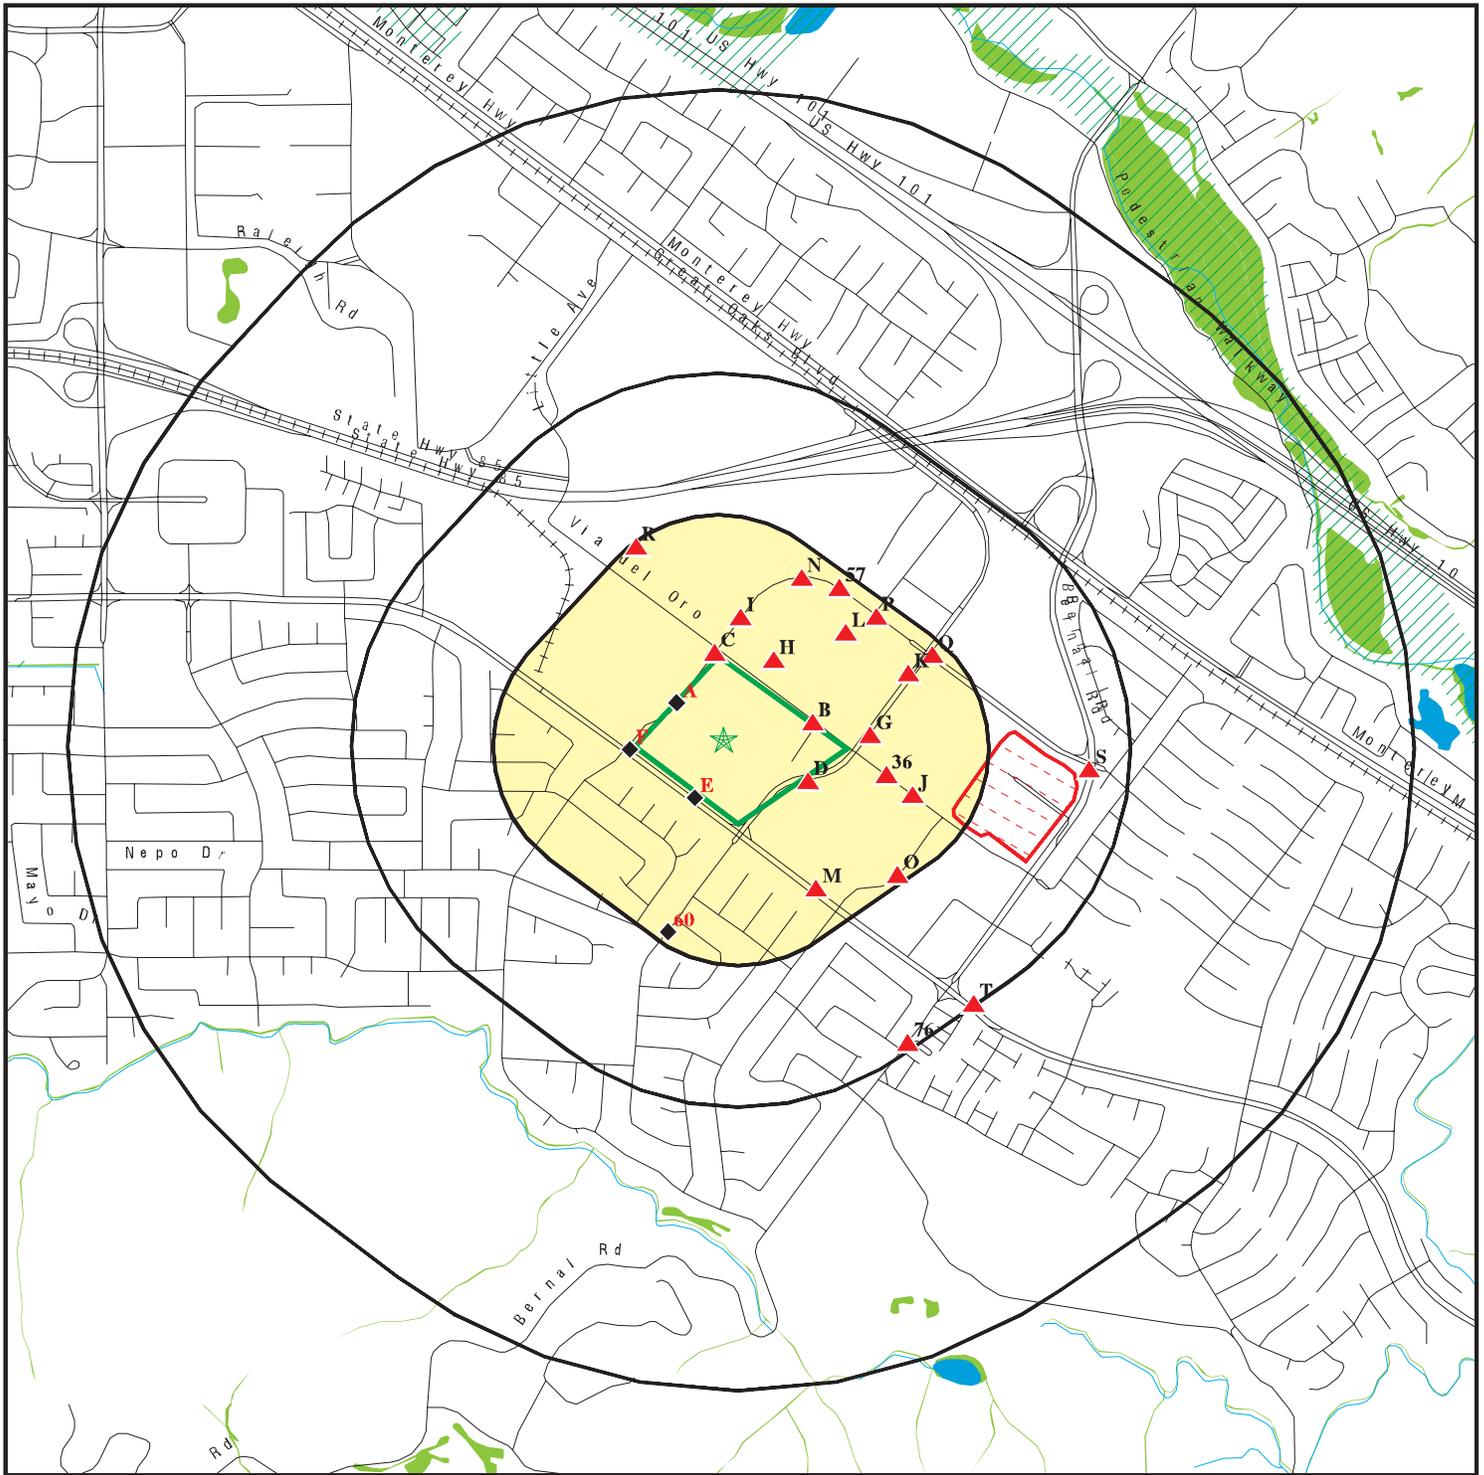

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 2 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 09/01/1996
Site name: SHELL SERVICE STATION
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Corrective Action Summary:

Event date: 01/01/1996
Event: CA049PA

Event date: 01/01/1996
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 01/01/1996
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action at the facility or area referred to CERCLA.

Event date: 01/01/1996
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Violation Status: No violations found

Summary Details:

