Proposal Description, including the reason for the need and anticipated outcomes (Please describe how the proposal will affect services for San José residents, community groups, businesses, etc.):

Sudden Cardiac Arrest, a life-threatening emergency that occurs when the heart suddenly stops beating, is the #1 killer of student-athletes in the U.S., the #1 cause of death on school campuses, and the #2 cause of medical death among youth under age 25. With no warning signs and only a 5-10% survival rate, this disease is dangerous and difficult to prevent. However, there is a way to drastically increase the chances of survival: an Automated External Defibrillator (AED). By delivering an electric shock, an AED can return the victim's heart rate to normal. The Kyle J. Taylor Foundation has seen the effectiveness of this device and the non-profit foundation raises money and donates AEDs to schools and recreational facilities not only to provide a life-saving AED to this popular facility, but also to raise awareness about SCA, and continue saving lives.
