Introduction

City Service Areas

What is a City Service Area?

City Service Areas (CSAs) integrate services provided in individual departments into the City’s five key lines of business – Community and Economic Development, Environmental and Utility Services, Neighborhood Services, Public Safety, and Transportation and Aviation Services. An additional CSA, referred to as “Strategic Support,” represents the internal functions that enable the other five CSAs to provide services to the community. These cross-departmental CSAs provide a forum for strategic planning and investment decisions within the context of the Mayor and City Council policy priorities. Plans, policies, and investment decisions at the CSA level are then carried out through departmental core and operational services.

Each CSA is guided by a Mission Statement, which is informed by the City’s Mission Statement. The City’s Mission Statement can be found on the City Service Area – Core Service Map at the end of this section.

The following pages present an overview of the CSA framework and how it is used in San José’s operating and capital budgets and in performance reporting to the City Council and the public.
The City of San José’s Service Delivery Framework for Performance-Driven Government aligns front-line services (or programs) to the Mayor and City Council Policy Priorities. This structure acknowledges the complexity of the organization and the wide variety of services delivered and provides tools at all levels of the organization to plan, manage, and measure the results that customers experience.

The 2002-2003 Operating Budget was San José’s first performance-based budget developed by City Service Area (CSA). CSAs enable the City to strategically plan and show results of the collaboration among departments. Each CSA aligns the efforts of a number of core services (each with its own set of performance measures) into the City’s key lines of business. In 2017-2018, programs were identified and aligned to the Core Services.

Both the operating and capital budget documents are aligned to the CSA framework. A CSA-based capital project reporting system has been implemented along with consistent performance measures to ensure that the City meets its on-time and on-budget goals for project delivery.
CSA Alignment for the Budget Document

The operating budget document reflects San José’s service delivery-based framework for performance-driven government. In that framework, each of the 69 departmental core services is aligned to one of six CSAs to which it contributes. A “map” detailing the alignment of the 69 core services to the six CSAs, including a description of the CSA mission and a listing of the CSA outcomes (the “ends” to which the plans, efforts, resources, and results of the CSA are directed) is provided at the end of this Introduction.

Each of the CSA overview sections that follow includes a description of the CSA’s mission, partner departments, and a CSA outcome listing. The Service Delivery Framework displays the CSA’s mission, outcomes, and the Core Services for each of the partner departments. A Budget Summary displays expected 2017-2018 service delivery and budget actions, followed by the CSA’s total budget by core service and authorized positions. This is followed by a CSA Overview that provides context through a discussion of service delivery accomplishments, the service delivery environment, and the CSA priorities/key services. The final section of the CSA Overview, Budget Dollars at Work: Performance Goals, displays performance data and targets for each of the CSA outcomes and strategic goals. Finally, a CSA budget changes summary provides a snapshot of the actions in this budget.

Resource Allocation by CSA

In the following CSA Budget Summary and in the individual CSA sections which follow, the operating budget resources are presented by CSA and include operating expenditures for all funds with the exception of transfers, reserves, and Ending Fund Balance. A CSA Position Summary is also included and is presented elsewhere in this document at the core service level.