Conditions at proposal October 15, 1984): Fairchild Semiconductor Corp. manufactures semiconductors on approximately 20 acres in South San Jose, Santa Clara County, California. Land use in the vicinity of the site is agricultural, residential, and commercial. This site was proposed under the name Fairchild Camera Instrument Corp. South San Jose Plant). The company took the new name in 1986. Soils and part of a major aquifer providing drinking water to an estimated 65,000 people are contaminated with trichloroethane and other solvents, according to analyses conducted by the Great Oaks Water Co. and Fairchild. One municipal well within 3 miles of the site has been taken out of service. In response to a request from the California Regional Water Quality Control Board, Fairchild is voluntarily taking action to contain and reduce the plume of contamination. Fairchild has started an investigation to determine the extent of the problem at the site and is currently undertaking interim cleanup measures consisting of excavation of contaminated soils, the pumping and treatment of contaminated ground water, and construction of a slurry wall to reduce the spread of contamination from the site. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status January 1986): Fairchild has removed contaminated soil from the facility, has installed a system to pump and treat contaminated ground water, and is constructing the slurry wall. Status June 24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. In 1982, the facility converted to a hazardous waste generator. Hence, it satisfies a component of EPA's NPL/RCRA policy. The slurry wall has been completed. In a pilot test, vapor extraction proved to effectively clean up contaminated soil within the wall. A full-scale system is scheduled to be implemented shortly. Contaminated ground water continues to be pumped and treated. Status October 4, 1989): EPA has placed this site on the NPL. A Record of Decision was signed in March 1989, finalizing the remedy and concurring with State orders for final cleanup. The company is in compliance with these orders. The remedy includes pumping and treatment of ground water and vapor extraction to remove contaminants from soils. In addition, the feasibility of reinjecting treated ground water is being studied.

Site Description: Fairchild has owned property at 101 Bernal Road in San Jose since 1975.

SHELL SERVICE STATION (Continued)

1000354472

Fairchild operated a semiconductor manufacturing facility at the site from April 1977 until it closed in October 1983. The facility has been inactive since 1983. In November and December 1981, Fairchild discovered that an underground organic solvent waste tank had failed, releasing a mixture of solvents to the subsurface. A public drinking water supply well, Great Oaks Water Company well number GO-13, located approximately 1800 feet down-gradient from the site, was contaminated by the release, causing a risk to public health. 1,1,1-trichloroethane (TCA) concentrations of 5,700 parts per billion (ppb) entered the well while it was being used as a drinking water supply well; the drinking water standard for TCA is 200 ppb. GO-3 was removed from service on December 7, 1981, as soon as the contamination was detected, and has since been destroyed and sealed. In 1987, all issued and outstanding shares of Fairchild stock were sold by Schlumberger Technology Corporation to National Semiconductor Corporation. Following the sale, Schlumberger retained all environmental liabilities associated with its past activities at the site. Schlumberger is currently managing the cleanup on behalf of Fairchild. Schlumberger has entered into a contract to sell the 22 acre site to the Koll Company. Koll plans to develop the property as a neighborhood shopping center. Fairchild has drilled more than 239 soil borings and installed over 124 groundwater monitoring and extraction wells in order to define and contain soil and groundwater pollution from their San Jose facility. Three aquifers, designated the A, B, and C aquifers, have been contaminated with organic solvents. The A aquifer is first encountered at depths of 10 to 20 feet below the ground surface and extends to depths of up to 60 feet. The A aquifer is not continuous off-site and is currently generally dewatered. The B aquifer is generally located between depths of 60 and 120 foot below ground surface. The C aquifer is generally found between 150 and 190 feet below ground surface. Only trace levels of chemicals have ever been detected below the B aquifer on-site or below the C aquifer off-site. Off-site, chemicals have been detected in groundwater to a depth of 190 feet below ground surface. Interim actions taken by Fairchild since the discovery of the release in 1981 include:

1. SOURCE REMOVAL AND SOIL CLEANUP - Actions taken to prevent further solvent migration from the source area include removal of the defective tank and excavation of 3,389 cubic yards of on-site soil containing an estimated 38,000 pounds of chemicals. Past and current concentrations detected in on-site soils are listed in Table 3. Off-site soils were not directly affected by the Fairchild release, although chemical residual may remain in soils that have been or are affected by the groundwater plume.
2. SOIL-BENTONITE SLURRY WALL - In 1986 Fairchild installed a 3-foot thick slurry wall around the perimeter of their property. The slurry wall is keyed into the BC aquifer. By installing the slurry wall and establishing an inward gradient by pumping small amounts of groundwater within the confines of the slurry wall, Fairchild has minimized further migration of on-site chemicals into off-site groundwater.
3. PILOT STUDIES - Fairchild has conducted on-site pilot studies to determine the effectiveness of on-site aquifer flushing and in-situ soil aeration in cleaning up on-site groundwater and soils. On-site flushing was determined to be ineffective in removing chemicals from the A aquifer. In-situ soil aeration is a technique for removing volatile chemicals by applying a vacuum on the polluted soils. This technique was determined to be effective in removing volatile chemicals from on-site soils.
4. MIGRATION CONTROL AND GROUNDWATER CLEANUP - Through the use of groundwater extraction wells, the plume has been under hydraulic control since 1982. Fairchild's groundwater extraction program has reduced the length of the plume from 4,900 feet in October 1982 to approximately 2400 feet in September 1988. The maximum concentration of TCA detected off-site has been, reduced to 430 ppb. As cleanup has progressed, Fairchild has been able to reduce their pumping rate from a maximum of 921 gallons per minute (gpm) (14,870 AF/yr) in February 1984 to 1042 gpm (1680

AF/yr) as of September 1988. Fairchild's groundwater extraction program has removed approximately 90,000 pounds of chemicals (75,000 pounds from on-site groundwater and 15,000 pounds from off-site groundwater). 5. GROUNDWATER TREATMENT - Since 1982 Fairchild has been discharging the extracted groundwater through storm drains to Canoas Creek under an NPDES permit. Considering that discharge concentrations from most parts of the plume are well below water quality standards, the original NPDES permit allowed the bulk of the extracted groundwater to be discharged to Canoas Creek without treatment. Groundwater extracted on-site and from off-site well RW-25 is treated using air stripping prior to discharge. 6. GROUNDWATER CONSERVATION - Groundwater polluted by the Fairchild release is part of the Santa Teresa groundwater basin. Low rainfall, reduced efficiency in artificial recharge ponds, and pumping for water supply and aquifer remediation have caused declines in the groundwater levels in the Santa Teresa Basin. Considering these water level declines, the very low levels of chemicals in the C aquifer (< 5 ppb), and that pumping from the C aquifer for discharge to Canoas Creek may be a waste or unreasonable use of water, the Regional Board issued Order 88-46 in March 1988. This Order allowed Fairchild to implement a phased water conservation program in the C aquifer. As a result of this water conservation program, Fairchild eliminated all groundwater extraction from the C aquifer on September 6, 1988. A Record of Decision addressing Operable Unit 1 was completed in March 1989.

Lead Agency Case Number: 2020382
Latitude: 37.230573
Longitude: -121.772387
Case Type: Cleanup Program Site
Case Worker: MS
Local Agency: Not reported
RB Case Number: 43S0036
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Other Solvent or Non-Petroleum Hydrocarbon
Site History: Background: The Site is located at 101 Bernal Road near the intersection of Bernal Road and San Ignacio Avenue in south San Jose (see Site location map). Land use in this area is a mixture of commercial and residential. In 1977, Fairchild Semiconductor Corporation (Fairchild) constructed a facility for manufacturing electronic devices at the Site. Fairchild's operations at this facility included the use, handling, repackaging, and storage of industrial solvents or volatile organic compounds (VOCs), including 1,1,1-trichloroethane (TCA), and 1,1-dichloroethylene (1,1-DCE). 1981, an underground waste solvent storage tank was found to have failed, causing a release of its contents. All manufacturing operations at the Site stopped in 1983. The current Site owner developed the Site into a retail shopping center in 1998. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency overseeing soil and groundwater cleanup activities at this Site. Site Investigation: An investigation in 1981 detected VOCs in subsurface soil and groundwater at the Site, with TCA being detected most frequently and at the highest concentrations. In the initial investigation in 1981-82, VOCs were detected in the A and B and C aquifers (underground water-bearing zones designated by increasing depth below ground surface). The current maximum concentrations of 1,1-DCE and TCA in the on-Site B aquifer (within the slurry wall containment area) are 3,000 micrograms per liter (a%g/L) and 260 a%g/L, respectively. The current maximum concentrations of 1,1-DCE and TCA in the off-Site B aquifer are 12 a%g/L and 16 a%g/L, respectively. The drinking water standards for 1,1-DCE and TCA are 200 a%g/L and 6.0 a%g/L, respectively. The contaminated groundwater plume extends approximately 500 feet off-Site within the B aquifer. The TCA plume in the B aquifer once extended approximately 4,500 feet west/northwest of the Site. The shallow groundwater beneath the Site is not used for drinking or other purposes. Great Oaks Water Company supplies drinking water to the Site and its vicinity. In 1995, Fairchild completed a health risk assessment evaluating potential VOC vapor intrusion into structures built on-Site. The assessment concluded that no significant health risk exists for building occupants. Cleanup Activities: Fairchild completed a series of extensive remedial programs at this Site. The underground storage tank and associated piping were taken out of service and 3,400 cubic yards of impacted soil were removed in 1982. Additional cleanup activities conducted between 1982 and 1998 included groundwater extraction and treatment, soil flushing, sealing of potential conduit wells, installation of a clay slurry wall, and soil vapor extraction (SVE) and treatment. Groundwater pumping from the C aquifer was terminated in 1989 due to non-detection of VOCs. The SVE was terminated in 1990 due to low VOC vapor recovery rates. All off-Site groundwater pumping was terminated in 1991 due to VOC detections at or below drinking water standards. Subsequently, on-Site groundwater pumping and treatment system operations were terminated in 1998 due to the effectiveness of the slurry wall containment. Due to implementation of these cleanup measures, VOC concentrations in soil and groundwater have decreased significantly over the years. Next Steps: Groundwater monitoring and reporting will continue into the foreseeable future.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008

Waste name: LEAD

Waste code: D035

Waste name: METHYL ETHYL KETONE

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL

USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Background Info: Fairchild operated an electronics manufacturing plant from 1977 to 1983 at the 22-acre site. Chemicals used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and underground storage tanks. In 1981, leaks discovered in pipelines and underground tanks resulted in releases of 1,1,1 trichloroethane (TCA), xylene, isopropanol, acetone and freon to soil and groundwater. Not reported
The site was listed on the National Priority List (NPL) by the United States Environmental Protection Agency (U.S. EPA). The Regional Water Quality Control Board (RWQCB) was named the lead agency.
Not reported
Approximately 3,400 cubic yards of contaminated soil was excavated and disposed offsite in June 1982. A soil vapor extraction system (SVE) operated from 1989 until 1995. Groundwater treatment began on the four affected aquifers. Off-site groundwater extraction was suspended in December 1991 due to an asymptotic trend. On-site extraction of groundwater was suspended in July 1998. No groundwater pumping, treatment, or reinjection is currently being performed at the site.
Not reported
A deed restrictions was recorded limiting use of groundwater, prohibiting installation of new wells and no excavation below 5 feet without an approved remediation program.
Not reported
American Store Properties, Inc. bought a 6-acre parcel within the site that did not contain contamination and entered into a covenant not to sue with RWQCB on February 19, 1997. Approval for the shopping center plan was given by U.S. EPA. After demolition of the Fairchild structures, a shopping center was

CA BOND EXP. PLAN:

Reponsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: Fairchild, the responsible party, has been conducting remedial activities under the direction of the RWQCB. DHS has budgeted \$50,000 for development, review, and approval of a remedial action plan and for oversight/monitoring of cleanup efforts. The responsible party will pay all costs associated with remedial investigations and cleanup activities.
Site Description: Fairchild operated an electronics manufacturing plant at this 20-acre site from 1977 to 1983. Chemical used in the manufacturing process and wastes generated from this process were handled and stored onsite in drums and underground storage tanks. The site is located adjacent to agricultural, residential and commercial development.
Hazardous Waste Desc: In 1981, Fairchild discovered that leaks in pipelines and underground tanks had resulted in the release of trichloroethane (TCA), xylene, isopropanol, acetone and Freon to soil and ground water.
Threat To Public Health & Env: The contaminants which have migrated from the site into the ground water represent a threat to the public health and environment. Five municipal and 22 private wells exist within a one-mile radius of the site. One public water well (Great Oaks WaterCompany No. 13) was contaminated and has been removed from service. Three irrigation wells have also been contaminated and taken out of service.
Site Activity Status: In 1981, soil and ground water contamination was discovered at the site. A leaking tank and contaminated soil were excavated and removed. A slurry wall and a ground water extraction system were also installed. Currently, the revised draft RAP is being prepared by the RP for approval by the involved governmental agencies.

Description: RP states that a single wall underground tank was discovered to be leaking due to unknown reasons resulting in the release of approx 7200 gallons of gasoline into the surrounding soil. The gasoline has been removed from the tank and the release is contained. No cleanup has been performed. So far, no reports of waterways impacted. On scene consultants have confirmed that no gasoline has entered nearby sewers and storm drains.

Count: 0 records.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 40	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2014	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/03/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/04/2014	Telephone: 916-323-3400

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/25/2014	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 09/09/2014	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/12/2014	Telephone: 202-564-8600

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	203 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	37121-B7 SANTA TERESA HILLS, CA
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

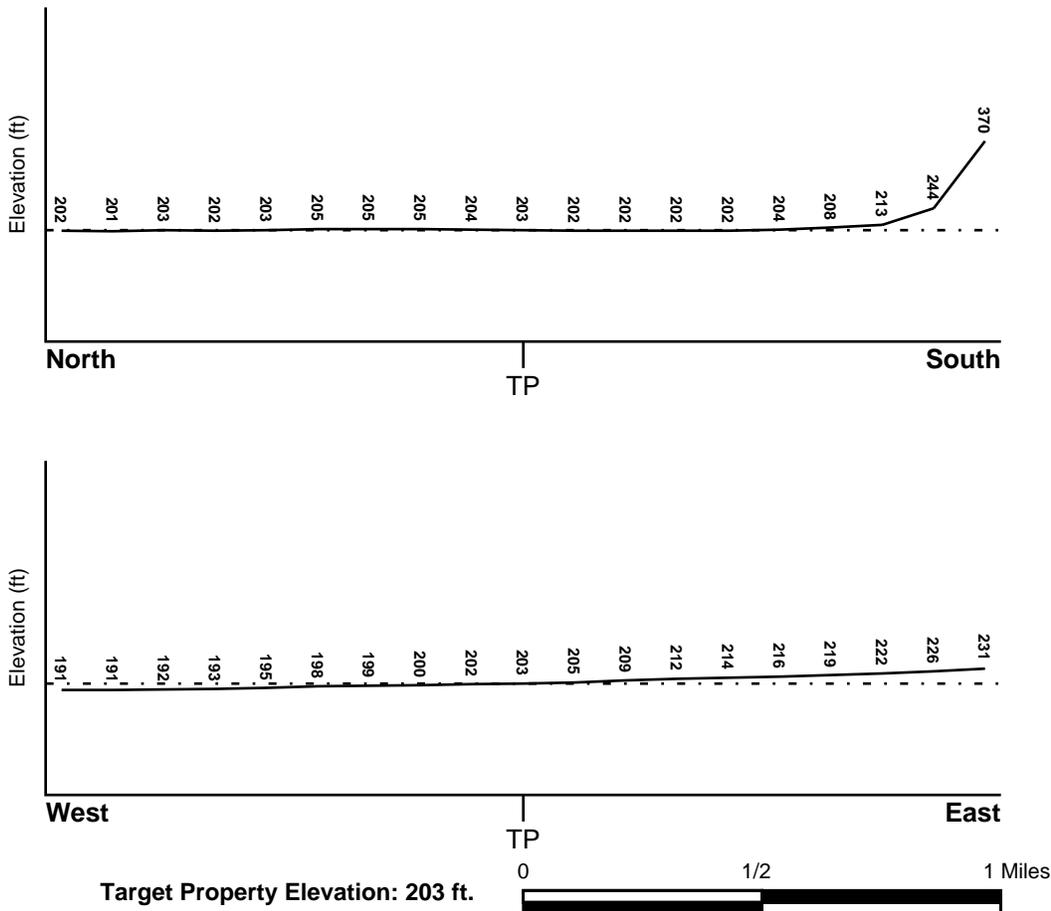

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SANTA CLARA, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06085C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SANTA TERESA HILLS	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Cretaceous
Series: Upper Mesozoic
Code: uMze(*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Eugeosynclinal Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
